ISLAGUARD™ SURGE SUPPRESSORS

AC power line surge suppressors provide normal mode protection and have undervoltage, phase, and power loss monitoring. 40k amp per phase surge capacity. Units supplied in enclosures that meet NEMA enclosure types 4, 4X, and 12. Weight: 6 lbs. 6 oz. Red and green LED alarm indication. Operating frequency: 50/60Hz. EMI/RFI attenuation: 50 dB (typical). Response time: ≤0.5 nanoseconds. Fault current rating: 300,000 AIC. Connection type: terminals (AWG #10 max.), flexible conduit. Altitude: 14,000′ (4,000m). Operating temperature range: –40°C to +50°C. Operating humidity range: 0-95% noncondensing. Life cycle testing: >3,000 10kA surges per ANSI/IEEE C62.41-1991. Dimensions: 7H x 4.25W x 4″D. Housing: gray Noryl HS-1000, rated 945V NEMA 4, 4X, and 12. Mounting: flange. Safety: meets UL1449 and UL1283. CSA certified, CE compliant.

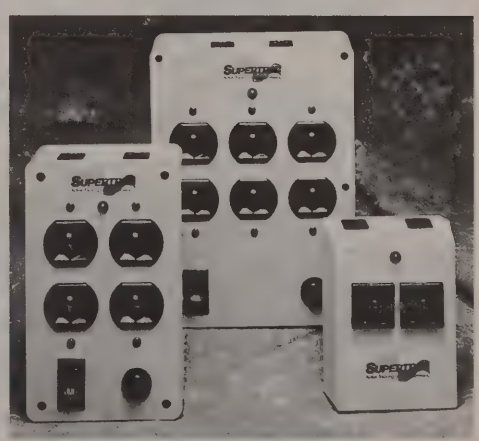
SUPERTRAC® ACTIVE TRACKING SURGE SUPPRESSORS



Features telecom/modem protection. Active tracking filter technology guards against all levels of potentially damaging transients. Line voltage: 120VAC. Operating voltage range: 0-130VAC. Operating frequency range: 40-70Hz. Phase configuration: single. Protection modes: Normal, L-N; common, L-N, N-G. Circuit type: hybrid, multi-staged active tracking. Operating temperature: –20°C to +45°C at 100% derate 50% at 60°C. Leakage currect to Ground: <0.3mA. Rated UL1449 and UL497A.

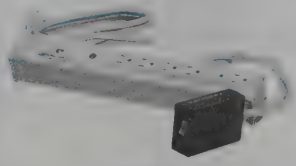
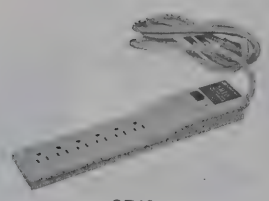
PERMA POWER COMPUTER-GRADE SURGE SUPPRESSORS

M4BZ



M6BZR



SR10

SRD10

Computer-grade surge suppressors are rated at 15A, 120VAC continuous duty. 6 high-energy metal oxide varistors divert surge energy. Circuit-breaker overload protection. L-N, L-G and N-G. Clamping response time: <5ns. Beige aluminum housing with impact-resistant end caps. 14/3 SJT beige power supply cord. Combination master power switch/pilot light, failure indicator light (when lit, equipment is being protected from surges). Mounting snap-on adjustable clips. **Types SR10** and **SRD10** are plastic, and include audible alarm. **Type SRD10** also includes phone line protection. *See warranty information on this page and specifications for each grade of operation on this page.* UL listed, CSA certified. 5-year product and $10,000 equipment warranty.

PERMA POWER ELECTRONIC-GRADE SURGE SUPPRESSORS

Perma Power electronic-grade surge suppressors offer economical, single-stage protection and noise filtering. These streamlined plastic units are rated at 15A, 120VAC, with protection on all three modes. Include circuit breaker and surge indicator light. **Type PR609** is a cordless, 6-outlet, wall plug unit. Applications include small computers and general office and home use. *See warranty information on this page and specifications for each grade of operation on this page.* UL listed, CSA certified. 2-year product warranty.

19" RACK-MOUNTED REAR OUTLET SURGE SUPPRESSORS

Designed to fit all standard 19" cabinets, carts, and racks. 120V, 15A, 60Hz with 15-amp resettable circuit breaker. 6 outlets on back of unit. Available with or without switch. Dimensions: 19W x 1.75H x 2.75"D (1.25" mounting centers). 1.5" receptacle center-to-center. **Type JT06** offers 400V surge clamping voltage, 13,000A maximum surge current, and 5-year product warranty. Fail-safe auto shutdown will protect your system if surge suppression circuit fails, except models with (*) after type number. **Type R5SX** offers 330V, 33,000A, and lifetime product warranty. Matte black steel housing; black 14/3 SJT cord. UL recognized, CSA certified.

PERMA POWER® POWER LINE SURGE SUPPRESSORS

RS-610

- **Low Let-Through Voltage**
- **Automatic Failure Shutdown**
- **Pilot Lamp**
- **Black Matte Finish**

Provide protection for sensitive equipment against both normal (line to line) mode surges and common (line to ground) mode surges. Computer grade models include single stage filtering supplied by three metal oxide varistors. Protect all three conductors in typical 120VAC circuit. Positive shutdown mechanism prevents inadvertent operation of unprotected equipment in the event of suppression element failure. Pilot lamp provides visual indication of shutdown. High-performance surge suppressors feature four element two-stage filtering, using metal oxide varistors and silicon avalanche diodes. High-performance surge suppressor has an almost unlimited operating life. Strip models offer a choice of 6 or 12 foot double insulated #14/3 SJT line cord, master switch and indicator light.

POWER PROTECTION PRODUCTS

NEW UL CSA NEMA

PERMA POWER® VOLTAGE REGULATORS

- **Maintains Safe Output Voltage to Protect Sensitive Electronic Equipment**
- **All-Metal Housing for Maximum Shielding from Magnetic Interference**
- **Circuit Breaker Protects Against Excessive Overloads**
- **MOV 400V Surge Protection**
- **Includes 6′ Cord with NEMA L5-15 Plug-Type SJT Receptacles**

Sensitive electronic equipment needs clean, voltage-controlled electric power to provide proper performance. They response to voltage changes in the power line to supply regulated 120VAC power that is free from transient surges and electromagnetic or radio interference. Power voltage regulators protect against voltage fluctuations and surge damages to safeguard data and protect your expensive equipment. Power switch controls output receptaclesand regulator circuit; can be used as a master control switch for all connected equipment.

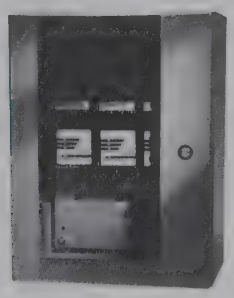
NEW CSA UL



PANELZONE® 100 SERIES SURGE PROTECTORS

- **Up to 100,000 Amp Maximum Surge Current**
- **Heavy-duty Components Promotes Long Life and Maximum Performance**
- **Press-to-Test Feature**
- **Remote Monitoring Capabilities**
- **Unconditional 10-Year Limited Warranty**
- **UL Listed, CSA Certified**

Hard-wired surge protection devices provide excellent transient control at the main service entrance or at branch panel locations. Provide unmatched protection against catastrophic surges based on the withstand and survival current of the entire unit, not the sum of the components. Integrated diagnostics: each module provides visual indication of its operating status. Rugged steel enclosure. Clear unit cover allows for monitoring protection status without opening unit. Dimensions: 16H x 12W x 8D″.

Surface Mount

Miniature PC board relays are compact with high-capacity contact: 2A at 30VDC. Units are 2-pole polarized and rated 30VDC, 1 res. Surge voltage between contact and coil: (10 x 150 ms): 1,500V, FCC part 68 and Bellcone 2110μs, 2500V. Dimensions: 0.39″H x 0.57″L x 0.28″W max.; pin length = 0.122″ max. Breakdown voltage between contacts and coil: 1,800Vrms for 1 min. Initial dielectric between open contacts: 1,000Vrms for 1 min. Contact type: bifurcated 2 Form C DPDT. Nominal coil power for relays listed: 140mW. Immersion-cleanable, plastic sealed case. UL recognized, CSA certified.

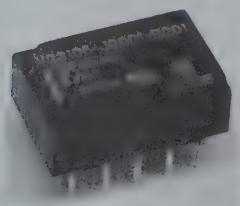
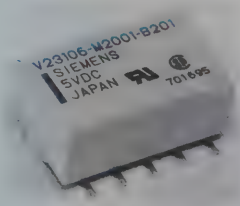
NEW



Board Mount



Surface Mount

Miniature PC board relays are compact with high-capacity contact: 1A @ 30VDC, 0.5A @ 125VAC. Units are 2-pole polarized and rated 30VDC, 1 res. Dimensions: 0.187H x 0.55L x 0.28″W max. Pin length: 0.138″ max. Breakdown voltage between contacts and coil: 1,000VAC for 1 min., 1,500VAC for FCC part 68 surge test. Initial dielectric between open contacts: 1,000VAC for 1 min. Contact type: bifurcated 2 Form C DPDT. Normal power for relays listed: 140mW for all voltages except 24V which is 200mW. Immersion-cleanable, plastic sealed case. UL listed under file E85596, CSA certified under file LR65354.

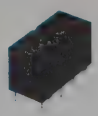
V23105 SERIES HIGH-SENSITIVITY DIP PC BOARD RELAYS



Standard DIP configuration mates with 16-pin socket. Meets FCC Part 68. Designed for application in telecommunications equipment, computer, peripheral, security and office automation. Ultrasensitive coil. Dimensions: 0.472″H x 0.787″L x 0.386″W max.; pin length = 0.138″. Immersion-cleanable, plastic-sealed case. Ultrasonic cleaning should be avoided. UL recognized, and CSA certified.

V23042 SERIES 2-POLE PC BOARD RELAY

Relays are high dielectric and polarized, with 5A switching capacity. Contact arrangement: bifurcated crossbar in 2 Form C, DPDT. **Prefix V23402A** in type number indicates nonlatching coil; **prefix V23402B** indicates dual coil latching function. Applications include audio communications circuits, logic and process control, vending machines and office automation. The **V23042 series** is a replacement for the **T83 series** of relays. All coil data at 20°C. Dimensions: 0.422″H x 0.795″L x 0.4″W max.; pin length = 0.11″ - 0.138″. Immersion-cleanable, plastic-sealed case. UL recognized, CSA certified.

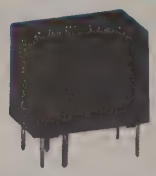
LOW-SIGNAL PC BOARD RELAYS

V23111 SERIES MINIATURE PC BOARD RELAYS

NEW



Miniature PC board relays are compact with high-capacity contact: 1A @ 24VDC, 1A @ 120VAC. Units are 2-pole polarized and rated 30VDC, 1 res. Dimensions: 10.0H x 12.5L x 7.5"W max.; pin length = 3.5" max. Surge voltage between contacts and coil; 1,500V, FCC Part 68 (10/160Ms). Initial dielectric between open contacts: 400VAC, 50/60 Hz for 1 min. Contact type: 1 Form A SPST and 1 Form C SPDT. Nominal power: 150mW. Immersion-cleanable, plastic sealed case. All types are nonlatching. UL recognized, CSA certified.

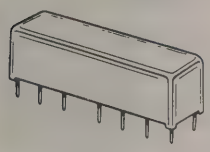
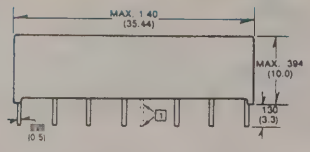
T84 SERIES HIGH DIELECTRIC TELECOMMUNICATIONS MINIATURE DIP RELAYS





T84 series relays are 4 Form C 4PDT units and have dielectric strength between open contacts of 1000Vrms. Standard DIP termination allows direct PC board mounting or plugging into 28-pin IC socket. Available: single coil non-latching, single coil latching and dual coil latching. All have polarized coils. Enclosed in permanently sealed plastic case backfilled with inert gas. Withstand automatic wave soldering and immersion cleaning. Contact ratings maximum switching voltage: 120VAC or DC. Maximum switching power DC: 24 watts resistive load AC: 60VA resistive. Maximum switching current: 1 amp DC or AC. Minimum switching current: dry circuit. Maximum carrying current: 2 amps DC or AC. Meets FCC Part 68 isolation. Type suffix indicated nominal coil voltage: –05 (suffix) = 5VDC. UL recognized, CSA certified.

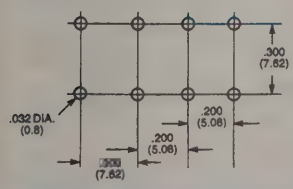
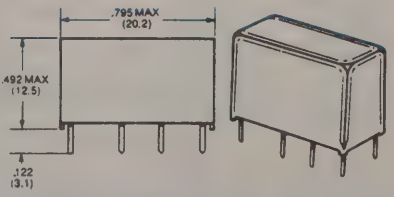
T85 SERIES HIGH SENSITIVITY ULTRA-MINIATURE DIP RELAYS





T85 series DIP relays feature ultra-sensitive coils. Switch up to 2 amps. 2 Form C DPDT with terminals on a 0.1 x 0.3" (2.54 x 7.62) grid layout. This configuration permits terminal mating with a 16-pin DIP socket. Relays are enclosed in PBT polyester dust cover designed for immersion cleaning applications using freon, alcohol or water. Bifurcated contacts are rated 1 amp at 24VDC and 0.5 amp at 120VAC. Contact ratings maximum switched current: 1.25A, AC or DC. Maximum switched voltage: 60VDC, 120VAC. Maximum switched power: 24W or 60VA. **Suffix -00** in type number indicates nominal coil voltage. UL recognized, CSA certified.

V23026 SERIES MINIATURE SEALED PC BOARD RELAYS

SMD

Surface Mount

Thru-Hole

Relays are designed for compact, high-density mounting. 108.5mm² surface area. Units switch loads from dry circuit to 1A. Contact type: bifurcated, 1 Form C SPDT. Thru-hole latching or nonlatching and surface mount nonlatching versions featured. Dimensions for thru-hole: 0.138"H x 0.272"L x 0.512"W max.; pin length = 0.138" max. Dimensions for surface mount: 0.315"H x 0.31"L x 0.531"W max.; pin length = 0.41" max. Suitable for data and communication systems. Expected mechanical life: 1 billion operations. UL recognized, CSA certified.

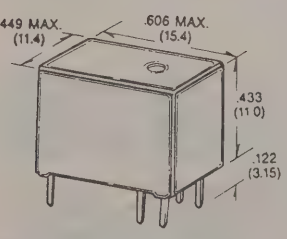
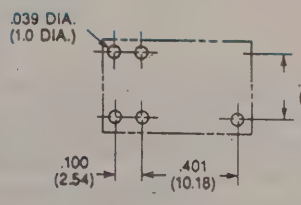
T81 SERIES MINIATURE HIGH DENSITY PC BOARD RELAYS





T81series relays are ultra-miniature devices that permit high density packaging for savings in equipment size and cost. High dielectric. Ideal for office machines, logic and process control. SPDT contacts are silver-palladium alloy with gold overlay and provide load handling of 1 amp @ 24VDC or 0.5 amps at 120VAC, resistive. **T81 series** are standard coil models and **T81 series** are sensitive coil models. **T81** relays are enclosed in an immersion cleanable polycarbonate case. Printed circuit terminals are on 0.1 x 0.3" (2.54 x 7.62) DIP compatible grid layout. Temperature range: –40° to +55°C (standard coil); –40° to+75°C (sensitive coil). High dielectric relays —1000Vrms contact-to-coil. Type suffix indicates nominal coil voltage: –05 (suffix) = 5VDC. Standard dielectric relays —500Vrms contact-to-coil. UL recognized, CSA certified.

LOW-SIGNAL AND POWER PC BOARD RELAYS

JWD SERIES DIP AND JWS SERIES SIP DRY REED RELAYS

JWD

JWS

JWD series DIP units and **JWS series** SIP units are designed to accommodate automatic component insertion and permit high density packaging of components on printed circuit boards. Mounted height is only 0.315″ (8.00), allowing PC board spacing on 0.500″(12.70) centers. Molded epoxy package with terminals on 0.100″ (2.54) centers compatible with automatic wave soldering. Can be immersion or spray cleaned. Operating temperature range: –35°C to +85°C. UL recognized, CSA certified.

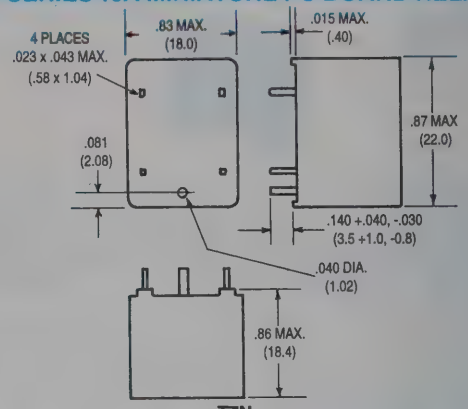
T7N SERIES 10A MINIATURE PC BOARD RELAYS



T7N

Offer an economical, small package relay. Applications include appliance, HVAC, security systems, and emergency lighting. Initial dielectric strength: 2,000V rms 50/60Hz. (1 min.) between coil and contacts. Immersion cleanable, sealed package. Silver cadmium oxide contacts. The fifth digit of the type number indicates contact arrangement: 1 = 1 Form A (SPST-NO); 5 = 1 Form C (SPDT). UL class F (140°C) coil standard. Plastic materials employ UL94V-O flammability. CSA certified.

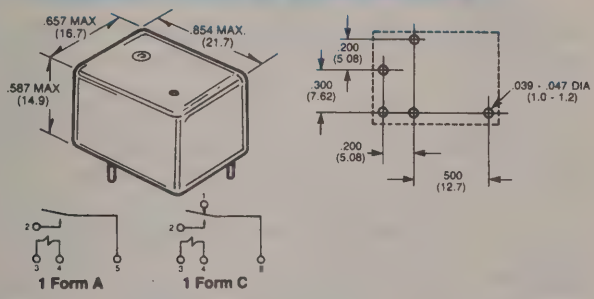
T73 SERIES 10 AMP PC BOARD RELAYS



T73 series miniature PC board relays are standard coil, non-latching (monostable) with printed circuit terminals. Contact material is silver-cadmium oxide. Relays have 10 amp switching capacity and are available in 1 Form A (SPST-NO) and 1 Form C (SPDT) contact arrangements. Resist high temperature and various chemical solutions. Immersion cleanable, plastic sealed case available. UL Class F insulation system standard. Nominal coil voltage is indicated by suffix of type number; 3-48VDC available. UL recognized, CSA certified.

Stock No.	Type	Coil Resistance (Ω)	1-24

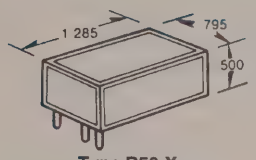
R50 SERIES PC BOARD RELAYS



Type R50-X

Type R50-Y:A=.595″ SPDT;A =.890″ DPDT

General purpose immersion-cleanable relays are 0.460″ (11.68) high for use on PC boards spaced as close as 0.7″ (17.78) center-to-center. PC terminals spaced on a 0.1″ (2.54) grid. Nominal pick-up power: **R50-Y1**, 330 mW DC; **R50-Y2**, 410mW DC; and **R50-X1**, 450 to 562mW DC. Coil voltage (VDC) is indicated by last digits of type number. Operating temperature range: –55°C to +50°C. Polyester cover bonded to relay base allows immersion cleaning. UL recognized, CSA certified.

RT SERIES MINIATURE PCB RELAYS

PCB, 8A-16A relays are miniature and low profile. Expected mechanical life: 30 million operations. Nominal voltage indicated in last 2 digits of type number. Sensitive coil: 400mW. Dimensions: 0.62″H x 1.14″L x 0.50″W; pin length = 0.17″. All units listed have contact material of silver-nickel 90/10. **Types RT1, RT3** and **RT4** are vented flux-tight. **Types RTB, RTD** and **RTE** are sealed. UL recognized, CSA certified. Other contact types available; *contact your local Newark sales office.*

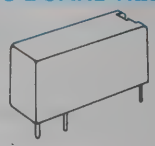
RYII SERIES MINIATURE PC BOARD RELAYS



RYII series are sealed 1-pole relays with single contact rated 8A at 250VAC (440VAC max. breaking voltage). Mechanical life: >30 x 10^6 operations. Dielectric strength: coil-contact = 5,000VAC; contact-contact = 1,000VAC. Dimensions: 28.5 x 10.1 x 12.3mm. UL recognized, CSA certified, VDE, OVE, SEV, SEMKO, NEMKO, DEMKO and SETI approved.

T75 SERIES 14A PC BOARD RELAYS

Miniature PC board relays are single coil, non-latching (monostable) with printed circuit terminals. Contact arrangement: 1 Form C (SPDT). Contact material: silver-cadmium oxide. Low profile and immersion cleanable. Suitable for applications including telecommunications equipment high current applications, household appliances and office machines. Nominal coil voltage is indicated in suffix of type number. Dimensions: 0.591H x 0.394W x 1.181"L (15 x 10 x 30). 3-60VDC types available; *contact your local Newark sales office.* UL recognized, CSA certified. Meets VDE, SEMKO, and SEV requirements.

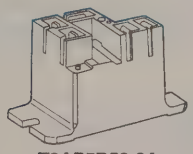
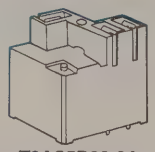
T9AS5D12-24



T9AP5D52-24



T9AS5D22-24

Up to 30 amp switching in SPST and 20 amp in SPDT arrangements. Meets UL 873 and UL 508 spacing -⅛" through air, ¼" over surface. Load connections made via ¼" Q.C. terminals and safety wells accept insulated female Q.C. terminals (mounting codes 2 & 5). **"P"** in type number indicates unsealed version with plastic dust cover. **"S"** in type number indicates version that is immersion cleanable, has a knock-off nib and comes in a sealed plastic case. Coil voltage (VDC) is indicated by last digits of type number. Dimensions: **T9AS5D12** = .805 (20.4)H x 1.08 (27.43)W x 1.27 (32.26)D. **T9AS5D22** = 1.10 (27.94)H x 1.27 (32.26)W x 1.08 (27.43)D. **T9AP5D52** = 1.10 (27.94)H x 1.98 (50.29)W x 1.08 (27.43). UL Class F insulation system standard. Suited for industrial, commercial and residential applications. UL recognized, CSA certified.

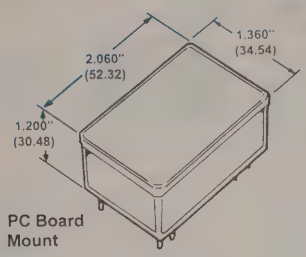
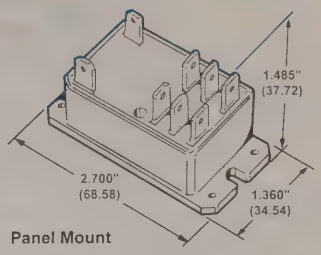
T92 SERIES 30-AMP POWER RELAYS





T92 Series power relays are available in PC board and panel mount versions and DPST-NO and DPDT configurations. Panel mount relays have two mounting slots for #8 screws on 2.35" (59.71) centers. Applications include appliance, heating and ventilating. **"P"** in type number denotes plastic dust cover (unsealed). Silver cadmium oxide contact materials. Coil input voltage is indicated by the type number suffix. **A** in type number indicates input voltage is AC; **D** indicates DC. Meets requirements of VDE 8mm spacing 4kV dielectric coil-to-contacts.

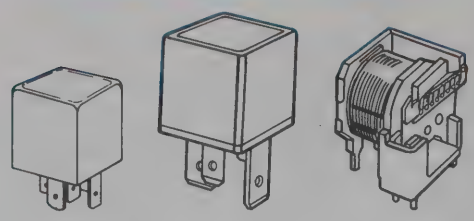
PC BOARD AUTOMOTIVE RELAYS

V SERIES AUTOMOTIVE RELAYS



VF4 VF7 VKP

VF4, VF7 and **VKP** panel mount and PC board relays feature continuous contact rating from 40A to 70A @ 85°C. **VF4 series** 40A relays all feature quick connect terminals *except* **types VF4-15F13** (PC terminals). Suffixes **S01** and **S05** in type number indicate coil suppression option. **C01** indicates unit is epoxy sealed. Also feature 20 operations per second with no contact load. 6 operations per minute for rated life at rated load. **Types VF4-41** and **VF4-45** are provided with a steel bracket for relay mounting. **Types VF4-81** and **VF4-85** have an integral molded plastic mounting bracket. Dimensions: 1.12 × 1.12 × 0.987″H (28.5 × 28.5 × 25.1). **VF7 series** are all quick-connect 70A relays with dust cover except **Type VF-7-12F12** (printed circuit clinch). **Type VF7-41F11** relay also features bracket. Dimensions: 1.04 × 1.04 × 0.992″H (26.5 × 26.5 × 25.2). **Type VFM15F12-K01** is a 20A relay with quick-connect terminals. **Type VKP series** are open PC board relays with 40A continuous current. 0.911 × 0.748 × 0.715″H (23.1 × 19.0 × 18.2). Coil input voltage for relays listed is 12VDC, except *, which is 24VDC.

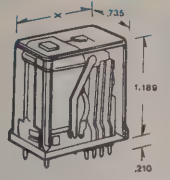
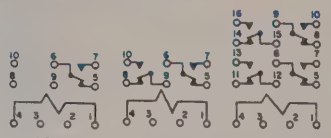
GENERAL-PURPOSE RELAYS

R10 SERIES PC BOARD RELAYS



X=.95″DPDT
=1.165″4PDT



Mechanical life expectancy is 100 million operations. Tin-plated terminals. Connect wires prevent opposite polarity from developing between adjacent contacts. Initial breakdown voltage is 1,000Vrms. Temperature range: –55°C to +75°C. **R10E2 series** relays are PC-board terminated and are very sensitive, current-actuated DC relays for direct drive by DTL, TTL, ECL and HTL. All relays DC voltage actuated. UL recognized, CSA certified. *Order* **R10** *PC board sockets separately on page 684. Order hold down springs separately on page 684.*

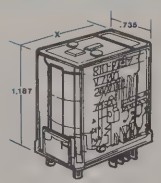
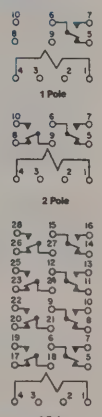
R10-E1 SERIES SOCKET AND PANEL MOUNT RELAYS





R10-E1 general-purpose relays are available in a choice of contact materials and types. Solder terminals are 0.012″ (0.305) x 0.080″ (2.03) x 0.210″ (5.33) long with # 3-48 mounting stud. Contact amp ratings are for 28VDC or 115VAC, resistive. All units are UL recognized, and all except 8PDT are CSA certified. **Type R10-E1-X2-5800** is sensitive DC voltage actuated. *Order* **type R10** *relay sockets, hold down spring and mounting strips separately on this page or; contact your local Newark sales office.*

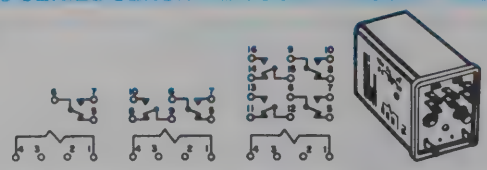
GENERAL-PURPOSE RELAYS

R10S SERIES SENSITIVE SOCKET-MOUNT RELAYS



R10S series relays are very sensitive, current actuated DC relays for direct drive by CMOS, TTL, ECL and HTL. Available in solder **(E1)**, termination. Maximum pickup is listed in "input" column. Dimensions: 0.95″H (2 Pole) or 1.165″H (4 Pole) x 735″W x 1.50″D (24.13 or 29.59 x 18.67 x 38.10). **Types R10S-E2** have PCB terminals, 0.064″ (1.62) clearance, and 1.25″ (31.75) height. UL recognized, CSA certified. *Order* **R10** *solder terminal sockets and hold down springs separately on this page. Order* **R10** *relay mounting strip separately, contact your local Newark sales office.*

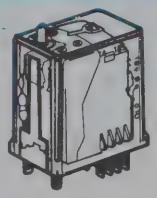
* For direct drive by CMOS, ECL and HTL.

(3297) (de50700)

R10L SERIES RELAYS WITH LED



LED indicator produces highly visible red light when coil is energized. Relays have silver-cadmium oxide contact, single button tin-plated terminals. Contact rating: 28VDC or 115VAC, resistive. Temperature range –55°C to +55°C. Relays fit standard **R10 series** sockets. 1.4″ x 0.735″W x 0.95″D (2PDT), 1.165″D (4PDT), 1.375″D (6PDT). UL recognized File Nos. E428 10 and E29244. CSA certified. *Order 2-, 4-, or 6-pole* **R10 series** *solder terminal sockets and hold down spring separately on this page.*

HOLD DOWN SPRINGS FOR R10 SERIES

Type 37D645 mounting strip features 10 pre-punched breakaway mounting plates. Designed to simplify mounting of one or more relays on chassis or racks. Each plate accepts 2, 4, 6 or pole solder terminal relay or socket. **Type 20C259** is a wire hold down strap. **Type 20C300** is for 2 pole R10s only.

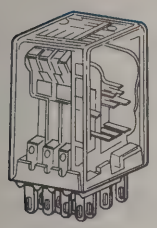
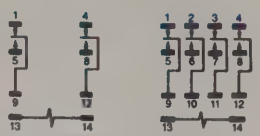
GENERAL-PURPOSE RELAYS

KHA SERIES MINIATURE SOCKET AND PANEL-MOUNT RELAYS





Wiring Diagrams

Miniature general-purpose units for data processing, photocopier, process control and similar applications. All 4 form C 4PDT except **type KHAU11** is 2 form C DPDT. Solder terminals. Dimensions: 1.281H x 0.859W x 1.109"D (32.54 x 21.82 x 28.17). The ninth digit of the type number indicates the contact type. UL recognized file E22575. CSA certified file LR15734. *Order sockets and spring separately on this page.*

CONTACT RATINGS FOR KHA SERIES RELAYS

Contact	Material	Resistive Rating	
		Minimum	Maximum
1	Silver	100mA @ 12VAC/12VDC	3A @ 120VAC/28VDC
2	Silver-cadmium oxide	500mA @ 12VAC/12VDC	5A @ 120VAC/28VDC
3	Gold-silver-nickel	10mA @ 12VAC/12VDC	2A @ 120VAC/28VDC
6	Bifurcated cross bar gold overlay silver	Dry circuit	1A @ 120VAC/28VDC
8	Gold-diffused silver	50mA @ 12VAC/12VDC	3A @ 120VAC/28VDC

NOTE: Relays should carry no more than 15 amps continuously for all poles combined.

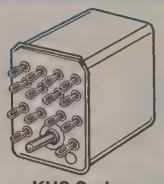
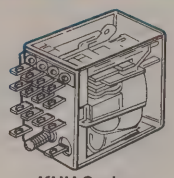
KH SERIES SOCKET- AND PANEL-MOUNT RELAYS



KHS Series



KHU Series

- **UL Recognized for Class 1, Division 2 Hazardous Locations CSA Certified**

4PDT relays available with AC or DC operation. **KHU series** has clear polycarbonate dust cover; **KHS series** has hermetically-sealed steel case. Units with **suffix"1"**: silver contacts rated 3A @ 28VDC resistive, 120VAC. **"2"**: silver-cadmium oxide contacts rated 5A @ 28VDC resistive, 120VAC. **"3"**: gold-silver nickel contacts for low-level to 2A @ 28VDC resistive, 120VAC. **"6"**: gold overlay on silver, bifurcated cross bar rated 1A @ 28VDC, 120VAC. **Suffix "N"** indicates neon lamp. Solder terminals. 1.281"H x 0.910"W x 1.156"D. *Order* **KH series** *sockets separately on this page.*

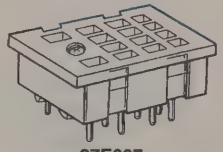
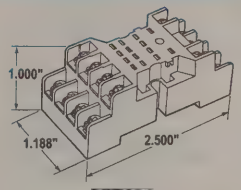
SOCKETS AND SPRING FOR KH/KHA SERIES



27E007



27E894

Solder terminal **type 27E006** includes grounding provision. **Type 27E007** is a PC terminal socket with grounding provision. Hold-down spring **type 20C217** is used for **27E007**. Screw terminal **type 27E166** is rated 5A. Molded, glass-filled polyester DIN rail mount polyamide **type 27E894** meets UL94V-0, 7A rating. Snaps on track without tools. Hold-down spring **type 20C297** is used with **types 27E166** and **27E894**. *Order* **KH series** *mounting strip separately on this page.*

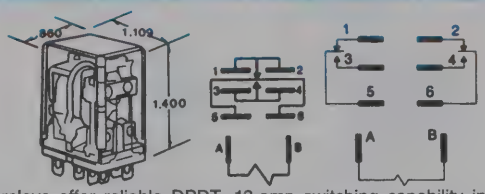
GENERAL-PURPOSE RELAYS

K10 SERIES SOCKET- OR PANEL-MOUNT RELAYS



K10 Series relays offer reliable DPDT, 13-amp switching capability in a compact, polycarbonate dust cover enclosed package. All have 0.187" (4.75) quick-connect/solder terminals, and they fit sockets with printed circuit, solder lug or screw terminals. Silver cadmium oxide contacts rated 15 amps @ 120VAC resistive; 10 amps @ 30VDC resistive or 277VAC; ½HP @ 250VAC; ⅓HP @ 120VAC. Nominal power: 0.9W for DC coil types and 1.2VAC for AC coil types. Mechanical life: 10 million operations. Electrical life: 100,000 operations. UL recognized, CSA certified. Units indicating a "**T**" in the type number are top flange/panel mount. *Order sockets and hold down spring separately on this page.*

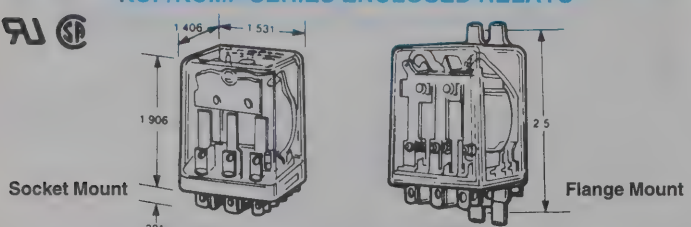
KUP/KUMP SERIES ENCLOSED RELAYS



Available in AC 50/60Hz coil and DC coil, socket or flange mount. **KUP** models with **"1"** as last digit of type number have silver, quick connect/solder terminal and are rated 5A at 28VDC/240VAC, 80% PF. **KUP** models with **"5"** as last digit have silver cadmium oxide, quick connect/solder terminals, and are rated 10A at 28VDC/240VAC. **KUMP** models are silver cadmium oxide, quick connect/solder terminals, rated 15A at 277VAC, ½ HP at 120VAC. Models with (**) have push-to-test button for manual contact actuation. (†) have neon lamp to indicate coil power. (‡) have test button and neon lamp. *Order sockets and hold down spring separately on this page.*

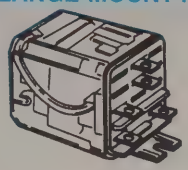
GENERAL-PURPOSE RELAYS

KUHP SERIES FLANGE-MOUNT POWER RELAYS



Offer switching capability in 1 Form C (SPDT) of 30 amps @ 120/240VAC, 25 amps @ 28VDC in 2 Form C (DPDT) of 20 amps @ 120/240VAC, 20 amps @ 28VDC. Contacts silver-cadmium oxide. Solder/push-on terminals. Type nos. with **T1** top brackets; dimensions: 2.461L x 1.393W x 2.382"H (62.51 x 35.38 x 60.50H). **51** side brackets; dimensions: 1.406L x 1.531W x 2.90"H (35.71 x 38.89 x 73.66H). UL recognized, CSA certified.

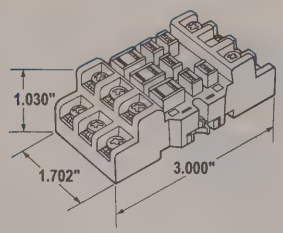
SOCKETS FOR KU SERIES RELAYS



27E893

Snap-in sockets for SPDT, DPDT, 3PDT relays require no mounting screws or retainer ring. **Type 27E893** DIN rail mount socket offers screw termination for **KU** relays, through 3 poles, with 0.187" (4.75) quick connect terminals. Socket snaps into track without tools. Screw terminals will accept a maximum of two #12 AWG wires. **Type 27E396** socket has snap-in panel mount male tab terminals 0.187" (4.75) by 0.020" (0.508), which will accept female quick connect terminals.

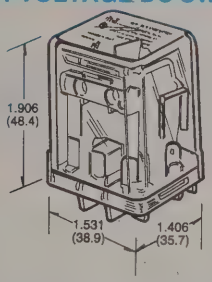
(3314) (de51840)

KUEP SERIES HIGH-VOLTAGE DC SWITCHING RELAYS



KUEP series relays switch 10 amps at 150VDC. Feature wide contact gap and are equipped with a permanent magnet blow-out to assist in interrupting DC current when the contacts are opened. Silver cadmium oxide contacts. 0.187" (4.8mm) x 0.020" (0.5mm) quick-connect/solder terminals. Type number indicates coil input. Last digits in type number indicate voltage, **A** in type number indicates AC, **D** indicates DC. Enclosed in a polycarbonate dust cover for socket mount. 2250 coil ohms have AC coil input only.

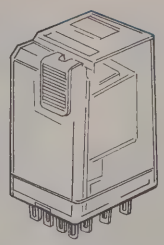
ZT SERIES MINIATURE RELAYS AND ZG SERIES SOCKETS



ZT series is available in both 2 **(prefix ZT2)** or 4 **(prefix ZT5)** changeover contacts. New test system with front-operated, finger-protected push-to-test button and integral- locking test tab. Description column for **ZT series** indicates: nominal voltage, coil resistance (ohms). **Type ZG78710** DIN rail socket with diode also available; *contact your local Newark sales office.* UL listed, UL recognized, CSA certified, CE marked, VDE approved.

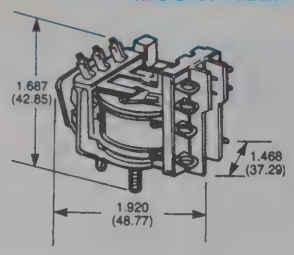
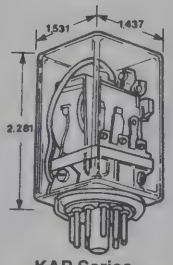
GENERAL-PURPOSE RELAYS

KA AND KAP SERIES LIGHT POWER SOCKET-AND PANEL-MOUNT RELAYS

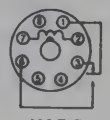


KA Series

KA



KAP Series



KAP 5

KAP 11

KAP 14

Highly efficient relays for light power loads such as small motors, solenoids, other relays and general automation work. UL recognized, files E22575 and E29244, and CSA certified, file LR15734. Mechanical life expectancy: 10 million operations. Types with **"Y" suffix** have silver contacts rated 5A @ 120VAC, **"G" suffix** have silver cadmium oxide contacts rated 10A @ 120VAC. Insulation material is molded phenolic. **KA series** is open version. Mounting: one no. 6-32 threaded stud and locating tab on 0.438" (11.13) centers. **KAP series** is enclosed model, protected by a clear polycarbonate dust cover. 8 or 11 pin octal type plugs for socket mounting. *Order octal-style sockets separately on page 689.*

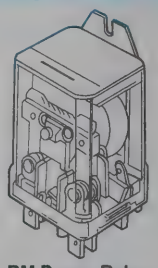
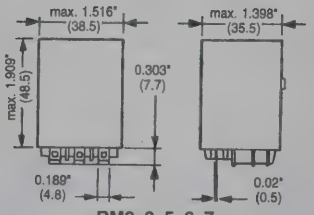
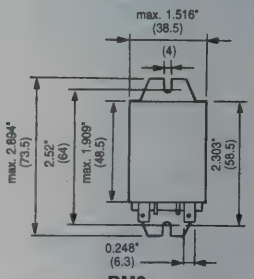
RM SERIES POWER RELAYS



RM Power Relay



RM2, 3, 5, 6, 7



RM8

RM series power relays are for direct control of squirrel-cage motors, water heaters, and night storage heaters. Used as power relays in electrical appliances. They are single contact. **Types RM2, 3, 5, 6,** and **7** rated up to 16A @ 380VAC (440 max. breaking voltage). **Type RM8** rated up to 25A @ 250VAC (440 max. breaking voltage). Relays have a mechanical life of > 20 x 10^6. **Types RM5** and **RM6** have 3mm contact gap. Dielectric strength: coil-contact 2500VAC; contact-contact 2500VAC; pole-pole 2500VAC. UL recognized, CSA certified, VDE approved.

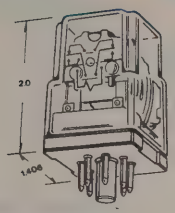
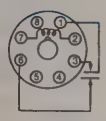
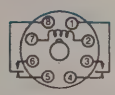
GENERAL-PURPOSE RELAYS

KRPA SERIES GENERAL-PURPOSE SOCKET-MOUNT RELAYS

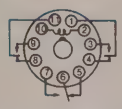




KRPA5



KRPA11



KRPA14

Enclosed in clear polycarbonate dust cover. Relays with **suffix "Y"** have silver contacts and are rated 5A @ 120VAC, 1/10HP @ 120VAC, 3 amps @ 240VAC and 1/8HP @ 240VAC. **Suffix "G"** have silver cadmium-oxide contacts and are rated 10A @ 250VAC, 1/3HP @ 250VAC and 1/8HP @ 120VAC. **Suffix "N"** have contacts identical to **"G"** and also have an indicator lamp wired in parallel with coil. **"Y"** and **"G"** are UL recognized and CSA certified. **"N"** UL and CSA in 110, 120 and 240V only. Hold-down spring for **KRPA** and **KRPA-N** will accommodate machine screws or rivets. Input voltage is indicated by last digits of type number. For use with flush mount chassis sockets. *Order sockets separately on this page.*

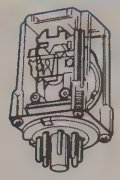
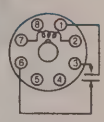
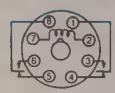
(3122) (de01658)

KRP SERIES MEDIUM POWER SOCKET-MOUNT RELAYS

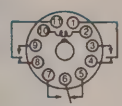




KRP5



KRP11



KRP14

Enclosed in clear polycarbonate dust covers. 1- and 2-pole relays come with ungrounded frame and contacts rated for opposite polarity; 3-pole relays same polarity only. Dimensions same as **KRPA series.** Input voltage is indicated by last digits of type number. Type numbers with **suffix "Y"** have silver contacts rated 5A @ 120VAC; **"G"** have silver cadmium oxide rated 10A @ 250VAC for 1-, 2-pole, 10A @ 120VAC for 3-pole; **"N"** rated same as **"G"** but have indicator lamp. **"Y"** UL recognized; **"G"** UL recognized and CSA certified; **"N"** UL and CSA in 120, 240VAC only. *Order* **27E series** *sockets and hold down spring separately on this page.*

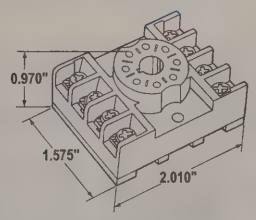
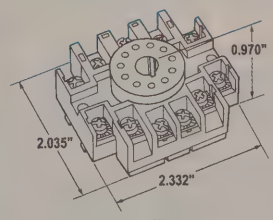
SURFACE MOUNT AND OCTAL-STYLE DIN MOUNT SOCKETS



Type 27E891



Type 27E892

For **KRP, KRP3-H, KAP** and **KBP** relays; **CB,CG,CD,CNS,CNT,CH,CK** and **CR** time delays; and **CS** sensor. **Type 27E122** is a molded polyester, 8-pin screw socket, rated 10 amperes. **Type 27E123** is a molded polyester, 11-pin screw terminal socket, rated 10 amperes. **Type 27E891** and **Type 27E892** are DIN rail snap-mount sockets and have M3.5 screw terminals, which accept two # 12AWG wires. Rated 10 amps @ 300VAC and meet UL94V-0. **Type 27E891** fits terminals with standard 8-pin octal-type base. **Type 27E892** fits standard 11-pin octal-type bases.

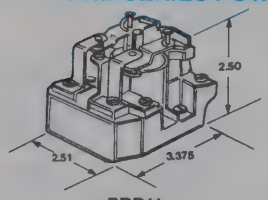
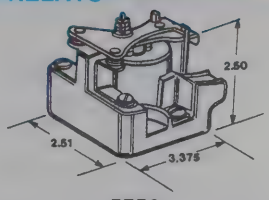
POWER RELAYS

PRD SERIES POWER RELAYS



PRD11



PRD3

PRD series relays are designed for use in high inrush current applications such as motor starting, other inductive and incandescent lamp loads. Relay bobbin is contained in plastic housing for added protection. Units feature screw terminations. Operating temperature range: –55°C to +45°C for AC models; –55°C to +80°C for DC models. UL listed under file E22575 and CSA certified under file 15734.

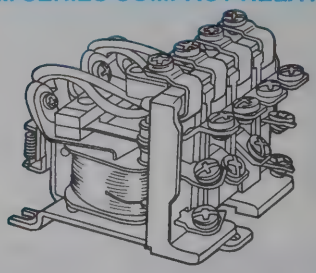
PM SERIES COMPACT RELAYS



4PDT power relays are for polyphase and heavy-duty switching operations. All types are 4 form C (4PDT). Nominal power is 4.4 Watts for DC coils and 14VA for AC coils. **"–Suffix"** in type number indicates the coil input voltage. Screw-terminal units have silver-cadmium oxide contacts rated 25A at 277VAC, 50/60Hz resistive, or 1HP per moveable arm at 120 or 240VAC single phase. Mount by one front key hole and two rear channel slots for 8-32 screws on 2 x 2.5″ (50.80 x 63.50) triangular centers. Dimensions: 2.657L x 3.394W x 2.719″H. UL listed under file E22575 and CSA certified under file 15374.

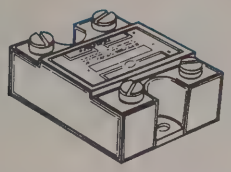
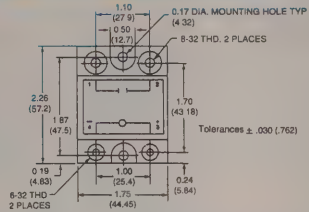
POWER AND SOLID-STATE RELAYS

SSRT SERIES RELAYS WITH TRIAC OUTPUT





SSRT series relay is a triac output solid-state relay that is controlled by an optoelectronic coupler. Intended for use as an On/Off switch for loads through 25 amps. EMI and RFI are greatly reduced due to zero voltage turn-on and zero current turn-off of the load. 1 Form A (SPST-NO). Plastic case is UL rated self-extinguishing. 400V rms isolation. Overall height: 0.87″. Line voltage: 24 - 280 VAC.

Stock No.	Type	Input Voltage	Switching Current Rating (Arms)	1-24	25-49
89F955	SSRT-240A10	90-280 VAC	.05-10	**21.11**	**19.64**

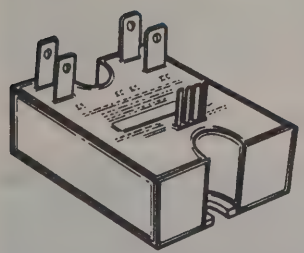
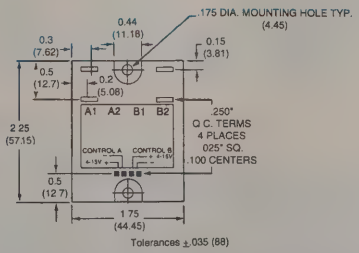
(3302) (de50871)

SSRD SERIES DUAL AC OUTPUT SOLID-STATE RELAYS





SSRD series relays comprise two totally independent, optically isolated, inverse parallel SCR output solid state relays in one standard package. Intended to be used as two On/Off switches for loads through 25 amps. Line voltage: 24-280VAC. Input voltage: 4-15VDC. UL recognized and CSA certified for industrial applications. 2 x 1 Form A (2 x SPST-NO). 2500Vrms isolation. Overall height: 1.3″.

Stock No.	Type	Max. Switching Rating (Arms) @ 25°C	1-24	25-49

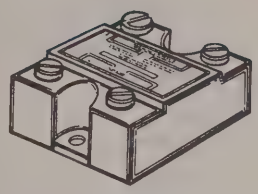
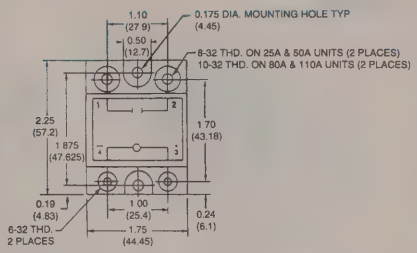
(3303) (de50872)

SSR SERIES SOLID-STATE RELAYS WITH SCR OUTPUT





SSR series is a medium/high power, 120/240VAC, 47-70Hz inverse parallel SCR output solid-state relay that is controlled by an opto-electronic coupler. Intended for use as On/Off switch for loads through 110 amps. Line voltage: 24-280VAC. 1 Form A (SPST-NO). 400Vrms isolation. Zero voltage turn-on except "**R**" **suffix** random voltage turn-on. Overall height: 0.87″. UL recognized, CSA certified.

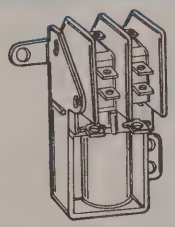
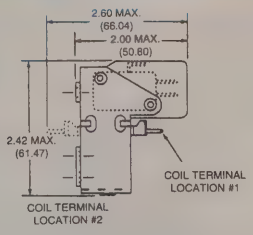
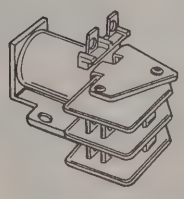
S86R/S87R SERIES 20-AMP POWER RELAYS

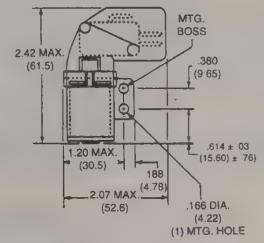


S86R





S87R



Relays have .250″ quick-connect/solder coil terminal located perpendicular to .250″ quick connect terminals. Contacts rated at 20A @ 277VAC, with life expectancy of 50,000 operations. Coil breakdown voltage: 1560V rms, 60HZ. **S87** relays are designed to operate with plunger in vertical or horizontal position, but not in upside-down position. Temperature range: -45°C to +65°C. Last digits in type number indicate coil input voltage. All input voltages are in VAC except - **11** in second segment of type number indicates DPDT; **5** indicates SPDT. UL recognized, CSA certified. **S87R** mounting style differs from **S86R** mounting style according to illustrations above. **S87R** width: 1.62″ (41.1). **S86R** width: 1.92″ (48.77).

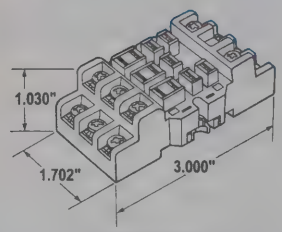
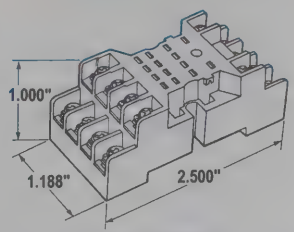
LATCHING POWER RELAYS AND RELAY ACCESSORIES

DIN MOUNT SCREW TERMINAL SOCKETS, MOUNTING TRACK AND SPRING CLIPS



Type 27E893



Type 27E894

Sockets' spring-loaded latch permits quick snap-on track mounting. Small screwdriver releases latch to remove socket. Sockets can be mounted without disturbing already-mounted sockets or components. Wide spacing and barriers between terminals for trouble-free wiring. Molded-in ID numbers for easy locating of terminals. Screws have captive pressure plates to use with stripped wires, spade and ring terminals. Terminals accept two 12 AWG wires. Rating: 10 amps @ 300V AC, except **type 27E894** is rated 7 amps.

KUL SERIES SINGLE AND DUAL COIL MAGNETIC LATCHING RELAYS

KUL series magnetic latching relays require only half the space of mechanical latching relays. Designed for continuous duty in applications demanding good memory stability. **Type KUL5A15S** is 1 Form C (SPDT); all others listed are 2 Form C (DPDT). Contacts are silver-cadmium oxide, 10 amps 28VDC resistive or 240VAC, 80% PF. AC coil relays include diodes. Dimensions: 1.531W x 1.406D x 2.156"H. All are UL recognized, CSA certified. *Order* **type 27E121**screw terminal *socket separately* . **"S"** in suffix denotes single coil model; **"D"** suffix, dual coil model.

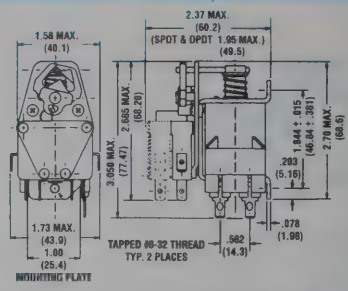
S89R SERIES BI-STABLE, IMPULSE RELAYS



Save power in uses where load is on for long time periods. Contacts are rated at 15 amps, 250VAC with life expectancy of 50,000 cycles at rated load. Coil breakdown voltage: 1500 Vrms, 60 Hz. 0.250" (6.35) quick-connect terminals. Temperature range: –40°C to +60°C. All feature 9.0VA coil power **except** types with **DBD** in type number which are 6.33W coil power. UL recognized, CSA certified **except** (*) which is enclosed relay with octal plug (10 amps max. rating).

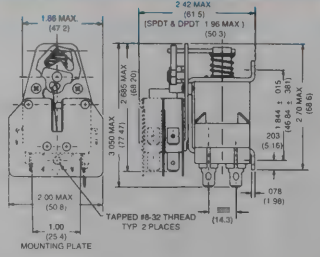
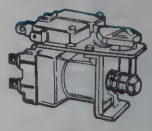
S90R SERIES BI-STABLE, IMPULSE RELAYS





Bi-stable relays can effect power savings in applications where load is on for long time periods. Meet UL 508 energy management requirements. 9 VA coil power. Operate on rated voltage pulses as short as 150ms. Mechanical life expectancy: 100,000 cycles. Temperature range: –40°C to +60°C. 20-ampere industrial rating. 0.250" quick connect terminals. UL recognized, CSA certified. Applications include industrial lighting control, motor starting and reversing of conveyor systems, or in air conditioning systems. Coil input voltage (VAC) is indicated in last digits of type number.

I/O MODULES AND MOUNTING BOARDS

SLIMLINE AND SOLID-STATE INPUT/OUTPUT MODULES

Slimline input/output modules provide interfacing between microprocessor- or computer-based control systems and external input devices and loads such as switches and sensors. Color-coded with high isolation and noise immunity. Packaged in a 0.4″ enclosure. 1 Form A (SPST-NO). Type numbers beginning with **IA** indicate module function is AC input. **ID** indicates DC input, **OA** indicates AC output, and **OD** indicates DC output. Solid state modules are photo-isolated and feature excellent transient immunity. Standard modules also serve as a reliable interface between microprocessor- or computer-based control systems and external input devices and loads. Packaged in industry-standard plug-in enclosure. Units interchange easily without disturbing wiring. Maximum load current derating for output modules is linear from 3 amps to 0.8 amps between +25°C and +80°C; **OAC-5H** and **ODC-5H** are linear from 5 amps to 1.3 amps between +25°C and +80°C. Both module types ideal for series operation. UL recognized, CSA certified. *Order mounting boards separately on this page.*

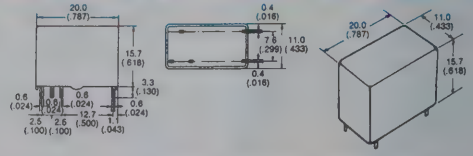
HB SERIES SUBMINIATURE DIP RELAYS



Sensitive, small size units for increased packaging density require very low operating power. Amber sealed. Coil voltage (VDC) is indicated by last digits of type number. Simple mechanism for stable quality; only 7 pieceparts. DIP-matching 16-pin IC socket. Contacts are gold-clad over silver-nickel. Rated 0.5A @ 125VAC, 2A 30VDC. Initial contact resistance: 100 milliohms. Operating temperature: –40°C to +50°C. Expected mechanical life: 10^7. UL recognized, CSA certified.

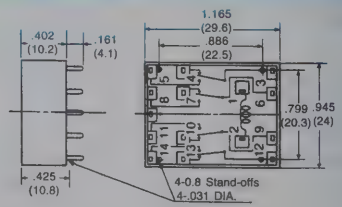
NF HIGH SENSITIVITY FLATPACK RELAYS



NF4

Suited for applications where small size and high sensitivity are required. Relays are low profile: 0.402″ (10.2) high. Minimum operating power for **NF2** is 150mW; minimum operating power for **NF4** is 240mW. Coil voltage is indicated by last digits of type number. Surge between open contacts: 1500V FCC. Life for DPDT is 3 x 10^8 mechanical operations; life for 4PDT is 10^8. All units listed are amber sealed. Contact material: gold-clad silver. Coil data listed at 25°C (77°F.) UL recognized. VDE approved types available; *contact your local Newark sales office for details.*

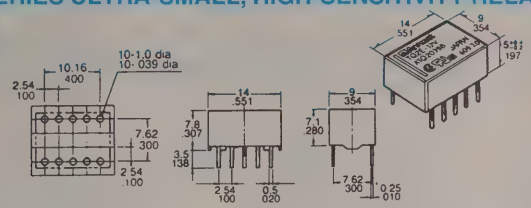
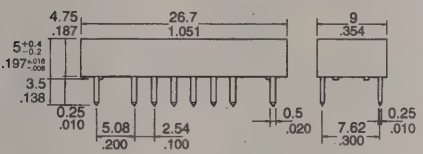
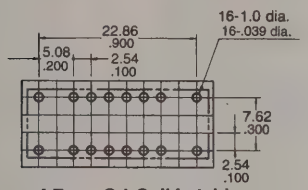
ULTRA-SMALL PC BOARD RELAYS

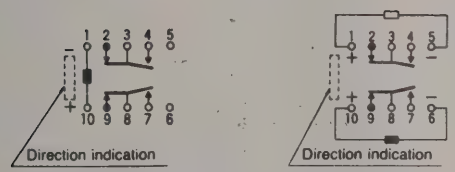
TQ SERIES ULTRA-SMALL, HIGH-SENSITIVITY RELAYS







4 Form C 1-Coil Latching



2 Form C Single-Side Stable 2-Coil Latching

Polarized units. Ambient temperature: –40°C to +70°C. **Type TQ4** is 4 Form C; others are 2 Form C. Maximum switching power: 30W, 62.5VA. Withstand 1500V surge. Sealed construction allows automatic dip-washing. Pre-soldered terminals provide improved solderability in automatic soldering process. Coil input (VDC) is indicated by type number suffix. UL recognized, CSA certified. 1-coil latching units available; *contact your local Newark sales office.*

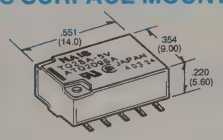
TQ SERIES SURFACE MOUNT RELAYS

SMD



TQ Series are ultra low-profile .236" (6) H, 2A, high capacity, surface mount relays. Contacts are gold-clad silver alloy and are rated: 2A @ 30VDC, 0.5A @ 125VAC nominal switching capacity (resistive); 60W, 62.5VA max. switching power resistive; 220VDC, 125VAC max. switching voltage; 2A max. switching current; 10µA, 10mVDC max. switching capability. Coil input (VDC) is indicated by type number suffix. UL listed, CSA certified.

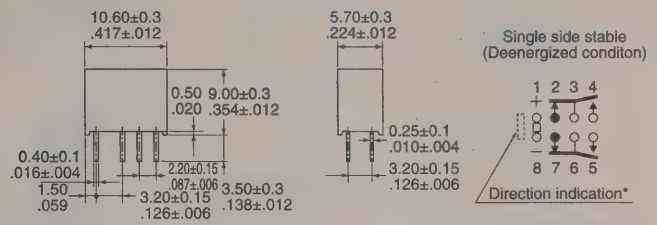
AGN SERIES ULTRA-SMALL SIGNAL RELAYS

NEW



AGN series ultrasmall PCB and surface mount relays are ideal for telecom, LAN, A/V, and measurement applications. Ultra-slim design allows for high-density mounting. Withstands 2500V (Bellcore) surge resistance. Twin crossbar contacts provide high contact reliability. 2 Form C. Maximum switching power: 30W, 37.5VA. Ambient temperature: -40°C to +85°C. Vibration/shock resistance. 1-coil latching version also available; *contact your local Newark sales office.* Tube packing standard. UL recognized, CSA certified.

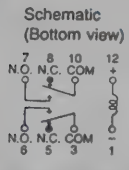
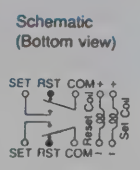
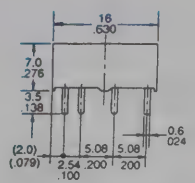
DF SERIES HIGHLY SENSITIVE 1-AMP DIP MINIATURE RELAYS



Single Side Stable



2-Coil Latching



Smaller than most 2 Form C relays, units have 200mW nominal power. Gold-clad silver contacts. **DF2E** are single-side stable; **DF2E-L2** are 2-coil latching. Coil input (VDC) is indicated by last digits of type number. UL recognized, CSA certified.

(3679) (de50849)

DS2Y SERIES SENSITIVE MINIATURE RELAYS

Relays offer high sensitivity and 1500V FCC surge withstand between open contacts. Typical applications for **DS** and **DS2Y** relays include telecommunications equipment, office equipment, and computer peripherals. **DS2Y series** features sealed construction, 2 Form C contacts and DIP–2C type matching 16 pin IC socket. Contact material: gold-clad silver. Ambient temperature: –40°C to +70°C (–40°F to +158°F). UL recognized, CSA certified. *Call Newark for additional product specifications.* Other **DS2** contact arrangements and voltages available; *contact Newark for information.*

DR SERIES MINIATURE DIP RELAYS

Relays offer small size and profile, high reliability, high sensitivity, and high contact pressure. Applications include telecommunications equipment, control panels, detectors, business machines, and medical equipment. Breakdown voltage: between open contacts, 750Vrms; between contacts and coil, 1500Vrms. Surge voltage withstand: 1500V, part 68, FCC standard. Operating speed: approx. 1 msec. Ambient temperature: –50°C to +85°C (–58°F to +185°F). Coil data featured at 20°C (68°F). Units listed are single-side stable, 1 form C. 1- and 2-coil latching types also available; *contact Newark for information.* UL recognized, CSA certified.

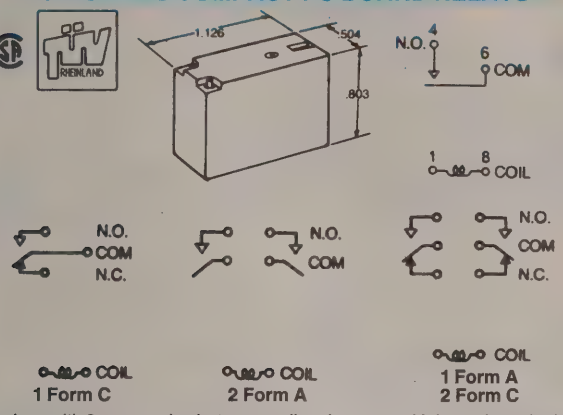
POWER PC BOARD RELAYS AND SOCKETS

JW SERIES COMPACT PC BOARD RELAYS



Sealed relays with 8mm spacing between coil and contacts. Universal terminal footprint. High dielectric withstanding for transient protection: 10,000V surge in microseconds between coil and contact. Nominal operating power: 530mW. Silver alloy contacts are 70% nominal voltage sealed. UL recognized, CSA certified, TUV approved.

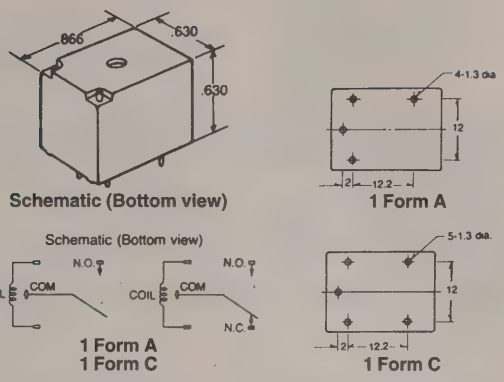
JS SERIES ULTRA-MINI PC POWER RELAYS



Ultra-miniature size with universal terminal footprint. High silver alloy contact capacity: 10A. Nominal operating power: 360mW. Input voltage (VDC) is indicated in last digits of type number. Contacts 70% nominal voltage, sealed. Maximum switching power: 1,250VA. Ambient temperature: –40°C to +70°C. UL recognized, CSA certified, TUV approved.

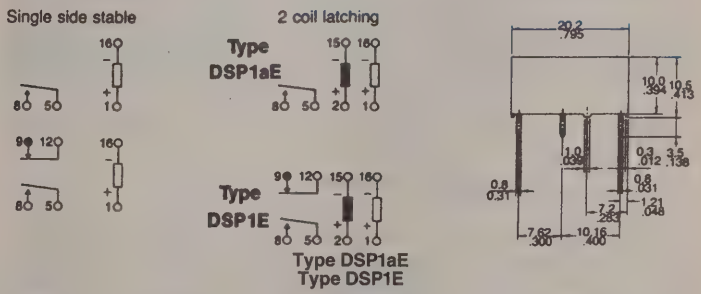
DSP SERIES MINIATURE PC MOUNT POWER RELAYS



Sealed relays are ideal for office, industrial electronic devices. High sensitivity: 190mW pick-up power. 0.300″ (7.62) row spacing. Initial contact resistance: 30 milliohms. Contact material: gold flash over silver alloy. Switching current 8A, 250VAC for 1 Form A; 5A, 250VAC for 1 Form A, 1 Form B. Nominal operating power: 300mW. 3,000 Vrms between contact and coil; 1,000 Vrms between open contacts (meets FCC Part 68). UL recognized, CSA certified, TUV approved. *Order sockets for* **DSP** *relays separately on this page.*

SEB SERIES 4-AMP POLARIZED HIGH DENSITY, HIGH SENSITIVITY RELAYS

	Single Side Stable (De-Energizer Position)	2 Coil Latching "Reset" Position When Reset Coil is Energized with Indicated Polarity.
2a2b		4a		
Schematic Bottom View

SEB series DIP relays are amber sealed, compact units that feature high sensitivity and high shock/vibration resistance of 50G/18G. Offer switching range of 100μA o 4A, with contacts rated 4A @ 250VAC and 3A @ 30VDC. Low, 3μV thermal electromotive force. 0.300" (7.62) row spacing, UL recognized, CSA certified. *Order* **type S-PS** *socket separately on this page.*

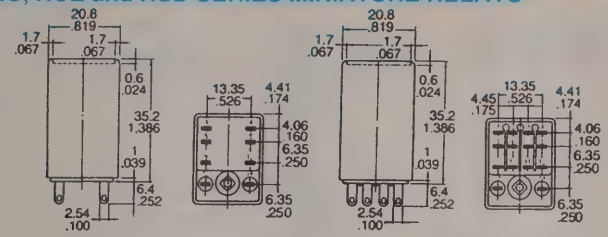
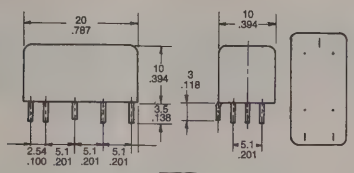
MINIATURE RELAYS

HC, HCE and RSD SERIES MINIATURE RELAYS





RSD

HC series miniature relays designed for more than 10^8 mechanical operations. Applications include: transportation, power station control equipment, refrigerators, office machines, medical equipment. Coil input voltage is indicated by last digits of type number. Rating (resistive) for gold-flashed silver alloy contacts is 7A, 250VAC for 2 form C; 5A, 250VAC for 4 form C. Ambient temperature: –50°C to +50°C. Initial contact resistance: max is 30 milliohms. Shock resistance: Min. 20G. **HCE series** same as **HC series** except amber sealed. **RSD series** are half-size, amber sealed relays. They feature high sensitivity and PC board terminals. All UL recognized, CSA certified. *Order sockets with hold-down clip for* **HC, HCE series** *separately below.*

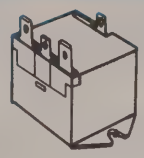
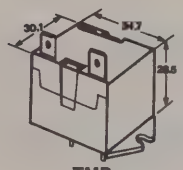
JA SERIES 1-HORSEPOWER COMPACT PC AND CHASSIS MOUNT POWER RELAYS

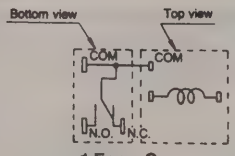


TM

1 Form C



TMP



1 Form C

Ideal for air conditioners, microwave ovens, load management equipment, copiers, central cleaning systems, process control equipment and facsimiles. 1 Form C. Switching capacity: 55A inrush, 15A steady state inductive load. Coil input voltage is indicated by last digits of type number. Silver alloy contacts. Switching voltage: 250VAC. Switching current: 15A. Ambient temperature: –50°C to +50°C. 0.250″ (6.35) QC terminals. **Type TM** solder terminals for direct chassis mount: **TMP** solder terminal and PCB terminal for PC board mount. UL recognized, CSA certified. **Type JA1A** has contact arrangement 1 form A.

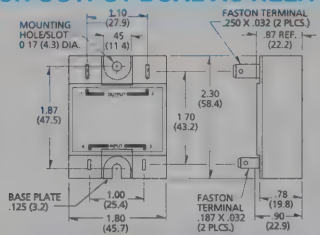
AC SOLID-STATE RELAYS

SCR OUTPUT DUAL AC RELAYS



Dual solid-state relays comprise two independent AC output relays in single standard panel-mount package. The relays have a 4-15VDC input range. **-10** suffix in type number indicates random turn-on/phase controllable switching.

240VAC OUTPUT MODELS (24-280VAC)

Stock No.	Type	Load Current Range	One-Cycle Surge Apk	1-9	10-24
90F2122	D2425D	0.15-25	350	53.57	49.28

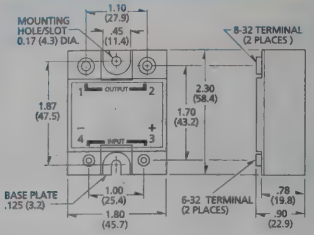
SERIES 1 SPST-NO OR NC RELAYS



Series 1 SPST-NO relays feature surface mount construction with back-to-back SCR output and are available with either zero-cross switching or random turn-on/phase controllable switching (**-10 suffix**). "E" versions = 24VAC input 8-36VAC. Control signal for DC models is 3-32 VDC. Control signal for AC models is 90-280 VAC. Normally closed versions (–B). All models have 4000 Vrms opto-isolation.

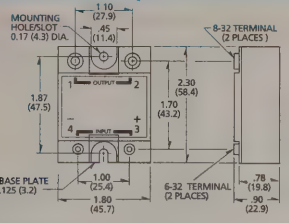
AC SOLID-STATE RELAYS

HA & HD SERIES 1200Vpk AC OUTPUT RELAYS



SPST-NO 480V relays feature the same surface mount construction and package as the series 1 and are available with either zero cross switching or random turn-on, phase controllable switching. DC control models have a 3-32VDC (3mA @ 5VDC) input. AC control models have a 90-280VAC (2mA @ 120VAC) input. All models have an operating voltage range of 48-530VAC. Random turn-on, phase controllable switching relays are also available; *contact your local Newark sales office.* UL recognized, CSA certified, VDE approved.

HA & HD60 SERIES 600VAC AC OUTPUT RELAYS

SPST-NO relays are capable of switching 600VAC loads; come in the same size package as the **1 series** available with either zero cross switching or random turn-on, phase controllable switching. Random turn-on phase controllable switching relays **(Suffix -10)**also available; *contact your local Newark sales office.* DC control types have a 3-32VDC (3mA @ 5VDC) input. AC control types have a 90-280VAC (2mA @ 120VAC) input. All types have an operating voltage range of 48-660VAC. UL listed, CSA certified, VDE approved.

H12 SERIES 50-90 AMP, IC DRIVEN RELAYS

SPST-NO relays feature the same surface mount construction and package as series 1, use IC driven circuitry and feature 1200V blocking standard. DC control models have a 4-32VDC (15mA @ 5VDC) input. AC control models have a 90-140VAC (15mA @ 120VAC) input. Operating Voltage Range: models "CA and WD", 48-660VAC; model "D", 48-530VAC. UL listed, CSA certified, VDE approved.

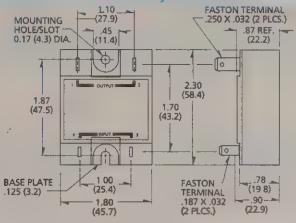
(3698) (de52311)

TA & TD SERIES 10-25 AMP, TRIAC OUTPUT RELAYS



SPST-NO relays have a TRIAC output for general purpose switching where performance requirements are less demanding. All models come in standard series 1 package with either AC or DC control. DC control models have a 3-32VDC (3mA @ 5VDC) input. AC control models have a 90-280VAC (2mA @ 120VAC) input. UL listed, CSA certifed, VDE approved.

HEAT SINKS AND COVERS

Provide efficient heat dissipation and allow SSR's to operate close to their maximum ratings. Each have mounting brackets and are drilled and tapped to take one of the following models. **Series 1, CT, CS, HA, HD, DLD, DSD, DUAL, QUAD, DC60, 1-DC, PCV,** and **RPC. Series HE-90** will take up to three of these or one type **53TP**. All current ratings are based upon the use of a suitable thermal compound, with fins mounted in the vertical plane, in a 40 deg C maximum ambient temperature.

Stock No.	Type	Max. Current	Deg. C/W@ Max. Current	H x W x D	1-9	10-24

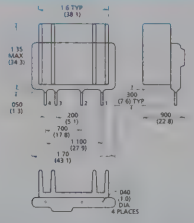
(13331) (ne10200)

PF SERIES "POWERFIN" AC OUTPUT RELAYS



PowerFin relays feature integral heatsink design to achieve PCB mount highest ratings up to 25 amps in forced air or 10 amps with natural convection at 25C. Control voltage range is 13-15VDC (15mA@5VDC). AC control available, *call your local Newark sales office for information.* UL recognized, CSA certified, VDE approved.

Stock No.	Type	Load Voltage (VAC)	One-Cycle Surge (Apk)	1-9	10-24

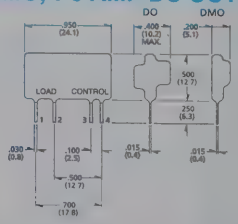
SERIES DO/DMO, 1-3 AMP DC OUTPUT MINI-SIP



Relays feature epoxy coated package with .10" lead spacing. DO models have bi-polar transistor output rated .02-1.0ADC. DMO models have MOSFET output rated 0-3.0ADC. Typical input currents are 15mA and 20mA respectively. UL recognized, CSA certified.

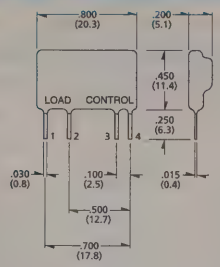
AC, DC SOLID-STATE RELAYS

4-PIN, 1.0-AMP SIP SOLID-STATE RELAYS

NEW



SPA series SIP relays are compact SCR output solid-state relays recommended for high-density printed circuit boards. Rated: 1.0A.

CONTROL CURRENT RANGE: 10-35mA

Stock No.	Type	Load Voltage Range	Transient Overvoltage	1-9	10-24	25-49	50-99

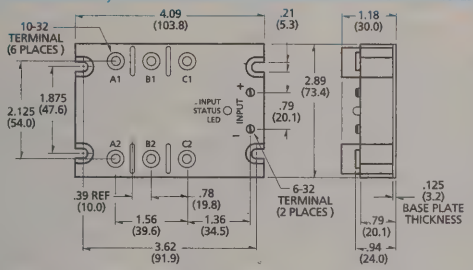
(32877) (ne32877)

53TP SERIES, 25-30 AMP THREE-PHASE RELAYS



Series 53TP solid state relays switch up to 530Vrms directly to loads such as motors, transformers, heating elements etc. **A53 types** have a 90-280VAC (2mA@120VAC) input. **D53 types** have a 3-32VDC (10mA@5VDC) control. Random turn-on, phase controllable versions **(-10 suffix)** available. UL recognized.

Stock No.	Type	Load Current (Arms)	One-Cycle Surge (Apk)	1-9	10-24

(3710) (de53006)

AO/ASO SERIES 1.0-2.0 AMP AC MINI-SIP RELAYS

AO/ASO series miniature SIP relays are available with either zero-cross switching or Random turn-on **(R suffix)**. AO models offer TRIAC output. ASO models are back-to-back SCR output. Control voltage range is 4-10VDC (15mA @5VDC). UL recognized, CSA certified.

Stock No.	Type	Load Current (Arms)	One-Cycle Surge (Apk)	1-9	10-24

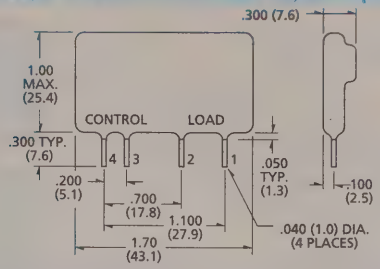
(3857) (de02690)

CX SERIES, 5.0 AMP PCB RELAYS, 250Apk SURGE



CX series relays achieve high power switching capability in a PC mount, air-cooled package. Models available with zero-cross or random turn-on **(R suffix)** switching and either AC or DC control (15mA@nominal voltage, 5VDC, 15VDC, 120VAC). UL recognized, CSA certified, VDE approved.

Stock No.	Type	Load Voltage (Vac)	Control Voltage	1-9	10-24

(3654) (de02550)

SERIES CMX, 5-10 AMP MOSFET DC OUTPUT RELAYS

SPST-NO relays use MOSFET output for high switching capabilities in the CX package for PCB mount air-cooled package. Extra low on-state resistance. Control voltage range, 3-10VDC (15mA@5VDC). Pin compatible with **Series 6** and **CX**. UL recognized.

Stock No.	Type	Line Voltage Range (VDC)	Max. Load Current, Amps (ADC)	1-9	10-24	25-49	50-99

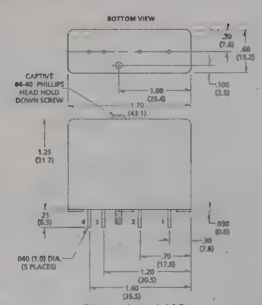
I/O MODULES



Standard I/O

I/O MODULES, BUFFERED I/O MODULES

I/O modules provide a clean, opto-isolated, noise free "output" interface between logic level control systems and external loads such as motors, valves, solenoids, and other process control components. All models feature 4000 volt isolation and high transient noise immunity. **Series 6 Buffered I/O modules** contain additional internal amplification to reduce drive requirements to a level suitable for the MOS devices used in many microprocessor systems. Modules are available in inverting and non-inverting types. **Series DMP** are identical to standard I/O modules, come in a skin-tight epoxy conformal coating. Yellow: IAC, (S)MIAC, 62XX; White: IDC, (S)MIDC, 61XX; Black: OAC, (S)MOAC, 64XX; Red: ODC, (S)MODC, 63XX.

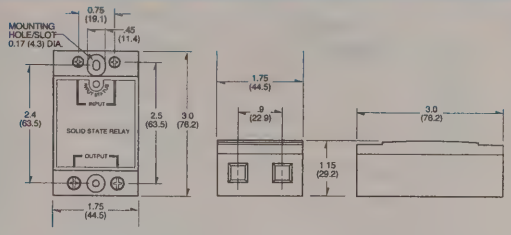
PROPAK™ CMD SERIES AC OUTPUT RELAYS



CMD series relays feature status indicating LED and "fingerproof" easy-to-use input and output cage-type terminals. All types are panel mount and offer zero voltage or random turn-on switching (**suffix 10** in type number). All types have 3-32VDC control. ISO 9002 certified. AC control versions are also available; *contact your local Newark sales office.*

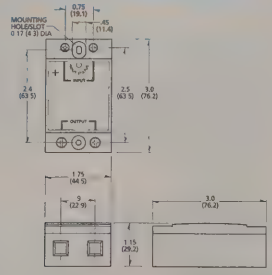
PROPAK™ CMA SERIES AC OUTPUT RELAYS



CMA series relays feature status-indicating LED and "fingerproof", easy-to-use, input and output-cage type terminals. All types are panel mount and offer zero voltage or random turn-on switching. Control voltage range: 90-140.

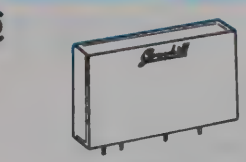
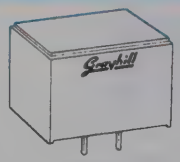
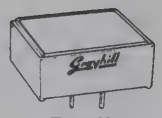
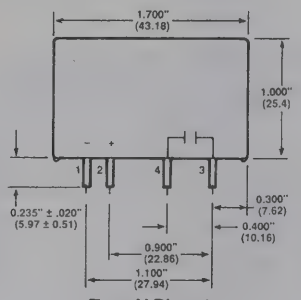
RELAYS AND I/O MODULE MOUNTING RACKS

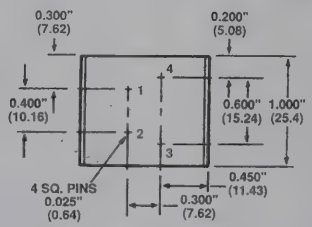
70S2 SERIES PC MOUNT SOLID-STATE RELAYS











SPST-NO relays provide 4000VAC optical isolation from sensitive logic circuits to field devices. Zero voltage turn-on. Built-in EMI-RFI immunity and voltage spike protection for worry-free operation. Relays withstand surge of 60A for one cycle or 18A for one second. Relays listed have a DC control of 3-30V. UL recognized, CSA certified.

Stock No.	Type	AC Load	1-9
46F2843	70S2-04-B-03-V	3A, 120V	11.44
46F2845	70S2-04-C-03-V	3A, 240V	12.05

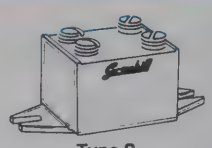
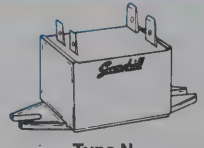
(3644) (de02333)

70S2 SERIES PANEL MOUNT SOLID-STATE RELAYS





SPST-NO relays mount on the same 1.187″ (47.50) centers as the bulkier hockey puck packages and switch loads up to 25A. Compatible with CMOS and TTL logic, they provide 4000VAC optical isolation and zero voltage turn-on. Also feature built-in snubber network, high surge rating and low offset voltage to minimize RFI and EMI. Ratings are for relays mounted with silicon grease on a 12″ x 12″ x 0.125″ (304.8 x 304.8 x 3.18) aluminum panel or equivalent. Load and logic connections are marked on each relay. **Suffix S** have screw terminals with screws. **Suffix N** have quick connect terminals for push-on connectors which fit blade sizes 0.187″ (4.75) for the logic/control side and 0.250″ (0.635) for the load size. Relays listed have a DC Control of 3-30V. UL recognized, CSA certified.

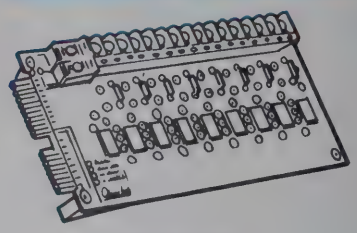
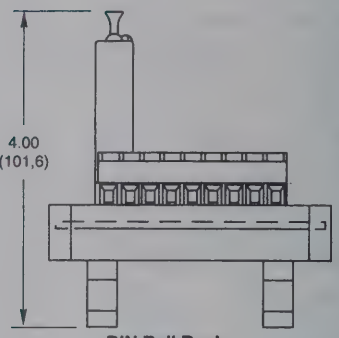
MODULE MOUNTING RACKS





Type 70R racks are for standard I/O modules; **type 70MR** are for mini I/O; **type 70GR** are for G5 I/O modules; **type 70LR** are for open-line I/O modules. Input and output modules plug into any position interchangeably. Standard and mini racks have replaceable fuses and status LEDs at each channel. Mini racks include hold down bars to retain modules. Available in 4, 8, 16, 24, or 32 channel. No suffix or **EC** suffix denotes board edge card connector for control signals. **HL** suffix denotes 50 pin ribbon cable header connector for control signals or direct controller plug-in. **R, T,** and **I** suffix denote terminal blocks for both control and field connections. **DIN** suffix denotes DIN rail mountable. UL recognized, CSA certified.

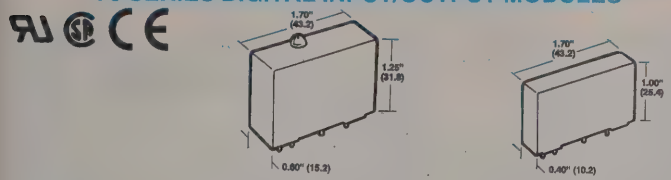
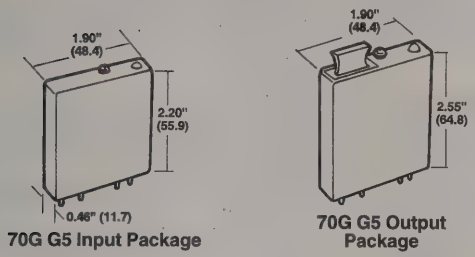
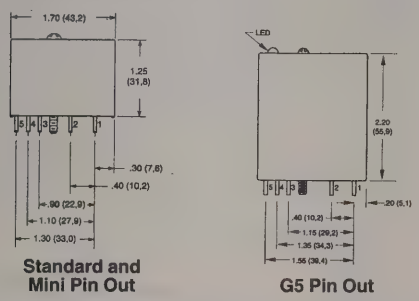
ANALOG AND DIGITAL I/O MODULES

70 SERIES DIGITAL INPUT/OUTPUT MODULES







70 Series I/O Modules provide 4000VAC optical isolation between sensitive logic circuits and external AC and DC power devices. Output modules have built-in transient surge protection to prevent false operation. All input modules except high speed IDC5B and IDC5D types have filtered inputs and transmit clean on/off status signals to the controller. Modules are epoxy filled for shock and vibration immunity and operate from –40° to +100°C. UL recognized, CSA certified and CE compliant. Lifetime warranty. All modules pass the EMC directive (89/336/EEC) for industrial products. G5 modules have built-in status LEDs and outputs have 5 x 20mm glass fuses. All are CE and TUV certified. ISW1 and OSW1 modules have toggle switches for simulating inputs and outputs during troubleshooting. Part numbers ending with **MA** have 3 position toggle switches for manual on/manual off/auto operation. Four types available: AC Output (Black); DC Output (Red), AC Input (Yellow), and DC Input (White).

TERMINAL NUMBER AND CONNECTION

Type	#5	#4	#3	#2	#1
OAC	N/A	DC-In	DC+In	AC Out	AC Out
ODC	N/A	DC-In	DC+In	DC-Out	DC+Out
IAC	Ground	Output	+Vcc	AC In	AC In
IDC	Ground	Output	+Vcc	DC-In	DC+In

Only input modules have terminal #5.

73G ANALOG INPUT/OUTPUT MODULES

Type 73G single-point G5 analog I/O modules can be mixed with 70G digital I/O modules on any of the 70G mounting racks. Connect a MicroDAC, Microlon, or DacNet controller and create a PC-based data acquisition or control system. Analog inputs (blue) convert incoming voltage, current, or temperature signals into a frequency which varies linearly from 14.4kHz to 72kHz. Analog outputs (orange) accept a data stream and set the output level accordingly. All models feature 2500V optical isolation from input to output and 2500V transformer isolation to the power supply. Full scale accuracy ranges from 0.1% to 0.3%. Modules are powered by a single 5VDC supply.

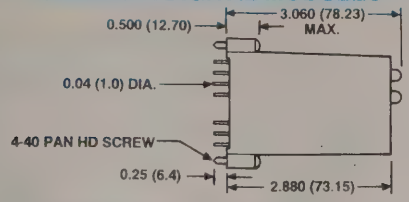
QUAD PAK & STANDARD I/O SYSTEMS

QUAD PAK DIGITAL MODULES



Quad Pak digital modules contain the equivalent of 4 single-channel circuits in a high-density package. Each module can be divided into 2 pairs, with each pair sharing a common line. Designed to plug into only high-density I/O mounting racks.

Stock No.	Type	Description	1-9	10-24
96F1014	IAC5Q	4-Ch., AC Input, 90-140VAc 5VDC Logic	50.79	47.55

I/O CABLES

Cable types are designated according to the types of connectors on each end. The **CA series** has an edge connector on both ends. The **HH series** has a header connector on both ends. The **OD series** has a header connector on one end and an edge connector on the other. 50-conductor ribbon cable. Length in feet is indicated in type number.

Stock No.	Type	Description	1-9	10-24

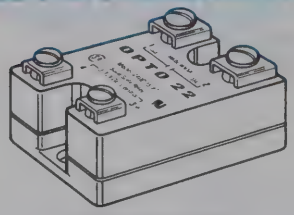
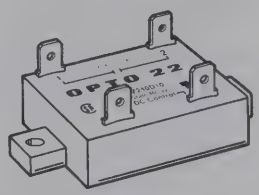
SOLID-STATE RELAYS

SOLID-STATE POWER RELAYS



AC/DC Power Relay



Z Power Relay

Solid-state power relays have built-in snubber. TTL compatible. Operating temperature: –40°C to +100°C. AC power relays feature 4000 volt isolation and maximum zero voltage turn on time of ½ cycle. **A** in type number indicates 85-280VAC control voltage; **D** indicates 3-32VDC control voltage. DC switching power relays are photo-isolated with 60VDC supply voltage, nominal current rating of 3A or 5A. **Z series** feature 4000 volt isolation and maximum zero voltage turn-on time of ½ cycle. **Z series** also feature a heat transfer system and plastic packaging. Suffix **17** in type number indicates VDE approved. Suffix **12** in type number indicates transient proof product. All relays are UL recognized, CSA certified, CE compliant.

PHOTOVOLTAIC RELAYS

Photovoltaic relays switch general-purpose analog signals. Four terminal devices with an LED input which provides a photo-isolated signal for actuating the power ICs, which form the solid-state output contacts. 0.2μV maximum thermal offset voltage @ 5mA control.

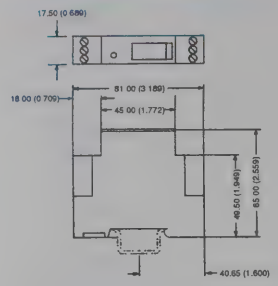
I/O MODULES AND MOUNTING BOARDS

"NEW GENERATION" DIN RAIL MOUNTABLE OUTPUT MODULES



DIN rail series I/O modules offer a packaging approach addressing installation and space-saving needs. DIN rail mountable (17.5mm wide) modules snap into place with an integral spring element which is part of the I/O assembly. Electrical connections made by wiring directly via a screw-clamp terminal design, conforming them to a "Touch Safe" IP-20 standard. Module includes LED indication, and output modules feature a quick and easy-to-change fuse (5A-Littlefuse Type 2290035). All units can also be configured for direct panel mounting. Input voltage is 4-32VDC. UL recognized and CE compliant.

OUTPUT MODULES

Stock No.	Type	Output Voltage	Max. Output Current (A)	1-4	5-9

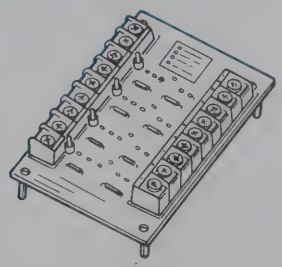
DIGITAL I/O MODULE MOUNTING BOARDS



Accept input and output modules interchangeably. Plug-compatible connections on 8, 16, 24, and 32-position boards; screw terminal block on 4-position board. Screw terminal barrier block for load connections. Resident pull-up resistors. 5-amp replaceable fuses. LEDs indicate logic status. UL recognized, CSA certified boards indicated with (*). **"SM" suffix** denotes boards with pin-retaining system for **SM series** modules. Single-point boards also compatible with **SM series** units. **PB4R** accepts output modules only.

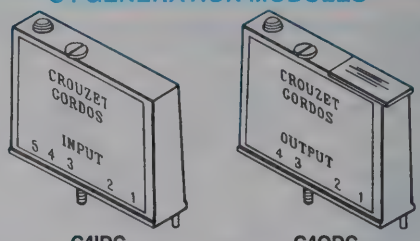
C4 GENERATION MODULES



C4IDC C4ODC

The C4 I/O modules provide all the features of a standard I/O module plus an LED status indicator light. The output module versions provide a 2AG glass fuse. UL recognized and CE compliant.

C4 INPUT MODULES, DC LOGIC OUTPUT 4.5-32VDC

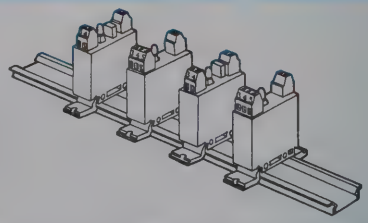
DR SERIES SINGLE POINT I/O MODULES



DR Series I/O modules offer a packaging approach that addresses installation and space saving needs. I/O modules snap into place with an integral spring element which is part of the I/O assembly. Electrical connections are made by wiring directly to color code and numbered terminal blocks designed to accept 28 to 14 AWG wire. I/O modules include ED indicator, and output modules contain a replaceable 5A fuse. Mounting holes provided for panel-mount applications. I/Os available with 5 or 24 VDC logic voltages. AC and DC outputs are suitable for most load requirements up to 5A. UL recognized, CSA certified, CE compliant.

INPUT MODULES, MAX. OUTPUT CURRENT 16mA

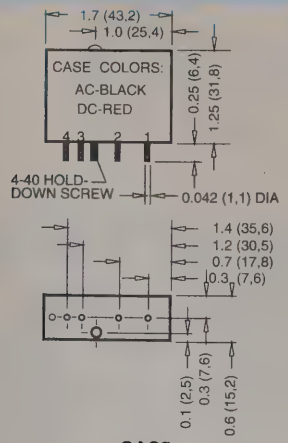
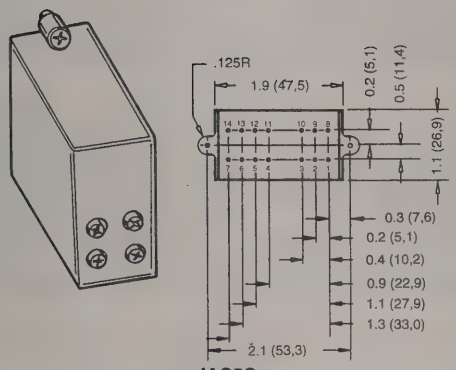
I/O MODULES

0.6″ INPUT/OUTPUT MODULES



OAC5



IAC5Q

SMT construction for high reliability. 4KV optical isolation. Quad pack modules denoted with suffix **"Q"**; all others single point modules. Suffix **"N"** denotes modules with noise immunity per NEMA ICS2-230. **"M"** prefix denotes miniature modules for **M series** mounting boards. Prefix **"SM"** denotes miniature modules which plug into standard or sub-miniature mounting boards and offer nylon retaining pin for fast, secure installation. Both **"M"** and **"SM"** series are 33% thinner than standard I/O modules and feature open collector output. Suffix **"F"** denotes fast switching modules 47-63Hz. UL recognized and CE compliant.

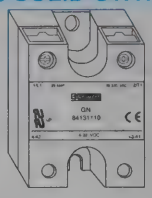
GN SERIES SOLID-STATE RELAYS

NEW



GN series relays have built-in, no-touch cover and current ranges from 10A to 90A. UL recognized, CE compliant per LVD 73/23/EEC. EMC compatibility to EN 50082-2 (immunity), EN 50081-2 (emissions), C.I.S.P.R.22 (radiated) Class B (conducted), Class A (requires EMI filter), EN60950, and IEC 947-4-2.

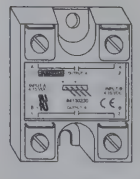
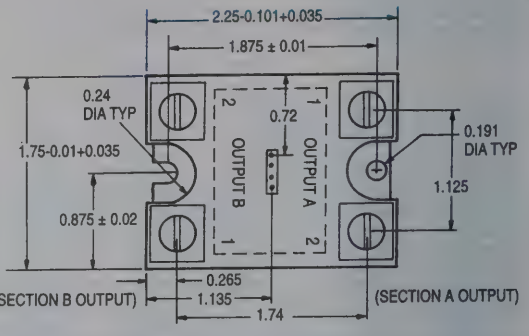
GD SERIES DUAL OUTPUT POWER RELAYS

NEW





The **GD series** of SSRs combines 2 relays into one package. Both 25 and 40-amp versions feature back-to-back dual SCR output and 4kV optical isolation. Operating temperature range is -20° to +80°C. Both versions are UL recognized and the 40-amp version is CE compliant.

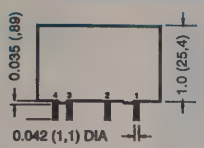
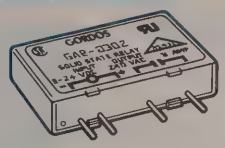
SOLID-STATE RELAYS

GA1 AND GA8 SERIES RELAYS





The **GA1** and **GA8 series** of SSRs have a high current thyristor for 100 amps surge capability in an industry standard package, SIP **(GA8)** or flat **(GA1)** pack. "R"suffix denotes random turn-on. UL recognized.

Stock No.	Type	Control Voltage	Output Current	Output Voltage	1-4	5-9

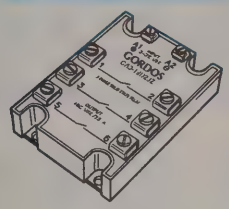
(12629) (ne10015)

GA3 SERIES RELAYS



GA3

The GA3 series of three phase solid-state relays provide three SSR's in one enclosure to switch three phase loads. A single TTL-compatible input actuates all three phases. UL recognized, CSA certified and CE compliant.

Stock No.	Type	Control Voltage	Output Current	Max Output	1-4	5-9

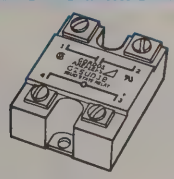
(12939) (ne10012)

GF AND GT SERIES RELAYS



The **GF series** employs **MOSFET** technology that combines the best features of electromechanical and solid-state relays: milliohm "ON" resistance, high "OFF" resistance, short transfer times and extremely long life. The **GT series** is a cost-effective, general-purpose DC solid-state relay.

Stock No.	Type	Control Voltage	Output Current Rating (A)	Max-Output	1-4	5-9

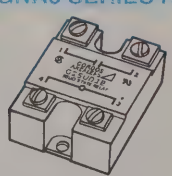
GA5 & GNA5 SERIES RELAYS



The **GA5 series** features an economical TRIAC output for general-purpose applications. Zero-voltage turn-on only. CE compliant. Available in ¼" quick connect (Suffix QC). The new **GNA5 series** uses the same industry standard packaging but meets the strict EMC directive. The **GNA5 series** comes in AC or DC control, 10 and 25 AMP, 24-280VAC output.

GAO SERIES 3-PHASE MOTOR-REVERSING RELAY

The GAO 3-phase motor-reversing relay allows the user to swap the 2-phase of a 3-phase motor to control forward or reverse motion. A dual TTL-compatible input actuates the forward or reverse sequence. Built-in interlock circuit prevents actuation of both directions. UL recognized, CE compliant, TUV approved.

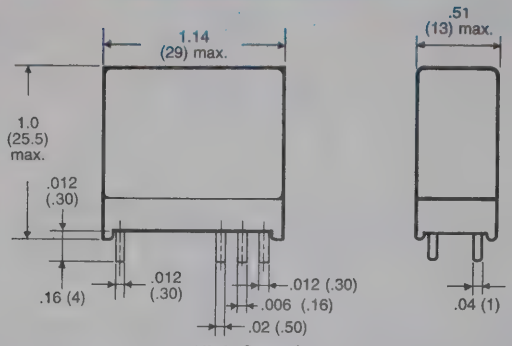
OMRON®

POWER PC BOARD AND GENERAL-PURPOSE RELAYS

G2R SERIES RELAYS



High-Capacity

G2R series are slim-styled power PCB relays. Creepage distance of 0.31″ min. between coil and contact. Relays with **E** in type number are high-capacity, all others are general purpose. UL recognized, CSA certified. Also available: class B insulation and latching types; *contact your local Newark sales office for details.*

G3NA SERIES SOLID-STATE RELAYS

The **G3NA** is an industry standard "hockey puck" style, solid state relay. Ideal for industrial switching applications where long life, heavy duty loads and fast switching speed is required. **Type 210B, 225B** and **240B** switch 10-40 Amp loads at 24-240VAC and **type 440B** switches 40 Amp loads at 200-480 VAC. Output load current can be significantly increased with a **type Y92B** heat sink; *contact your local Newark sales office for details.* UL recognized. CSA certified, TUV approved. Additional models available; *contact your local Newark sales office.*

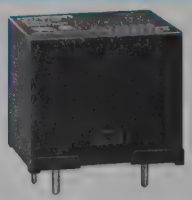
G5LE SERIES PC BOARD RELAYS

NEW



Subminiature "sugar cube" relays are rated 10A and are UL Class B insulation certified. Withstand impulses of up to 4,500V. Maximum switching voltage: 250VAC, 125VDC. Operating temperature: -25°C to +85°C. 19.05(.75)H x 22.5(.89)L x 16.51(.65)″W. Ideal for security equipment, home electrical appliances, audio equipment, and remote control switched power. UL recognized, CSA certified.

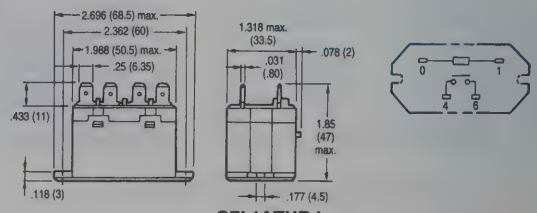
G7L SERIES RELAYS

TUV Rheinland



G7L1ATUBJ
1A Type

G7L series are general purpose, flange mount relays. Dielectric strength: 4,000VAC. Max. switching voltage: 250VAC. Contact material: AgCdO. 2.70 (68.58) L x 1.36 (34.54) W x 1.93″ (49.02) H. Last digits in type number indicate coil input voltage. **TUB** in type number indicates QC terminals; **BUB** indicates screw terminals. PTT button.

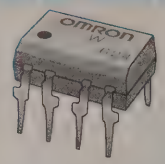
G3VM SERIES LOW-SIGNAL RELAYS

NEW



G3VM series low-signal relays feature PHOTOMOS construction. Ideal for telecom, datacom, and computer construction. Dielectric strength: 2,500VAC for one minute. Maximum operating voltage: –350VDC to +350VAC maximum. except **G3VM-W(F)**, which has a –350VDC to +350VAC minimum operating voltage. Maximum operating current: 50mA. Dimensions: 4.58H x 6.4L x 3.65"W for **types G3VM-2**. For dimensions on other types; *contact your local Newark sales office*

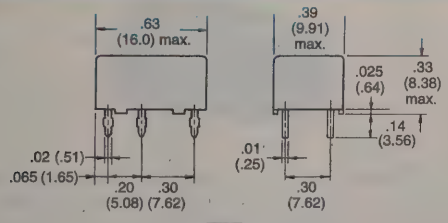
G6E SUBMINIATURE LOW SIGNAL RELAYS



G6E

High sensitivity relays with pick-up coil power of 98mW. Unique moving loop armature reduces relay size, magnetic interference, and contact bounce time. Units feature bifurcated crossbar contacts for high reliability. Relays packaged for automatic insertion. Last digits in type number indicate coil voltage rating. Types listed are SPDT. Meets Bellcore 2.5kV surge withstand requirement. UL recognized, CSA certified.

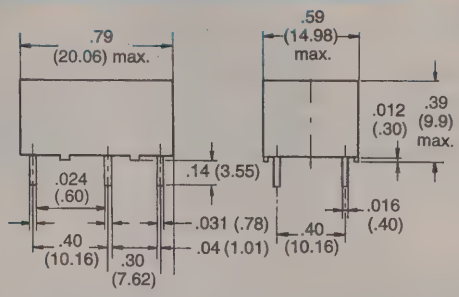
G6C MINIATURE POWER PCB RELAYS



G6C

Units feature unique moving loop armature which reduces relay size, magnetic interference, and contact bounce time. Semi-sealed and sealed types available (all types listed are sealed). Relays have low (200mW) power consumption. Last digits in type number indicate coil voltage rating. Rated current and coil resistance are measured at a coil temperature of +23°C with tolerance of ±10%. **Types 1114** are SPST-NO; **types 2114** are SPST-NO + SPST-NC. UL recognized, CSA certified, VDE approved.

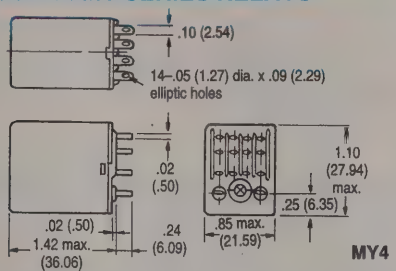
SUPER MY SERIES RELAYS

NEW



MY4

MY series "ice cube" relays provide high reliability and up to 500k operations. Ultra-high sensitivity and quick response. Offered in multi-pole configurations. Ideal for switching multiple loads with one compact device. Three pole types, flange mount, PC board mount and other coil voltages available; *contact your local Newark branch.* Vibration and shock resistant. **Prefix MY2** in type number indicates 2 pole; **prefix MY4** in type number indicates 4 pole. **"N"** in type number = LED; **"Z"** in type number = bifurcated. All types shown below are plug-in/solder termination. UL recognized, CSA certified, VDE approved.

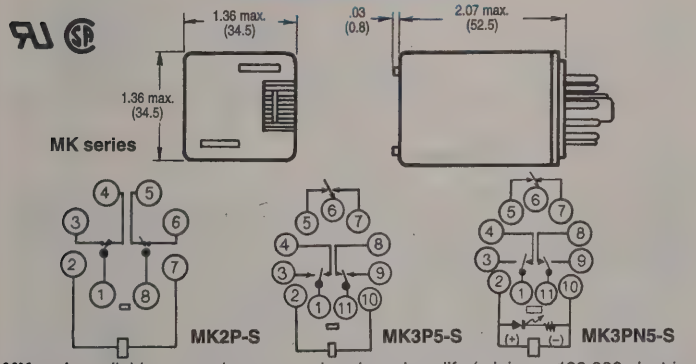
MK SERIES RELAYS



MK series reliable, general-purpose relays have long life (minimum 100,000 electrical operations). Feature built-in operation indicator (mechanical, LED), diode surge suppression, and varistor surge suppression. All types listed have a mechanical indicator and a push-to-test button. **MK2PN-S** and **MK3PN5-S** types have LED indicator and plug-in terminals; **MK2P-S** and **MK3P5-S** types are standard with plug-in terminals. Types with built in varistors and diodes and other coil voltages also available; *contact your local Newark sales office.* Last digits of type number indicate coil voltage rating. **MK2P-S** and **MK3P5-S** are UL recognized, CSA certified.

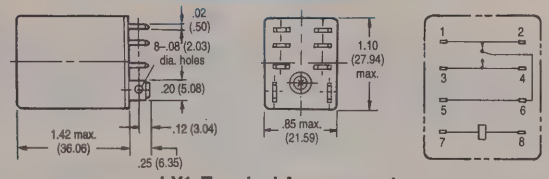
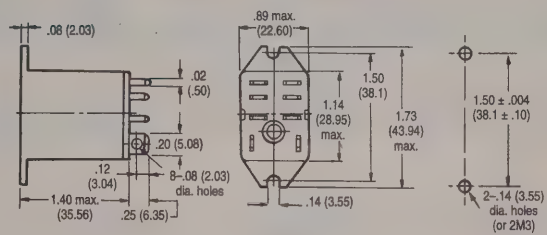
LY SERIES RELAYS



LY1, Terminal Arrangement



LY1F

LY series are general purpose relays. **Type LY1** are SPDT; **LY2** are DPDT; **LY3** are 3PDT; **LY4** are 4PDT. Arc barrier equipped. Dielectric strength: 2,000VAC. AgCdO contacts. Mechanical service life: 50 million operations minimum. Mechanical service life: 50 million operations minimum. Type **LY2N** relays include an LED. UL recognized, CSA certified.

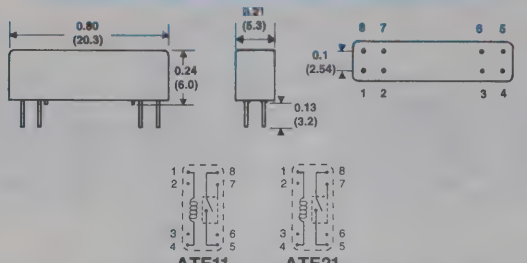
ATE SERIES MINIATURE REED RELAYS



Designed for use in integrated circuit test systems. Their small size and magnetic shielding allow for the high density packing required when used on custom load boards. Some models available with coaxial shield that provides a 50Ω characteristic impedance. Nominal voltage is 5V. Suited for carrying fast digital pulses and low power, high-frequency signals. All have hermetically sealed contacts.

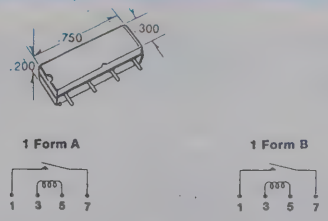
DSS4 SERIES 4-PIN SIP DRY REED RELAYS



Feature 0.300″ (7.62) low-profile construction for 0.500″ (12.70) board spacing. Epoxy-molded, immersion cleanable. Contact form is indicated by **"1A"** or **"1B"** in type number. Contact ratings: 10VA switching power. 100VDC or peak AC switching voltage, 0.5A switching current. Last digits in type number indicate nominal voltage (VDC). Contact resistance: 150mΩ. Life expectancy: 200 x 10^6. Operate and release time: 0.50ms. **Type DSS41A05B** has diode.

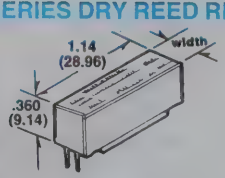
MRB SERIES DRY REED RELAYS



MRB series units feature 1x0.1″ (25.40x2.54) grid and ruthenium contacts rated 10VA switching power, 200VDC or peak AC switching voltage, and 0.5A switching current. Nominal voltage (VDC) is indicated by last digits of type number. Fourth and fifth digits in type number designate contact form: 1A, 2A or 4A. UL recognized, CSA certified.

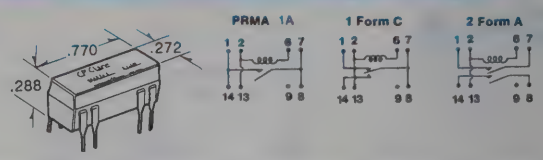
PRMA SERIES 14-PIN DRY REED DIP RELAYS



Molded construction units are automatic board processing compatible. Contact forms 1A and 2A are rated 10VA switching power, 100VDC or peak AC switching voltage and 0.5A max. switching current. Last digits in type number indicate nominal voltage (VDC). Contact resistance: 150mΩ. Life expectancy: 200 x 10^6. Operate and release time: 0.5ms. Form 1C rated 3VA switching power, 100VDC or peak AC switching voltage and 0.25A max. switching current. Contact resistance: 200mΩ. Life expectancy: 20 x 10^6. Operate and release time: 3.00ms. Available with diode suppression (pins 2/13 and 6; cathode pin 2). UL recognized, CSA certified.

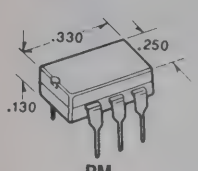
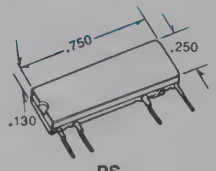
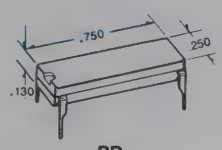
AC SOLID-STATE RELAYS



PM



PS



PD

Typical applications include input/output modules, solenoid drivers, motors, blowers, heater and temperature controls, control of relays, switching fans, TTL-compatible driver for contactors, and replacing TRIAC/TRIAC drivers. All versions feature optical isolation and 1 Form A normally open contacts, as well as DC control/AC output. TTL and CMOS compatible. These units provide interface between logic and power systems, high transient immunity, high surge capability, and they save PC board space. No arcing, no contact bounce. Long life. **Type PM** Power Mini relays, **type PD** PowerDIP, and **type PS** PowerSIP relays also feature 5mA sensitivity, zero crossing detection, low EMI and RFI generation, inherent noise immunity. Machine insertable and wave solderable. 5mA input control. Suffix X2 parts have an internal resistor in the input circuit. It is designed to be driven directly by 5VDC. UL recognized, CSA certified, VDE approved.

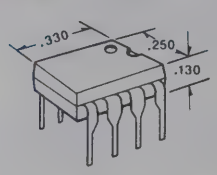
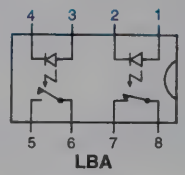
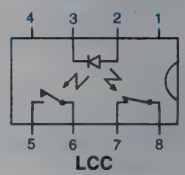
OPTOMOS® AC/DC SOLID-STATE SWITCHES





LBA



LCC

Typical applications include tip/ring interface, hookswitch/dial pulse, AC ring injection, groundstart, flying capacitor multiplexing, I/O modules, microprocessor interface and replacement of optocouplers and mechanical relays. Feature AC/DC switching, optical isolation to 3750V, negligible offset voltage, 100% dv/dt immunity. There is no EMF/RFI generation, no snubber needed, no contact bounce. Switches are machine insertable, wave solderable, have low drive power, long life, and conserve PC board space. Control current is 5mA on all types listed except **LCA110** (2mA) and **LCC110** (8mA). Available in 6-pin and 8-pin design. UL recognized, CSA certified, FCC compatible, BABT and BSI approved.

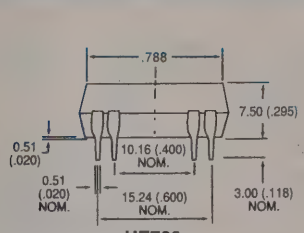
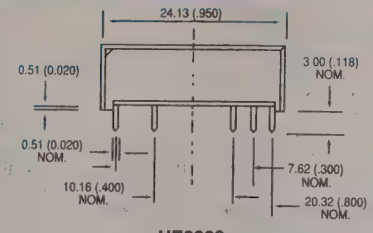
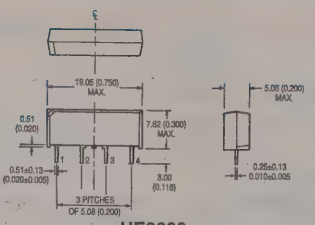
REED RELAYS



HE700



HE3300



HE3600

Relays are molded construction and compatible with automatic insertion and board washing. All contacts are run-in one million operations prior to testing. Operating temperature: –40°C to +85°C, immune to 50G shock and 20G vibration. 10-2000Hz. Maximum contact resistance 200 milliohms. Other voltages are also available; *contact your local Newark sales office.*

REED RELAYS

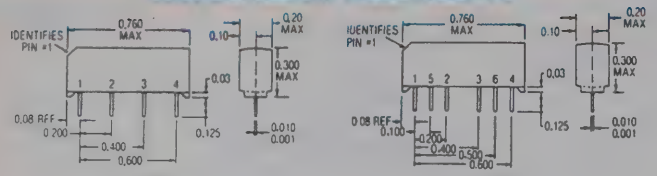
9000 SERIES SIP REED RELAYS



Type 9001 engineered for low-level switching, and **9002** is ideal for 50-ohm transmission line switching as found in VSLI, ATE, and other applications. Designed for mounting on 0.2″ (5.08) centers and automatic insertion using SIP equipment. Rugged, epoxy-molded, lead frame package is impervious to cleaning fluids and enables use in harsh, industrial environments. **Type 9001** is 4-pin, SPST SIP and **9002** is 6-pin, SPST SIP. **5th** and **6th digits** of type no. indicate 5 or 12 volt coil: **-01 suffix** denotes internal diode option and **-02** indicates 1B contact form with positive no. 2 pin. Relays with a magnetic shield coil suppression diode are also available. **Type 9090** relays feature similar functional characteristics as **type 9000SIP**, but require only 60% of the board area. *Contact your local Newark sales office.*

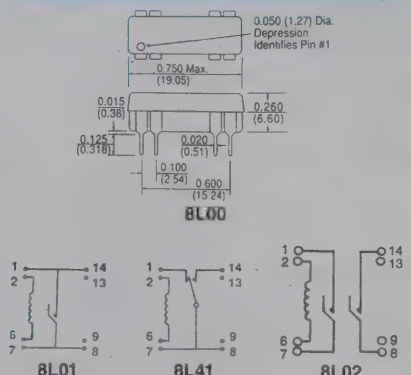
8L00 SERIES DIP REED RELAYS



8L00 Spartan series relays utilize the industry standard 14 pin molded DIP package. Relays are available in either 1A, 2A, 1B, or 1C configurations and coil voltages ranging from 5 to 24 volts. Industry standard coil resistance. Switching voltages: **Types 8L01** and **8L02** are 200V; **type 8L41** is 100V. Contact ratings: **types 8L01** and **8L02** are 10W; and **type 8L41** is 3W.

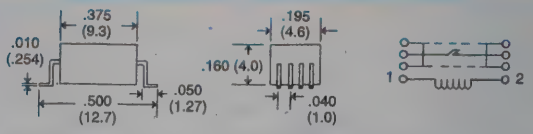
9800 SERIES RF 4GHz REED RELAY



9800 series is the newest surface mount relay featuring a compact size (0.195W x 0.375″L) and molded thermoset body. The **9800** is fitted with a coaxial shield to provide 50Ω impedance, making it ideal for RF (up to 5GHz) and fast rise time pulse switching. Coil resistance: 150Ω. The relay is available with gull-wing, axial, and J-lead configurations. (Gull-wing depicted.) *Contact your local Newark sales office for details.*

Stock No.	Type	Contact	Switching Voltage	Contact Rating	1-99	100-249

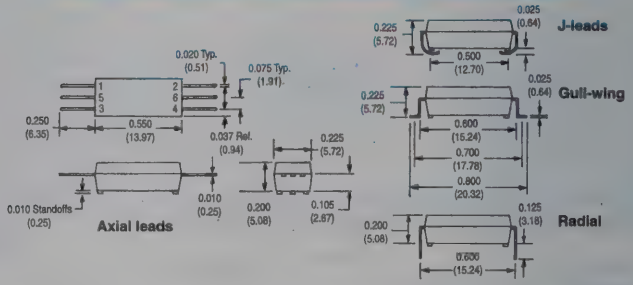
(3663) (de03956)

9400 SERIES SURFACE-MOUNT REED RELAYS



Type 9401 4-pin SPST relay for low-level signal switching. **Type 9402** 6-pin SPST relay features identical switching characteristics to **type 9401** but is fitted with a coaxial shield for 50Ω transmission line impedance. **Type 9402** provides RF and fast rise time pulse switching up to 2.0GHz. Contact rating: 10W. Low capacitance; contact to shield is 1.1pF typical. Switching current is 0.5A for all relays listed. Coil resistance is 200Ω for relays with **-05-** in type number; 825Ω for relays with **-12-** in type number.

Stock No.	Type	Switching Voltage (V)	1-99	100-249

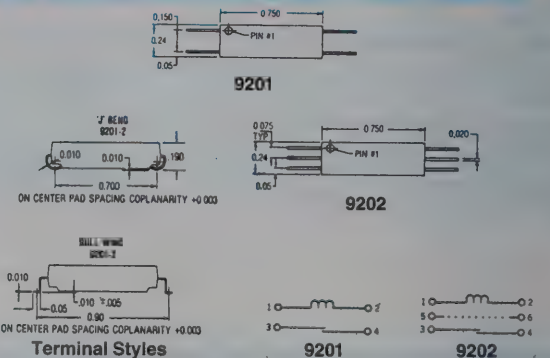
9200 SERIES SURFACE-MOUNT REED RELAYS



9201 4-pin SPST relay is ideal for low-level signal switching. The **9202** 6-pin SPST relay features identical switching characteristics to the **9201** but is fitted with a coaxial shield for 50Ω transmission line impedance. Switching current: 0.5A. Contact Rating: 10w. The relays are available with gull-wing, axial, radial and "J" lead configurations. The -20 in the part numbers below represents the J-lead and the -00 is the gull wing version.

Stock No.	Type	Switching Voltage	Coil Resist.	1-99	100-249

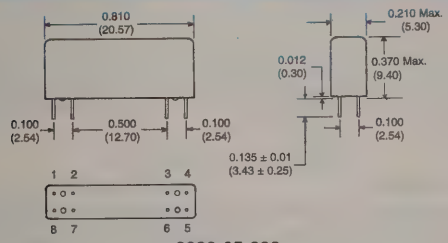
2300 SERIES SMALLEST MULTIPOLE RELAY



2333-05-000

Designed for high density packaging and versatility in a multipole relay. Applications include data acquisition, process control, and automatic test equipment. 1 form C normally open and normally closed contacts have individual switch capsules for reliability. The **2300 series** occupies only 0.17" (4.32) of PC board space – yet its additional height allows for 3 Form A and 2 Form C. Contacts are hermetically sealed. Special **2300 series** designs include 2A (200V, 10W), 3C (100V, 3W) and 3A (200V, 10W) configurations. The 1C Form has a switching voltage of 200V with a contact rating of 10W.

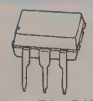
G2 SERIES SOLID-STATE RELAYS

NEW



8-Pin Surface Mount 6-Pin DIP

The **G2 Series** relays are solid-state devices that can be used as an alternative to reed or electromechanical relays. The LED input on these relays is optically coupled to the MOSFET outputs; providing 3750V I/O isolation. Available in standard thru-hole or low-profile surface mount configurations. Tape and reel quantities also available; *contact your local Newark sales office.* UL recognized, CSA certified, VDE approved.

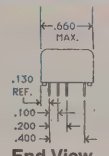
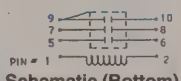
3600 SERIES THERMAL EMF REED RELAYS

Side View



End View



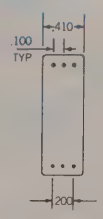
Schematic (Bottom)

3600 series relays provide ultra-low thermal EMF characteristics suited for instrumentation and data acquisition/process control applications. Relays are available in 1, 2 and 3 form A configurations with thermal EMF ratings ranging from 5μV to 500nV. Mercury-wetted and high voltage relays are also available in the low thermal packages.

Stock No.	Type	Contact Rating	Switching Voltage-Max.	1-99	100-249
50F4974	3675-0000	5 Watts	150 Volts	13.39	8.04

(3689) (de51851)

7000 SERIES DRY REED STANDARD RELAYS



7101

7000 series high reliability reed relays are ideally suited for data acquisition/process control, telecommunications and general purpose applications. These models are specifically designed for high quality with a large assortment of switching capabilities. The contact forms range from single to multiple (4 maximum) poles in dry and mercury-wetted form A, form B and form C contacts. High voltage and latching versions are also available. All the relays are magnetically shielded in a metal shell and are hermetically sealed in an insulating epoxy which provides a high dielectric strength.

Stock No.	Type	Contact Form	Ohms ±10% @25°C	Nom. Coil Volt	1-99	100-249	250-499	500-999

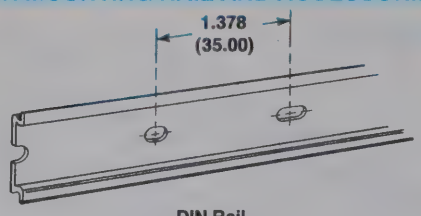
RELAY SOCKETS AND ACCESSORIES

DIN MOUNTING RAIL AND ACCESSORIES



DIN Rail

Rail Spacer and End Clip

Type 3270 low-profile 3' length DIN mounting rail designed to accommodate snap mount and surface mount sockets on same side. Made of durable extruded aluminum. Dimensions: 0.287H x 1.378W x 1.062"L (7.29 x 35.00 x 26.97). Holes on 1.378" (35.00) centers. UL recognized (file E73815), CSA certified (file LR29513M25). **Type SMS-RC** rail spacer is used for spacing between adjoining sockets. Width: 0.197" (5.00). Snaps on and off. To prevent sideward movement, use **type SMS-EC** end clip at each end of socket row.

DIN mount octal relay sockets eliminate extra mounting hardware. Snap the socket onto DIN mounting rail and it's installed. Low-profile design. Molded bodies are flexible break-resistant thermoplastic. Terminal buses are solid 1-piece stamping. Self-lifting wire clamps allow fast and secure wire connections with wire clamp terminals. **Type SMS1-21** 8-pin DPDTsocket rated 600V, 10A. **Type SMS2-32** 11-pin 3PDT socket rated 300V, 10A. Connectors are brass, nickel-plated. Pressure clamp is 6-32 x 5/16" steel, zinc-plated. Color: black. UL recognized (file E73815), CSA certified (file LR29513M25).

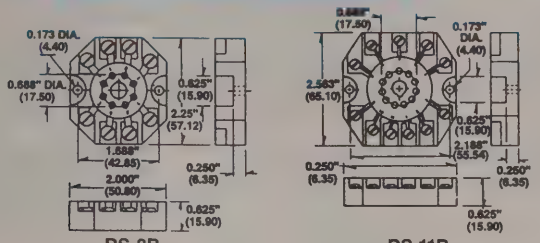
RELAY SOCKETS

8- AND 11-PIN OCTAL SOCKETS



RS-8B RS-11B

Closed back thermoplastic terminal sockets with pressure clamp screws are rated 600V, 10A. 8- and 11-pin octal-style sockets are heavy-duty. Connectors are nickel-plated brass. Color: black. UL recognized E73815, CSA certified LR29513M25.

Stock No.	Type	Description	1-24	25-49	50-99	100-999

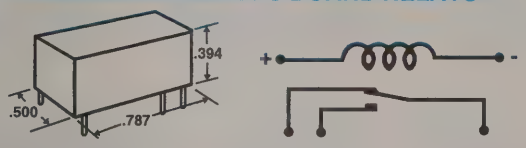
276 SERIES POWER PC BOARD RELAYS



SPST miniature relays feature grid spacing of 0.1″ and require 0.394″ clearance above the PC board. Single side stable design, provides a maximum switching current of 7A @ 240VAC or 30VDC and up to 380VAC and 125VDC at lower currents. 5kV surge resistance coil to contact meets international 4mm spacing between coils and contacts. Also available in 10A versions. UL recognized, CSA certified.

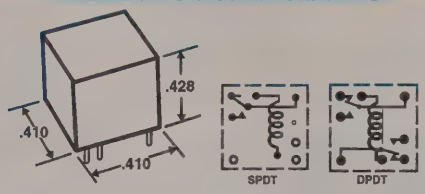
7 SERIES PC BOARD RELAYS



Epoxy-sealed class **7 series** PC mountable micro-miniature relays. Bifurcated contacts ideal for low level switching applications up to 2A @ 120VAC. Excellent RF switching characteristics. Life expectancy 100 million mechanical operations. Requires .155 sq. in. of circuit board space. UL recognized.

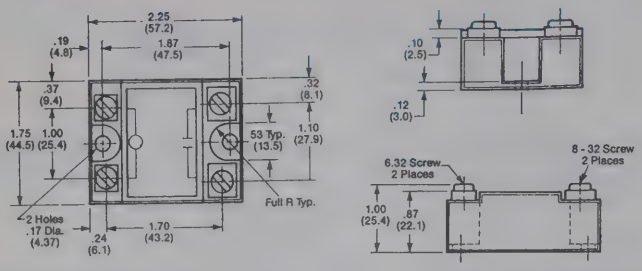
SOLID-STATE AND GENERAL-PURPOSE RELAYS

6 SERIES SOLID STATE RELAYS



High reliability, opto-isolated solid state AC output relays enable switching of AC power loads up to 75A and DC output models to switch loads up to 40A DC. AC output circuit has back-to-back dual SCRs. Isolation voltage: 4000VAC std. (input to output). Temperature range: –30 to +80°C. Input control voltage range for DC input with AC output is 3 to 32 VDC. AC input with AC output is 90 to 280 VAC, DC input with DC output is 3.5 to 32 VDC. Input Current DC: 12 mA @ 5 VDC. Input current AC: 8.5 mA @ 120 VAC, 22 nA @ 240 VAC. Leakage Current: 8 mA @ 120 VAC, 10mA max. @ 240 VAC. All types come with LED lamp indicator.

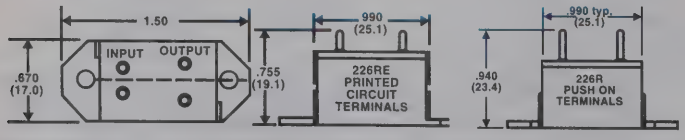
(3970) (de00243)

226 SERIES SOLID STATE RELAYS



226 series relays are encapsulated. Compatible with TTL gates, these relays mount to TO-3 transistor heat sinks for increased current handling capacity. Units handle loads 50mA to 7.5A. Connections can be made via standard slip-on connectors or units can be inverted and inserted into PC board for wave soldering. Termination pins are on standard 0.1″ grid pin spacing and are polarized to prevent reverse voltage plug-in. High-sensitivity, along with 2500V rms and 10^{12} ohms isolation ratings, make units ideal output devices when going from low level logic to line voltage loads. Leakage: 0.1mA. 400 VAC min. repetitive peak blocking voltage.

PRINTED CIRCUIT TERMINALS

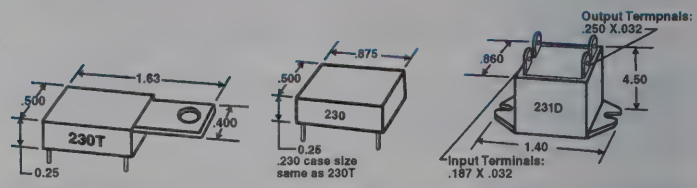
(3972) (de00245)

230/231 SERIES SOLID STATE RELAYS



230/231 series relays are optically coupled with zero-voltage switching. Leakage is less than 1mA. Units handle 1-cycle, 20A surges. Isolation I/O is 2500V rms. SPST-NO. Type suffix indicates input volts. –30 to +80°C temperature. **Class 230** 16-pin DIP pinout. Input 1 & 16; output 8 & 10. Model 230 rated at 1.5A max. 230T rated at 3.0A max., 231 rated at 4.0A max.

GENERAL-PURPOSE AND POWER RELAYS

67 SERIES PLUG-IN OR PANEL MOUNT RELAYS

	"A" DIM.	"B" DIM.
SPDT DPDT	.978 (24.8)	.344 (8.7)
4PDT	1.156 (29.4)	.562 (14.3)
6PDT	1.374 (34.9)	.780 (19.8)
8PDT	1.592 (4.04)	1.000 (25.4)

Standard **Class 67** miniature relays are designed for applications requiring DPDT to 8PDT contacts where space and weight are of prime importance. Shatter resistant, see-thru plastic covers are utilized to protect against dust, tampering and electrical shock. The 67T models have Bifucated Contacts and are designed for low level switching applications. Rated @ 3 or 5 Amps @ 120VAC/28 VDC. UL recognized, CSA certified.

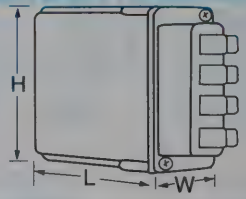
21 SERIES FLASH TRANSFER RELAYS



Plug-in base with polarizing pin. DPDT contacts switch tungsten lamp loads up to 10A @ 240VAC. Incorporates rectified coil for chatter-free operation in brownout conditions down to 85VAC. Expected life: 200,000 operations at 10A, tungsten loads. Size: 2.47H x 2.84L x 1.85"W. UL recognized, CSA certified. Meets NEMA Std. TS 2 1992, Approved by D.O.T.

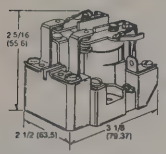
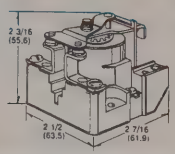
POWER AND INDUSTRIAL RELAYS

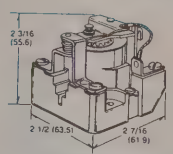
199 SERIES HEAVY-DUTY 30A POWER RELAYS



W199 SPDT



W199 SPST-NO-DM



W199 DPDT

5/16" (7.95) diameter silver cadmium oxide gold flashed contacts are rated at 30A up to 300VAC, 50/60Hz. Class B insulation system. Dielectric withstanding voltage between open contacts: 1500V; between mutually insulated conductive elements: 2200V. Screw terminals. Molded phenolic base. UL listed E43641, CSA certified LR37547, CE compliant.

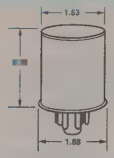
88HP SERIES OCTAL PLUG-IN WITH HERMETICALLY SEALED STEEL ENCLOSURE



Highly reliable, general purpose relays have glass melamine insulation for high dielectric strength and resistance to humidity or temperature change. Molded nylon bobbin and coil cover. Silver-cadmium oxide, gold flash contacts rated 10A 120/240VAC/28VDC resistive. Steel enclosure fillled with dry nitrogen, solder sealed to help prevent contamination of internal parts.

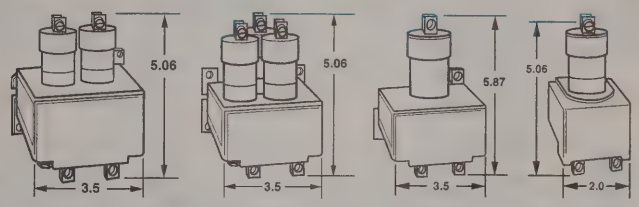
WM SERIES MERCURY DISPLACEMENT RELAYS (MDR)



MDRs handle tungsten resistive and motor loads. Ratings range: 30A-100A, up to 600VAC or 250VDC at lower currents. Contractor tubes hermetically sealed in steel. Frequency of operation: 60 per minute max. Pull-in voltage: 80% of rated voltage typical for AC and DC models. Operate time typical: 50 milliseconds. Operating temperature: –35°C to +60°C.

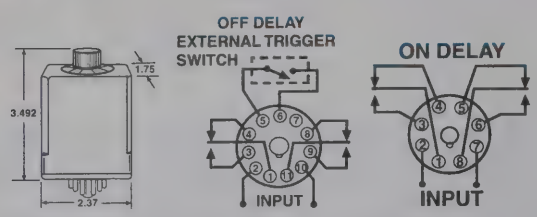
TIME-DELAY AND SENSING RELAYS

211 SERIES OCTAL TIME-DELAY RELAYS



CMOS circuitry controls operation and maintains timing accuracy to ±0.1% or 33mS AC, ±10ms DC at constant voltage and temperature. Rated 10A @ 120VAC/28VDC. 50,000,000 operations mechanical life. 500,000 operations at rated load. Meet NEMA noise immunity and 5,000 volt test. Temperature range: –30° to +55°C. *Order sockets separately on page 731.* UL listed. UL recognized, CSA certified.

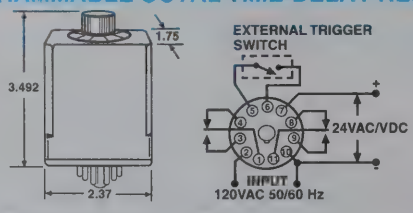
(4044) (de51601)

CLASS 211 PROGRAMMABLE OCTAL TIME-DELAY RELAY



Features 4 separate timer functions: "on delay," "off delay," "one shot," and "on-plus-off delay." Capable of 62 timing ranges from 0.1 seconds to 2 hours. Input 120VAC, 24VAC or 24VDC. DPDT contacts rated 10AC 120VAC/30VDC. DIP switch enables the programming functions. Size is the same as the standard **211 series** time delay relay. Life:500,000 operations at rated load. *Order sockets separately on page 731.*UL listed when used with **type 70-465-1** socket. UL recognized, CSA certified.

Stock No.	Type	Timing Range	Input Voltage	1-9	10-24

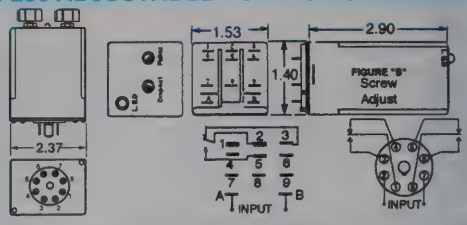
(12626) (ne09981)

CLASS 236 ADJUSTABLE VOLTAGE SENSING RELAYS



Class 236 voltage sensing relays combine a solid-state sensor with a SPDT, 13A or DPDT, 10A relay contacts. Field adjustable for pull-in and dropout. Can be used either as an over or under voltage detecting relay. Sensor is non-latching and has no time delay. Pull-in: 75% to 115% of nominal. Dropout: 75% to 95% of pull-in. UL recognized, CSA certified.

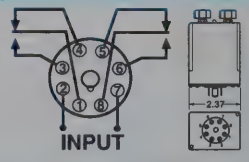
(12542) (ne09985)

CLASS 222 REPEAT CYCLE TIMER

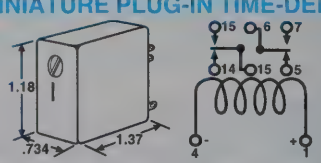


Independently adjustable for both On and Off timing. Octal style pin terminals and dual timing knobs. Rated 10A @ 120VAC.28VDC. 2⅜"W x 2⅞"H. Eight-pin octal plug-in. *Order socket separately on page 731.*

Stock No.	Type	Timing Range	Input Voltage	1-9	10-24
44F846	W222ACPFX-16	3-300 Sec.	120VAC	86.28	75.94

(4048) (de51605)

CLASS 67 MINIATURE PLUG-IN TIME-DELAY RELAYS

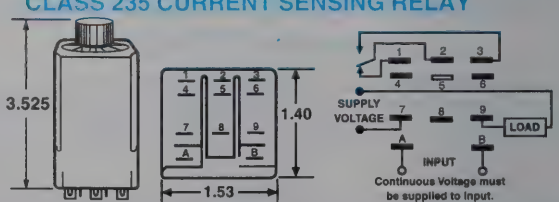


On-delay relays are slow operating. DPDT contacts are rated 5A @ 120VAC, 28VDC resistive. Timing adjustment by screw. Operating temperature: –10°C to +55°C. *Plug-in style use class 67, 6-pole socket, ordered separately on page 732.*

Stock No.	Type	Timing Range	Input Voltage	1-9	10-24
56F1000	W67CPS0X-1	0.1-30 Sec	12VDC	52.34	46.07
56F1001	W67CPS0X-2	0.1-30 Sec	24VDC	52.34	46.07

(4047) (de51604)

CLASS 235 CURRENT SENSING RELAY



Class 235 relays are field adjustable for detecting AC current levels. The sensor is non-latching and has no time delay. Contacts: rated at 10A @ 120VAC, 6A @ 28VDC. Current detection range: 1.5A to 15A. Operating temperature: –10 to +55°C. 3⁄16" terminal is socket compatible with 388 series sockets . ¼" terminal is solder/QC and not socket compatible, uses taped hole and anti-rotation tab for panel mount.

Stock No.	Type	Terminals	Input Voltage	1-9	10-24

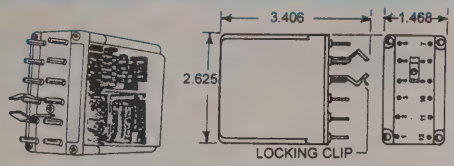
GENERAL-PURPOSE RELAYS & SOCKETS

219 SERIES GENERAL-PURPOSE RELAYS



219 series general purpose industrial plug-in relays feature 12-pin or 14-pin bases with locking clip. Contacts: gold diffused silver cadmium oxide rated at 10A. Maximum total current 30A for all poles. The coil is encapsulated for protection. Nuclear qualifed versions are available; *contact your local Newark sales office.* UL recognized, CSA certified.

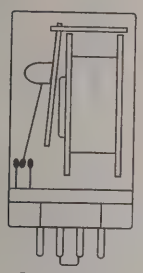
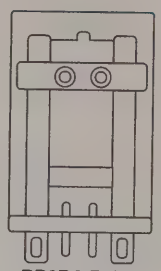
RELAYS AND ACCESSORIES

GENERAL-PURPOSE POWER RELAYS

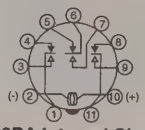


RR2P Relay

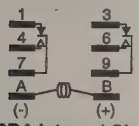


RR2BA Relay

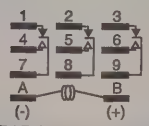
RR2P Internal Circuit



RR3PA Internal Circuit



RR2BA Internal Circuit



RR3B Internal Circuit

RR series relays feature 10-amp capacity. Contact material is silver. Operating time: 25ms. Temperature range: –25°F to +158°F. Mount into standard 8- (DPDT) or 11-pin (3PDT) octal sockets. **UL** in type number denotes units with indicator lights. Both pin termination and blade termination are plug-styles. UL recognized, CSA certified, CE marked (pin terminaton only), and TUV approved.

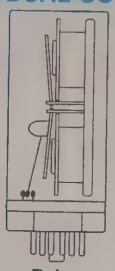
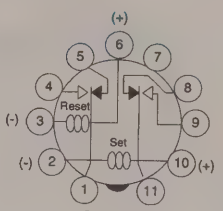
DUAL-COIL LATCHING RELAYS



Relay



Circuit

RR2KP series relays feature 2 Form C silver contacts rated 10 amps and 10MΩ contact resistance. Operation time: 25ms. Temperature range: –30°C to +70°C. All are 11-pin termination and DPDT. UL recognized, CSA certified.

Stock No.	Type	Rated	Coil Ohms	Each
91F5565	RR2KP-UAC24V	24VAC, 92mA	95Ω	33.42

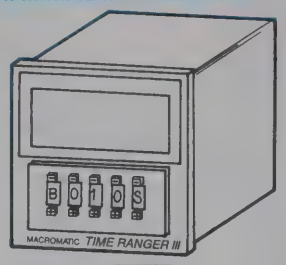
TIME RANGER™ III DIGITAL-SET MULTI-FUNCTION PROGRAMMABLE TIME DELAY RELAY



9816U1

Features eight field-selectable functions: On Delay, Flasher, Interval/Off Delay, Off Delay (two versions), Interval, Delayed Interval and On Delay/Off Delay. LCD display with output status indicator and percent-of-time-remaining bar. Pushbutton thumbwheels for accurate digital setting of time delay. Programmable timing range: 0.1 second to 9,990 hours. Load (burden): 3 watts. Repeat accuracy: ±0.3%. Temperature range: 10°C to +55°C (14°F to 131°F). Output: 3A SPDT resistive at 250VAC, 5A resistive at 28VDC. UL recognized, CSA certified. *Order sockets and accessories separately on this page.*

Stock No.	Type	Input Voltage	Socket	1-4	5-9

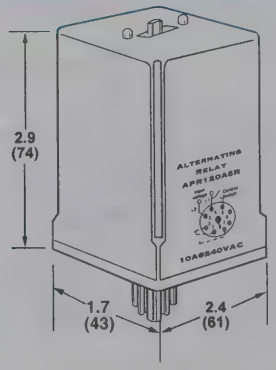
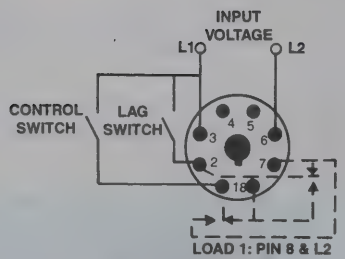
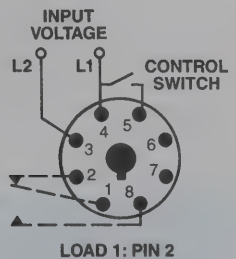
(9616) (ne08048)

ALTERNATING RELAY





DPDT Cross-Wired



SPDT

Used for systems requiring equal run time of two loads. DPDT cross-wired output allows either alternating loads or simultaneous operation of both loads. Selector switch electrically locks in one sequence. Two LEDs indicate relay status. Output: SPDT or DPDT cross-wired 10A resistive at 240VAC/30VDC, ½hp at 240VAC. Response time: 50ms. Temperature: –28°C to 65°C (–20°F to 150°F). Power required: 3VA. UL recognized, CSA certified. *Order sockets separately on this page.*

SPDT OUTPUT CONTACTS – 8 PIN OCTAL SOCKET

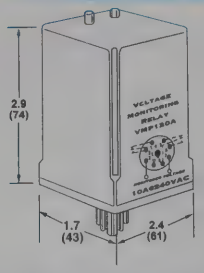
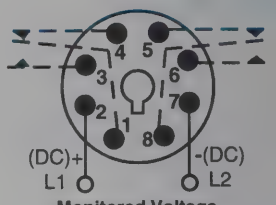
(4067) (ne08052)

VOLTAGE MONITORING RELAY





Monitored Voltage

Monitors AC single-phase or DC voltages. Pick-up voltage setting is adjustable from 85-115% of nominal. Drop-out voltage is fixed at 3% below pick-up setting. Relay energizes when the monitored voltage is above the pick-up setting. LED indicates relay status. Output: DPDT 10A resistive at 240VAC/30VDC, ½hp at 240VAC. Response time: 50ms for both pick-up and drop-out. Temperature: –28°C to +65°C (–20°F to +150°F). Power required: 3VA. UL recognized, CSA certified. *Order sockets separately on this page.*

Stock No.	Type	Nominal Voltage	Pick-up Voltage	Drop-out Voltage	Socket	1-4	5-9

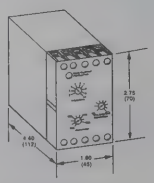
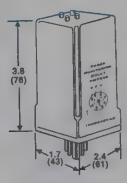
(4086) (ne08051)

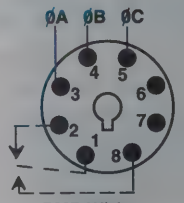
PHASE MONITORING RELAY



PMD Surface-Mount



PMP Plug-in



PMP Wiring

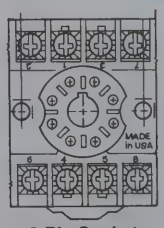
Protects against phase loss, phase reversal, phase unbalance, and undervoltage. Relay features user-selectable phase unbalance (2-10%) and undervoltage settings. Adjustable time-delay drop-out (0.1-20 seconds) on undervoltage prevents nuisance tripping. LED indicates both normal and fault conditions. Output: SPDT (**Types PMP**) or DPDT (**Types PMD**) 10A resistive at 240VAC/30VDC, ½hp at 240VAC. Temperature: –28°C to 65°C (–20°F to 150°F). Power required: 3VA. Reset: automatic. UL recognized, CSA certified. *Order sockets separately on this page.*

Stock No.	Type	Operating Voltage (50-60Hz)	Adjustable Undervoltage Range	1-4	5-9	10-24
16F1118	PMP240*	208/240VAC	180-230V	95.81	87.00	81.42
01F1878	PMP480*	480VAC	360-460V	101.48	92.15	84.57
01F1879	PMD240	208/240VAC	180-230V	117.24	106.46	97.70
16F1117	PMD480	480VAC	360-460V	126.07	114.48	107.13

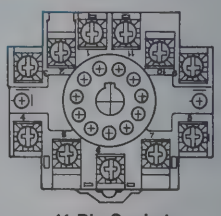
*PMP240 requires 70169-D socket; PMP480 requires 70175 socket.

(4085) (ne08049)

SOCKETS



8-Pin Socket



11-Pin Socket

Units are made for use with all Macromatic plug-in products. Sockets feature pressure wire clamps and can be either DIN track except **type 70175** or direct panel-mounted. UL recognized, CSA certified.

Stock No.	Type	Description	1-9	10-24	25-49
66F2892	70169-D	8-Pin Octal (300V)	5.90	5.37	4.93

(4088) (ne08053)

TIME-DELAY RELAYS

TIME RANGER™ PROGRAMMABLE TIME-DELAY RELAYS

User sets delay from one of 16 time ranges built-in to each unit and then adjusts within selected range using knob on top. No math is required. The 16 time ranges cover 0.1 seconds to 2 hours (0.6 seconds to 24 hours on SS-631, SS-651, SS-661 & SS-681). Output: DPDT 10A resistive @ 240VAC/30VDC, 1/3hp @ 240VAC. Repeat accuracy: ±0.1%. Temperature: –28° to 65°C (–20° to 150°F). Power required: 3VA. UL recognized, CSA certified. *Order 8-pin and 11-pin space saver sockets separately on page 738.*

SS 602 ON-DELAY

Upon application of input voltage, a preset time begins. At the end of the preset time, the relay contacts transfer. Input voltage must be removed and re-applied to reset the time delay relay.

Stock No.	Type	Input	Socket	1-9	10-24	25-49
46F5879	SS 60222	120VAC/DC	8 Pin Octal	61.51	55.99	51.42
46F5881	SS 60228	24VAC/DC	70169-D	61.51	55.99	51.42
46F5880	SS 60226	12VAC/DC		61.51	55.99	51.42

SS 605 INTERVAL ON

Upon application of input voltage, the relay contacts transfer and a preset time begins. At the end of the preset time, the contacts return to their normal condition. Input voltage must be removed and reapplied to reset the time delay relay.

46F5882	SS 60522	120VAC/DC	8 Pin Octal	65.35	59.49	54.64
46F5883	SS 60528	24VAC/DC	70169-D	65.35	59.49	54.64

SS 616 OFF DELAY (TERMINAL 5-6 TRIGGER)

Input voltage must first be applied. Upon closure of the control switch, the relay contacts transfer and hold. Upon opening of the control switch, a preset time begins. At the end of the preset time, the relay contacts will return to their normal condition. Any application of the control switch will reset the time. The time delay relay is reset by closing the control switch.

46F5885	SS 61622	120VAC/DC	11 Pin Octal	73.68	67.07	61.60
46F5886	SS 61628	24VAC/DC	70170-D	73.68	67.07	61.60

SS 619 OFF DELAY (POWERED TRIGGER)

ACTION. Same as **616 series.**

Stock No.	Type	Input	Socket	1-9	10-24	25-49
46F5888	SS 61922	120VAC/DC	11 Pin Octal	84.89	77.28	70.97
46F5889	SS 61928	24VAC/DC	70170-D	84.89	77.28	70.97

SS 615 MOMENTARY INTERVAL (SINGLE SHOT)

Input voltage must first be applied. Upon closure of the control switch, the relay contacts transfer and the preset time begins. During the time-out, the trigger input is ignored. The time delay relay is rest by applying the trigger when the relay is not energized.

46F5884	SS 61522	120VAC/DC	11 Pin Octal	69.20	62.99	57.85
98F2045	SS 61526	12VAC/DC	70170-D	64.07	58.33	53.57
01F1875	SS 61528	24VAC/DC	70170-D	68.08	61.82	56.73

SS 618 WATCHDOG (POWERED TRIGGER)

Input voltage must first be applied. Upon closure of the control switch, the relay contacts transfer and the preset time begins. At the end of the preset time, the relay contacts return to their normal condition unless the control switch is opened and closed before the preset time elapses. Continuous cycling of the trigger at a rate faster than the preset time will cause the relay contacts to remain closed.

01F1876	SS 61822	120VAC/DC	11 Pin Octal	72.49	65.82	60.41
01F1877	SS 61828	24VAC/DC	70170-D	72.49	65.82	60.41

SS 631 REPEAT CYCLE

Upon application of input voltage, OFF time begins. When the OFF time is completed, the ON time begins. The sequence repeats until the input voltage is removed. The OFF time and ON time are independently adjustable.

90F1395	SS 63122	120VAC/DC	8 Pin Octal	83.52	75.84	70.97
90F1396	SS 63128	24VAC/DC	70169-D	83.52	75.84	70.97

SS 651 REPEAT CYCLE

Upon application of input voltage, ON time begins. When the ON time is completed, the OFF time begins. The sequence repeats until the input voltage is removed. The ON time and OFF time are independently adjustable.

90F1397	SS 65122	120VAC/DC	8 Pin Octal	83.52	75.84	70.97
90F1398	SS 65128	24VAC/DC	70169-D	83.52	75.84	70.97

SS 661 DELAYED INTERNAL

Upon application of input voltage, OFF time begins. When the OFF time is completed, the ON time begins. When ON time is completed, sequence stops. Input voltage must be removed and reapplied to initiate action again. The ON time and OFF time are independently adjustable.

90F1399	SS 66122	120VAC/DC	8 Pin Octal	83.52	75.84	70.97
90F1400	SS 66128	24VAC/DC	70169-D	83.52	75.84	70.97

SS 681 MULTI-FUNCTION

Offering 4 field-selectable operating modes (On Delay, Interval On, Off Delay & Single Shot) and 16 time ranges (0.6 seconds to 24 hours) in one unit.

83F4313	SS 68122	120VAC/DC	11 Pin Octal	77.22	70.12	64.35
83F4314	SS 68128	24VAC/DC	70170-D	77.22	70.12	64.35

(4073) (de90480)

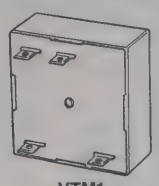
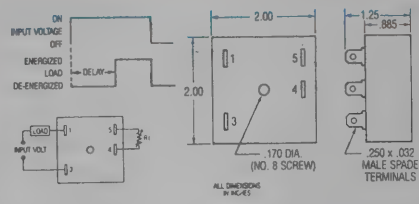
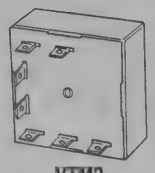
INDUSTRIAL GRADE SOLID STATE MINIATURE TIMING MODULES

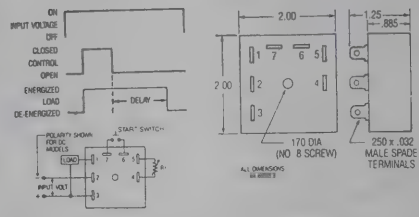


VTM1





VTM2



VTM series designed for demanding industrial applications. Repeat accuracy ±1% at constant temperature. 100,000,000 operations at rated load. **VTM1/VTMA1** time-delay operation begins when operating voltage is applied. At the end of the preset time-delay, the output relay (load) is energized until operating voltage is removed. To reset, remove operating voltage. Operation for **VTM2** off delay models: operating voltage is applied continuously. The output relay (load) is energized when a normally-open control switch is closed (the load remains energized as long as the switch is closed). When the control switch is re-opened, time delay begins. If the control state is reversed during time-delay period, the delay generating circuit automatically resets to zero.

VTM1A1 ON DELAY 24-240VAC/VDC

Stock No.	Type	Time Range	Each
98F9869	VTMA1ULA	24-480 sec.	29.04

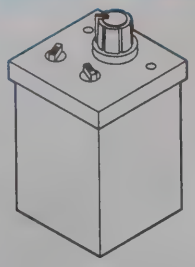
KNOB VERSION TIME DELAY AND UNDERVOLTAGE RELAYS

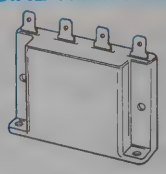


48K series knob version time delay relays are built in a 1/16 DIN package and feature timing ranges of 0.1 sec. to 10 hours. 10A, DPDT contact rating. Universal models (**US** in type number) feature two 8-position switches and linear analog knob with 4 or 8 selectable timing modes. Also feature power on LED and output contacts LED (timing: blinks; energized: on). 120VAC model features one 8-position switch, linear analog knob and output contacts LED. Rated NEMA 1. Operating temperature range: –13°F to 140°F. **Type VMA** solid-state undervoltage relay protects equipment in DC or single phase AC systems. 120VAC nominal, 104V pick up, 78-99V drop out. Time delay relays are UL recognized, CSA certified.

Stock No.	Mode	Voltage	Each
97F7740	8-Pin, Multi-Mode	24-240VAC/DC	75.00
97F7741	11-Pin, Multi-Mode	24-240VAC/DC	79.02

46F8515 Type VMAXAA. **Each** **93.75**
83F7116 Type VMAXBA. **Each** **99.64**
(4017) (de03596)

UNIVERSIAL TIMING MODULES



VTM-1 Miniature Timing modules are simple, encapsulated units remarkably small in size and high reliable. In-line timing module is wired in series with load circuit. Time delay is initiated when power is applied to the series network. Connecting a resistor across the center terminates provides tamper-proof setting of time delay from 1-10,000 secs. Quick-connect terminals (¼") for input line, load output, and timing resistor. Repeat accuracy ±0.1%. Output: solid state SPNO, 1 ampere inductive at nominal operating voltage. 10 million operations at rated load. Operating temperature -30°C to +65°C. UL recognized.

Stock No.	Type	Description	Each
95F9584	1300-010-426	1-1000 Secs	1.17
83F7121	VTM-10	1-10,000 Sec	32.35

(32879) (ns32879)

SERIES B PLUG-IN SOCKETS

DIN track or back panel mount. Feature mechanism that holds socket firmly on track. Brass, nickel-plated connectors. UL recognized, CSA certified.

Stock No.	Type	Description	Each
28F1962	BCSA08SC	8 Pin Octal Socket	12.21
28F1963	BCSA11SC	11 Pin Octal Socket	15.84

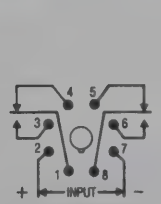
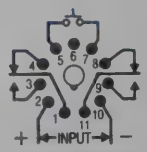
(4010) (de02324)

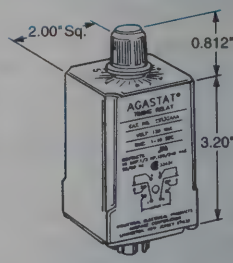
INDUSTRIAL AND INSTRUMENT GRADE SOLID-STATE TIMERS



SST1



SST2



Features high repeat accuracy with digital timing circuitry. Fast, easy setting with time-calibration knobs. Repeating accuracy ±1% . Mechanical life: 10,000,000 operations. Temperature range –23.3°C to + 54.4°C. Operation for **SST1** on-delay model begins when operating voltage is applied. At end of preset time-delay, output relay (load) is energized until operating voltage is removed. To reset, remove operating voltage. Terminated with 8-pin Octal Plug *ordered separately on this page* . Operation for **SST2** off-delay model: operating voltage is applied continuously. The output relay (load) is energized when a normally-open control switch is closed. When control switch is re-opened, preset time delay begins. At end of preset time-delay, output relay (load) de-energizes. If control state is reversed during time-delay period, the delay generating circuit automatically resets to zero. To reset, close control switch. All types are UL recognized and CSA certified. Terminated with 11-pin octal plug, *ordered separately on this page.*

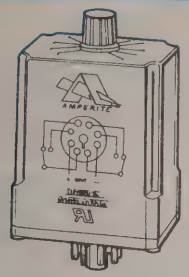
TIME-DELAY RELAYS AND FLASHERS

C10/CR10 SERIES TIME-DELAY RELAYS



Economical, octal-style plug-in models with solid state analog circuitry have 10 amp DPDT contacts. Models are knob adjustable. **C-10 types** are delay-on-operate, white case, **CR-10 types** are delay-on-release, black case. Operating range: –45°C to +70°C.Type number prefix denotes input voltage. UL recognized. CSA approved.

DC10/DCR10 TIME-DELAY RELAYS

DC10 series delay-on-operate CMOS digital TDR's have an 8-pin octal base. **DCR10** delay-on-release CMOS digital TDR's have an 11-pin base. Both series' are rated 10A @ 240 VAC, 15A @ 30 VDC. Contacts: DPDT. Dimensions: 2 5⁄8L x 1¾W x 2⅜″. Temperature range: UL recognized, CSA certified –45° to +70° C. Type number prefix denotes input voltage. UL recognized, CSA certified.

DOD SERIES TIME-DELAY RELAYS

DOD series time-delay relays feature solid-state analog circuitry and true delay-on dropout with 8-pin base. Contacts are gold clad silver alloy, arranged 2 form C (DPDT) and are rated 1000VA, 90W maximum switching power, 250VAC, 48VDC maximum switching voltage and 4 amperes maximum switching current. Power requirements: AC units—2VA or less; DC units—2 watts or less. Type number prefix denotes input voltage. UL listed, CSA Certified.

GLASS TUBE TIME-DELAY RELAYS

Standard octal or miniature 9-Pin relays. Power consumption is 2.3 watts. Temperature operating range –55°C to +80°C. Contact rating: 3 amps @ 115VAC. Relays listed have a voltage of 115VAC/DC. Other voltages are available. Contacts are SPST. UL recognized.

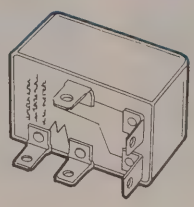
C AND CR SERIES LOW AMP TDRs



C and **CR series** economical time delay relays have analog circuitry. SPST or SPDT contacts; rated 1A @ 32VAC, ½A @ 115VAC. **C series** is delay-on-make, 0.1-60 seconds delay. **CR series** is delay-on-release. 0.110″ male solder terminals. Dimensions are 1 1⁄16 x 1½ x 15⁄16″. Input voltage is indicated by first digits of type number.

DFA SERIES ADJUSTABLE RECYCLING TIMERS (FLASHERS)

Solid-state digital CMOS recycle (flasher) timer circuitry with 8-pin base. On and off time user adjustable over a 100:1 span. DPDT (2 Form C) isolated 10A relay contacts. Adjustable cycling timers provide a continuously operating on/off cycle as long as power is applied to the input terminals. Two knob operated potentiometers provide user adjustment of both the flash rate and duty cycle. Type number prefix denotes input voltage.

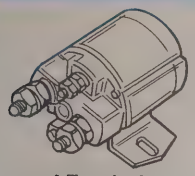
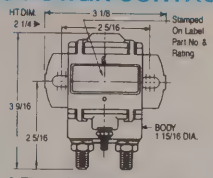
124 SERIES HEAVY-DUTY DC POWER CONTACTORS



4-Terminal



4-Terminal Dimensions

- **Dust-Proof Cover**
- **Ideal for Mobile DC Equipment**

124 series meets UL 583 Truck Standard. Heavy-duty contactors have a dust-proof cover and are suitable for rugged and high-current mobile DC equipment applications. Silver contacts rated for DC inductive load: 100A continuous; 400A inrush. Maximum continuous coil watts: 12 at rated voltage. Maximum pick-up: 75% rated coil voltage, with design ambient from –40°C to +65°C. Contact termination: 5/16″-24 UNA-2A stud. Coil termination: #10-32 UNF-2A thread. 3-terminal versions have grounded coil; 4- and 6-terminal versions have isolated coil.

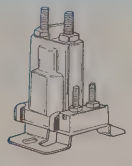
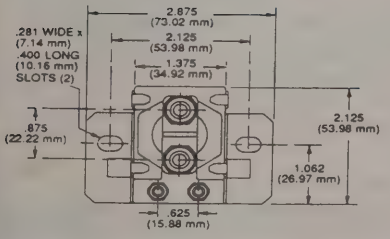
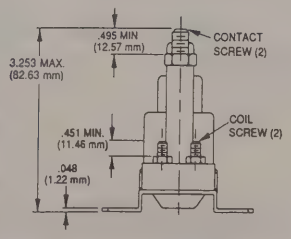
120 SERIES HEAVY-DUTY DC POWER CONTACTORS







120 series durable, water-resistant, continuous-duty contactors are ideal for high-temperature and high-vibration conditions. Circuits: SPNO. Termination: # 10-32 UNF-2A thread. Rated 100A full load, 400A inrush. Contacts: silver-alloy. Temperature range: –20°F to +150°F. Units feature standard bracket. Versions with L-shaped bracket are also available; *contact your local Newark sales office for details.*

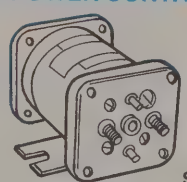
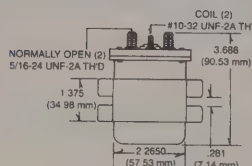
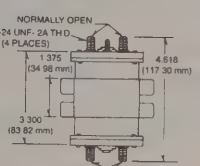
SPNO



SPDT



SPNO Dimensions



SPDT Dimensions

Designed for controlling DC starting motors on gasoline engine-driven auxiliaries, battery-charging power circuits, reversing circuits in winch applications, low-voltage DC motor-generator sets, and industrial lift trucks. Features continuous-duty coil. Incorporates double-make or double-break contacts. Coil rated at 12W continuous duty. Rated 200A continuous, 600A inrush. Contact material: silver. 4-terminals. Temperature range: –40°F to +149°F. Units are dust- and splash-proof.

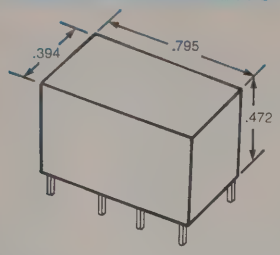
INDUSTRIAL RELAYS & ACCESSORIES

DUAL-IN-LINE RELAYS



The **MD** relay is enclosed, super-clean, inert gas-filled and epoxy sealed. It is designed for automatic printed circuit board processing. Contact rating is from low level to 2.0 amps switching, with 3.8 amps carry. Standard contact arrangement is a 2 Form C DPDT). It has bifurcated cross-bar contacts for high reliability switching. Mechanical life expectancy is 100 million operations. Two Form C bifurcated contacts gold clad and silver-palladium. Standard and high sensitivity models available. Designed for stable, low contact resistance. UL recognized component, File E90612. Conforms to FCC part 68, 304-1000 VAC. CSA file no. LR65354-1.

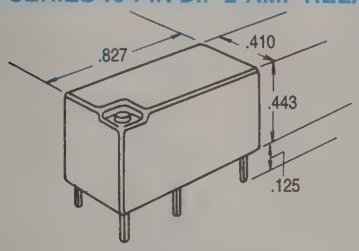
190 SERIES 16-PIN DIP 2-AMP RELAYS



DPDT relays feature silver (gold clad) contacts, rated 2 amps @ 30VDC resistive or 0.6 amp @ 120VAC resistive. Conform to FCC part 68 1500VDC surge withstand. Dielectric breakdown: 1000VAC coil to poles, 1000VAC between poles, 700VAC across open contact. Nominal power rating: 500mW. Initial contact resistance of 50 milliohms for low level switching. Inert gas sealed for direct PC board insertion and immersion. 10 million mechanical operations. UL recognized, CSA certified.

MAGNETIC LATCHING SOLENOIDS

Combine permanent magnets with conventional solenoid design to provide pull and hold action in response to momentary current pulses. Ideally suited for battery-operated devices where continuous-duty service is required but power consumption must be minimized. Dielectric strength 1500 Vrms at 60Hz. Last digits in type number indicate voltage (VDC). UL recognized.

MERCURY DISPLACEMENT RELAYS

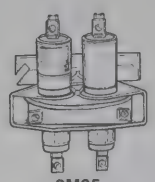
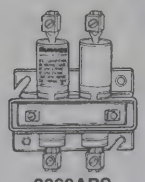
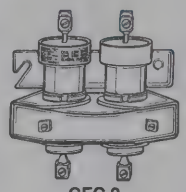
3M30 & 3030 Series



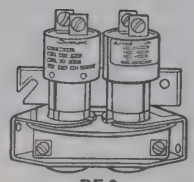
2M35



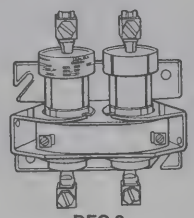
2060APS



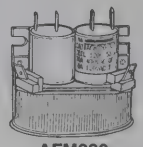
CFC 2



BF 2



DFC 2



AFM220

General purpose, resistive, motor load, and tungsten ratings are available. Typical applications are lighting and traffic controls, industrial processing equipment, and high-voltage applications. All relays are normally-open. Tubes are hermetically-sealed. Operate in a wide range of temperatures, under low or high pressure, in dust or vapor-filled atmospheres. With self-renewing liquid mercury contacts, they are virtually immune to wear, pitting or corrosion, providing long life, quiet operation. Pull-in voltage is 85% of nominal. Typical contact resistance is 4 milliohms. Operating temperature range: –35°C to +55°C. UL listed, CSA certified. **Types 3M30** and **3030** are CE and TÜV approved. Other control voltages available, 24VAC thru 480 VAC.

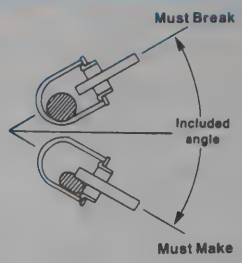
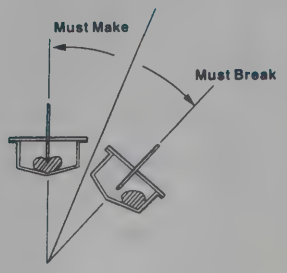
TILT AND TIP OVER SWITCHES



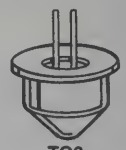


A½S-4929

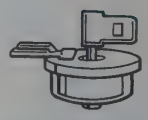
A½-4859

4380

A½-4770



TO8



Tilt and tip-over motion switches provide long contact life and quiet, dependable performance. Sealed contacts are closed to external contaminants. Self renewing, liquid mercury contacts. **A series** switches "make" when the electrode is tilted below horizontal, and "break" when tilted above horizontal. Angle specifications are dependent on rotation rates and load parameters.

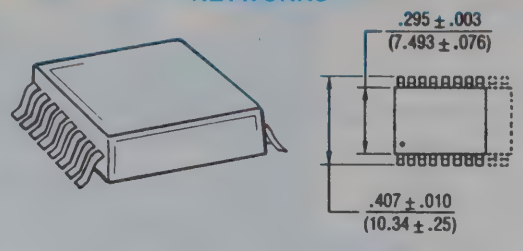
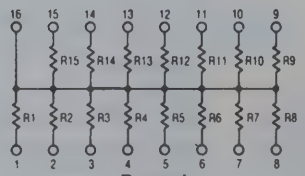
4416 AND 4816 SERIES SURFACE MOUNT RESISTOR NETWORKS

SMD



4416P
4816P

Isolated



Bussed

Surface mount, 16-pin resistor networks feature high-temperature design suitable for all popular solder techniques. Compliant leads reduce solder joint fatiguing. Superior package integrity prevents moisture damage and contamination. Operating temperature: –55°C to +125°C. Power rating @ 70°C: **44116 series**- 1.12W; **4816 series**- 1.28W. Tolerance: 10Ω to 49Ω:±1Ω; 50Ω to 2.2MΩ: ±2%. **4416 series** SOIC gull-wing form features 0.0300″ (7.62) wide body, compatible with automatic placement equipment. **4816 series** is 0.220″ (5.59) body gull-wing form with standard EIA (SOGN-0002) wide body package compatible with automatic placement equipment. **Minimum order quantity: 10 pieces.** Also available in reels of 2000 or 1500 for dual terminator networks; *contact your local Newark sales office.*

CR0603/CR0805/CR1206 THICK FILM CHIP RESISTORS

Surface mount resistors. Power rating at 70°C: **CR0603** - 0.10W; **CR0805** - 0.125W; **CR1206** - 0.25W. Temperature coefficient of resistance: ±100ppm/°C (1% tolerance); ±200ppm/°C (5% tolerance). Operating temperature: –55°C to +125°C. Max. working voltage: **CR0603 series** -50V; **CR0805 series** -100V; **CR1206 series** -200V. Additional resistance values from 10Ω to 1MΩ (1% tolerance) and from 1Ω to 10Ω (5% tolerance) also available; *contact your local Newark sales office.* **Sold in reel of 5000.**

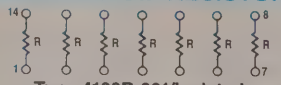
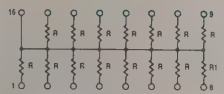
RESISTOR NETWORKS AND ARRAYS

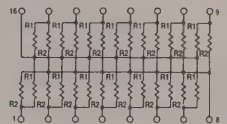
4100R SERIES MOLDED DIP RESISTOR NETWORKS



Type 4100R-001/Isolated



Type 4100R-002/Bussed



Type 4100R-003/Dual-Terminator

4100R series is in industry standard DIP package suitable for automatic insertion. Molded epoxy-resin (Novolac) body. Package power ratings at 70°C: **Type 4114R** rated 2.00 watts; **type 4116R** rated 2.25 watts. Most popular values listed. Additional values available as listed in table below; *contact your local Newark sales office.* NOTE: Minimums may apply.

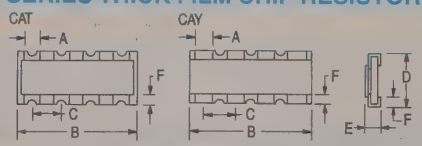
CAT/CAY SERIES THICK FILM CHIP RESISTOR ARRAYS

SMD



CAT series feature concave terminals and four elements. **CAY series** feature convex terminals and four elements. Power rating: 62mW. Resistance tolerance: 5%. Working voltage (max.): 50V. Operating temperature: –55 to +125°C. Rating temperature: +70°C. Additional values available; *contact your local Newark sales office.*

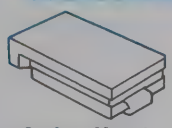
MF-SM SERIES MULTIFUSE® PTC RESETTABLE OVERCURRENT PROTECTORS



Surface Mount

Axial Lead

MF-SM series help protect low voltage power supplies and loads from excessive current. Weldable nickel terminals. Packaged per EIA 481-2 standard. **"SM"** in type number denotes surface mount device. **"S"** in type number denotes axial lead "strap".

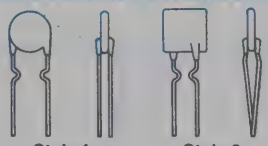
MF-R SERIES MULTIFUSE® PTC RESETTABLE OVERCURRENT PROTECTORS



Style 1 Style 2

MR-F series provides resettable circuit protection. Withstand voltage (max.): 30V for type **MF-R110** thru **MF-R800**; 60V for **MF-R010** thru **MF-R090**. Fault current (max): 40A. Test conditions @ 23°C. Operating temperature: –40°C to +85°C. **Types MF-R010** thru **MF-R185** are Style 1, **MF-R250** thru **MF-R800** are Style 2.

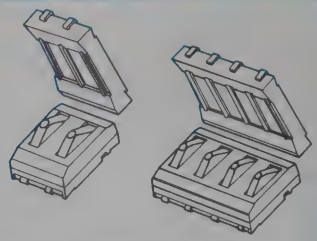
70AD SERIES MODULAR BATTERY CONTACTS



Modular contacts are ideal for rechargeable batteries, battery packs, battery chargers, cellular phones, and portable transceivers. High quality plated contacts. Captured contact spring prevents contact from being inadvertently pulled out. 2, 3, 4, 5, or 6 positions and SMT or thru-hole mounting maximizes versatility for off-the-shelf designs. Pick-and-place compatible. High-temperature molded plastic withstands surface mounting process. **"1"** in type number indicates locator pins (surface mount style only).

Electronic Terms and Measurements

Resistance
Opposition to current flow. Basic unit is the ohm (Ω).

1 kilohm – kΩ — 1,000 or $1x10^3$ ohms
1 Megohm – MΩ — 1,000,000 or $1x10^6$ ohms

Voltage
Electromotive force. Basic unit is the volt (V).

1 millivolt – mV — 1/1,000 or $1x10^{-3}$ volt
1 microvolt – µV — 1/1,000,000 or $1x10^{-6}$ volts

Current
Movement of electricity. Basic unit is the ampere (A).

1 milliampere – mA — 1/1,000 or $1x10^{-3}$ ampere
1 microampere – µA — 1/1,000,000 or $1x10^{-6}$ ampere

Frequency
Number of cycles per second. Basic unit is the hertz (Hz).

1 kilohertz – kHz — 1,000 or $1x10^3$ hertz
1 Megahertz – MHz — 1,000,000 or $1x10^6$ hertz
1 Gigahertz – GHz — 1,000,000,000 or $1x10^9$ hertz

Time
Basic unit is the second (s).

1 millisecond – ms — 1/1,000 or $1x10^{-3}$ second
1 microsecond – µs — 1/1,000,000 or $1x10^{-6}$ second
1 nanosecond – ns — 1/1,000,000,000 or $1x10^{-9}$ second

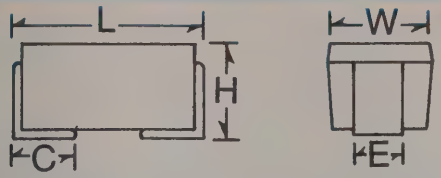
METAL STRIP AND SURFACE MOUNT RESISTORS

WSR SERIES POWER METAL STRIP® RESISTORS

SMD



WSR series low-resistance power resistors are ideal for switching and linear power supplies, amplifiers, and low-voltage lighting. All welded construction with metal resistive element and 60/40 tin/lead copper terminations. High temperature encapsulation. Very low inductance. Low thermal EMF. Power rating: 2.0W @ +70°C. Operating temperature: –65°C to +275°C. Tolerance: ±1%. **Sold in 4-in. reels of 100 pieces.** Also available in bulk bags of 50 pieces; *contact your local Newark sales office.*

WSL SERIES POWER METAL STRIP® RESISTORS

SMD

WSL series ultra-precision resistors are ideal for current sensing, voltage division, and pulse applications. All welded construction with metal resistive element and 60/40 tin/lead copper terminations. High-temperature epoxy coating. Standard EIA sizes. Very low inductance. Low thermal EMF. Operating temperature: –65°C to +170°C. Tolerance: ±1%. **Sold in 4-in. reels.** Also available in bulk bags of 100 pieces; *contact your local Newark sales office.*

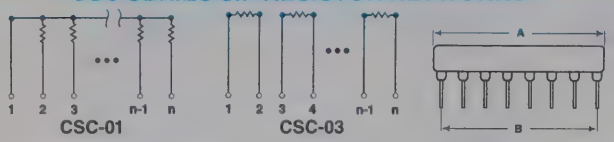
RESISTOR AND RESISTOR NETWORKS

CSC SERIES SIP RESISTOR NETWORKS



Resistor networks provide a choice of 5, 7, or 9 nominally equal resistors each connected to a common pin (no. 1). **CSCxxA-03** series resistor networks provide a choice of 3, 4, or 5 nominally equal resistors, each isolated from the others. **CSC10A-03** series are available in resistance values of 560Ω to 18kΩ only. Tolerance: ±2%. Height: 0.195″ (4.95). Lead spacing: 0.100″ (2.54). Most popular sizes listed. Additional resistance values available; *contact your local Newark sales office.*

SOMC SERIES SURFACE MOUNT RESISTOR NETWORKS

SMD

Devices have a 0.090″ (2.29) max. seated height, 0.050″ (1.27) lead spacing. Tolerance: ±2%. Temperature coefficient: ±100 ppm/°C. **Type SOMC-1601** has 13 or 15 nominally equal resistors (rated 125mW) with one lead common; **type SOMC-1603** has 7 or 8 nominally equal resistors (rated 250mW) with each resistor isolated. Maximum operating voltage: 50VDC. Operating temperature: –55°C to +125°C. Also available in 14-pin style. Most popular sizes listed. Additional resistance values available; *contact your local Newark sales office.* **Sold in packages of 52.**

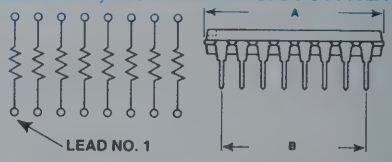
MDP SERIES DIP, MOLDED RESISTOR NETWORKS



Dual in-line resistor networks are compatible with automatic insertion equipment, have wide resistance range, uniform performance characteristics. Stable thick film. Rugged molded case construction, 0.160″ (4.06) maximum seated height. Operating temperature: –55°C to +125°C. Tolerance: ±2%. **Type MDP1603** provides 8 nominally equal resistors with each resistor isolated from all others and wired directly across. Power: 0.250W. 16-pin package. Most popular sizes listed. Additional resistance values available; *contact your local Newark sales office.* Factory minimum and multiple requirements apply to some values.

RN55 SERIES PRECISION METAL FILM RESISTORS

Type RN55 precision metal film resistors have excellent RF characteristics, low noise, and voltage coefficient. Meet or exceed electrical, environmental, dimensional requirements of MIL-R-10509. Versions with **"C"** in type number have temperature coefficient of 0 ±50ppm/°C; **"D"** in type number have 0 ±100ppm/°C; **"E"** in type number have 0 ±25ppm/°C. Operating temperature: –55°C to +175°C. Most popular sizes listed. Additional values available, *contact your local Newark sales office.* **Sold in multiples of 100.**

CRCW SERIES THICK FILM CHIP RESISTOR KITS

SMD

A wide selection of resistance values in 1% and 5% tolerances. Temperature coefficient: ±100ppm/°C (1%), ±200ppm/°C (5%). Tape and reel strips. With application notes and technical data.

CRCW0603-104 KIT 5% TOLERANCE

3,000-piece kit contains 100 pieces each of 30 resistance values from 10 to 1M ohms.

16F5097 Type CRCW0603-104-KIT. **Each** **220.67**

CRCW0603-106 KIT 1% TOLERANCE

1,200-piece kit contains 100 pieces each of 12 resistance values from 49.9 to 1M ohms.

16F5099 Type CRCW0603-106-KIT. **Each** **121.37**

CRCW1206-102A KIT 1% TOLERANCE

3,000-piece kit contains 100 pieces each of 30 resistance values from 51.1 to 150K ohms.

46F975 Type CRCW1206-102A KIT. **Each** **220.67**

CRCW1206-102B KIT 1% TOLERANCE

3,000-piece kit contains 100 pieces each of 30 resistance values from 60.4 to 200K ohms.

46F976 Type CRCW1206-102B KIT. **Each** **220.67**

CRCW1206-104 KIT 5% TOLERANCE

3,000-piece kit contains 100 pieces each of 30 resistance values from 10 to 1M ohms.

93F2209 Type CRCW1206-104-KIT. **Each** **220.67**

CRCW0603 SERIES THICK FILM CHIP RESISTORS

NEW

Thick film surface mount resistors in standard EIA sizes. Automatic placement compatible, flow solderable. Operating temperature: –55°C to +150°C. Most popular sizes listed. Additional resistance values and sizes available, *contact your local Newark sales office.* Reels also available in quantities of 5000 each. NOTE: Minimum quantities may apply on some values.

CRCW0805 SERIES THICK FILM CHIP RESISTORS

Thick film surface mount resistors in EIA standard sizes. Automatic placement compatible, flow solderable. Operating temperature: –55°C to +150°C. Temperature coefficient: ±100ppm/°C(1%); ±200ppm/°C(5%). **CRCW0805 series** are available in values from 10W to 1MW in 1% tolerance. Also sold in packages of 100 and in reel quantities. Most popular values and sizes listed. Other values and sizes available in standard decades of resistance; *contact your local Newark sales office.* NOTE: Minimum quantities may apply on some values. Some values also available in bulk quantities and packages of 100 pieces.

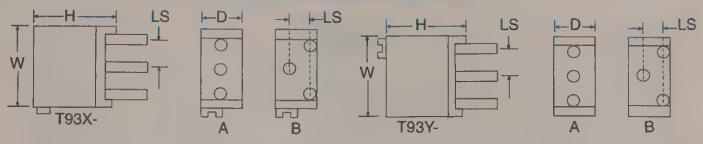
T93 SERIES MULTI-TURN CERMET TRIMMING POTENTIOMETERS



Electrical travel: 19 turns ±2. Resistance tolerance: ±10%. Temperature coefficient: ±70PPM/°C (–55°C to +155°C) for Rn ≥ 100Ω typical. Dielectric strength: 1000 Vrms. Mechanical travel: 22 turns ±5. Operating torque: 2.1 oz. in. (max). Operating temperature: –55°C to +155°C. Fully sealed, water washable container IP67. Height (H): 0.382″ max. Width (W): 0.382″ max. Depth (D): 0.189″ max. Lead length: 0.197″. Lead spacing (LS): 0.1″. Lead diameter: 0.02″. Adjustment slot: 0.024 x 0.024″.

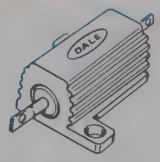
FRIENDLY, QUALITY SERVICE FROM YOUR LOCAL NEWARK SALES OFFICE.

WIREWOUND RESISTORS

TYPE RH (MIL-R-18546D, TYPE RE) CHASSIS MOUNT WIREWOUND RESISTORS



Aluminum-housed wirewound resistors feature completely welded construction for total environmental protection. Standard winding and screw mounts on chassis utilizes heat-sink effect. High stability. Tolerance: ±1%. Operating temperature: –55°C to +250°C. Most popular values listed. Other values available from 0.01Ω to 150kΩ; *contact your local Newark sales office.*

LVR-1, LVR-3 AND LVR-5 SERIES WIREWOUND RESISTORS

Commercial resistors for all types of current sensing applications, including switching and linear power supplies, instruments and power amplifiers. Power rating: for **LVR-1**, 1W; for **LVR-3**, 3W; for **LVR-5**, 5W. Solderability satisfactory when tested in accordance with Method 208 of MIL-STD-202. Maximum ambient temperature at rated wattage, 25°C; maximum ambient temperature at zero power, 175°C. Tolerance: ±1%. Other values available; *contact your local Newark sales office.* NOTE: manufacturer's minimum requirements may apply to some values.

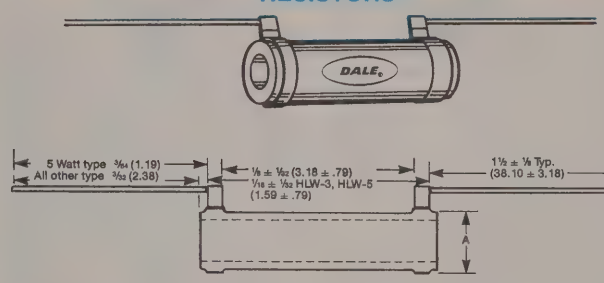
HLW SERIES TUBULAR AXIAL LEAD WIREWOUND RESISTORS



- **Dissipates Large Amounts of Power In DC or Low-frequency AC Circuits**
- **Lug-Attached Leads Facilitate Direct Electrical Connection by Soldering**

These tubular, axial lead resistors suit a wide range of applications: grid resistors, voltage-dropping resistors, high-volt bleeder resistors in power supplies, bias-supply resistors, load resistors, shunt resistors, voltage divider networks, filiment-dropping resistors. Resistance values below 1 ohm are ±10% tolerance; 1 ohm and above are ±5% tolerance. Minimum resistance is 0.1 ohm for all values. Most popular values listed. Additional resistance values available, *contact your local Newark sales office.* NOTE: manufacturer's minimum requirements may apply to some values. **Sold in multiples of 10.**

5063J SERIES SPACE MISER METAL FILM RESISTORS

1% tolerance resistors are designed for high density applications. 0.020″ (0.500) dia. leads. Power: ⅛ watt @ 70°C for 10,000 operating life hours. Capable of automatic insertion on 0.200″ (5.08) centers. Superior mechanical strength and heat dissipation. Max. length: 0.142″ (3.61). Dia.: 0.063″ (1.6). Leads: 1.1″ (27.94)L. Lead dia.: 0.020″ (0.508). Meets MIL-R-10509 (RN50).

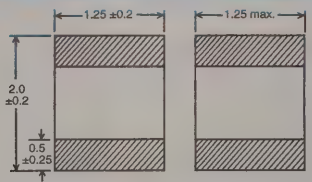
SURFACE MOUNT NTC THERMISTORS

SMD



EIA standard 0805 chips have a high degree of sensitivity and accuracy over a wide temperature range. Ideal for temperature compensation, sensing and protection. Suitable for wave or reflow soldering. Silver palladium contacts. Operating temperature: –55°C to +155°C. Resistance value has tolerance of ±5%.

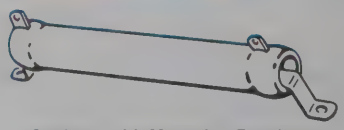
ONE-STOP SHOPPING . . . WITH ONE CALL AND ONE PURCHASE ORDER.

270 SERIES LUG-TYPE FIXED WIREWOUND POWER RESISTORS



Resistor with Mounting Brackets

Wirewound on high quality ceramic cores, these resistors are coated with a flame resistant vitreous enamel. Provide excellent heat conduction, even for high wattage applications. The solder coated radial lug terminals are suitable for soldering or bolt connection. Tolerance: ±5% for 1 ohm or greater, ±10% for below 1 ohm. Power rating is based on 25°C free air rating. When resistance exceeds the resistance values below, derate the power rating by 25% to improve reliability.
Mounting brackets and thru-bolts are available separately on page 764

Power Rating	12W	25W	50W	100W
Resistance (Ω)	3.9k	12k	35k	75k

25-WATT CORE: 2 x 9/16"

Use No. 9 bracket.

270 SERIES LUG-TYPE NON-INDUCTIVE FIXED WIREWOUND POWER RESISTORS

Conformal vitreous enamel coating. Tolerance: ±5%. Core dimensions (measured from lug to mounting bracket): **types LN50J10R** and **LN50J25R**, 4 x 9/16"; all others, 6½ x ¾". Spring-grip brackets recommended. (Thru-bolt mounting not recommended.) For **50W types**, use mounting bracket no. 9; for **100W types** use mounting bracket no. 12. *Mounting brackets sold separately on page 764.*

WIREWOUND POWER RESISTORS

200 SERIES "BROWN DEVIL" RESISTORS

Wirewound resistors for voltage-dropping, bias units, bleeders, etc. Resistors have extra-sturdy, all-ceramic vitreous enamel coating. Protected against shock, vibration, heat, and humidity. Tolerance: ±5%. 8-watt units have 1 x 5/16" cores; 12-watt units, 1¾ x 5/16" cores; 20-watt units, 2 x 7/16" cores. All have 1½" leads. Most popular sizes listed. Other resistance values available; *contact your local Newark sales office.*

90 SERIES MOLDED WIREWOUND RESISTORS

Axial-lead resistors with all-welded, molded construction and flame-resistant vitreous enamel coating. Markings resistant to high temperatures, solvents, and abrasions. Consistent form permits mounting in clips with heat sink benefits up to 100%. Meets MIL-R-26 requirements for insulated resistors. Tolerance: ±5%. Dielectric withstanding voltage: 1000VAC. All have 1½" leads. Mounting hardware which extends power ratings available separately below. Most popular sizes listed. Other resistance values available, *contact your local Newark sales office.*

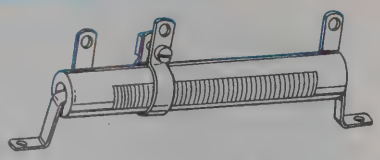
210 SERIES LUG-TYPE WIREWOUND ADJUSTABLE RESISTORS



210 series lug-type, wirewound resistors have vitreous enamel coating on which a narrow strip has been left uncovered to expose a portion of each turn. Contact to wire on this strip is made by an embossed contact on the adjustable lug. Resistance changes by moving the lug; one screwdriver adjustable lug included with each unit. *Additional lugs may be ordered separately below.* Make ideal voltage dividers for original equipment and replacement in transmitters, rectifiers and other apparatus. The stated wattage rating applies only when entire resistance is in circuit. Tolerance ±10%. *Order mounting brackets and thru-bolts separately on this page.*

TYPE 210-12 12-WATT CORE: 1.750 x 0.312″ (44.96 x 7.92)

Use no. 5 bracket. *Order separately on this page.*

MOUNTING BRACKETS AND THRU-BOLTS FOR 210 AND 270 SERIES LUG-TYPE WIREWOUND RESISTORS

MOUNTING BRACKETS

Stock No.	Type	For Ohmite Resistor Type	1-49
13F097	5/BRACKET	270-12, 210-12	0.33
13F098	9/BRACKET	270-25, 270-50, 210-25, 210-50	0.29
13F099	12/BRACKET	270-100, 210-100	0.58
13F100	18/BRACKET	270-225	0.61

THRU-BOLTS

7PA series thru-bolts, with centering and mica insulation washers, permit perpendicular mounting of **210 series** and **270 series** resistors in panels up to 0.25″ thick.

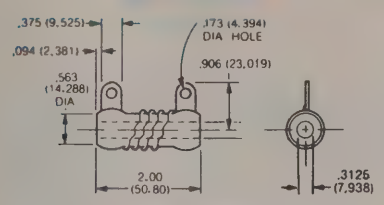
Stock No.	Type	Bolt Size Length	Bolt Size No.	For Resistors (Power Ratings)	1-24	25-49	50-99
90F3639	7PA10	2½″	8	12 Watt	3.44	2.76	2.34
94F1789	7PA25	2¾″	10	25 Watt	3.72	2.97	2.53
89F400	7PA50	4¾″	10	50 Watt	4.12	3.30	2.80
90F3640	7PA100	7⅝″	10	100 Watt	5.04	4.03	3.43
98F702	7PA200	11½″	¼″	225 Watt	8.72	6.97	5.93

6126-P8½ elongated and **6110-10½** (slotted) thru-bolt mounting brackets fit **7PA series** thru-bolts to mount both **210** and **270 series** resistors.

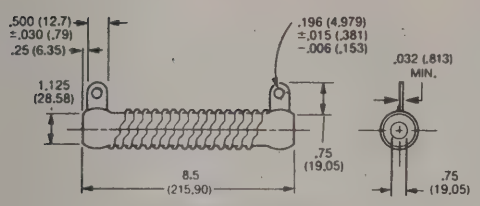
89F399 Type 6128-P8 1/2. **Each** **19.05**
94F3517 Type 6110-10 1/2. **Each** **12.45**
(4117) (de00232)

WIREWOUND POWER RESISTORS

FIXED AND ADJUSTABLE VITREOUS ENAMEL POWER RESISTORS



Fixed 35-Watt



Fixed/Adjustable 300-Watt*

Power resistors are ideal for applications involving high currents at very low resistance values. Designed to withstand frequent start-stop cycle characteristics of motor starting, dynamic braking, and similar applications. Ribbed construction enhances cooling. Made with corrugated resistive wire. Tolerance: ±10%. Dielectric withstanding voltage 1000VAC. Temperature coefficient: ±400ppm/°C. **Type C35KR02** is silicone-ceramic coated.

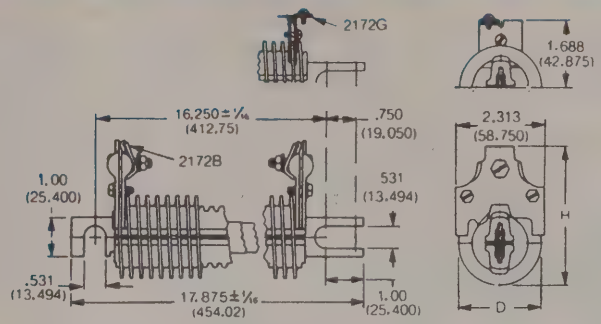
POWR-RIB® EDGEWOUND WIRE POWER RESISTORS



Edgewound

Rugged resistors are designed to handle 700 to 1000 watts of power. Constructed from heavy-resistance alloy wound around ceramic insulators and supported by a metal mounting bar. Edgewound resistors are designed for very low resistance and high power capacity. Round wire are designed for higher resistance with lower power capacity requirements. Terminals: clamps, movable along resistor wire for setting intermediate resistance values on edgewound units. Tolerance: ±10%. Overload: 10 times rated watts for 5 seconds. Temperature coefficient: 47 amps and under are ±300 ppm/°C; 50 amps and over are ±500 pm/°C.

EDGEWOUND DIMENSIONS ±0.125″ (3.18)

80 SERIES ±1% SILICONE-CERAMIC CONFORMAL WIREWOUND RESISTORS

Axial lead. High stability, precision power resistors. Temperature coefficient: ±90 ppm/°C under 1 ohm; ±50 ppm/°C 1 to 9.99 ohms; ±20 ppm/°C for 10 ohms and above. Dielectric withstanding: 1000 VAC. Meet MIL-R-26. Minimum quantities may apply. Most popular values listed. Additional values available; *contact your local Newark sales office.*

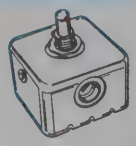
POWER CONTROLS AND RHEOSTATS

SOLID-STATE POWER AND MOTOR SPEED CONTROLS



Type PCA are AC output types that control heaters (resistive and infrared) and motors such as universal, shaded pole and permanent-split capacitor. **PCD** are DC output types that control shunt and series wound, universal, compound and permanent magnet motors, magnetic clutches, brakes. **PCD** have 2 DC outputs, 1 from AC source that's rectified DC at approximately full line voltage; other is variable or controlled DC. Built-in on-off switch, adjustable control range, panel mount. **Type PCA:** 1.75″ square x 1.125″D (44.45 x 28.58). **PCD:** 2.75H x 1.75W x 1.125″D (69.85 x 44.45 x 28.58). 60Hz. Shaft diameter: 0.25″ (6.35). ⅜-32 bushing. *Order knob* **type 5150** *separately on this page. Order dial plate* **type 5000** *separately on this page.*

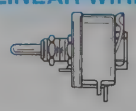
E SERIES 12-½-WATT LINEAR WIREWOUND RHEOSTATS



Operate at maximum hot spot temperature rise of 300°C at 40°C ambient. Also useful for operating at high military ambients, derated linearly to zero at 340°C. Vitreous enamel coating except resistances of 3500 ohms and over silicone-ceramic coating. 300° rotation (±5°). 0.875″ (22.23) diameter. Resistance tolerance: ±10%. Mount with ¼-32 bushing and hex nut on panels to 0.125″ (3.18) thick. Shaft diameter: 0.125″ (3.18). *Order knob* **type 5151** *separately on this page. Order dial plate* **type 5007** *separately on this page.*

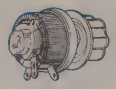
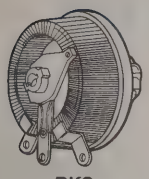
WIREWOUND POWER RHEOSTATS

WIREWOUND POWER RHEOSTATS

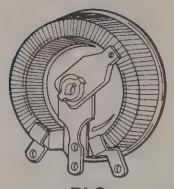


RHS

RJS



RKS



RLS

RNS

Resistance wire is wound on solid ceramic core. Turns are locked in with either vitreous enamel or silicone-ceramic material. Contact brushes are metal graphite. Terminals at each end of winding permit unit to be used as a potentiometer. Models H, J, K, L and N are listed under UL Reexamination Service File No. E-10946 and CSA File No. 21309 unless noted otherwise. Current ratings shown assume use in free air. If units are enclosed wattage should be reduced to as much as 50% depending on ventilation. *Order knobs separately on page 766.*

Model	Body Dia.	Shaft Dia.	Rotation	Max. Panel Thickness	Mounting Hardware
H	1 9/16″	1/4″	300°	to 1/4″	3/8-32 Bushing and Hex nut
J	2 5/16″	1/4″	300°	to 1/4″	3/8-32 Bushing and Hex nut
K	3 1/8″	1/4″	300°	to 1/4″	3/8-32 Bushing and Hex nut
L	4″	1/4″	300°	to 1/4″	3/8-32 Bushing and Hex nut or 10-32 x 3/4 F.H. screws
N	6″	3/8″	320°	to 1 1/4″	1/4-20 F.H. screws

MODEL H 25-WATT

Knob **type 5150** recommended; *order separately on page 766.* Types 10kΩ and above are ceramic coated; 500V max. Not UL approved above 5kΩ.

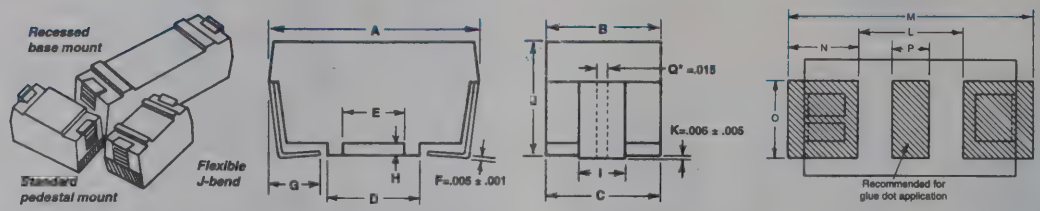
SURFACE MOUNT POWER RESISTORS

RW AND RP SERIES SURFACE MOUNT POWER RESISTORS

SMD



Surface mount power resistors, available in both wirewound **(RW series)** or power film **(RP series)** enable the integration of power resistors into designs that reduce circuit board clutter. They bring higher power levels and a wider ohmic range than conventional chip resistors. Values from 0.005 ohms to 1 megaohm are available. Flexible J-bend terminals eliminate the need for leaded components and reduce the chance of solder-joint breakage due to thermal expansion and vibration. Epoxy-molded body carries a UL94V0 flammability rating and has a temperature rating of 205°C continuous. Pedestal mount design is ideal for wave soldering applications while recessed base mount design decreases board contact and is ideal for reflow soldering. Package styles CA and CB are pedestal mount. Package style EA is a recessed base mount. **"J" suffix** in type number indicates sold in packages of 10. **"JT"** suffix in type number indicates sold in reel quantities.

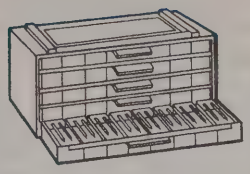
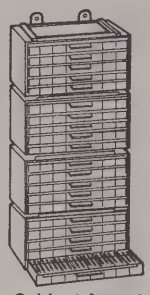
RESISTOR ASSORTMENTS AND SELECTORS

CAB SERIES RESISTOR ASSORTMENTS

Convenient assortments comprise the most popular resistance values in use today. Choose the one best suited to your requirements ... and have a full inventory of the resistors you need now **and** for future use. Assortments available in carbon film, metal film and carbon composition. Each comes in 4.75H x 9.00W x 5.25"D (120.65 x 228.60 x 133.35) cabinet with five drawers. Each drawer is subdivided into eight compartments. Dovetail tops and bottoms on cabinets allow stacking for convenience when ordering more than one assortment. Assemblies of 2, 3 or 4 cabinets come sturdily riveted to metal strips for wall hanging. Type numbers ending with **M** are metal film. Those ending in **F** are carbon film.



Single Cabinet Assortment



Four-Cabinet Assortment

CAB SERIES SURFACE MOUNT RESISTOR ASSORTMENTS

Includes 1000 pieces of 1% and 5% tolerance cermet chip resistors in 63 ohmic values. High-quality resistors have passivated, protective-coated cermet element on high-purity alumina substrate, with pre-tinned wrap-around terminals. Assortment also includes cabinet and application supplies and tools: 10 grams adhesive, 1 transfer pin collet, 1 adhesive transfer pin, 2 syringes, 4 syringe needles, 1 pair tweezers and 1 each of 3X and 6X optical magnifiers. Complete instructions included. Cabinets stackable and drawers clearly identify contents. Chip dimensions listed below.

PORTABLE RESISTANCE AND CAPACITANCE SELECTORS

For use in labs, schools and by service technicians. Feature positive slide switch operation. Light weight for easy in-hand use. Metal case, four rubber feet for non-slip bench use, and screw type binding posts. Compact size: 6.00H x 4.00W x 1.00"D (152.40 x 101.60 x 25.40).

Ohm-Ranger™ 3420. Portable resistance selector. Wide range of resistance values, from 1 ohm to over 11 million ohms in one ohm increments. Assured accuracy of ±1% tolerance for 10 ohm and above settings, ±5% for 9.99 ohms and under. Rated to ½W maximum. 250V maximum.

13F161 Type 3420. **Each** **198.95**

Cap-Ranger™ 3430. Portable capacitance selector. Wide range of capacitances from 100 picofarads to 11.111 microfarads in 100 picofarad steps with ±2% tolerance. Rated to 200VDC maximum.

76F799 Type 3430. **Each** **238.74**

Decade-Ranger™ 3416. Precision, ±0.1% accuracy, decade resistance box. Range: 1 ohm to 1,111,110 ohms, in 1 ohm increments. Number of decades: 6. Power: ¼ watt per resistor. Rotary tap switches operate in either direction. Direct digital readout. Switch life in excess of 50,000 operations. Metal housing, universal binding posts and grounded metal post for effective shielding. Dimensions: 10.5W x 3.75H x 4.625"D. Weight: 3 lbs. 10 oz.

94F1792 Type 3416. **Each** **327.77**

WIREWOUND RESISTORS AND THERMISTORS

20 SERIES VITREOUS ENAMEL CONFORMAL COATED WIREWOUND RESISTORS

OHMITE®

Rugged, economical wirewound axial lead resistors for industrial applications. ±5% tolerance, 1kV dielectric breakdown voltage (500V for 1 watt size). Typical temperature coefficiency for 10 ohm and above: ±30 ppm/°C. Minimum quantities may apply. Most popular values listed. Additional values available; *contact your local Newark sales office.*

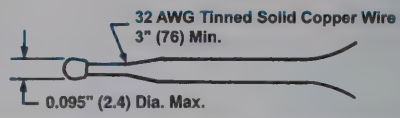
44000 SERIES EPOXY INTERCHANGEABLE NTC THERMISTORS

YSI®



Provide accurate and stable temperature sensing for application of temperature measurement, control, indication and compensation. Time constant: 1 sec. max. in oil bath, 10 sec. max. in still air.

±0.2°C INTERCHANGEABILITY TOLERANCE

Working temperature for best stability: **types 44001A**, **44002A** and **44003A**, –80°C to +51°C; all others, –80°C to +120°C.

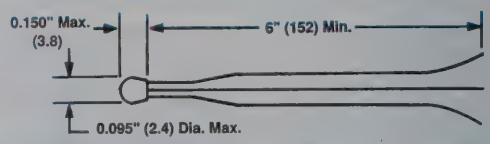
TYPE 44000 THERMILINEAR® NTC THERMISTOR COMPONENTS AND NETWORKS

YSI®



Each network provides linear R vs T for the range specified. A Thermilinear component is two or three epoxy encapsulated thermistors. A network consists of a Thermilinear component and 2 or 3 metal film resistors. Thermistor accuracy and interchangeability: ±0.15°C @ –30 to +100°C. *For dimensions contact your local Newark sales office.*

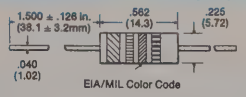
46000 SERIES INTERCHANGEABLE GLASS NTC THERMISTORS ARE ALSO AVAILABLE, CONTACT YOUR LOCAL NEWARK SALES OFFICE

(33391) (ne33391)

SPH SERIES GENERAL-PURPOSE/FAIL-SAFE MOLDED WIREWOUND RESISTORS



SPH series resistors feature resistance alloy winding on braided fiberglass substrate. Intermediate silicone coatings enhance processibility and protect resistive element. Mechanically crimped terminal leads are alloy-coated copper flashed steel with welded cap. Phenolic plastic encapsulation, flame-resistant coating covers resistive element. Tolerance: ±5%. Power rating: 2W. @ 70°C (1W. @ 115°C). Working voltage (continuous): √PR. Dielectric withstanding voltage: 1000 V_{RMS} min. Mil. style: RC32/RC42. Most popular sizes listed below. Additional resistance values available, *contact your local Newark sales office.* **Sold in multiples of 50.**

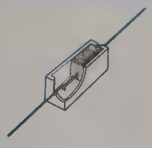
PLO SERIES EXTREMELY LOW-RESISTANCE LOW-INDUCTANCE WIREWOUND RESISTORS



PLO series extremely low resistance, power resistors have welded terminations and fireproof housing. Tolerance: ±1%. Inductance is less than 10nH.

CGH SERIES HIGH-VOLTAGE THICK FILM RESISTORS

Precision resistors have diamond spiral thick film element and heat-conducting ceramic substrate. All welded cap and lead construction, epoxy-coated body. Tolerance: ±1%. **Type CGH150PPM750M2%** has 2% tolerance. Maximum TCR*: 500ppm/°C. Most popular sizes listed. Additional values available, *contact your local Newark sales office.*

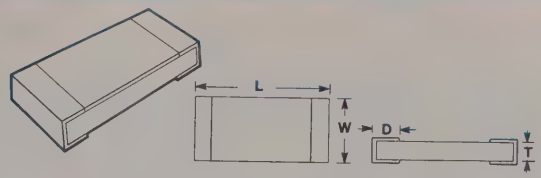
LRC SERIES LOW VALUE FLAT CHIP RESISTORS



Low inductance thick film design for current sensing applications. Leach-resistant solder-plated copper wrap around termination. Tolerance: ±1.0%. Temperature coefficient: above 0.075Ω < + 150ppm/°C, 0.075-0.045Ω < + 300ppm/°C, below 0.045Ω < + 600ppm/°C. Max. operating voltage: 50V. Operating temperature:–55°C to +125°C.

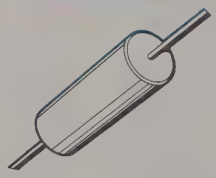
LOB SERIES LOW-RESISTANCE METAL ELEMENT RESISTORS



Non-inductive metal element resistors for switching and linear power supplies, instrumentation, current sensing circuits, regulators. Tinned copper leads, molded body. Tolerance: ±1%. Dimensions in inches (mm) for **LOB-1 series**: Length = 0.390 (9.90). Diameter = 0.140 (3.60). **LOB-3 series**: Length = 0.560 (14.224). Diameter = 0.210 (5.334). **LOB-5 series**: Length = 0.920 (23.368). Diameter = 0.330 (8.382).

CARBON COMPOSITION RESISTORS

RC SERIES CARBON COMPOSITION RESISTORS

Hot-molded, fixed composition resistors for general-purpose use in electronic equipment. Feature high level of uniformity for reducing hot spots, noise, and for predictable performance. Also feature freedom from catastrophic failure when used according to published ratings and recommendations. Tightly compressed resistance material has large cross-section for low current density and high overload capacity. **¼W types sold in packs of 200. ½W and 1W types sold in packs of 100.**

Type	Power	Tol.	Length (mm)	Diameter (mm)	Lead Length (mm)	Lead Dia. (mm)	Max. Working Voltage	Max. Overload Voltage

CARBON FILM RESISTORS

CARBON FILM RESISTORS

Resistors feature epoxy coating for moisture protection. Tolerance: ±5%. Operating temperature: –55°C to +155°C. Available in standard ohmic values from 1Ω to 10MΩ. **Sold in multiples of 50**. *Additional values available, contact your local Newark sales office.*

THICK FILM CHIP RESISTORS

THICK FILM CHIP RESISTORS

NEW

CR series surface mount resistors feature metal-glazed film on high-purity alumina substrate. Rating: 1/16W. Temp. coefficient: ±250ppm/°C (size 0402); ±300ppm/°C (size 0603). **Sold in multiples of 50.** 1% tolerance also available; *contact your local Newark sales office.*

EIA SIZE 0402, ±5% TOLERANCE

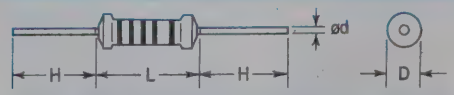
PRECISION METAL FILM RESISTORS

MFR SERIES PRECISION METAL FILM RESISTORS



Resistors feature nichrome elements for stable performance and low noise in various environments. Epoxy-coated for maximum moisture protection. Tolerance: ±1%. Temperature coefficient: ±50ppm/°C. Operating temperature: -55°C to +125°C. Meets military specification MIL-R-10509F. **Sold in multiples of 50.** *Additional values available, contact your local Newark sales office.*

RESISTOR KITS

COMBINATION RESISTOR AND CAPACITOR KIT

This 756-piece general kit is ideal for R & D labs, schools, and maintenance needs. Kit contains 630 carbon film resistors ranging from 0.5 to 4.7MΩ (42 each in ⅛W, ¼W, ½W), 5% tolerance and 126 capacitors in 42 values. Kit has 3 of each type: polyester film, metallized film, ceramic, radial and axial lead tantalum electrolytic capacitors. *Contact your local Newark sales office for exact value ranges.*

92N4512 Type 3329. **Each** **388.13**
(16035) (ne10110)

Combination Kit

CARBON FILM RESISTOR KITS

Carbon film resistor kits come fully assembled with lid label showing ohmic values. Resistors have conformal multi-coating. **Type 1767** kit contains ¼, ½, 1, 2-watt resistors. 2-watt resistors are metal oxide with operating temperature of –55° to +200°C. Meets or exceeds MIL-R-11F. Tolerance: ±1%. Operating temperature: –55° to +155°C. *Contact your local Newark sales office for exact value ranges.*

Stock No.	Type	Case Style	Watts	Resistance Range	No. of Values	Qty. per Value	Kit Quantity	Each
44N2350	AR125-6025	A	⅛	2.2Ω to 2.2MΩ	60	25	1500	**169.99**
37N1739	AR25-6025	A	¼	2.2Ω to 2.2MΩ	60	25	1500	**124.19**

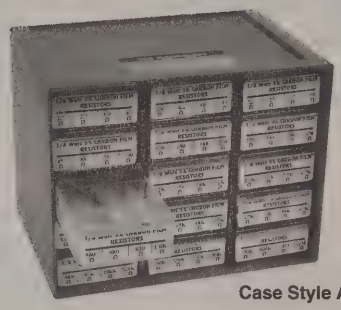
95N3708	AR50-6025A	B	¼	0.5Ω to 4.7MΩ	42	25	1050	**123.17**
92N4511	1767	B	⅛, ¼, ½, 1, 2	1.0Ω to 1.0MΩ	42	*	770	**181.08**

*⅛-, ¼-, and ½-watt sizes have 25 of each value listed, 1- and 2-watt sizes have 5 of each value.
(9539) (de02977)



Case Style A

THICK FILM RESISTOR CHIP ASSORTMENT KITS

Surface mount thick film resistor kits come fully assembled with lid label showing ohmic values. These resistors have high reliability and wave flow solderability. **Type ARMC 125-6020** has EIA size 1206 chips, **Type ARMC 125-6050** has EIA size 0805 chips. *Contact your local Newark sales office for exact value ranges.*

Stock No.	Type	Case Style	Watts	Resistance Range	No. of Values	Qty. per Value	Kit Quantity	Each

92N4534	ARMC125-6050	A	1/10	2.7Ω to 2.2MΩ	60	50	3000	**310.45**

(4147) (ne02891)

Case Style B

METAL FILM RESISTOR ASSORTMENTS

Metal film resistor kits come fully assembled with lid label showing ohmic values. EMF (evaporated metal film) resistors are coated with special epoxy paint. Meets or exceeds MIL-R-1059E. Max. operating voltage: 250V. Max. overload voltage: 500V. Tolerance: ± 1%. Ohmic values are listed in table below.

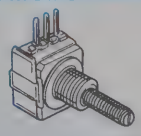
50 SERIES 12.5mm MODULAR PANEL CONTROLS



Single-section conductive plastic or cermet (**A** suffix) element sealed potentiometers. Metal bushing, single slotted metal shaft. Conductive plastic have resistance tolerance of ±20%. Cermet have tolerance of ±10%. Power rating: cermet 1.0 watt; plastic 0.5 watt. Storage temperature: –55°C to +125°C. Standard options include PC pin and solder lug terminals, anti-rotation lugs, and audio and linear tapers. Most popular values listed. Additional resistance values available; *contact your local Newark sales office.*

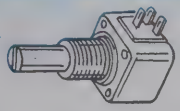
81 SERIES SINGLE ⅝″ PANEL CONTROL



Feature conductive plastic and cermet modular versions. Built with metal shaft, gangable, with smooth shaft torque feature. **Type 81A** plain pushings are ⅜″. **Type 81C** plain bushings are ¼″. Available with conductive plastic linear or CW audio tapers, both with resistance tolerance of ±20%. Power rating: 1W. Storage temperature: –55°C to +125°C. Shaft diameter: 0.375″. Cermet versions of the **81 series** potentiometers with a resistance tolerance of ±10% are also available; *contact your local Newark sales office.* Most popular values listed. Additional resistance values available; *contact your local Newark sales office.*

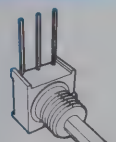
3310 SERIES PANEL CONTROLS



3310 series are 0.375″ (9) square, sealed conductive plastic. Solderable PC pin length: 0.235″ (5.97); spacing: 0.1″ (2.54). ¼-32 unf-2A threaded bushing. Shaft length: 0.5″ (12.70). Shaft diameter: 0.125″ (3.18). Resistance tolerance: ±20%. Power rating: 0.25 watts. **Type 3375** encoders are 6mm square, sealed bushing or PC board mount. Output: 2-bit grayscale, channel A leads channel B, clockwise (LW). Rotational life: 100,000 cycles. Continuous electrical travel. Most popular values listed. Additional resistance values available; *contact your local Newark sales office.*

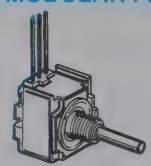
91 SERIES 16mm MODULAR PANEL CONTROLS



One-piece molded plastic shaft and rotor, plain metal bushing, in-line PC pin terminals, and single 0.305R, 90° clockwise CW anti-rotation lug. **91A** plain bushings are ⅜″. Available with conductive plastic linear (**suffix B**) or CW audio tapers (**suffix D**), both with a resistance tolerance of ±20%. Power rating: 1W. Storage temperature: –55°C to +125°C. Shaft type: slotted. Cermet versions of the **91 series** potentiometers with a tolerance of ±10% are also available; *contact your local Newark sales office.* Most popular values listed. Additional resistance values available; *contact your local Newark sales office.*

PLASTIC AND CERMET PANEL CONTROLS

3862

3851, 3852, 3856

Panel mount controls offer essentially infinite resolution. **Type 3852** are ¾″ diameter/single-turn cermet controls. **Type 3856** is ¾″ diameter/3¾-turn cermet control. **Type 3862** are ½″ diameter/single-turn cermet controls. All models have plain bushing slotted-end shaft, solder lug terminals (except **type 3862** which come with J-hook solder lugs) and linear taper, with a resistance tolerance of ±10%. Power rating: **type 3852/3856**—2 watt linear taper, 1 watt audio taper; **type 3862**—1 watt audio taper. Storage temperature: –65°C to +125°C. Shaft length measured from mounting surface. Most popular values listed. Additional resistance values available; *contact your local Newark sales office.*

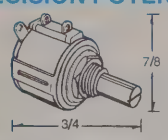
3540S & 3541H SERIES 7/8″ DIAMETER 10-TURN WIREWOUND/ HYBRID PRECISION POTENTIOMETERS



3540S series bushing mount pots have gold-plated solder lug terminals. Slotted shaft: 0.812″L measured from mounting surface. 0.250″ dia. Power rating: 2 watts @ +70°C. Resistance tolerance: ±5%. Operating temperature: –55°C to +125°C. **3541H series** precision potentiometers are virtually the same as **3540S** except for Hybriton® element, and ±10% resistance tolerance.

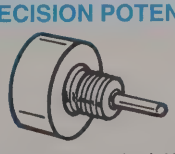
6637 SERIES 7/8″ DIAMETER SINGLE-TURN CONDUCTIVE PLASTIC PRECISION POTENTIOMETERS



Bushing mount pots meet MIL-STD-202, method 106, for moisture resistance and MIL-STD-202, method 301, dielectric withstanding voltage requirements. Slotted shaft: 0.886″ (2.23mm) L measured from mounting surface. 0.886″ diameter. Power rating: 1 watt at +70°C. Resistance tolerance: ±10%. Operating temperature ranges: static operation, –65°C to +125°C; dynamic, +1°C to +125°C. Resolution essentially infinite.

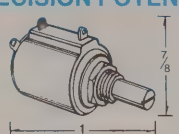
3500S & 3501H SERIES 7/8″ DIAMETER 10-TURN WIREWOUND/ HYBRID PRECISION POTENTIOMETERS



3500S series 3/8″-32-2A THD bushing mount model meets moisture resistance requirements of MIL-STD-202 method 103 condition B, as well as dielectric withstanding voltage requirements of MIL-STD-202 method 301. Slotted shaft: 0.812″ L measured from mounting surface. 0.250″ dia. Power rating: 2 watts at 70°C. Resistance tolerance: ±3%. Operating temperature range: –65°C to +125°C. **3501H series** is virtually identical to **3500S** except these have Hybitron conductive plastic over wire element and resistance tolerance of ±10%. Operating temperature: –65°C to +125°C.

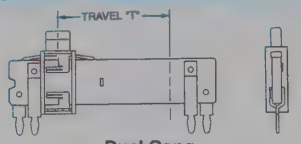
PDV SERIES OPEN-FRAME SLIDE POTENTIOMETERS



Dual Gang

Vertical mount potentiometer with carbon element and sliding force of 20 to 300gcm. **Type PDV15** has 15mm slider travel, dual gang, no detent and linear taper. Power rating: 0.1 watt; max. operating voltage: 150V. **Type PDV20** has 20mm slider travel, single gang, center detent, and audio taper. Power rating:0.05 watt; max. operating voltage: 100V. Sliding noise: 47mV max. Overall length: "T" + 20mm. Height above board: 17.5mm. Width: 3.9mm. Pin length: 3.6mm.

(4150) (ne04228)

TYPE 3375 ENCODERS

Type 3375 encoders are 6mm square, sealed. Bushing or PC board mount. Output: 2-bit gray code, channel A leads channel B electrically turning clockwise (CW). Circuit resistance: 5 ohms max. Dielectric withstand voltage: 900VAC min. Electrical travel: continuous. Operating temperature: –55°C to 125°C. Rotational life: 100,000 cycles. Torque: 5 oz.-in. max.

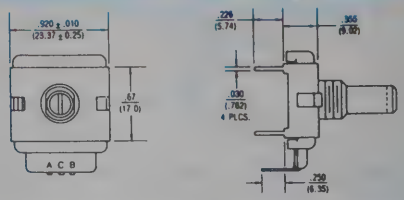
(4155) (ne07271)

EC SERIES CONTACTING ENCODERS



200,000-revolution encoders allow direct entry of digitized analog data into digital circuit without A/D conversion, (rather than conventional potentiometric voltage ratio output). Feature 0.75″ (19)L x 0.25″ (6.35) diameter plain shaft with inserted slot, PC terminals with terminal cover, mounting bracket. Rated 10mA @ 10VDC or 0.1 watt max. Dielectric withstanding voltage: 1,000VAC minimum. Operating temperature: +1° to +125°C. Bushing: 0.35 ″ x 0.25″ L (9 x 6.35). Performance code: 24.

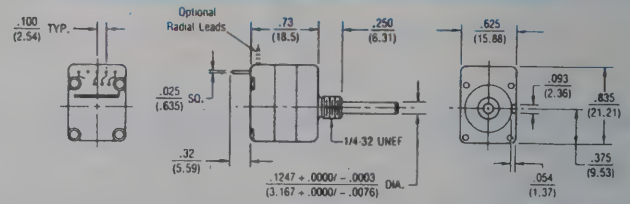
(4143) (de52794)

EN SERIES ROTARY OPTICAL ENCODERS



Self-contained encoders produce 2-bit quadrature signal suitable for digital systems and convert rotary input into electrical signals which can be used by microprocessors. With front bushing and shaft. Shaft length 0.875″ (22.23). **ENA types:** Bushing ⅜″D x ⅜″L threaded. **ENC1JD28L00128:** Bushing ¼″D x ¼″ threaded. **ENS1JB28L00256:** Bushing ⅜″D x ⅜″L threaded, with ball bearing. All types have ¼″D, plain end shaft except **ENC1JD28L00128** has ⅞″ plain end shaft. Anti-rotation lug position is at 9:00. Terminal: axial, multi-purpose pin. Switching configuration: Channel A Leads, Channel B by 90° clockwise rotation. Operating temperature: –40°C to +85°C.

SDR0805/SDR1006 SERIES SMD POWER INDUCTORS

SMD

High DC output. Operating temperature: –50°C to +125°C. **SDR0805 series** have a height of 5.3mm and an outside diameter of 7.8mm. **SDR1006 series** have a height of 5.8mm and an outside diameter of 9.8mm.

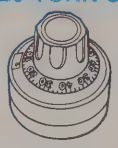
(4110) (de00052)

TYPE H 15- AND 20-TURN COUNTING DIALS



Type H-46-6A is a 20-turn dial. Accepts 0.250″ (6.35) diameter shaft. Minimum shaft extension beyond panel: 0.712″ (18.1). Locking brake. Markings are black on chrome background. **H-506-¼** is a 15-turn dial. Accepts 0.250″ (6.35) diameter shaft. Minimum shaft extension beyond panel: 0.689″ (17.5). Locking brake. Markings are white on black background. Good for plastic shafts. **H-22-6A** is identical to **H-506**, except for having black on chrome markings. Recommended for metal shafts.

Stock No.	Type	Overall Diameter	Height	1-9	10-24	25-49

TYPE 3214 PATENTED 4mm SQUARE MULTI-TURN SURFACE MOUNT CERMET TRIMMING POTENTIOMETERS

SMD

Type 3214 are sealed to withstand board wash processing. 4mm design meets EIA/EAIJ/IPC/VRCI SMD standard trimmer footprint, and features pick-and-place centering design with flush adjustment. Resistance tolerance: ±10% std. Adjustment angle: 5 turns nom. Power rating: (300V max.) 0.25W @ 85°C. Operating temperature: –65°C to 150°C. Temperature coefficient: ±100ppm/°C. Load life: @ 85°C rated power- 1,000 hours.

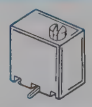
3269 SERIES PATENTED MULTI-TURN TRIMMERS

SMD



¼" (6.35) square cermet trimmers are specifically designed for instrumentation and other sensitive equipment requiring board-level adjustment. Compatible with automated assembly and reflow soldering equipment. Top- and side-adjust voltage divider models. Resistance tolerance: ±10% std. Power rating: (300V max.) 85°C—0.25W. Operating temperature: –65°C to +150°C. Temperature coefficient: ±100ppm/°C. Load life: 1000 hrs. at 0.25W @ 85°C. Rotational life: 200 cycles.

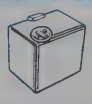
3224 SERIES PATENTED MULTI-TURN TRIMMERS

SMD



4mm square sealed cermet trimmers are compatible with all surface-mount processes and feature pick-and-place centering design with flush adjustment. Resistance tolerance: ±10% std. Adjustment angle: 11 turns nom. Power rating: (300V max.) 85°C—0.25W. Operating temperature: –65°C to +150°C. Temperature coefficient: ±100ppm/°C. Load life: @ 85°C rated power 1000 hrs. **Sold in quantities of 1-249 or in reels of 250.**

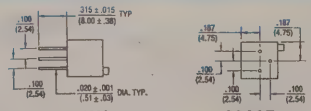
3290 SERIES MULTI-TURN WIREWOUND TRIMMERS



3290W 3290P

Industrial and military wirewound trimmers. ⅜″ square, 25 turns, rated 1 watt at +70° C. Case constructed of all plastic to protect against liquids and potting compounds. Resistance tolerance: ±5%. Operating temperature range: –65° to + 0°C. Dielectric strength: 1000VAC. Mechanical life: 200 cycles. Solderable PC terminals.

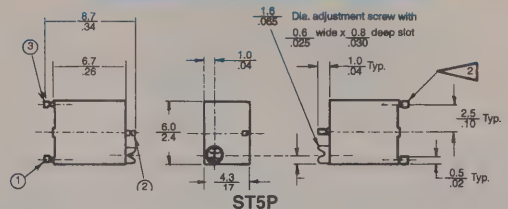
ST-5 SERIES MULTI-TURN SURFACE MOUNT TRIMMING POTENTIOMETERS

SMD



Designed for automated assembly lines. Miniature outline: 0.240 x 0.266 x 0.169″ (6.00 x 6.75 x 4.30). Sealed for immersion cleaning processes. Mechanical angle: 14 turns, nominal. Electrical angle: 11 turns, nominal. Essentially infinite resolution. Precious metal alloy multi-contact wiper. Resistance tolerance: ±10%. Power rating: 0.25W @ 85°C, derated to 0W @ 125°C. Operating temperature: –55°C to +125°C. 2.78 oz.-in. maximum operating torque. **Sold in packages of 50.**

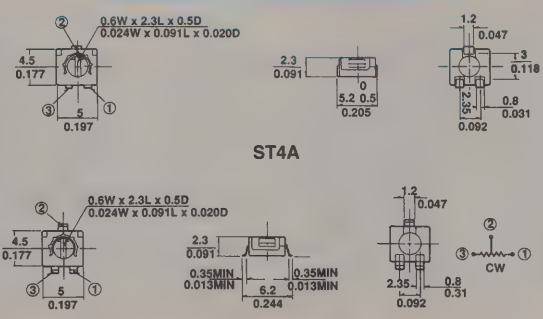
ST-4 SERIES SINGLE-TURN SURFACE MOUNT TRIMMING POTENTIOMETERS

SMD



Single-turn units. O-ring seal and high temperature capabilities enable these units to withstand soldering and cleaning processes used on larger sealed SMDs. Essentially infinite resolution. Resistance tolerance: ±20%. Power rating: 0.25W @ 70°C, derated to 0W @ 125°C. Operating temperature: –55°C to +125°C. 1.39 oz.-in. maximum operating torque. Dimensions: 0.177 x 0.197 x 0.091″ (4.50 x 5.00 x 2.30). **Sold in packages of 100.**

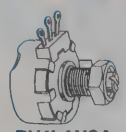
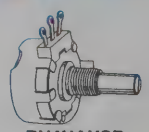
POTENTIOMETERS AND READOUT DIALS

RV4 SERIES PLASTIC MILITARY POTENTIOMETERS



RV4LAYSA



RV4NAYSD

- **Direct Cross to Hot-Molded Carbon Composition "J" Potentiometers**

2-watt potentiometers are sealed against environmental elements. 1.063″ (27.00) dia. and 0.563″ (14.29) deep, brass nickel-plated shaft and bushing, with stainless steel cover. 500WVDC. Linear taper. ±10% tolerance. Meet military specification MIL-R-94. Operating temperature: –55°C to +120°C. For commerical equivalents, see **53C series** below. Additional values available, *contact your local Newark sales office.*

POTENTIOMETERS AND DIALS

364 SERIES CERMET TRIMMING POTENTIOMETERS

364P 364X 364Y 364W

Trimmers have CRV of 3% or 3Ω and temperature coefficient of 100ppm/°C. Rated 0.5W 85°C not to exceed 400V. Effective electrical travel: 25 turns nominal. Tolerance: ±10%. End resistance: 2Ω or 1%, whichever is greater. Contact idles at stops. Operating torque: 5.0 oz-in. max. Sealed for cleaning in common solvents. Most popular values listed. Additional values available; *contact your local Newark sales office.*

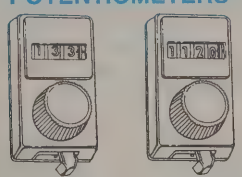
DIGITAL READ-OUT DIALS FOR MULTI-TURN POTENTIOMETERS



DR300 DR400

Type DR-400 is 100 turn, 4-digit model, with left two digits indicating completed revolutions of turning knob and right two digits indicating percent of revolution. Unit registers count of 9999. Satin chrome finish body. Matte black bezel, base. Metal finish knobs. White numerals on black background. **Type DR-300** same, but 3-digit, 10-turn, count of 999. Mounting requirements: 0.25″ (6.35) shaft and ⅜″ 32-NEF-2A bushing.

Stock No.	Type	1-4	5-9	10-24

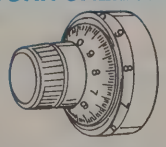
COMMERCIAL 10-TURN CALIBRATED SCALE DIALS



Fit up to 10-turn potentiometer and other rotary devices. Accurate readings, zero backlash, brake lever option. Need 1 sq. inch (25.40) of panel space. Mounts on true 1″ (25.40) centers. Knob attaches to shaft; body of dial mounts to panel. Mounting requirements: 0.25″ (6.35) diameter shaft, ⅜″ 32-NEF-2A bushing. Available with black or clear anodized housing with or without brake lever.

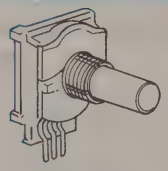
574 AND 575 SERIES COMMERCIAL POTENTIOMETERS



Single-section potentiometers feature robust construction, high rotational life, and conductive plastic elements. Ideal for appliance, consumer, and automotive applications. WVAC: 350V. Linear taper. Power rating: 0.5W @ 70°C. Tolerance: ±20%. Shaft dia.: 0.25″. Shaft length: 0.75″. Effective rotation: 270°. Torque range: 0.2 to 2.5 in. oz. Operating temperature: –40°C to +120°C. Meet MIL-STD-103B, Test Condition A.

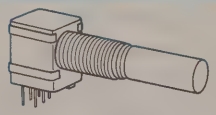
580 SERIES COMMERCIAL POTENTIOMETERS



580 series 9.5mm modular potentiometers feature robust construction, smooth operation, high rotational life, and conductive plastic elements. Suitable for audio and automotive applications. WVAC: 100V. Power rating: 0.1W @ 40°C. Tolerance: ±20%. Mechanical rotation: 295° ±5°. Operating temperature: –40°C to +100°C.

WRS SERIES HOT-MOLDED ½ -WATT LINEAR TAPER PANEL POTENTIOMETERS

WRS Series

WRS series are linear taper, single section units with ¼ x ¼"L dust and splash resistant bushing and ⅛ x ⅞"L, standard slot shaft. Shaft dia.: 0.125". Resistance tolerance: ±10% . Come with SPST switch, actuated at start of clockwise rotation that reduces effective electrical rotation to 240° nominal. Operating temperature: –55°C to +120°C.

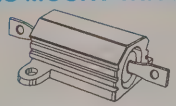
CMC SERIES CHASSIS MOUNT WIREWOUND RESISTORS



Aluminum housing power resistors screw mount on chassis surface, and offer heat sink capability. Temperature range: –55°C to +275°C. Resistance tolerance: 1.0%. Copper weld, tinned terminals. Meet MIL-R-18546. Minimum quantities may apply. Most popular values listed. Additional values available, *contact your local Newark sales office.*

GA & WA SERIES HOT-MOLDED CARBON ½ -WATT LINEAR-TAPER PANEL POTENTIOMETERS

Type GA2G056S and WA2G056S

Type GA2GL040S and WA2L040S

Types GA and **WA** are MIL-R-94 style RV6 single section immersion-sealed linear taper units, with mounting nut, lockwasher and locknut. **GA2L040S** have ½"L locking bushing and ⅝"L slotted-end shaft. **GA2G056S** have ¼" plain bushing and ⅞"L standard slotted-end shaft. **WA2L040S** have ½"L locking bushing and ⅝"L slotted-end shaft. **WAG056S** have ¼"L plain bushing and ⅞"L slotted-end shaft. Dia. of all shafts: 0.125". Resistance tolerance, all units: ±10%. Operating temperature: –55° to +120°C.

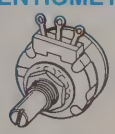
380 SERIES 2-WATT CONDUCTIVE PLASTIC POTENTIOMETERS



Superior dynamic noise, long rotational life. Tolerance: linear, up to 1MΩ ± 10%, above 1 MΩ ± 20%. Linearity ± 5% independent. 500VDC across terminals. **380C1** 2" round shaft FMS; ⅜" long bushing with ⅜ x 32-NEF-2A thread; **380C2** ⅝" screwdriver slotted shaft FMS; with a ½" split locking bushing; **380C3** ⅞" screwdriver slotted shaft FMS; ⅜" long bushing with ⅜ x 32-NEF-2A thread. Meet MIL-R-94, where applicable. **485 series** with a life cycle of 1,000,000 shaft rotations is also available. *Contact your local Newark sales office.*

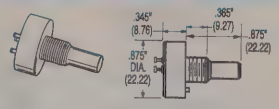
POWER RESISTOR DECADE BOX

Resistance decade box provides any resistance from 1 to 999,999 ohms for working circuits. Six front-panel dials enable selection in 1-ohm increments, with the total value shown on the dial. Each decade has power rating of 225 watts maximum, 1000VDC or 660VAC maximum. Standard uses include resistance determination, load resistance, meter multiplier, and calibrating meters.

62F730 Type 240C. **Each** **1328.94**

(4128) (de01977)

157 SERIES 0.875″ SINGLE-TURN CONDUCTIVE PLASTIC PRECISION POTENTIOMETERS



Bushing mount unit. Plated brass terminals. Aluminum housing. 11/32″ behind panel. ¼″ stainless steel, non-magnetic shaft. Power: 1 W @ 40°C. Tolerance: ±20%. Linearity: ±2.0%. Dielectric strength: 1000Vrms. Mechanical rotation: 360° continuous. Operating temperature: –55°C to +125°C

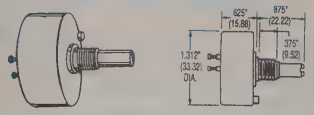
138 SERIES SINGLE-TURN CONDUCTIVE PLASTIC POTENTIOMETERS



1.312″ dia., bushing mount, conductive plastic. Rated 2.0W at 40°C. Independent linearity: ± 0.5%; electrical rotation: continuous, 345°± 4°, units with stops, 336°± 4°. Temperature range: –55°C to +125°C. End taps standard. Shaft length including bushing: 0.875 x ¼″ dia. Bushing: ⅜-32 x ⅜″. Resistance tolerance: ±10%. **0-0** in type = continuous rotation; **2-0** in type = stops.

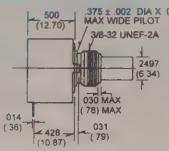
657 SERIES CONDUCTIVE PLASTIC POTENTIOMETERS

NEW



657 series potentiometers have conductive plastic element on an alumina substrate. Moisture-resistant sealed construction. Sleeve bearing. Stainless steel shaft: 0.440″ x 0.2497″ (11.12 x 6.34) dia. Nickel-plated brass bushing: ⅜″ x 32UNEF-2A. Power rating: 0.5W @ 85°C. Mechanical rotation (with stop): 250°. Tolerance: ±20%. Operating temperature: –40°C to +125°C.

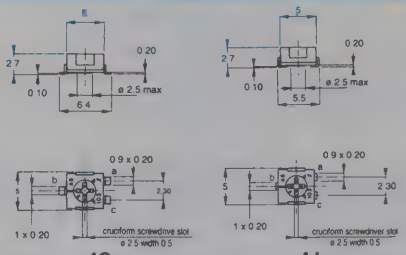
4G AND 4J SERIES TRIMMING POTENTIOMETERS

SMD



4G 4J

- **Designed for High-Performance and Stability**
- **Optimum Packaging Density**
- **Fully Sealed for Wave, Vapor Phase, Reflow Soldering and Immersion Cleaning**
- **Designed for both Manual and Automatic Operation**

Both gull wing (**type 4G**) and J-lead (**type 4J**) are fully sealed. MIL-STD-202, Method 106 for moisture resistance; MIL-STD-202, Method 213/1 for shocks; MIL-STD-202, Method 204/D for vibrations. Resistance tolerance: ±20%. Resistive element: Cermet. **Sold individually and on tape and reel of 500.**

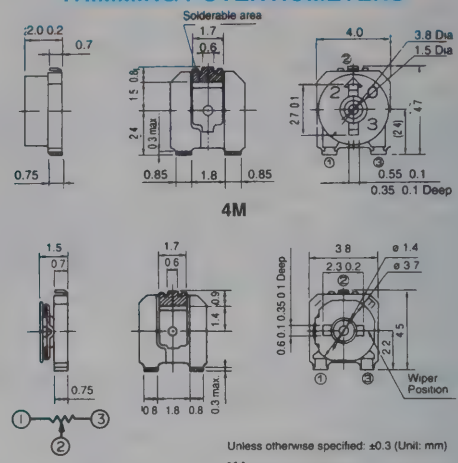
4H AND 4M SERIES 4mm SURFACE MOUNT CERMET TRIMMING POTENTIOMETERS

SMD



- **Designed for High-Performance and Stability**
- **Optimum Packaging Density**
- **Designed for both Manual and Automatic Operation**

Type 4H is open frame; **type 4M** is sealed. Features of **4H** include terminations with excellent solder wettability as well as high solder leaching resistance due to nickel barrier layer construction. Features of **4M** include miniature size (4.7 x 4.0 x 2.0mm), suitability for flow and reflow soldering with no cleaning process necessary after soldering. Resistance tolerance: ±25%. **Sold individually and on tape and reel.**

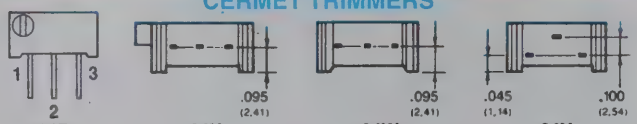
64 SERIES 0.375″ SQUARE INDUSTRIAL MULTI-TURN CERMET TRIMMERS



Fully sealed. Positive gear drive and solder terminations. 25-turn nominal effective travel. Temperature coefficent: ±100ppm/°C. Resistance tolerance ±10%. Rated 0.5W @ 85°C. Operating temperature: –55°C to +125°C. Adjustment screw position: **64P series**, side; **64X series**, side; **64W series** and **64Y series**, top. *Order* **type 8T000** *trimmer adjustment tool separately on page 797.*

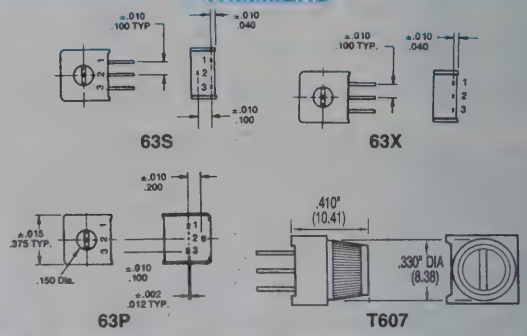
63 SERIES 0.375″ SQUARE SINGLE-TURN CERMET TRIMMERS



Cermet trimmers have resistance tolerance of ±10%. 0.5W @ 70°C. Dielectric withstanding: 1000VAC. Operating temperature: –55°C to +125°C. Solid stop. **63P series** have PC board terminal pins, 0.100″ grid (TO-5 grid) with adjustment perpendicular to board; **63X series** have PC board pins, 0.100″ grid (TO-5 grid) with adjustment parallel to board; **63S series** have PC board pins, 0.100″ in line, with adjustment parallel to board. **63P-T607 series** are knob-adjust units with flat serrated knob. *Order* **type 8T000** *trimmer adjustment tool separately on page 797.*

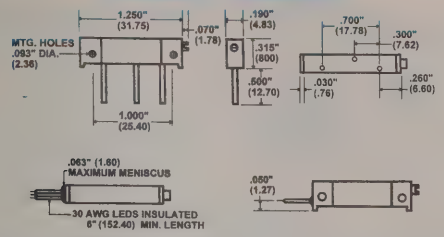
70 SERIES 1.25″ RECTANGULAR INDUSTRIAL MULTI-TURN CERMET TRIMMERS



Industrial grade trimmers are for applications requiring higher operating wattage and temperature. Units are resistant to humidity, shock and vibration. 20-turn screwdriver adjustment with idling end stops. **Type 70Y** PC pin units; **Type 70L** insulated wire lead units. Body mounting holes: 0.093″ (2.38) on 1″ (25.40) centers. Operating temperature: –55°C to +150°C. Resistance tolerance: ±10%. Power rating: 1 watt at 85°C. Resistance range: 10 ohms to 2 megohms. Temperature coefficient is from –100 to +200 PPM/°C up to 50 ohms resistance, and ±100 PPM/°C for greater than 50 ohm resistance. *Order* **Type 8T000** *trimmer adjustment tool separately on this page.*

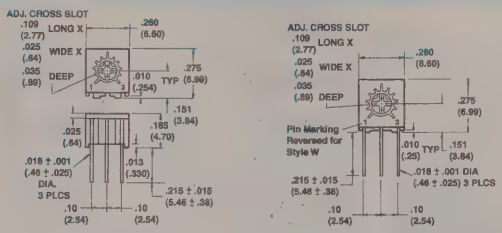
76 SERIES 1/4″ SQUARE SINGLE-TURN CERMET TRIMMERS



Top Adjust **Side Adjust**

Standard features include a multi-finger wiper to minimize contact resistance variation. Resistance tolerance: ±10%. Temperature range: –55°C to +125°C. Per MIL-STD-202, Method 103, for humidity. **Types 76H** and **76P** are top adjust; **76W** is side adjust.

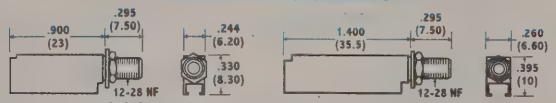
6 SERIES SNAP-ON PANEL MOUNT EXTENDING ADAPTERS FOR 43 & 70 SERIES



6-1-0 **6-2-0**

43 series standard 0.750″ (19.1mm) and **70 series** standard 1.250″ (31.75mm) rectangular trimming potentiometers can be panel mounted with these polyester plastic panel mount adapters. Optional adjustment shafts available. Suffix **(1)** flush shaft; suffix **(2)** 0.575″ (14.6mm) shaft extension; suffix **(3)** 0.875″ (22.23mm) shaft extension. Snap-in assembly. **6-1** is for **43 series; 6-2** is for **70 series.**

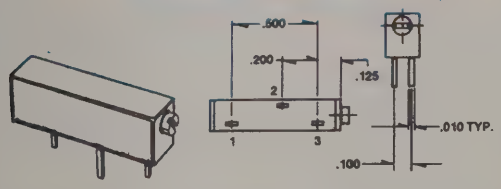
43P SERIES 0.75″ RECTANGULAR INDUSTRIAL MULTI-TURN CERMET TRIMMERS



Fully sealed and suitable for automatic soldering, these trimmers are designed for general use where economy and space are factors. 20-turn screwdriver adjustment. Operating temperature: –55°C to +125°C. Resistance tolerance: ±10%. ¾ watt at +70°C. *Order* **Type 8T000** *trimmer adjustment tool separately on this page.*

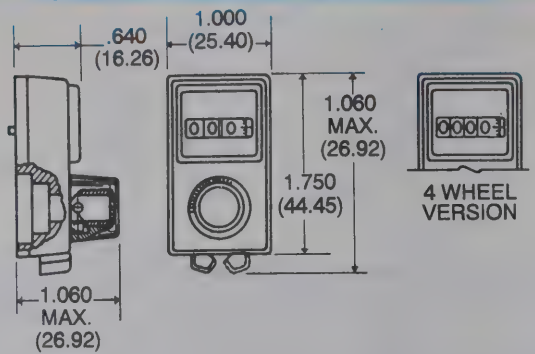
COUNTING DIALS AND SENSORS

10 AND 100 TURN DIGITAL SCALE DIALS



Types 15-1-11 and 15-1-31. For 0.25″ (6.35) diameter shaft. Three digit models count to 9.99 turns. Removable knob conceals setscrews and permits access to pot shaft for fast, accurate phasing. Positive braking action. Left digit indicates number of completed turns; right two digits show percent of partial turn. Mounting hardware included. Satin clear anodized finish. Knobs, bezel and base are matte black plastic. White numerals on black background. **Type 15-1-11** has open bezel. **Type 15-1-31** has clear plastic window bezel. **Type 15-2-11** same as **type 15-1-11** except is four-digit; counts to 99.99 turns. Left two digits indicate number of completed turns.

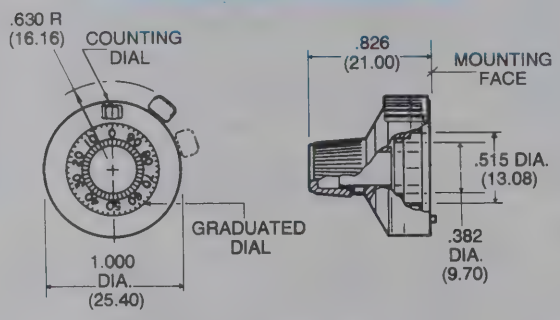
11-TURN VERNIER SCALE DIALS



Types 11-1-11 and **11-1-31.** 1.00″ (25.40) diameter dial. For 0.25″ (6.35) diameter shaft. Count to 10.99 turns. Single numeral in window (0-10) indicates complete turns, graduated circular dial shows percent of partial turn. Mounting hardware included. Black numerals and index marks, black plastic turning knob and brake lever. **Type 11-1-11:** satin chrome finish. **Type 11-1-31:** brushed chrome finish.

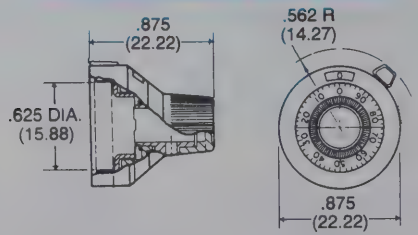
15-TURN VERNIER SCALE DIAL



Type 16-1-11. 0.875″ (22.23) diameter dial. For 0.25″ (6.35) diameter shaft. Counts to 14.99 turns. Positive brake action, brake lever adjustment for higher torque. Numeral in window (0-14) indicates completed turns, graduated circular dial shows percent of partial turn. Mounting hardware included. Dial: black numerals on brushed metal finish. Turns counter: black numerals on white background. **Type 16-1-21** has black anodized finish with white numerals.

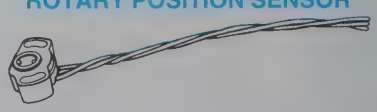
ROTARY POSITION SENSOR



Conductive plastic resistance elements for high linear accuracy. Expected life of 1,000,000 full cycles, 6,000,000 dither cycles. Compact design with flexible lead wires. 1W power rating, derating to zero at 135°C. Operating temperature: –40°C to +135°C. 120° ±5° mechanical rotation, CCW stop, 6 in.-lbs. maximum. Moisture resistant, shock resistant to 50G's, and vibration resistant 15G's, 50 to 1000Hz. Electrical angle 85° ±2°, mechanical angle 120° ±5°.

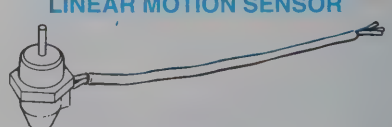
(4170) (de00003)

LINEAR MOTION SENSOR



Conductive plastic resistance elements offer long life, low CRV, and excellent linearity performance. Expected life of 1,000,000 full cycles, 6,000,000 dither cycles. 1W power rating, derating to zero at 135°C. 0.425″ ±0.15″ mechanical travel spring loaded to extended position. 0.405″ ±0.015″ electrical travel, ±3% linearity. Operating temperature: –55°C to +135°C. Moisture resistant, shock resistant to 50G's, and vibration resistant 15G's, 50 to 2000Hz.

NTC THERMISTORS

111 AND 112 SERIES GLASS BEAD NTC THERMISTORS

Radial Leads Axial Leads

Type 111 small bead thermistors. Tolerance: 20%. DC power: 0.1mW/°C. Time constant: 1 second. **Type 112** standard bead thermistors. Tolerance: 20%. DC power: 0.4mW/°C. Time constant: 4 seconds. **Type 112** meet MIL-T-23648A. Types ending in suffix **H01** are axial lead; types ending in suffix **B01** are radial lead. Lead length: 0.375″. Lead material: weldable platinum iridium.

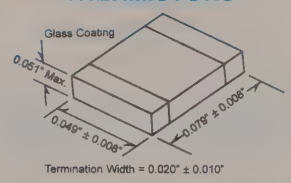
173 SERIES SURFACE MOUNT END-BANDED NTC THERMISTORS

NEW SMD



173 series NTC thermistors are designed for automated pick-and-place mounting on rigid or flexible PC boards. Ideal for boards with a high density of discrete components. Glass-coated ceramic. Solder-plated nickel barrier terminations. EIA size: 0805. Withstand solder temperatures of 260°C for 30 sec. Operating temperature: 150°C max.

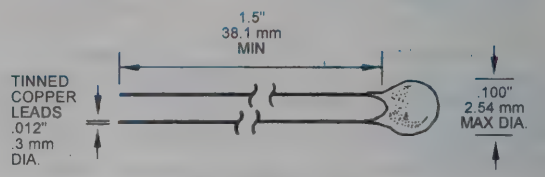
TYPE C100 NTC THERMISTORS

THERMOMETRICS



Type C100 thermistors are epoxy-coated with tinned copper leads. Suitable for temperature measurement, control and compensation applications. Low-cost for high-volume applications such as energy management systems, small appliance controls, and automotive and industrial equipment controls. Can be used for applications in the –80 to +150°C temperature range, but best stability is achieved below 105°C. Resistance: 10kΩ@ 25°C. Power rating: 0.075W derated from 100% at 25°C to 0% at 100°C. Dissipation constant: 1 mW/°C (stilled air); 8 mW/°C (stirred oil). Thermal time constant: 10 sec. (still air); 1 sec. (stirred oil). Diameter (max.): 0.100″ (2.54). Lead length (min.): 1.5″ (38.1). Lead diameter: 0.012″ (0.3).

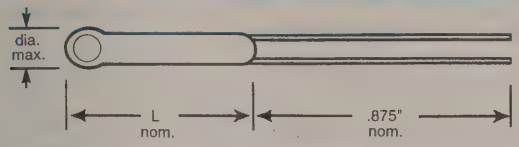
THERMISTORS AND PROBES

TYPES P60 AND P100 NTC THERMISTORS



Types P60 and **P100** thermoprobes are recommended for general purpose applications involving temperature measurement, control, circuit temperature compensation, liquid level sensing and fluid flow sensing. Large bead thermistor is hermetically sealed in tip of a shock-resistant solid glass rod. Tinned dumet leads. Excellent long-term stability. ±20% tolerance at 25°C. Length: 0.50″ (12.7). Diameter: **type P60**, 0.060″ (1.5); **type P100**, 0.100″ (2.5).

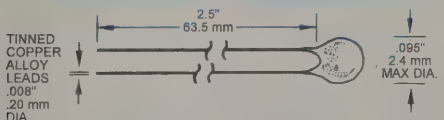
TYPE EC95 NTC THERMISTORS



All **type EC95** thermistors are epoxy-coated for stability and have tinned copper alloy leads. For use in any general temperature measurement, control or compensation applications where interchangeability and low-cost are major considerations, especially disposable and permanent medical products, energy management systems, appliances, industrial equipment and automotive applications. May be used from –80°C to +150°C, but best overall stability below 105°C. Max. temperature is 150°C. Operating temperature: 0 to +70°C. Power rating (max.): 0.075W derated from 100% at 25°C to 0% at 100°C. Dissipation constant: 1 mW/°C (stilled air); 8 mW/°C (stirred oil). Thermal time constant: 10 sec. (still air); 1 sec. (stirred oil). Diameter (max.): 0.095″ (2.4). Lead length (min.): 2.5″ (63.5). Lead diameter: 0.008″ (0.20).

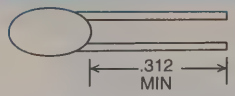
TYPE BR42 NTC THERMISTORS



Type BR42 Thermobeads are ruggedized, reliable versions of large, glass-coated bead NTC thermistors. This thick glass coating provides a superior hermetic seal with improved strain relief and greater stability than conventional glass-coated parts. Platinum alloy leads. ±20% resistance tolerance at 25°C. Dissipation constant in still air at 25°C: 0.33mW/°C. Max. power rating: 0.042 watts.

AUTOMOTIVE SENSOR

Stainless steel probe meets the rigors of automotive, light, and heavy truck applications. Equally functional in both diesel and gasoline combustion systems. Meets Automotive Electronics Council Standard CDF-AEC-Q200 for salt spray, moisture, vibration, and durability. Stainless steel protective braiding covers AWG #22 stranded 2-conductor twisted pair Teflon® cable. Stainless steel probe extension. 7⁄16″ free-spinning hex nut design provides easy, tangle-free insertion of long harness wires.

91F9856 Type A-1291. **Each** **95.74**

INDUSTRIAL SENSOR

Use in generators, compressors and furnace controls. 7⁄16″ fixed nut design for short-leaded applications. Max. operating temperature: 1000°C. Stainless steel probe extension. AWG #22 stranded 2-conductor twisted pair Teflon® cable has strain relief flexible sleeving.

91F9854 Type A-1282. **Each** **76.59**

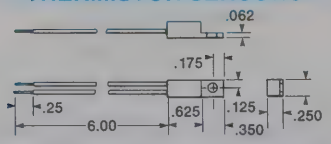
THERMISTORS

THERMISTOR SENSORS



These sensors feature AWG 24 irradiated Polyolefin insulated leads. Maximum operating temperature: +125°C.

Stock No.	Type	Resist. @ 25°C	TC%/°C @ 25°C	1-9	10-24

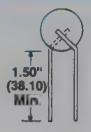
(4200) (de02363)

NTC THERMISTORS



Negative temperature coefficient thermistors decrease in resistance as temperature increases. Disc-type with dip-soldered, radial leads. Temperature coefficients range from –3.42%/C to –5.23%/C @ 25°C. Maximum operating temperature: +150°C. Resistance ratio is ratio of zero power resistance @ 0°C to zero power resistance at +50°C. Tolerance: ±10% or ±20%, indicated by part number suffix. Other tolerances available; *contact your local Newark sales office.* **NOTE: Factory minimum and multiple requirements apply**.

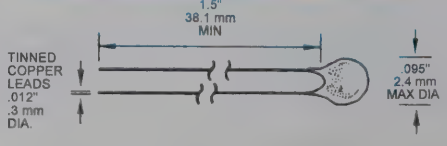
NTC THERMISTOR KITS

Type A786 NTC thermistor kit contains one each of the **type RL** NTC thermistors of 10% tolerance (**suffix T10**) listed above. Ideal for design and maintenance applications.

46F417 Type A-787. **Each**..... **55.53**

(4181) (de00629)

TYPE DC95 NTC THERMISTORS



All **type DC95** thermistors are epoxy-coated for stability and have tinned copper leads. For use in any general temperature measurement, control or compensation applications where interchangeability and low-cost are major considerations, especially disposable and permanent medical products, energy management systems, appliances, industrial equipment and automotive applications. May be used from –80°C to +150°C, but best overall stability below 105°C. Max. temperature is 150°C. Operating temperature: 0 to +70°C. Power rating (max.): 0.075W derated from 100% at 25°C to 0% at 100°C. Dissipation constant: 1 mW/°C (stilled air); 8 mW/°C (stirred oil). Thermal time constant: 10 sec. (still air); 1 sec. (stirred oil). Diameter (max.): 0.095" (2.4). Lead length (min.): 1.5" (38.1). Lead diameter: 0.012" (0.3).

NTC INRUSH CURRENT LIMITERS

Disc-type thermistors with dip-soldered, radial leads provide protection against extremely high peak inrush current, especially in AC/DC switching power supplies. NTC thermistors control the initial surge at turn-on for several seconds. All parts insulated with protective coating.

Stock No.	Type	Ohms @ 25°C ±25%	Max. Steady Current (A)	Max. Diameter	1-99	100-249	250-499

On the following 44 pages is a listing of only a fraction of the thousands of semiconductor devices that Newark regularly stocks. We also continually add new devices to our inventory. If you don't see the component you need, call Newark at 1-800-4-NEWARK to check the latest availability. Please note that the prices listed below are subject to change.

This listing is organized as follows: The first column is the manufacturer's part number (used to order with), the second column is the manufacturer (see the key on the facing page). The third column is the page number on which the part appears, if it is in this edition of the catalog. The last two columns are pricing for that item, each has the quantity break first, then the price in US$.

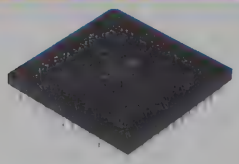
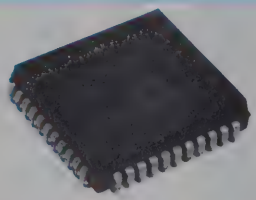
Product Selection Guide—Semiconductors

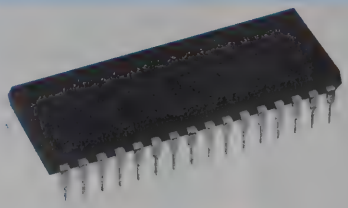
SECTION 17



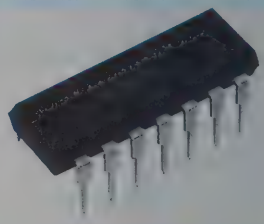
Microprocessors, Pages 850, 851, 900, 921



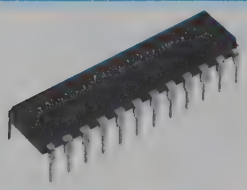
Microcontrollers, Pages 852, 853, 857, 908, 911, 913, 914, 921



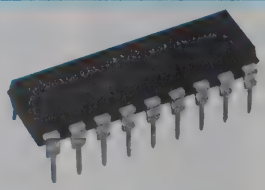
Memory, Pages 859, 910, 911, 913, 931



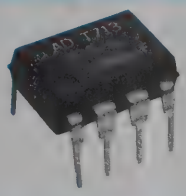
Logic, Pages 860-864, 902, 903, 911, 912, 931



Linear—Converters, Pages 867, 884-887, 898, 899, 904, 906, 917, 918



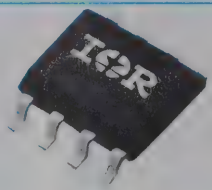
Linear—Drivers, Pages 867, 897, 905, 916, 919, 920, 928, 939



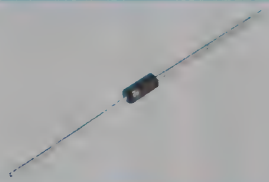
Linear—Op-Amps, Pages 866, 879-883, 889, 896, 897, 904, 907, 917, 920

Linear—Regulators, Pages 865, 876, 889, 904, 908, 918

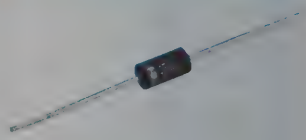
Transistors—FETs, Pages 869, 870, 873, 894, 924, 925, 934, 940



Transistors—Power, Pages 868, 870-873, 894, 909, 923, 928, 934, 936, 940, 941

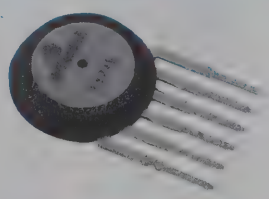


Rectifiers, Pages 874, 875, 894, 922, 923, 926, 927, 929, 930, 932, 933, 935-938, 940, 941

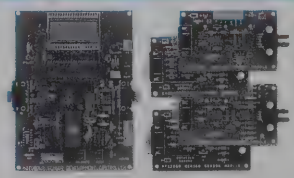


Diodes, Pages 869, 876, 909, 928, 932-936

Varistors, Pages 892, 893



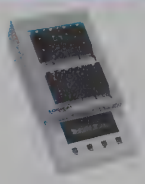
Sensors, Pages 877, 889, 891, 906, 915, 917



Semiconductor Kits, Pages 891, 901, 921, 940, 941

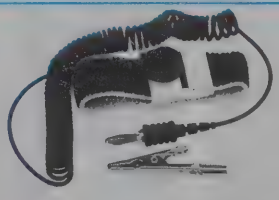
SECTION 18

Heat Sinks, Pages 947-950, 952



PROM/PLA Programmers, Page 962

UV EPROM Erasers, Page 963



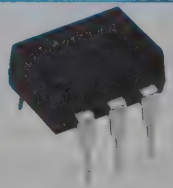
Static Control Products, Pages 958, 959

Tubes, Page 946

Technical Publications, Pages 944, 945

SECTION 12

LED Products, Pages 580, 581, 587, 592, 596-600



Optocouplers/Isolators, Pages 578, 579, 584, 585

SECTION 9

Fiber-Optic Products, Pages 492-506

DATA SHEETS AND WEB ADDRESSES

AUTOMATED DATA SHEET FAX-BACK SERVICES

Many of our semiconductor manufacturers have their data sheets available to you via an automated dial up system. First, call the number listed below and request an index of all available documents. Then, select the desired data sheet and call back using the code or document number given on the index.
(4657)

PRODUCT INFORMATION AVAILABLE ON THE WORLD WIDE WEB

In-depth product information, including product specifications and complete data sheets, are available from many of our semiconductor manufacturers. Refer to the Internet address listed below for the complete URL address.
(ne09509)

Advanced Micro Devices

Automated data sheet delivery system available by dialing Advanced Micro Devices' *FACTS-ON-DEMAND* Hotline at: 1-800-222-9323.

Web Site: http://www.amd.com/
(4643) (ne09459)

Honeywell OPTOELECTRONICS GROUP

Technical support available by calling Honeywell's Technical Support at 1-800-FOR-OPTO.

Web Site: http://www.honeywell.sensing.com/
(4651) (ne09467)

Allegro MicroSystems, Inc. Formerly Sprague Semiconductor Group

Contact your local Newark sales office at 1-800-4-NEWARK (1-800-463-9275) for your Allegro Microsystems data sheet requirements.

Technical support available by calling 1-508-ALLEGRO.

Web Site: http://www.allegromicro.com/
(4644) (ne09460)

MICREL SEMICONDUCTOR

For technical support and data sheets, see their website at http://www.micrel.com/
(40071) (ne40071)

ANALOG DEVICES

Automated data sheet delivery system available by dialing Analog Devices *Analog Fax* FAX-ON-DEMAND at 1-800-446-6212.

Technical support available by calling Analog Devices Applications Hotline at 1-800-ANALOGD (1-800-262-5643).

World Wide Web Site: http://www.analog.com/
(4646) (ne09462)

MOTOROLA

Automated data sheet delivery system available by dialing Motorola's *Design-Net* data sheet service at 1-602-244-6609.

Web Site (data sheets): http://www.design-net.com/

Includes a full search capability and complete data sheets for all products.
(4653) (ne09469)

DALLAS SEMICONDUCTOR

Automated data sheet delivery system available by dialing Dallas Semiconductor's *Document Retrieval Service* at 972-371-4441.

Web Site: http://www.dalsemi.com/
(4647) (ne09463)

National Semiconductor

Obtain National Semiconductor data sheets on the Internet.

Web Site: http://www.national.com/
(18036) (ne10885)

GENERAL SEMICONDUCTOR

Contact your local Newark sales office at 1-800-4-NEWARK (1-800-463-9275) to obtain General Semiconductor data sheets.

Web Site: http://www.gensemi.com/
(4648) (ne09464)

SEMIKRON innovation+service

For technical support and data sheets, see their website at www.semikron.com/
(40072) (ne40072)

HARRIS

Automated data sheet delivery system available by dialing Harris Semiconductor's *Answerfax* Hotline at 1-407-724-7800.

Technical support available by calling Harris' Applications Hotline at 1-800-4-HARRIS.

Web Site: http://www.semi.harris.com/
(4649) (ne09465)

TI

Contact your local Newark sales office at 1-800-4-NEWARK (1-800-463-9275) to obtain Texas Instruments data sheets.

Web Site: http://www.ti.com/
(4655) (ne09471)

HEWLETT® PACKARD

Automated data sheet delivery system available by dialing Hewlett Packard's Fax-Back Service Hotline at 1-800-450-9455.

Technical support available by calling Hewlett Packard's Application Support at 1-800-933-4395.

Web Site: http://www.hp.com/
(4650) (ne09466)

ZiLOG Totally Logical

Contact your local Newark sales office at 1-800-4-NEWARK (1-800-463-9275) to obtain Zilog data sheets.

World Wide Web Site: http://www.zilog.com/
(4656) (ne09472)

STAND-ALONE CPUs

Type	Speed (MHz)	Package	Description	Comments
MC68EC000FN10 MC68EC000FN12 MC68EC000FN16 MC68EC000FN20 MC68EC000FU10 MC68EC000FU12 MC68EC000FU16 MC68EC000FU20	10 12 16 20 10 12 16 20	68-Lead PLCC 68-Lead PLCC 68-Lead PLCC 68-Lead PLCC 64-Lead PQFP (14mm x 14mm) 64-Lead PQFP (14mm x 14mm) 64-Lead PQFP (14mm x 14mm) 64-Lead PQFP (14mm x 14mm)	8-/16-/32-Bit HCMOS Embedded MPU	Embedded Control MPU with 8-/16-Bit Selectable Data Bus.
MC68HC000FN10 MC68HC000FN12 MC68HC000FN16 MC68HC000FN20	10 12 16 20	68-Lead PLCC 68-Lead PLCC 68-Lead PLCC 68-Lead PLCC	HCMOS 16-/32-Bit MPU	Complete **MC68000** Pin and Timing Compatibility with one-tenth the Power Dissipation
MC68SEC000FU10 MC68SEC000FU16 MC68SEC000FU20	10 16 20	64-Lead PQFP (14mm x 14mm) 64-Lead PQFP (14mm x 14mm) 64-Lead PQFP (14mm x 14mm)	8-/16-/32-Bit Static HCMOS Embedded MCU	Static Version of Low-Cost Embedded Control MPU with 8-/16-Bit Selectable Data Bus
MC68020FC16E MC68020FC20E MC68020FC25E MC68020FC33E MC68020RP16E MC68020RP20E MC68020RP25E	16 20 25 33 16 20 25	132-Lead PQFP (Gull Wing) 132-Lead PQFP (Gull Wing) 132-Lead PQFP (Gull Wing) 132-Lead PQFP (Gull Wing) 114-Lead PPGA 114-Lead PPGA 114-Lead PPGA	32-Bit MPU	Complete 32-Bit MPU. 5GB Linear Address Space. Coprocessor Interface. Instruction Cache. Dynamic Bus Sizing. Excellent MPU for Graphics Control. On-Chip Cache Speeds Drawing Alogorithms. Bit Field Support for Pixel Manipulation.
MC68EC020FG16 MC68EC020FG25 MC68EC020RP16 MC68EC020RP25	16 25 16 25	100-Lead PQFP 100-Lead PQFP 100-Lead PPGA 100-Lead PPGA	32-Bit Embedded MPU	32-Bit Data Bus MPU with 24-Bit Address Bus. Instruction Cache. Dynamic Bus Sizing. Coprocessor Interface. Low-Cost Packaging.
MC68030FE16C MC68030FE20C MC68030FE25C MC68030FE33C	16 20 25 33	132-Lead CQUAD 132-Lead CQUAD 132-Lead CQUAD 132-Lead CQUAD	Enhanced 32-Bit MPU	Complete 32-Bit MPU with On-Chip Instruction and Data Caches, Internal Parallel Buses, Enhanced Bus Controller, and On-Chip MMU.
MC68EC030FE25C MC68EC030FE40C MC68EC030RP25C MC68EC030RP40C	25 40 25 40	132-Lead CQUAD 132-Lead CQUAD 124-Lead PPGA 124-Lead PPGA	Embedded MPU	32-Bit MPU for Embedded Applications. On-Chip Instruction and Data Cache Provide High-Speed Access for Control Routines and Data. Utilizes Low-Cost DRAM Bus Interface.
MC68040FE25 MC68040FE33 MC68040FE40	25 33 40	184-Lead CQUAD 184-Lead CQUAD 184-Lead CQUAD	32-Bit MPU/MMU/FPU	Complete 32-Bit MPU with On-Chip Instruction/Data Caches (4KB each). On-Chip MMU. Full IEEE Floating-Point, Multi-processing Support with Full **M68000 Series** Compatibility.
MC68EC040FE20 MC68EC040FE25 MC68EC040FE33 MC68EC040FE40	20 25 33 40	184-Lead CQUAD 184-Lead CQUAD 184-Lead CQUAD 184-Lead CQUAD	Embedded 32-Bit MPU	High-Performance 32-Bit MPU with On-Chip Instruction and Data Cache. Provides High-Speed Access for Control Routines and Data. Utilizes Low-Cost DRAM Bus Interface.
MC68LC040FE20 MC68LC040FE25 MC68LC040FE33 MC68LC040FE40	20 25 33 40	184-Lead CQUAD 184-Lead CQUAD 184-Lead CQUAD 184-Lead CQUAD	32-Bit MPU	High-Performance **68040**-Compatible Integer Unit and MMU. Ideal Solution for Cost-Sensitive Computer or Sophisticated Embedded Applications.
MC68040FE25V MC68040FE33V	25* 33*	184-Lead CQUAD 184-Lead CQUAD	32-Bit MPU/MMU/FPU	Low-Voltage Complete 32-Bit MPU with On-Chip Insruction Data Caches (4KB each). On-Chip MMU. Full IEEE Floating-Point, Multiprocessing Support.
MC68EC060RC50 MC68EC060RC75	50 75	206-Lead PGA 206-Lead PGA	Superscalar 32-Bit MPU	RISC Hybrid Superscalar MPU with Full **M6800 Series** Compatibility. Includes Dual Integer Units, On-Chip Instruction and Data Caches (8KB each). Ideal for High-Performance Embedded Control Applications.
MC68LC060RC50 MC68LC060RC75	50 75	206-Lead PGA 206-Lead PGA	Superscalar 32-Bit MPU	RISC Hybrid Superscalar MPU with Full **M6800 Series** Compatibility. Includes Dual Integer Units, On-Chip Instruction and Data Caches (8KB each), and On-Chip MPU.
MC68882FN16A MC68882FN20A MC68882FN25A MC68882FN33A	16 20 25 33	68-Lead PLCC 68-Lead PLCC 68-Lead PLCC 68-Lead PLCC	Enhanced Floating-Point Coprocessor (EFPCP)	Pin-to-Pin Timing and Software Compatibility with **MC68881**. Dual-Ported Registers and Increased Pipelining Allows 2-4 Times the Performance of**MC68881**.

* @ 3.3V.

MICROPROCESSOR DEVELOPMENT SYSTEMS

MC68HC05/08 DEVELOPMENT SYSTEMS

- **Step 1: Choose the Device to Be Emulated and Its Package Type**
- **Step 2: Select the Emulation Module that Goes with the Device**
- **Step 3: Select the Device-Specific Flex Cable**
- **Step 4: Select the Device-Specific Target Head**

The key component of the M68HC05/08 development system is the **type M68MMPFB0508** station module, which can be re-used in multiple projects. To accessorize the station, you must choose the MCU-specific components (emulation module, flex cable, target head, and surface-mount adapter, if necessary) for the device in question. Many of these supporting components can be used with multiple MCUs, and, therefore, do not need to be re-ordered for many projects. **Type M68MMDS0508** is a modular development system which works with both the M68HC05 and M68HC08 series.

M68HC16 AND MC68300 DEVELOPMENT SYSTEMS

Type M68MMDS1632 core station module covers the entire spectrum of devices in the M68HC16 and M68300 microcontroller series, and can be re-used for multiple projects involving these devices. To use the core station you must select the appropriate microcontroller personality board (MPB) for the device and package type with which you are working.

Type	Device Supported	Package	MPB Type
M68MMDS1632	68HC16Y1	160-Pin QFP (FT)	**M68MPB16Y1B**
	68HC16Z1	132-Pin PQFP (FC)	**M68MPB16Z1B**
	68332A	132-Pin PQFP (FC)	**M68MPB332AB**
	68F333	160-Pin QFP (FT)	**M68MPBF333C**

MC68HC11 AND MC68HC12 SERIES MICROCONTROLLERS EVALUATION AND DEVELOPMENT TOOLS

M68HC11 AND MC68HC12 EVALUATION BOARDS (EVB/EVBU)

Type MC68HC11EVB evaluation board and **type MC68HC11EVBU** universal evaluation board are for development of the **type MC68HC11A8, MC68HC11E9, MC68HC711E9,** and **MC68HC811E2** microcontrollers. Both boards feature BUFFALO ROM monitor program, which resides in the on-board MC68HC11, provides one-line assembly, disassembly, and debugging commands. Both also have built-in RS-232C I/O port circuitry for communication between the evaluation board and the external terminal or host computer. **Type MC68HC11EVB** comes with an on-board MC68HC11A8. Features expanded mode of operation, with full bus access for debugging and evaluation. Requires a power supply that provides +5VDC, +12VDC, and –12VDC. Includes one flat-ribbon cable for target use. **Type MC68HC11EVBU** comes with an on-board MC68HC11E9. Has single-chip (I/O only) mode of operation. Requires a +5VDC power supply. Contains a wire-wrap area for system development. NOTE: To order the evaluation board or universal evaluation board, indicate which of the four supported devices is required.

Type	Devices Supported	Description
M68HC11EVB	MC68HC11A8/E9 MC68HC711E9 MC68HC811E2	Evaluation Board for **M68HC11 Series** MCUs. With BUFFALO ROM, RS-232 Circuitry, Expanded Mode of Operation.
M68HC11EVBU	MC68HC11A8/E9 MC68HC711E9 MC68HC811E2	Universal Evaluation Board for **M68HC11 Series** MCUs. With BUFFALO ROM, RS-232 Circuitry, Single-Chip Mode of Operation.
M68EVB912B32	MC68HC12B32	Evalutation Board for **M68HC12 series** MCUs. With 32K Internal Flash EEPROM, RS-232 Circuitry, Four Modes of Operation.
M68HC12A4EVB	MC68HC12A4	Evalutation Board for **M68HC12 series** MCUs. With 64K of Onboard EPROM, RS-232 Circuitry, Background Mode Operation.

MC68HC11 SERIES DEVELOPMENT SYSTEM

- **Step 1: Choose the Device to Be Emulated and its Package Type**
- **Step 2: Select the Emulation Module that Goes with the Device**
- **Step 3: Select the Device-Specific Flex Cable**
- **Step 4: Select the Device-Specific Target Head**

The key component of the M68HC11 development system is the **type M68MMDS11** station module, which can be re-used in multiple projects. To accessorize the station, you must choose the MCU-specific components (emulation module, flex cable, and target head) for the device in question. Many of these supporting components can be used with multiple MCUs, and, therefore, do not need to be re-ordered for many projects. **Type M68HC11PFB** platform board for MCU evaluation is also available; *contact your local Newark sales office.* Supporting components for other M68HC11 devices are also available; *contact your local Newark sales office.*

Type	Devices Supported	Package	Evaluation Module Type	Flex Cable Type	Target Head Type
M68MMDS11	68HC11A8*	52-Pin PLCC (FN)	**M68EM11E20**	**M68CBL11C**	**M68TC11E20FN52**
	68HC11D3*	44-Pin PLCC (FN)	**M68EM11D3**	**M68CBL11C**	**M68TC11D3FN44**
	68HC711D3*	44-Pin PLCC (FN)	**M68EM11D3**	**M68CBL11C**	**M68TC11D3FN44**
	68HC11E9/711E9	52-Pin PLCC (FN)	**M68EM11E20**	**M68CBL11C**	**M68TC11E20FN52**
	68HC11E20/711E20	52-Pin PLCC (FN)	**M68EM11E20**	**M68CBL11C**	**M68TC11E20FN52**
	68HC811E2*	52-Pin PLCC (FN)	**M68EM11E20**	**M68CBL11C**	**M68TC11E20FN52**

* Supporting components for devices in PDIP packages are also available; *contact your local Newark sales office.*

DIGITAL SIGNAL PROCESSORS

DIGITAL SIGNAL PROCESSORS

DSP56800 FAMILY GENERAL-PURPOSE 16-BIT FIXED POINT

The **DSP56800** core family is the first architecture designed to enable digital signal processing and embedded microcontroller functionality. This multifunctional approach supports applications requiring both signal processing and control functionality, such as wireless messaging, digital answering machines, feature phones and low-cost wireline modems.

Type	Package	Speed (MHz)	Program ROM/RAM	Data ROM/RAM	Peripherals	Comments
XC56L811BU40	100-Pin TQFP	40	64/1024	.../2048	SPI x 2, Synchronous Serial Interface, Timers	On-Chip Emulator, PLL, 3.3V

DSP56000 FAMILY GENERAL-PURPOSE 24-BIT FIXED POINT

The **DSP5600** family of HCMOS, 24-bit DSP devices are source code compatible and are used extensively in telecommunications, control and audio applications.

Type	Package	Speed (MHz)	Program ROM/RAM	Data ROM/RAM	Peripherals	Comments
DSP56002FC40	132-Pin PQFP	40	64/512	2x256/2x256	Host, Synchronous Serial Interface, Serial Communications Interface, Timer	On-Chip Emulator, Phase-Lock Loop
DSP56002PV40	144-Pin TQFP	40	64/512	2x256/2x256		
DSP56002PV66	144-Pin TQFP	66	64/512	2x256/2x256		
DSP56002PV80	144-Pin TQFP	80	64/512	2x256/2x256		
DSP56004FJ50	80-Pin PQFP	50	64/512	2x256/2x256	Serial Audio Interface, Serial Host Interface, External Memory Interface	
DSP56004FJ66	80-Pin PQFP	66	64/512	2x256/2x256		
DSPE56009FJ81	80-Pin QFP	81	10240/(512/2816)	4864/8960		On-Chip Emulator, PLL, 2304 x 24 Bits Data RAM Reconfigurable as Program RAM

DSP56300 FAMILY HIGH-PERFORMANCE 24-BIT FIXED POINT

The **DSP5600** family offers a new level of performance in MIPS, rich instruction set and low power dissipation, enabling a new generation of products in wireless, telecommunications, and multimedia.

XC56301GC66	252-Pin PBGA	66	.../3072	.../4096	32-Bit Host, Enhanced Synchronous Serial Interface, Serial Communications Interface	Single Clock Cycle per Instruction, Barrel Shifter, Instruction Cache, DMA Port
XC56302PV66	144-Pin TQFP	66	20480 (RAM)	14336 (RAM)		
XC56303PV66	144-Pin TQFP	66	.../3072	.../4096	8-Bit Host, Enhanced Synchronous Serial Interface, Serial Communications Interface	
XC56303PV80	144-Pin TQFP	80	.../3072	.../4096		
XC56303GC66	196-Pin PBGA	66	.../3072	.../4096		
XC56303GC80	196-Pin PBGA	80	.../3072	.../4096		

DSP96000 FAMILY 32-BIT IEEE FLOATING POINT

Type DSP96002 has full architecture compatibility with the 16-bit DSP56000 families. Although designed primarily for image processing, other proven applications include communications, spectrum analysis, instrumentation, speech processing and pattern recognition.

DSP96002RC33	223-Pin PGA	33	64/1024	2x512/2x512	...	Dual Bus, On-Chip Emulator Port
DSP96002RC40	223-Pin PGA	40	64/1024	2x512/2x512

Type	Description
M68302ADI-PC	**M68302FADS** ADI Card and Cable for IBM PC
M68302FADS	**302 Series** ADS Board; IBM-PC I/F Kit
M68302FADS-ENA	Ethernet Adapter Card with **MC68EN360RC25**
M68302FADS-LC	**M68302 Series** Application Development System with **MC68LC302RC25**
M68302FADS-PM	**M68302 Series** Application Development System with **MC68PM302RC25**
M68360QUADS	**MC68360** QUICC Application Development System for **68360** and **68EN360**
M68360ADI-PC	**M68360QUADS** I/F for IBM PC
M68360ADI-SUN4	**M68360QUADS** I/F for Sun4
MPC850FADS	**MPC850 Series** Application Development System
MPC860FADS	**MPC860** Series Apllication Development System
MPC860SRFADS	**MPC860FADS** for **MPC860SR**
MPC860TFADS	**MPC860FADS** for **MPC860T**
MPC860ADI-PC	**MPC860** ADI for IBM PC
MPC860ADI-SUN4	**MPC860** ADI for Sun4

TELECOMMUNICATIONS ICs

Type	Package	Function	Features
MC33110P	PDIP	Basic Compander	2.1 to 7.0V, No Precision Externals, 80dB Range, –40 to +85°C, Independent Compressor and Expander
MC34129P	PDIP	Current Mode Regulator	For Phone Line Power Applications, Soft-Start, Current Limiting, 2% Accuracy
MC33121P	PDIP	Central Office, Remote Terminals, PBX Applications	All Gains Externally Programmable, Most BORSHT Functions, Current Limit Adjustable to 50mA, 58dB Longitudinal Balance, –21.6 to –42V
MC34017-1P	PDIP	Adjustable Tone Ringer	Differential Output, Meets FCC Requirements, Adjustable REN, Different Warble Rates
MC34017-2P	PDIP		
MC34114P	PDIP	Basic Phone Line Interface	Loop Current Interface, Speech Network, Line Length Compensation, Speech/Dialing Modes, Bell System and Foreign Countries
MC34114DW	SOIC		
MC34018P	PDIP	Complete Speaker Phone with Speaker Amplifier	All Level Detection (2 pt.), Attenuators, and Switching Controls, Mike and Speaker Amp
MC34118P	PDIP	Complete Speaker Phone with Hybrid, Filter	All Level Detection (4 pt.), Attenuators, and Switching Controls, Mike Amp with Mute, Hybrid, and Filter
MC34118DW	SOIC		
MC34119P	PDIP	Low-Voltage Audio Amp	400mW, 8.0 to 100Ω, 2.0 to 16V, Differential Outputs, Chip-Disable Input Pin
MC34119D	SOIC

LONWORKS SUPPORT TOOLS

Type	Description
M143204EVK	Direct Connect Transceiver Board
M143206EVK	Neuron IC I/O Interface (GIZMO 3)
M143208EVK	Neuron IC I/O Interface Board (GIZMO 5)

(38872) (ne38872)

COMMUNICATIONS ICs

INTERFACE DEVICES

Type	Description	Package
MC145403DW	EIA-232/V.28 CMOS Driver/Receiver, 3 x 5	20-Pin SOIC
MC145404DW	EIA-232/V.28 CMOS Driver/Receiver, 4 x 4	20-Pin SOIC
MC145404P	EIA-232/V.28 CMOS Driver/Receiver, 4 x 4	20-Pin PDIP
MC145405DW	EIA-232/V.28 CMOS Driver/Receiver, 5 x 3	20-Pin SOIC
MC145406DW	EIA-232/V.28 CMOS Driver/Receiver, 3 x 3	16-Pin SOIC
MC145406P	EIA-232/V.28 CMOS Driver/Receiver, 3 x 3	16-Pin PDIP
MC145407DW	EIA-232/V.28 CMOS Driver/Rcvr, 5V Only, 3 x 3	20-Pin SOIC
MC145407P	EIA-232/V.28 CMOS Driver/Rcvr, 5V Only, 3 x 3	20-Pin PDIP
MC145408DW	EIA-232/V.28 CMOS Driver/Receiver, 5 x 5	24-Pin SOIC
ISDN TRANSCEIVERS		
MC145572FN	ISDN U-Interface Transceiver II	44-Pin PLCC
MC145572PB	ISDN U-Interface Transceiver II	44-Pin LQFP
MC145574DW	ISDN S/T-Interface Transceiver II	28-Pin SOIC
MC145574PB	ISDN S/T-Interface Transceiver II	32-Pin LQFP
MODEM FUNCTION DEVICES		
MC14LC5447DW	Calling Line I.D. Ring Detector	16-Pin SOIC
MC14LC5447P	Calling Line I.D. Ring Detector	16-Pin PDIP
UNIVERSAL DIGITAL LOOP TRANSCEIVERS		
MC145421DW	Provides Synchronous Full-Duplex 160kbps Voice and Data Communication in a 2B+2D Format for ISDN Compatibility on a Single Twisted Pair up to 1km. Single 5V Power Supply, Protocal Independent.	24-Pin SOIC
MC145421P		24-Pin PDIP
MC145425DW		24-Pin SOIC
MC145425P		24-Pin PDIP
MC145422DW	Provides Synchronous Full-Duplex 80kbps Voice and Data Communication in a 1B+2D Format on a Single Twisted Pair up to 1km. Single 5V Power Supply, Protocal Independent.	24-Pin SOIC
MC145422P		22-Pin PDIP
MC145426DW		24-Pin SOIC
MC145426P		22-Pin PDIP
VOICE AND DATA CODING DEVICES		
MC14LC5480DW	5V PCM Codec-Filter	20-Pin SOIC
MC14LC5480P	5V PCM Codec-Filter	20-Pin PDIP
MC14LC5480SD	5V PCM Codec-Filter	20-Pin SSOP
MC145481DW	3V PCM Codec-Filter	20-Pin SOIC
MC145481SD	3V PCM Codec-Filter	20-Pin SSOP
MC145483DW	3V Linear Codec-Filter	20-Pin SOIC
MC145483SD	3V Linear Codec-Filter	20-Pin SSOP
MC145484DW	5V PCM Codec-Filter	20-Pin SOIC
MC145484SD	5V PCM Codec-Filter	20-Pin SSOP
MC145502P	PCM Codec-Filter	22-Pin PDIP
MC145503DW	PCM Codec-Filter	16-Pin SOIC
MC145503P	PCM Codec-Filter	16-Pin PDIP
MC145505DW	PCM Codec-Filter	16-Pin SOIC
MC145505P	PCM Codec-Filter	16-Pin PDIP
MC14LC5540DW	3V ADPCM Codec-Filter	28-Pin SOIC
MC14LC5540P	3V ADPCM Codec-Filter	28-Pin PDIP
MC14LC5540FU	3V ADPCM Codec-Filter	32-Pin LQFP
MC145554DW	PCM Codec-Filter	16-Pin SOIC
MC145554P	PCM Codec-Filter	16-Pin PDIP

CMOS LOGIC DEVICES

VHC SERIES VERY HIGH-SPEED CMOS LOGIC

- **Over 60% Faster than HCMOS (Close to FACT)**
- **Very Low Noise (0.3 V_{OLP} Typ.)**
- **Inputs Tolerate Voltages from 0V to 7V (At Any Specified Voltage)**
- **Low Static I_{CC}**
- **8mA Sink/Source Current at V_{CC} = 4.5V (4mA @ V_{CC} = 3.0V)**

VHC series CMOS logic is designed for operation from V_{CC} = 2V-5.5V. Feature 5V-tolerant inputs to aid 3V-5V mixed system designs, when operating at supply voltages less than 5V. Low power, low switching noise, and fast switching speeds make this series perfect for low-power, low-cost portable applications. Latch-up immunity: >±300mA.

Type	Description	Pins	Package
MC74VHC00D	Quad 2-Input NAND Gate	14	SOIC
MC74VHC14D	Hex Schmitt Trigger	14	SOIC
MC74VHC32D	Quad 2-Input OR Gate	14	SOIC
MC74VHC74D	Dual D-Type Flip/Flop	14	SOIC
MC74VHC125D	3-State Quad Buffer, Non-Inverting	14	SOIC
MC74VHC126D	3-State Quad Buffer, Non-Inverting	14	SOIC
MC74VHC132D	Quad 2-Input NAND Gate	14	SOIC
MC74VHC138D	1-of-8 Decoder/Demultiplexer	16	SOIC
MC74VHC139D	Dual 1-of-4 Decoder/Demultiplexer	16	SOIC
MC74VHC157D	Quad 2-Input Multiplexer	16	SOIC
MC74VHC244DT	Octal Buffer, 3-State, Non-Inverting	20	TSSOP
MC74VHC245DT	Octal Transceiver, 3-State, Inverting	20	TSSOP
MC74VHC373DT	Octal Transparent Latch, 3-State, Non-Inverting	20	TSSOP
MC74VHC374DT	Octal D-Type Flip/Flop, 3-State, Non-Inverting	20	TSSOP
MC74VHC393D	Dual 4-Stage Binary Ripple Counter	14	SOIC
MC74VHC540DT	Octal Buffer Flow-Through-Pinout, 3-State, Inverting	20	TSSOP
MC74VHC541DT	Octal Buffer Flow-Through-Pinout, 3-State, Non-Inverting	20	TSSOP
MC74VHC573DT	Octal Transparent Latch Flow-Through-Pinout, 3-State, Non-Inverting	20	TSSOP
MC74VHC574DT	Octal D-Type Flip/Flop Flow-Through-Pinout, 3-State, Non-Inverting	20	TSSOP
MC74VHC595D	8-Bit Serial-Input/Serial- or Parallel-Output Shift Register, 3-State	16	SOIC

(28228) (ne28228)

LCX SERIES LOW-VOLTAGE CMOS LOGIC

- **Designed for 2V to 3.6V V_{CC} Operation**
- **LVTTL and LVCMOS Compatible**
- **±24mA Balanced Output Sink and Source Capability**
- **Near Zero Static Supply Current in All Three Logic States (10µA) Substantially Reduces System Power Requirements**

LCX series 3V CMOS logic features 5V tolerant inputs. Operating temperature: –40°C to +85°C. Latch-up performance exceeds 500mA.

Type	Description	Pins	Package
MC74LCX00D	Quad 2-Input NAND Gate	14	SOIC
MC74LCX02D	Quad 2-Input NOR Gate	14	SOIC
MC74LCX04D	Hex Inverter	14	SOIC
MC74LCX08D	Quad 2-Input AND Gate	14	SOIC
MC74LCX32D	Quad 2-Input OR Gate	14	SOIC
MC74LCX74D	Dual D-Type Flip/Flop	14	SOIC
MC74LCX125D	3-State Quad Buffer	14	SOIC
MC74LCX138D	1-of-8 Decoder/Demultiplexer	16	SOIC
MC74LCX157D	Quad 2-Input Multiplexer	16	SOIC
MC74LCX244DT	Octal 3-State Buffer, Non-Inverting	20	TSSOP
MC74LCX245DT	Octal Transceiver, 3-State, Non-Inverting	20	TSSOP
MC74LCX373DT	Octal Transparent Latch, 3-State, Non-Inverting	20	TSSOP
MC74LCX374DT	Octal D-Type Flip/Flop, 3-State, Non-Inverting	20	TSSOP
MC74LCX540DT	Octal Buffer, Flow-Through-Pinout, 3-State, Inverting	20	TSSOP
MC74LCX541DT	Octal Buffer, Flow-Through-Pinout, 3-State, Non-Inverting	20	TSSOP
MC74LCX573DT	Octal Transparent Latch Flow-Through-Pinout, 3-State, Non-Inverting	20	TSSOP
MC74LCX574DT	Octal D-Type Flip/Flop Flow-Through-Pinout, 3-State, Non-Inverting	20	TSSOP
MC74LCX652DW	Octal Bus Transceiver	24	SOIC
MC74LCX16240ADT	16-Bit Buffer, 3-State, Inverting	48	TSSOP
MC74LCX16244DT	16-Bit Buffer, 3-State, Non-Inverting	48	TSSOP
MC74LCX16245DT	16-Bit Transceiver, 3-State, Non-Inverting	48	TSSOP
MC74LCX16373DT	16-Bit Transparent Latch, 3-State, Non-Inverting	48	TSSOP
MC74LCX16374DT	16-Bit D-Type Flip/Flop, 3-State, Non-Inverting	48	TSSOP

(28229) (ne28229)

LVX SERIES LOW-VOLTAGE CMOS LOGIC

- **Low-Voltage Operation: 2.0V to 3.6V V_{CC}**
- **Balanced ±4mA Output Drive Capability**
- **High-Speed Operation: 4.7ns Typ. V_{CC} = 3.3V**
- **Low Power Consumption: I_{CC} = 4µA @ 25°C**
- **Low Noise Performance: V_{OLP} = 0.5V Typ.**

Motorola's new **LVX series** features 5V-tolerant inputs. Operating temperature: –40°C to +85°C. Latch-up immunity: >±300mA.

Type	Description	Pins	Package
MC74LVX00D	Quad 2-Input NAND Gate	14	SOIC
MC74LVX02D	Quad 2-Input NOR Gate	14	SOIC
MC74LVX04D	Hex Inverter	14	SOIC
MC74LVX08D	Quad 2-Input AND Gate	14	SOIC
MC74LVX14D	Hex Schmitt Trigger	14	SOIC
MC74LVX32D	Quad 2-Input Positive OR Gate	14	SOIC
MC74LVX74D	Dual D-Type Flip/Flop	14	SOIC
MC74LVX125D	3-State Quad Buffer, Non-Inverting	14	SOIC
MC74LVX138D	1-of-8 Decoder/Demultiplexer	16	SOIC
MC74LVX157D	Quad 2-Input Multiplexer	16	SOIC
MC74LVX240DT	Octal Buffer, 3-State, Inverting	20	TSSOP
MC74LVX244DT	Octal Buffer, 3-State, Non-Inverting	20	TSSOP

MC100LVEL38DW	÷2, ÷4/÷6 Clock Driver	20-Pin SOIC
MC100LVEL39DW	ECL to PECL Translator	28-Pin PLCC
MC100LVEL56DW	Dual Differential 2:1 Multiplexer	20-Pin SOIC
MC100LVEL59DW	Triple 2:1 Multiplexer	20-Pin SOIC
MC100LVEL90DW	ECL to PECL Translator	20-Pin SOIC
MC100LVEL91DW	PECL to ECL Translator	20-Pin SOIC
MC100LVEL92DW	PECL to LVPECL Translator	20-Pin SOIC
MC100LVEL01D	4-Input OR/NOR	8-Pin SOIC
MC100LVEL11D	1:2 Fanout Buffer	8-Pin SOIC
MC100LVEL16D	Differential Receiver	8-Pin SOIC
MC100LVEL31D	D-Type Flip/Flop with Set and Rest	8-Pin SOIC
MC100LVEL32D	÷2 Divider	8-Pin SOIC
MC100LVEL33D	÷4 Divider	8-Pin SOIC
MC100LVEL51D	D-Type Flip/Flop	8-Pin SOIC

(38973) (ne38973)

ECLinPS LITE TRANSLATORS

Type	Description	Package
MC10ELT20D	TTL/Differential PECL Translator	8-Pin SOIC
MC100ELT20D	TTL/Differential PECL Translator	8-Pin SOIC
MC10ELT21D	Differential PECL/TTL Translator	8-Pin SOIC
MC100ELT21D	Differential PECL/TTL Translator	8-Pin SOIC
MC10ELT22D	Dual TTL/Differential PECL Translator	8-Pin SOIC
MC100ELT22D	Dual TTL/Differential PECL Translator	8-Pin SOIC
MC100ELT23D	Dual Differential PECL/TTL Translator	8-Pin SOIC
MC10ELT24D	TTL/Differential ECL Translator	8-Pin SOIC
MC100ELT24D	TTL/Differential ECL Translator	8-Pin SOIC
MC10ELT25D	Differential ECL/TTL Translator	8-Pin SOIC
MC100ELT25D	Differential ECL/TTL Translator	8-Pin SOIC
MC10ELT28D	TTL to Diff. PECL/Diff. PECL to TTL Translator	8-Pin SOIC
MC100ELT28D	TTL to Diff. PECL/Diff. PECL to TTL Translator	8-Pin SOIC
	LOW-VOLTAGE	
MC100LVELT22D	Dual TTL/Differential PECL Translator	8-Pin SOIC

(39170) (ne39170)

ADVANTAGES

- HIGHEST LOGIC SPEED FORM AVAILABLE
- CONSTANT SUPPLY CURRENT AS A FUNTIONS OF FREQUENCY OR LOGIC STATE. NEWER FORMS HOLD CURRENT AS A FUNCTION OF POWER SUPPLY
- COMPLEMENTARY OUTPUTS ON SAME FUNCTION
- LOW NOISE GENERATION
- COMMON MODE REJECTION OF 1V OR MORE ON THE LINE RECEIVERS
- MINIMAL DEGRADATION OF PERFORMANCE AS A FUNCTION OF TEMPERATURE OR POWER SUPPLY VARIATIONS
- HIGH ACCURACY AND MINIMAL JITTER GENERATION

(42470) (bmot1)

BOUNCE ELIMINATOR

Description	Tech.	Type	Pins	Package
Hex Contact	CMOS	MC14490P	16	PDIP
	CMOS	MC14490DW	16	SOIC

(4277) (ne09537)

BUFFERS

Description	Tech.	Type	Pins	Package
Low-Voltage Dual 1:4, 1:5 Diff. Fanout, ECL/PCL Compatible	ECL	MC100E210FN	28	PLCC

(4278) (ne09538)

BUS INTERFACE

Description	Tech.	Type	Pins	Package
Hex 3-St. Non-Inv. w/ Sep. 2- and 4-Bit Sections	CMOS	MC74HC367AN	16	PDIP
Hex with 3-State Outputs (Non-Inv.)	CMOS	MC14503BD	16	SOIC
Hex w/ 3-State Outputs Non-Inv. Buffer w/ Separate 2- and 4-Bit Sections	CMOS	MC74HC365AN	16	PDIP
Octal Bidirectional Transceiver with 3-State Inputs/Outputs	CMOS	MC74AC245N	20	PDIP
	CMOS	MC74AC245DW	20	SOIC
Octal Buffer/Line Driver with 3-State Outputs	CMOS	MC74AC244N	20	PDIP
	CMOS	MC74AC540N	20	PDIP
	CMOS	MC74AC541N	20	PDIP
Octal with 3-State Outputs Inverting Buffer/Line Driver/Line Receiver	CMOS	MC74HC240AN	20	PDIP
	CMOS	MC74HC540AN	20	PDIP
Octal w/ 3-St. Outputs Inv. Bus Xcvr	CMOS	MC74HC640AN	20	PDIP
Octal with 3-State Outputs Non-Inverting Buffer/Line Driver/Line Rcvr	CMOS	MC74HC541AN	20	PDIP
Octal with 3-State Outputs Non-Inverting Bus Transceiver	CMOS	MC74HC245AN	20	PDIP
	CMOS	MC74HC245ADW	20	SOIC
Octal with 3-State Outputs Non-Inverting Bus Transceiver and D F/F	CMOS	MC74HC646N	24	PDIP
Quad 3-State Non-Inverting Buffers	CMOS	MC74HC125AN	14	PDIP
	CMOS	MC74HC126AN	14	PDIP
Quad Bus Driver	ECL	MC10192P	16	PDIP
	ECL	MC10192L	16	CerDIP

(9903) (ne09539)

CLOCK DISTRIBUTION CHIPS

Description	Tech.	Type	Pins	Package
1:4	ECL	MC10EL15D	16	SOIC
	ECL	MC100EL15D	16	SOIC
	ECL	MC100EL15DR2	16	SOIC
Low-Voltage 1:9 ECL/PECL	ECL	MC100LVE111FN	28	PLCC

(4279) (ne09540)

CLOCK DRIVERS

Description	Tech.	Type	Pins	Package
1:2 Differential	ECL	MC10EL11D	8	SOIC
	ECL	MC100EL11D	8	SOIC
1:9 Diff. w/ Low Skew, Enable, V_{BB}	ECL	MC10E111FNR2	28	PLCC
1.9 Differential ECL/PECL RAMBus Clock Buffer	ECL	MC10E411FN	28	PLCC
+2, 4.8 Differential	ECL	MC10EL34D	16	SOIC

(4280) (ne09541)

COMPARATORS

Description	Tech.	Type	Pins	Package
4-Bit Magnitude	CMOS	MC74HC85N	16	PDIP
5-Bit Magnitude	ECL	MC10H166L	16	CerDIP
8-Bit Equality	CMOS	MC74HC688N	20	PDIP
Dual Analog with Latch	ECL	MC10E1651FN	20	PLCC
Dual Analog w/ Latch (Hi-Perf MC1651)	ECL	MC10E1652FN	20	PLCC

(4282) (ne09543)

CONVERTERS

Description	Tech.	Type	Pins	Package
Dual A/D	ECL	MC1650L	16	CerDIP
	ECL	MC1651L	16	CerDIP

(9886) (ne09544)

COUNTERS

Description	Tech.	Type	Pins	Package
12-Bit Binary	CMOS	MC14040BD	16	SOIC
12-Stage Binary Ripple Counter	CMOS	MC74HC4040AN	16	PDIP
	CMOS	MC74HC4040AD	16	SOIC
14-Bit Binary	CMOS	MC14020BD	16	SOIC
14-Bit Binary Counter and Oscillator	CMOS	MC14060BD	16	SOIC
7-Stage Ripple	CMOS	MC14024BD	14	SOIC
8-Bit Synchronous Binary Up	ECL	MC10E016FN	28	PLCC
	ECL	MC100E016FN	28	PLCC
Decade	CMOS	MC14017BD	16	SOIC
	CMOS	MC74HC4017N	16	PDIP
	CMOS	MC74HC4017D	16	SOIC
Dual 4-Stage Binary Ripple	CMOS	MC74HC393N	14	PDIP
Dual 4-Stage Binary Ripple, W+2, +5 Sections	CMOS	MC54HC390J	16	CerDIP
	CMOS	MC74HC390N	16	PDIP
	CMOS	MC74HC390D	16	SOIC
Presettable	CMOS	MC74HC161AN	16	PDIP
	CMOS	MC74HC161AD	16	SOIC
Universal Hexadecimal	ECL	MC10H136L	16	CerDIP
	ECL	MC10136P	16	PDIP

LOGIC DEVICES

DRIVERS

Description	Tech.	Type	Pins	Package
Coaxial Cable Driver	ECL	**MC10EL89D**	8	SOIC

(4269) (ne09527)

ENCODERS

Description	Tech.	Type	Pins	Package
Decimal-to-BCD	CMOS	**MC74HC147N**	16	PDIP
	CMOS	**MC74HC147D**	16	SOIC

(4270) (ne09528)

FLIP-FLOPS

Description	Tech.	Type	Pins	Package
Dual Type-D Master-Slave	ECL	**MC10131P**	16	PDIP
	ECL	**MC10H131P**	16	PDIP
J-K	ECL	**MC100EL35D**	8	SOIC
Master-Slave	ECL	**MC1670L**	16	CerDIP
Octal D-Type with 3-State Outputs	CMOS	**MC74AC374N**	20	PDIP
Octal with 3-State Outputs Non-Inverting D	CMOS	**MC74HC574AN**	20	PDIP
Quad D w/Common Clock and Reset	CMOS	**MC74HC175N**	16	PDIP
Quad, 3-St. Outputs, Common Clock & Reset	CMOS	**MC74HC173N**	16	PDIP
4-Bit D Individual Clock,	ECL	**MC10E131FN**	28	PLCC
Reset Differential Output	ECL	**MC100E131FN**	28	PLCC
5-Bit Differential Register	ECL	**MC100E452FN**	28	PLCC
6-Bit Register w/Common Clock, Asynch. Master Reset, Diff. Outputs	ECL	**MC100E151FN**	28	PLCC
Differential Data and Clock	ECL	**MC100EL52D**	8	SOIC
Dual D	CMOS	**MC74AC74N**	14	PDIP
Dual D w/Set and Reset	CMOS	**MC74HC74AN**	14	PDIP
Dual Diff. Data & Clock w/Set / Reset	ECL	**MC100EL29DW**	20	SOIC
Dual J-K w/Reset	CMOS	**MC74HC107N**	14	PDIP
Dual J-K Master-Slaye	ECL	**MC10135L**	16	CerDIP

(9863) (ne09502)

AND/NAND GATES

Description	Tech.	Type	Pins	Package
13-Input NAND	CMOS	**MC74HC133N**	16	PDIP
8-Input NAND	CMOS	**MC74HC30N**	14	PDIP
Dual 4-Input NAND	CMOS	**MC74AC20N**	14	PDIP
	CMOS	**MC74HC20N**	14	PDIP
Quad 2-Input AND	CMOS	**MC74AC08N**	14	PDIP
	CMOS	**MC74HC08AN**	14	PDIP
	ECL	**MC10104P**	16	PDIP
	CMOS	**MC14081BD**	14	SOIC
Quad 2-Input NAND	CMOS	**MC74AC00N**	14	PDIP
	CMOS	**MC74HC00AN**	14	PDIP
	CMOS	**MC14011BD**	14	SOIC
Quad 2-Input NAND (Unbuffered)	CMOS	**MC14011UBD**	14	SOIC
Quad 2-Input NAND with Open-Drain Outputs	CMOS	**MC74HC03AN**	14	PDIP
	CMOS	**MC74HC03AD**	14	SOIC
Triple 3-Input AND	CMOS	**MC74AC11N**	14	PDIP
	CMOS	**MC74HC11N**	14	PDIP
Triple 3-Input NAND	CMOS	**MC74HC10N**	14	PDIP
	CMOS	**MC14023BD**	14	SOIC

(4259) (ne09503)

COMPLEX GATES

Description	Tech.	Type	Pins	Package
2-Input AND/NAND	ECL	**MC10EL04D**	8	SOIC
	ECL	**MC100EL04D**	8	SOIC
2-Input Differential AND/NAND	ECL	**MC10EL05D**	8	SOIC
	ECL	**MC100EL05D**	8	SOIC
2-Input XOR/NOR	ECL	**MC10EL07D**	8	SOIC
4-Input OR/NOR	ECL	**MC10EL01D**	8	SOIC
	ECL	**MC100EL01D**	8	SOIC
Dual 4-Input OR/NOR	ECL	**MC1660L**	16	CerDIP
Quad OR/NOR	ECL	**MC10H101P**	16	PDIP
	ECL	**MC10101P**	16	PDIP
Quint 2-Input AND/NAND	ECL	**MC100E104FN**	28	PLCC
Triple 2-3-2 Input OR/NOR	ECL	**MC10105P**	16	PDIP
Triple 2-Input Exclusive OR/Exclusive NOR	ECL	**MC10H107P**	16	PDIP

(4260) (ne09504)

EXCLUSIVE OR/EXCLUSIVE NOR GATES

Description	Tech.	Type	Pins	Package
Quad Exclusive OR	CMOS	**MC14070BD**	14	SOIC
Quad Exclusive NOR	CMOS	**MC14077BD**	14	SOIC

(4297) (ne09581)

NOR GATES

Description	Tech.	Type	Pins	Package
Dual 4-Input	CMOS	**MC74HC4002N**	14	PDIP
Quad 2-Input	CMOS	**MC74AC02N**	14	PDIP
	CMOS	**MC74HC02AN**	14	PDIP
	CMOS	**MC74HC02AD**	14	SOIC
	ECL	**MC10H102P**	16	PDIP
	ECL	**MC10102P**	16	PDIP
	CMOS	**MC14001BD**	14	SOIC
Triple 3-Input	CMOS	**MC74HC27N**	14	PDIP

(4298) (ne09582)

OR GATES

Description	Tech.	Type	Pins	Package
Quad 2-Input	CMOS	**MC74AC32D**	14	SOIC
	CMOS	**MC74HC32AN**	14	PDIP
	CMOS	**MC74HC32AD**	14	SOIC
	CMOS	**MC14071BD**	14	SOIC

(4299) (ne09583)

2-STATE INVERTER/BUFFERS

Description	Tech.	Type	Pins	Package
Hex Inverter	CMOS	**MC74AC04N**	14	PDIP
	CMOS	**MC74HC04AN**	14	PDIP
	CMOS	**MC74HC04ADT**	14	TSSOP
Hex Inverter Gate (Unbuffered)	CMOS	**MC14069UBD**	14	SOIC
Hex Inverter with Open-Drain Outputs	CMOS	**MC74AC05N**	14	PDIP
Hex Inverter/Buffer	CMOS	**MC14049BD**	16	SOIC
Hex Inverting Buffer/Logic-Level Down Converter	CMOS	**MC74HC4049N**	16	PDIP
	CMOS	**MC74HC4049D**	16	SOIC
Hex Non-Inverting Buffer/Logic-Level Down Converter	CMOS	**MC74HC4050N**	16	PDIP
	CMOS	**MC74HC4050D**	16	SOIC

(4300) (ne09584)

LATCHES

Description	Tech.	Type	Pins	Package
Dual 2-Bit Transparent	CMOS	**MC74HC75N**	16	PDIP
Octal D with 3-State Outputs	CMOS	**MC74AC573DW**	20	SOIC
Octal Transparent with 3-State Outputs	CMOS	**MC74AC373N**	20	PDIP
Quad NOR R-S	CMOS	**MC14043BD**	16	PDIP

(4301) (ne09585)

MULTIPLEXERS/DATA SELECTORS

Description	Tech.	Type	Pins	Package
Dual 4-Channel Analog Mux/Demux	CMOS	**MC74HC4052N**	16	PDIP
	CMOS	**MC14052BD**	16	SOIC
Dual 4-Input Data Selector/Mux	CMOS	**MC74HC153N**	16	PDIP
	CMOS	**MC74HC153D**	16	SOIC
Dual 4-Input Data Selector/Mux with 3-State Outputs	CMOS	**MC74HC253N**	16	PDIP
Quad 2-Channel Analog Mux/Demux	CMOS	**MC14551BD**	16	SOIC
Quad 2-Input Data Selector/Mux with 3-State Outputs	CMOS	**MC74HC257N**	16	PDIP
Quad 2-Input Data Selectors/Mux	CMOS	**MC74HC157AN**	16	PDIP
Quad 2:1 Mux, Individual-Select	ECL	**MC10E157FN**	28	PLCC
Quad Analog Switch/Multiplexer	CMOS	**MC14016BD**	14	SOIC
	CMOS	**MC14066BD**	14	SOIC
Quad Analog Switch/Mux/Demux	CMOS	**MC74HC4066N**	14	PDIP
	CMOS	**MC74HC4066D**	14	SOIC
Quad Analog Switch/Mux/Demux w/Sep. Analog/Digital Power Supplies	CMOS	**MC74HC4316N**	16	PDIP
	CMOS	**MC74HC4316D**	16	SOIC
Triple 2-Channel Analog/Mux/Demux	CMOS	**MC74HC4053N**	16	PDIP
	CMOS	**MC14053BD**	16	SOIC
Triple Differential 2:1 Multiplexer	ECL	**MC10E457FN**	28	PLCC
1-of-8 Decoder/Demultiplexer	CMOS	**MC74AC151N**	16	PDIP
2:1 Multiplexer	ECL	**MC10EL58D**	8	SOIC
4:1 Differential Multiplexer	ECL	**MC10EL57D**	16	SOIC
8-Channel Analog Mux/Demux	CMOS	**MC74HC4051N**	16	PDIP
	CMOS	**MC14051BD**	16	SOIC
8-Input Data Selector/Multiplexer	CMOS	**MC74HC151N**	16	PDIP
8-Input Selector/Mux w/ 3-St. Outputs	CMOS	**MC74HC251N**	16	PDIP
8-Line Multiplexer	ECL	**MC10H164L**	16	CerDIP

(9904) (ne09594)

LOGIC DEVICES

MULTIVIBRATORS

Description	Tech.	Type	Pins	Package
Dual Prec. Mono. (Retrig., Reset.)	CMOS	**MC74HC4538AN**	16	PDIP
Dual Precision Monostable	CMOS	**MC14538BD**	16	SOIC
	CMOS	**MC14538BCP**	16	SOIC
Voltage Controlled	ECL	**MC1658P**	16	PDIP

(4309) (ne09595)

OSCILLATORS

Description	Tech.	Type	Pins	Package
7-Stage Binary Ripple Counter	CMOS	**MC74HC4024N**	14	PDIP
Low Power, Voltage Controlled	ECL	**MC12148D**	8	SOIC
Voltage Controlled	ECL	**MC1648P**	14	PDIP

(4310) (ne09596)

OSCILLATOR/TIMER

Description	Tech.	Type	Pins	Package
Programmable Timer	CMOS	**MC14536BDW**	16	SOIC

(4311) (ne09597)

PARITY CHECKERS

Description	Tech.	Type	Pins	Package
9-Bit Odd/Even Parity Generator/Checker	CMOS	**MC74HC280N**	14	PDIP

(4312) (ne09598)

PHASE-LOCKED LOOP

Description	Tech.	Type	Pins	Package
Phase-Locked Loop	CMOS	**MC14046BDW**	16	SOIC

(4313) (ne09599)

PRESCALERS

Description	Tech.	Type	Pins	Package
1.1GHz ÷2/4/8 Low Power w/ Stand-By Mode	ECL	**MC12093D**	8	SOIC
225MHz ÷20/21 Dual Modulus	ECL	**MC12019P**	8	PDIP

(4314) (ne09600)

PROGRAMMABLE DELAY CHIPS

Description	Tech.	Type	Pins	Package
Dig 80ps Anal. 1.6 Ps/mv	ECL	**MC100E196FN**	28	PLCC
Digitally Selectable 20ps Res.	ECL	**MC10E195FN**	28	PLCC
Digitally Selectable 20ps Res.	ECL	**MC100E195FN**	28	PLCC

(4315) (ne09601)

RECEIVERS

Description	Tech.	Type	Pins	Package
Quad Line	ECL	**MC10H115P**	16	PDIP
Quint Differential Line	ECL	**MC10E116FN**	28	PLCC
	ECL	**MC100E116FN**	28	PLCC
	ECL	**MC100E416FN**	28	PLCC
Triple Line	ECL	**MC10H116P**	16	PDIP
Differential	ECL	**MC10EL16D**	8	SOIC
	ECL	**MC100EL16D**	8	SOIC

(4316) (ne09602)

REGISTERS

Description	Tech.	Type	Pins	Package
4 x 4 Multiport	CMOS	**MC14580BCP**	24	PDIP

(37770) (ne37770)

SCHMITT TRIGGERS

Description	Tech.	Type	Pins	Package
Hex Inverter	CMOS	**MC74AC14N**	14	PDIP
Hex Schmitt Trigger Inverter	CMOS	**MC74HC14AN**	14	PDIP
Quad 2-Input NAND Gate	CMOS	**MC74HC132AN**	14	PDIP
with Schmitt Trigger Inputs	CMOS	**MC74HC132AD**	14	SOIC

(4318) (ne09604)

SHIFT REGISTERS

Description	Tech.	Type	Pins	Package
8-Bit Bidirect. Universal w/ Parallel I/O	CMOS	**MC74HC299N**	20	PDIP
8-Bit Serial or Parallel Input/Serial Output w/ 3-St. Outputs	CMOS	**MC74HC589AN**	16	PDIP
8-Bit Serial Input/Serial or Parallel Output with Latched 3-State Outputs	CMOS	**MC74HC595AN**	16	PDIP
	CMOS	**MC74HC595AD**	16	SOIC
8-Bit	ECL	**MC100E141FN**	28	PLCC
8-Bit Static	CMOS	**MC14021BD**	16	SOIC
8-Stage Shift/Storage Register w/ 3-St. Outputs	CMOS	**MC14094BD**	16	SOIC

(4320) (ne09606)

SYNTHESIZERS

Description	Tech.	Type	Pins	Package
2.7GHz Frequency	ECL	**MC12179D**	8	SOIC

(4283) (ne09550)

TRANSLATORS

Description	Tech.	Type	Pins	Package
9-Bit TTL/ECL	ECL	**MC100H600FN**	28	PLCC
ECL/TTL (Single P.S. @ +5.0V)	ECL	**MC10H350FN**	16	PLCC
9-Bit Latch ECL/TTL	ECL	**MC10H603FN**	28	PLCC

	ECL	**MC10H351P**	20	PDIP
	ECL	**MC10H351FN**	20	PLCC
Registered Hex ECL/TTL	ECL	**MC100H605FN**	28	PLCC
Registered Hex TTL/ECL	ECL	**MC10H604FN**	28	PLCC

(4321) (ne09607)

VCO

Description	Tech.	Type	Pins	Package
Phased-Locked Loop with VCO	CMOS	**MC74HC4046AN**	16	PDIP

(4322) (ne09608)

THIS NEWARK CATALOG IS AVAILABLE ON CD-ROM!
CONTACT YOUR LOCAL NEWARK SALES OFFICE FOR DETAILS.

POWER MANAGEMENT ICs

SWITCHING REGULATOR CONTROL CIRCUITS

EASY SWITCHER SERIES SINGLE-ENDED CONTROLLERS WITH ON-CHIP SWITCH

Ideally suited for easy, convenient deisgn of step-down switching regulators (buck converters) with a number of external components. Other voltages available; *contact your local Newark sales office.*

Type	I_O Max. (mA)	Operating Voltage Min. (V)	Oscillator Frequency* (kHz)	Output Voltage (V)	T_J (°C)	Package

GreenLine™ PWM CONTROLLERS

Type MC44604 is a high-safety, standby ladder mode, single-ended PWM controller, specifically designed for off-line and DC-to-DC converter applications. **Type MC44605** is high-safety, latched mode, current mode PWM controller, designed specifically for off-line converters. Particularly suitable for multisynchronized monitor applications.

Type	Temperature Range	Package
MC44604P	–25° to +85°	16-Pin PDIP
MC44605P	–25° to +85°	16-Pin PDIP

VERY HIGH VOLTAGE SINGLE-ENDED CONTROLLER WITH ON-CHIP POWER SWITCH

Type	Power Switch Max. Rating V_{DS} (V)	Power Switch Max. Rating I_{DS} (mA)	Startup Input Max. (V)	Max. Useful Osc. Freq. (kHz)	Feedback Threshold (V)	T_J (°C)	Package

MC33363DW	700	1000	450	...	...	...	WSOIC

CMOS MICROPOWER DC-to-DC CONVETERS

Variable frequency, external switch drive. Operating temperature: T_A=–30°C to +80°C.

Type	Output Voltage (V)	Package
MC33463H-30LT1	3.0	SOT-89
MC33463H-33LT1	3.3	SOT-89
MC33463H-50LT1	5.0	SOT-89

Fixed frequency, PWM micropower, external switch drive. Operating temperature: T_A=–30°C to +80°C.

MC33466H-30LT1	3.0	SOT-89
MC33466H-33LT1	3.3	SOT-89
MC33466H-50LT1	5.0	SOT-89

CRITICAL CONDUCTION SMPS CONTROLLER

MC33364 series are variable frequency SMPS controllers that operate in the critical conduction mode. Optimized for low-power, high-density power supplies that require minimum board area, reduced component count, and low power dissipation.

Stock No.	Type	Operating Temperature	Package	Each
48F4046	MC33364D	–25°C to +125°C.	16-Pin SOIC	1.59
48F4047	MC33364D1	–25°C to +125°C.	8-Pin SOIC	1.59
48F4048	MC33364D2	–25°C to +125°C.	8-Pin SOIC	1.59

SPECIAL SWITCHING REGULATOR CONTROLLERS

POWER FACTOR CONTROLLERS

Type MC33368 is an active power factor controller that functions as a boost converter in off-line power supply applications. Optimized for low-power, high density power supplies that require minimum board area, reduced component count, and low power dissipation.

Type	Operating Temperature	Package
MC33368D	–25°C to +125°C	16-Pin SOIC

(39172) (ne39172)

VERY LOW DROPOUT VOLTAGE REGULATORS

Type L4949 is a monolithic, integrated, 5.0V voltage regulator with a very low dropout, and additional functions such as power-on reset and input voltage sense.

Type	Temperature Range	Package
L4949D	–40°C to +125°C	8-Pin SOIC
L4949N	–40°C to +125°C	8-Pin PDIP

(39381) (ne39381)

MICROPOWER VOLTAGE REGULATORS FOR PORTABLE APPLICATIONS

MC34119D	500mW	16	2.5	8 to ∞	Low Power Audio Amp	SOIC
MC34119P	500mW	16	2.5	8 to ∞	Low Power Audio Amp	PDIP

(4306) (ne09591)

BRUSHLESS DC MOTOR CONTROLLERS

Features: Undervoltage lockout, internal thermal shutdown, forward and reverse control, output enable, 6.25V reference output, and error amplifier. Output drivers: totem pole (bottom) and open collector (top). Noninverting current-sense comparator inputs.

Type	Operating Voltage V_{CC} (V)	Sensor Electrical Phasing	Operating Temperature	Package
MC33033P	10-30	60°/300° and 120°/240°	–40°C to +85°C	PDIP

(35881) (ne35881)

OCTAL SERIAL SWITCH

Monolithic, eight-output, low-side switch, with 8-bit serial input control. Incorporates CMOS logic, bipolar/CMOS analog circuitry, and DMOS power FETs. All inputs are CMOS compatible. Designed to interface to a microcontroller, and to switch inductive or incandescent loads. Each independent output is internally clamped to 55V, current limited to ≥3.0A, and has an $R_{DS(on)}$ of ≤0.45Ω with V_{PWR} ≥9.0V. Low standby current, cascadable fault-status reporting, output diagnostics, and shutdown for each output.

Type	Operating Temperature	Pins	Package
MC33298P	–40°C to +150°C	20	PDIP

(35882) (ne35882)

CELLULAR BASE STATION PRE-DRIVERS

These 50 ohm amplifiers are recommended for modem, mutli-tone, CDMA and TDMA base-station pre-driver applications. Their high-order intercept, tight phase control and excellent group delay characteristics make these amplifiers ideal for use in high-power feedforward loops.

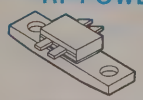
RF MOSFETs AND TRANSISTORS

RF POWER MOSFETs



Case 319B

Case 375

N-channel field-effect transistors with an oxide-insulated gate which controls vertical current flow. Exhibit higher gain, higher input impedance, enhanced thermal stability, and lower noise than bipolar transistors. Constructed using a planar process to enhance manufacturing repeatability. For use in RF power amplifiers.

To 150MHz HF/SSB

For military and commercial HF/SSB fixed, mobile, and marine transmitters. V_{DD} = 50V, Class AB.

Type	P_{OUT} Output Power (W)	P_{IN} Input Power Typ. (W)	G_{PS} Gain @ 30MHz Typ. (dB)	IMD Typ. d_3 (dB)	IMD Typ. d_{11} (dB)	θ_{JC} (°C/W)	Package

(4293) (ne09562)

RF POWER BIPOLAR UHF TRANSISTORS

100-400MHz BAND

Stringent military requirements are met by **type MRF392,** with gold metal systems, specific ruggedness and programmed wire-bond construction, to provide consistent input impedances for internally matched components.

Type	V_{CC} (V)	P_{OUT} Output Power (W)	P_{IN} Input Power Max. (W)	G_{PE} (Min.)/ Freq. Power Gain (dB/MHz)	θ_{JC} (°C/W)	Package
MRF392	28	125	19.8	8	0.7	Case 744A/1

400-500MHz BANDWIDTH

Nitride-passivated die, gold metal systems, specified ruggedness, and controlled wire-bond construction to meet the stringent requirements of military space applications. Class C.

MRF166C	28	20	0.62	15/500	2.5	CS-12
MRF323	28	20	2	10/400	3.2	0.280″ Stud

470-512MHz BANDWIDTH

Designed for broadband operation. Internally input-matched construction. Guaranteed ruggedness under output mismatch and RF overdrive conditions. Specified for hand-held, mobile, and base station operation. Class C.

MRF652	12.5	5	0.5	10/512	7	0.280″ Stud

** Small signal gain, P_O is typ. † Internal impedance matched

(4290) (ne09559)

PHASE-LOCKED LOOP COMPONENTS

Technologies include CMOS for lowest power consumption and bipolar for high-speed operation. Typical applications include TV. CATV, radios, scanners, WLANs, cordless telephones plus home and personal computers.

PLL FREQUENCY SYNTHESIZER

THYRISTOR TRIGGERS

PROGRAMMABLE UNIJUNCTION TRANSISTORS

Similar to unijunction transistors, except that I_V, I_P, and intrinsic stand-off voltage are programmable (adjustable) by using an external voltage divider. General operating frequency range is from 0.01Hz to 10kHz. Suitable for long duration timer circuits.

Type	I_P Min. @ RG=10kΩ	I_P Max. @ RG=1MΩ	I_{GAO} @40V Max.	I_V Min. @ RG=10kΩ	I_V Max. @ RG=1MΩ	Pkg.

AUDIO AMPLIFIERS

For type number breakdown, see the ordering guides on page 878.

Type	Description	Package
OP176GP	Low-Noise, High-Output Drive Amp with a Bipolar JFET Front-End. For High-Performance Applications.	PDIP
OP275GP	Dual, Bipolar/JFET Amp Featuring Low Distortion (0.0006%) at Low Supply Current (5mA). Noise 6nV/√Hz; SR: 22V/µs; GBW: 9MHz.	PDIP
OP275GS	Dual, Bipolar/JFET Amp Featuring Low Distortion (0.0006%) at Low Supply Current (5mA). Noise 6nV/√Hz; SR: 22V/µs; GBW: 9MHz.	SOIC
SSM2017P	Ultra Low-Noise Audio Pre-Amp Features 0.95nV/√Hz @ BW = 20kHz.	PDIP
SSM2018P	Voltage Controlled Amp. No External Amp Required.	PDIP
SSM2018TP	Trimless Voltage Controlled Amp	PDIP
SSM2135P	Dual, Single Supply Amp with High-Output Drive Capability. Excellent Sonic Characteristics. Noise: 5nV/√Hz; THD + N @ 1kHz: 0.001%.	PDIP
SSM2139P	Dual, Low-Noise, High-Speed, Audio Amp	PDIP
SSM2141P	High-CMR, Differential Line Receiver, Complementing **Type SSM2142** Line Driver.	PDIP
SSM-2142P	Balanced Differential Line Driver Capable of Driving 10VRMS into a 600Ω Load.	PDIP
SSM2143P	–6dB Differential Line Receiver. CMR: 90dB typ. Ultra-Low THD (0.0006% typ.).	PDIP
SSM2165-1P	Microphone Pre-Amp with Variable Compression and Noise Gating.	PDIP
SSM2166P	Microphone Pre-Amp with Variable Compression and Noise Gating.	PDIP

AD9243AS	14	3	0.6 Typ	40	14,µP	+1 to +2.5V, Int/Ext	MQFP	14-Bit, 3 MSPS ADC, 44-Pin

* Data format for the bus. "µP" indicates microprocessing capability, e.g., for a 12-bit converter 8/12, µP indicates that the data can be formatted for an 8-bit bus, or can be in parallel (12 bits) and is microprocessor compatible.
** "Ext" indicates external voltage reference with the range of values listed where applicable. "Int" indicates reference is internal. A voltage value is given if the reference is pinned out.

AD574AKN	12	35	±0.5	10V Int	8/12, µP	PDIP	Complete ADC with Reference and Clock; Industry Standard
AD671JD-750	12	0.75	±2	5V Ext	12	HDIP	12-Bit 750ns Monolithic ADC
AD674BAR	12	15	±1	10V Int	8/12, µP	SOIC	Monolithic, 12-Bit ADC with Ref., Clock, and Output Buffers
AD7672KN05	12	...	±4.1	–5V Ext	8, µP	PDIP	LC^{2}MOS, High-Speed, 12-bit ADC

* "Ext" indicates external voltage reference with the range of values listed where applicable. "Int" indicates reference is internal. A voltage value is given if the reference is pinned out.
** Data format for the bus. "µP" indicates microprocessing capability, e.g., for a 12-bit converter 8/12, µP indicates that the data can be formatted for an 8-bit bus, or can be in parallel (12 bits) and is microprocessor compatible.

DIGITAL-TO-ANALOG CONVERTERS

SINGLE DIGITAL-TO-ANALOG CONVERTERS

Digital-to-analog converters (DAC) accept digital input and produce an analog output. The basic DAC consists of a voltage or current reference, binary weighted precision resistors, a set of electronic switches and a means of summing the weighted currents. *For type breakdown, see the ordering guides on page 878.*

* Data format for the bus. "µP" indicates microprocessing capability, e.g., for a 12-bit converter 8/12, µP indicates that the data can be formatted for an 8-bit bus, or can be in parallel (12 bits) and is microprocessor compatible. ** "Ext" indicates external voltage reference with the range of values listed where applicable. "Ext (M)" indicates external reference with multiplying capability. "Int" indicates reference is internal. A voltage value is given if the reference is pinned out.

NEWARK ELECTRONICS® IS AN ISO 9002 COMPANY.

ANALOG SWITCHES & MULTIPLEXERS

Solid-state analog multiplexers and switches provide ability to control and select specified transmission path for analog signal. Suit variety of applications, including data acquisition, process control, instrumentation, video systems and telephony. *For type breakdown see the ordering guides on page 878.*

SIGNAL COMPRESSION DEVICES

Variable-gain amplifiers use technology which allows the amplifier gain to be varied as the dynamic range of the input signal changes. Variable-gain amplifiers are typically employed as fast-response automatic gain (AGC) elements in RF and IF systems. They can also provide time gain control (TGC) in applications such as commercial sonar. Logarithmic amplifiers provide output voltage proportional to logarithmic of input voltage for signal from DC to 120MHz. Excellent in applications that require compression of wide-range analog input data.

VARIABLE-GAIN AMPLIFIERS

Type	Gain Range	Gain Accuracy Max.	BW Typ. (MHz)	Channel Type	Package
AD600JN	0dB to +40dB	±0.5dB*	35	Dual	PDIP

BALANCED MODULATOR/DEMODULATOR

Type AD630 is a fast, flexible, switched dual-input operational amplifier with an on-chip comparator. It is intended to operate in wide-band, low-level and wide-dynamic range instrumentation applications and coherent systems. Capable of many analog signal processing functions, such as balanced modulation and demodulation, phase detection, square-wave multiplication, absolute-value amplification, and two-channel precision multiplexing. Can also be used as a lock-in amplifier, synchronous detector, rectifier and more.

Type	Unity Gain BW* Typ. (MHz)	Open Loop Gain Min. (dB)	Input Offset Voltage Max. (µV)	Output Voltage Swing Min.	Package
AD630JN	2	90	500	+10V	PDIP

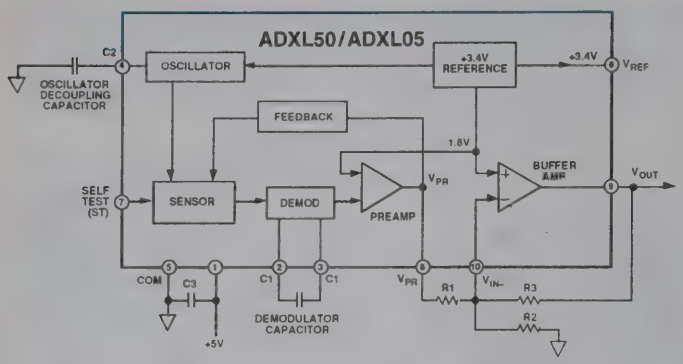
ACCELEROMETERS AND MULTIPLIERS/DIVIDERS

SINGLE CHIP ACCELEROMETERS WITH SIGNAL CONDITIONING



- **Complete Acceleration Measurement System on a Single Monolithic IC**
- **User-Selectable Full Scale Ranges: 0g to ±50g**
- **Post Filtering with External Passive Components**
- **High Shock Survival**

The **ADXL** single chip accelerometers with signal conditioning measure acceleration on a single monolithic IC. Three external capacitors and a +5V power supply are all that is needed. TTL compatible self test on digital command can electrostatically deflect the sensor beam at any time to verify all components are functioning correctly. The **ADXL05** measures accelerations with ranges of ±5g. Extremely low noise level — typical noise floor is 500µg/√Hz. Shock survival is 1000g. Output scale selectable from 200mV/g to 1V/g. The **ADXL50** has a full-scale measurement range of ±50g. Sensitivity is factory trimmed to 19mV/g, resulting in a full-scale output swing of ±0.95V for ±50g applied acceleration. Shock survival is >2000g unpowered. Zero-g output level is 1.8V.
(4339)

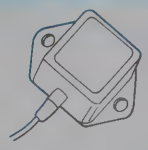
ADXL SERIES ACCELEROMETER EVALUATION MODULES



- **High-Performance, Prepackaged Accelerometers**
- **Complete Acceleration Measurement System**
- **Single and Multiaxis Versions**
- **Small, Economical, and Ready to Use**
- **Available in ±4g, ±10g and ± 50g Full-Scale Ranges**
- **+5V Single-Supply Operation**
- **Reliable Industrial Packaging with Screw-Down Mounting**

ADLXEM series evaluation modules provide a complete acceleration measurement system in an economical package. The modules simplify the evaluation and testing of the **ADXL series** of monolithic accelerometer ICs. Each module contains one or more accelerometers precalibrated to a convenient output scale factor with onboard low-pass filtering. Supply voltage: +5V±0.25V max. Bandwidth: DC-100Hz (±5%). Span output: ±2.0V±0.1V @ +25°C. Nonlinearity: ±0.2% FS typ. Alignment: ±2° typ. Transverse sensitivity: ±3.5% FS typ.

Type	Span ±5% (g)	Sensitivity ±5% (mV/g)	Noise Typ. (mg rms)	Orientation	Zero g Output (@ 25°C) (V)	Zero g Drift (@ 0 to +70°C) (mV)	Operating Temperature	Shock		Output Loading Max.	Supply Current Typ. (mA)

ANALOG MULTIPLIERS/DIVIDERS

Accept analog voltages and multiply, divide, square and/or square-root them. Devices process signals over wide frequency range (DC to 500MHz). 4-quadrant multipliers accept any combination of input signal polarity and provide output signals of appropriate polarity. Analog multipliers can be used to implement various signal processing functions, including modulation and demodulation, fixed and variable remote gain adjustment, power measurement and mathematical operations in analog computing, curve computing and linearizing.
For type number breakdown, see the ordering guides on page 878.

Type	BW Typ. (MHz)	Accuracy FS Max. (%)	Supply Voltage Range	Output Voltage Swing Min.	Package	Comments

UltraFET LOW $R_{DS(on)}$ POWER MOSFETs

Features: Run cooler, low V_{SD}, low Q_{RR}, faster t_{rr}, lower gate charge, and faster t_f. Applications include: Power conversion, power supplies, motor controls, and general-purpose load switching.

POWER CONTROL ICs

CMOS POWER SUPPLY SUPERVISORY CIRCUITS

VOLTAGE CONVERTERS (8-PIN)

Positive to negative; needs only two capacitors. Acts as voltage doubler. Voltage range: **ICL7660**—1.5 to 12V; **ICL7662**—4.5 to 20V.

Type	Package	Temperature Range
ICL7660CPA	DIP	Commercial
ICL7660SCBA	SOIC	Commercial
ICL7660SCPA	DIP	Commercial
ICL7660SIBA	SOIC	Industrial
ICL7660SIPA	DIP	Industrial
ICL7662CPA	DIP	Commercial
ICL7662IPA	DIP	Industrial

AUTOMATIC BATTERY BACK-UP SWITCHES (8-PIN)

Automatically connects output to greater volt supply.

ICL7673CPA	DIP	Commercial
ICL7673CBA	SOIC	Commercial

PROGRAMMABLE MICROPOWER UNDER/OVER VOLTAGE (8-PIN)

Two low-power, individually-programmable detectors; one CMOS chip. Voltage range: 1.6 to 16V. 20mA sink 10µA max. quiescent current.

ICL7665SACBA	SOIC	Commercial
ICL7665SACPA	SOIC	Commercial
ICL7665SAIBA	PDIP	Commercial
ICL7665SCBA	SOIC	Commercial
ICL7665SCPA	DIP	Commercial
ICL7665SIBA	SOIC	Industrial
ICL7665SIPA	PDIP	Industrial

PROGRAMMABLE VOLTAGE LEVEL DETECTORS (8-PIN)

7mA limited sinking when voltage is below 1.15V.

ICL8211CPA	DIP	Commercial

Switches output on when voltage exceeds 1.15V.

ICL8212CPA	DIP	Commercial

POWER SUPPLY/CONTROL CIRCUITS

Type	Pins	Description
ICL7663SCPA ICL7663SACBA ICL7663SACPA	8 DIP 8 SOIC 8 DIP	High-efficiency CMOS programmable µpower voltage regulator accepts 1.6 to 16V puts.
CA3094AE CA3094E	8 8	Programmable power switch/amplifier for control and general-purpose application.
CA3524E CA3277E	16 16	Regulating PWM. Dual 5V regulator.

(9954) (de03895)

GENERAL-PURPOSE LOAD CONTROL

QUAD AND OCTAL DRIVERS—LOW-SIDE

Types 3252 and **3262** are four-gated, inverted-power drivers. **Type 3282** is an 8 serial driver.

OPERATIONAL AMPLIFIERS

LOW/ULTRA-LOW-INPUT OFFSET VOLTAGES

CMOS super chopper-stabilized. Low long-term and temperature drifts of input offset voltage; high- gain, low-supply current. I_{OS} (max.) = 20pA; I_{BIAS} (max.) = 10pA.

Type	Package	V_{OS} Max. (µV)	I_{BIAS} Max. (pA)	I_{OS} Max. (pA)
ICL7650SCPA-1	8-Pin Plastic	+5	10	20
ICL7650SCPD	14-Pin Plastic			
ICL7650SCTV-1	8-Pin TO-99			

LOW POWER/LOW INPUT BIAS CURRENT CMOS

Provide high performance at low supply voltages, selectable quiescent currents. Internal compensation. I_{BIAS} (max.) = 50pA; I_{OS} (max.) = 30pA. Single amps (**type ICL7642ECPD** is quad amp).

Type	V_{OS} Max.	Package
ICL7611BCPA*	5	8-pin Mini-DIP
ICL7611DCPA*	15	8-pin Mini-DIP
ICL7612BCPA	5	8-pin Mini-DIP
ICL7642ECPD	20	14-pin Mini-DIP

LOW-INPUT BIAS CURRENT

Internal compensation, commercial temp. range. **CPA** suffix = CMOS Dual amp; **CPD** = quad amp. V_{OS} is in µV.

Type	V_{OS} Max.	Package
ICL7621BCPA*	5	8-pin Mini-DIP
ICL7621DCPA*	15	8-pin Mini-DIP
ICL7641ECPD*	20	14-pin DIP

ULTRA HIGH-SPEED OPERATIONAL AMPLIFIERS

Ultra high-speed amplifiers deliver almost equal bandwidth without a gain-bandwidth trade-off. The **HFA-1130 series** features a user-defined output clamping level, which works well for high-speed video (HDTV) and imaging applications. High slew rate up to 2500V. Gain flatness up to 100 MHz; unity gain bandwidth up to 850 MHz. Fast settling time s 11ns ±0.1%. Available packages: PDIP (**IP suffix** on type number) or SOIC (**IB suffix**).

SINGLE OP AMPS & BUFFERS

Type	Description	Slew Rate (V/µs)	Package
HFA1100IB	850MHz	2300	SOIC
HFA1100IP	850MHz	2300	PDIP
HFA1109IB	500MHz Op Amp	1200	SOIC
HFA1113IB	850MHz	2300	SOIC
HFA1130IP	850MHz w/Output Limiting	2300	PDIP
HFA1135IP	350MHz w/Output Limiting	1200	PDIP

DUAL OP AMPS & BUFFERS

HFA1205IP	400MHz	1275	PDIP

PERSONALIZED SERVICE FROM YOUR LOCAL NEWARK SALES OFFICE.

WIDEBAND VIDEO OPERATIONAL AMPLIFIERS

HA-2841 is available in PDIP and SOIC packages. **HA-5020** series is an enhanced pin compatible version of the EL-2020 series; replaces EL-2030 in many instances. Minimum/maximum about +25°C. Gain bandwidth product typically up to 1000 MHz.

SINGLE BUFFERS: VIDEO AMPLIFIERS

DISPLAY DRIVERS

Type ICML711 drive conventional LCD displays. Include RC oscillator, divider chain, latches, interface and LCD drivers. **Types ICM7211** and **ICM7211M** have hexadecimal font (0-9, A-F). **Types ICM7211A** and **ICM7211AM** have Code B font (0-9, H, E, L, P, -, and blank). Come in 40-pin plastic DIP. **Type 7212AM** drive common anode, non-multiplexed LED displays, and have Code B font. Come in 40-pin DIP. **Type ICML7218** feature 3 decode formats and drive up to 64 independent LEDs. Include 8 x 8 memory, multiplexed LED drivers, encoders, interface and control. Compatible with both hexadecimal and Code B fonts. Come in 28-pin ceramic DIP. **Type ICM7243B** can be daisy-chained or cascaded. Have ASCII font. Come in 40-pin DIP.

Type	7-Segment Digits	Display Type	Interface*	Cycle Time (ns)
ICM7211IPL	4	LCD Direct Drive	Mux BCD	1000
ICM7211AIPL	4	LCD Direct Drive	Mux BCD	1000

ANALOG-TO-DIGITAL CONVERTERS

INTEGRATING CONVERTERS WITH DISPLAY DRIVERS

Rollover and linearity error of less than one count. 40-pin plastic DIP package, commercial temperature range. Converters for 3½-digit LCD/LED 7-segment displays contain all necessary active devices. **ICL7116PCL** has hold reading input for indefinite retention of display. **ICL7136** and **ICL7137** are improved versions of **ICL7126** and **ICL7107,** respectively. Converters for 4½-digit LCD multiplexed, 7-segment displays require only a few passive components and a reference.

3 ½-DIGIT FOR DIRECT DRIVE OF LCD/LED 7-SEGMENT DISPLAYS

Type	Display	Conv./ Sec. Max.	Supply Voltage	Pins	Package
ICL7106CPL	LCD Direct Drive	15	± 15V	40	PDIP
ICL7107CPL	LED Common Anode	15	+ 6V to –9V	40	PDIP
ICL7116CPL	LCD Direct Drive	15	± 15V	40	PDIP
ICL7117CPL	LED Common Anode	15	+ 6V to –9V	40	PDIP
ICL7126CPL	LCD Direct Drive	4	± 15V	40	PDIP
ICL7136CPL	LCD Direct Drive	4	± 15V	40	PDIP
ICL7137CPL	LED Common Anode	4	+ 6V to –9V	40	PDIP

3 ½ DIGIT LCD/LED SINGLE-CHIP A/D CONVERTER

Type	Display Type	Supply Voltage	Temp. Range	Package
ICL7107RCPL	LED Common Anode	–9, +6V	0°C to +70°C	40-Pin PDIP

µP-COMPATIBLE INTEGRATING CONVERTERS

Monolithics. Up to 12-bit resolution and guaranteed accuracy of ±1 count or 1 LSB. Output may be directly accessed by two separate enables, except for **ICL7135CPI,** which has multiplexed BCD, count accuracy of ±1 in 20,000 and added functions for display applications and more sophisticated systems. Commercial temperature range.

Type	Resolution	Conv./ Sec. Max.	Supply Voltage	Pins	Package
ICL7135CPI	4½-Digit	15	+6V to –9V	28	PDIP
ICL7109CPL	12-Bit	30	+6.2V to –9V	40	PDIP

Analog-to-digital converter provides a 3-digit, multiplexed BCD output.

Type	Conversions per Second	Supply Voltage	Pins	Package
CA3162E	4 or 16	5V	16	PDIP

Integrated circuit performs the BCD to seven-segment function. Features constant-current segment drivers.

Type	Constant Current Segment Output	Supply Voltage	Pins	Package
CA3161E	25mA	5V	16	PDIP

2-CHIP A/D CONVERTER

2-chip set. When combined with the **ICL8052** or **ICL8068** , the **ICL7104** performs the analog switching and digital functions of an A/D converter (either 14- or 16-bit binary 3-state latched outputs, plus polarity and overrange). Guaranteed zero reading for zero V_{IN}.

ICL7104

Type	Resolution	Conv./ Sec. Max.	Supply Voltage	Pins	Package
ICL7104-14CPL	14-Bit	12.2	±17V	40	PDIP
ICL7104-16CPL	16-Bit	32.2	±17V	40	PDIP

MATCHING AMPLIFIERS FOR ICL7104

ANALOG-TO-DIGITAL AND DIGITAL-TO-ANALOG CONVERTERS

Analog-to-digital and digital-to-analog high-speed converters operate at speeds over 1MHz. Used in numerous applications in which digital data is gathered and transmitted in an analog format, such as video, wireless communications, cable communications, and measurement equipment.

ANALOG-TO-DIGITAL

MICROPROCESSOR PERIPHERALS

Type 82C50A asynchronous communications element (ACE) will support data rates from DC to 625k baud (0-10MHz clock). **Type CP82C52** will support data rates up to 1M baud asynchronously with a 16x clock (16MHz clock frequency). **Type CP82C55A** has 24 I/O pins which may be individually programmed in 2 groups of 12, and used in 3 major modes of operation.

Type	Operating Temperature	Operating Frequency	Operating Voltage	Description	Package
CP82C50A-5	0°C to +70°C	10.0MHz	5.0V	UART/BRG	40-Pin PDIP
CP82C52	0°C to +70°C	16MHz	5.0V	UART/BRG	28-Pin PDIP
CP82C55A	0°C to +70°C	8.0MHz	5.0V	Programmable I/O	40-Pin PDIP
CS82C55A	0°C to +70°C	8.0MHz	5.0V	Programmable I/O	44-Pin PLCC
CS82C55A-5	0°C to +70°C	8.0MHz	5.0V	Programmable I/O	44-Pin PLCC

DATA COMMUNICATIONS PRODUCTS

Type HD3-6402B-9 applications include modems, printers, peripherals, and remote data acquisition systems. **Type HD3-4702-9** generates 13 commonly used bit rates using an on-chip crystal oscillator or an external input. **Type HD3-6409-9** is intended for use in serial data communication. Easily interfaces to protocol controllers.

Type	Operating Temperature	Operating Frequency	Operating Voltage	Description	Package
HD3-6402B-9	–40°C to +85°C	8.0MHz	5.0V	UART	40-Pin PDIP
HD3-4702-9	–40°C to +85°C	...	5.0V	Bit Rate Generator	16-Pin PDIP
HD3-6409-9	–40°C to +85°C	1.00MHz	5.0V	Manchester Encoder-Decoder	20-Pin PDIP

CDP1800 SERIES CMOS MICROPROCESSORS

CDP1800 series are CMOS 8-bit microprocessors with 64k memory addressing. General-purpose CPUs designed for multi-system applications requiring large memory address space and extensive external I/O. Low-power drain and military temperature range allow for use in military applications, battery-operated systems, and situations in which low heat dissipation is important. Wide operating voltage ranges reduce the need for power regulation. **Type CDP1805ACE** has on-board RAM. **Types CDP1805ACE** and **CDP1806ACE** have counter/timer.

Type	DC V_{RANGE}	Clock Frequency (MHz)	Instruction Time Min./Max. (µs)	Package
CDP1802ACE	4-6.5	3.2	5/7.5	40-Pin PDIP
CDP1805ACE	4-6.5	5.0	3.2/16	40-Pin PDIP
CDP1806ACE	4-6.5	5.0	3.2/16	40-Pin PDIP
CDP1802BCE	4-6.5	5.0	3.2/4.8	40-Pin PDIP

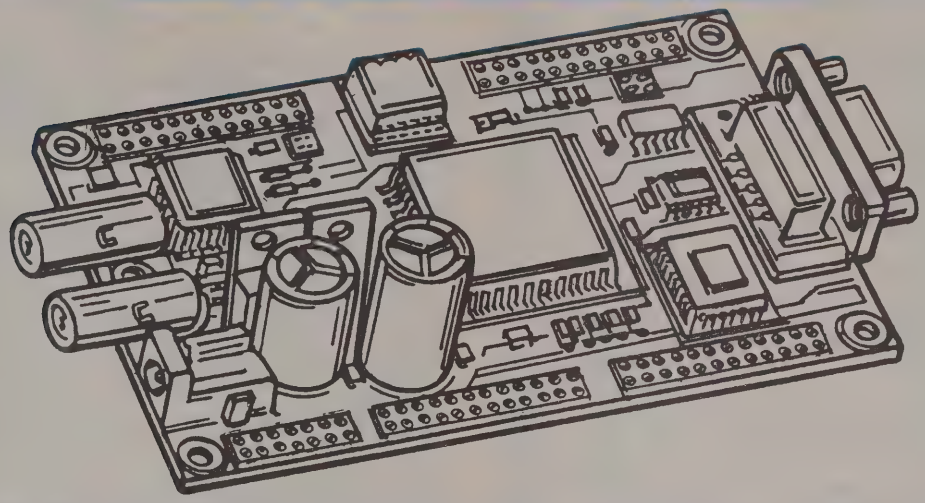
TMDS320 DIGITAL SIGNAL PROCESSOR EVALUATION KITS



Texas Instruments' **TMDS320DSP** DSP Starter Kits (DSK) are an ideal low-cost tool for first-time users interested in evaluating a DSP platform. The DSK allows users to write, run and evaluate real-time source code and debug their system. Each DSK comes with a **TMDS320** evaluation board, its own easy-to-use assembler/linker/debugger, and a complete documentation package. All DSKs run on PC-AT with MS-DOS or PC-DOS (ver. 4.01 and later).

Type TMDS3200026 digital signal processor evaluation kit features: a **TMS320C26** 16-bit, fixed-point DSP, a **TLC32040** analog interface chip with 14-bit linear resolution, and RS-232 serial port for PC communication. Includes standard RCA plug connectors for analog I/O, and a 2.5mm jack for an AC transformer power supply.

Type TMDS3200026. DSP Evaluation Kit. **Each** **102.47**

Type TMDS3200031 digital signal processor evaluation kit features: a **TMS320C3X** 32-bit floating point DSP, 40ns instruction cycle, standard or enhanced parallel printer port interface, **XDS5510** emulator connector, and 14-bit dynamic range A/D and D/A converters. Includes standard RCA plug connectors for analog I/O, and an I/O expansion bus for daughtercards.

Type TMDS3200031. DSP Evaluation Kit. **Each** **102.47**

Type TMDS3200051 digital signal processor evaluation kit features: a **TMS320C5X** 16-bit fixed-point DSP, 50ns instruction cycle, a **TLC32040** Analog Interface Chip with 14-bit linear resolution, RS-232 serial port for PC communications, and 32K PROM for PC interface. Includes standard RCA plug connectors for analog I/O, and a 2.1mm jack for an AC transformer power supply.

Type TMDS3200051. DSP Evaluation Kit. **Each** **102.47**

Type TMDS32000LO digital signal processor evaluation kit features: 40 Mips C542 DSP; Code Explorer Windows-based debugger and sample program; universal power supply (5 VDC); parallel printer port (with cable) supporting 4-bit/8-bit ports; 2 mini-plug I/O jacks for multimedia; socketed PAL; **TLC320AC01** AIC; and literature.

Type TMDS32000LO. DSP Evaluation Kit. **Each** **154.22**

LINEAR CIRCUITS

ANALOG-TO-DIGITAL CONVERTERS AND DATA ACQUISITION ICs

Type	Description	Package
ADC12H034CIN	Self-Calibrating, 12-Bit, Plus Sign, Serial I/O, A/D Converter with Mux and Sample/Hold	24-Pin DIP
LM12434CIWM LM12438CIWM	12-Bit, Plus Sign, Data Acquisition System with Serial I/O and Self-Calibration	28-Pin SOIC 28-Pin SOIC
LM12438EVAL	Windows-Based Evaluation System for **LM12438**	...
ADC16071CIN	16-Bit, Sigma-Delta, 192kSPS A/D Converter	24-Pin DIP

(17836) (ne10953)

HIGH-PERFORMANCE ANALOG SIGNALING PRODUCTS

Type	Description	Package
CLC400AJE	Fast-Settling, Wideband, Monolithic Op. Amp	8-Pin SOIC
CLC400AJP	Fast-Settling, Wideband, Monolithic Op. Amp	8-Pin DIP
CLC402AJE	Low-Gain Op. Amp, with Fast, 14-Bit Settling	8-Pin SOIC
CLC404AJE	Wideband, High Slew Rate, Monolithic Op. Amp	8-Pin SOIC
CLC407AJE	High-Speed Video Op. Amp, With Disable	8-Pin DIP
CLC409AJE	Very Wideband, Low-Distortion, Monolithic Op. Amp	14-Pin SOIC
CLC411AJE	High-Speed Video Op. Amp, With Disable	8-Pin SOIC
CLC414AJE	Quad, Low-Power, Monolithic Op. Amp	14-Pin SOIC
CLC420AJE	High-Speed, Voltage-Feedback Op. Amp	8-Pin SOIC
CLC425AJE	Ultra Low-Noise, Wideband Op. Amp	8-Pin SOIC
CLC426AJP	Low-Noise, Voltage Feedback Op Amp	8-Pin MDIP
CLC430AJE	General-Purpose 100MHz Op. Amp	8-Pin SOIC
CLC430AJP	General-Purpose 100MHz Op. Amp	8-Pin DIP
CLC432AJE	Dual Wideband Monolithic Op. Amp	8-Pin SOIC
CLC440AJE	High-Speed, Low-Power, Voltage-Feedback, Op. Amp	8-Pin SOIC
CLC449AJE	1.2GHz Ultra-Wideband, Monolithic Op. Amp	8-Pin SOIC
CLC502AJE	Clamping, Low-Gain, Op. Amp with Fast, 14-Bit Settling	8-Pin SOIC
CLC505AJE	High-Speed, Programmable Supply Current, Op. Amp	8-Pin SOIC
CLC520AJE	Amplifier with Voltage Controlled Gain, AGC + Amp	8-Pin SOIC
CLC522AJE	Wideband Variable Gain Amplifier	14-Pin SOIC
CLC5602IM	Dual, High-Output, Video Amp	8-Pin SOIC
CLC5612IM	Dual, High-Output, Prog. Gain Buffer	8-Pin SOIC
CLC5622IM	Dual, High-Output, Video Amp	8-Pin SOIC
CLC5623IM	Triple, High-Output, Video Amp	14-Pin SOIC
CLC5632IM	Dual, High-Output, Prog. Gain Buffer	8-Pin SOIC
CLC5633IM	Triple, High-Output, Video Amp	14-Pin SOIC
CLC5644IN	Low-Power, High-Speed, Quad Op Amp	14-Pin MDIP
CLC5654IM	Low-Power, High-Speed, Quad Op Amp	14-Pin MDIP
LM6321N	High-Speed Buffer	8-Pin DIP
LM6361N	High-Speed Op. Amp	8-Pin DIP

LINE DRIVERS, RECEIVERS, AND TRANSCEIVERS

Type	Description	Package
DS14185WM	±12V, +5V 3x5 Driver/Receiver	20-Pin SOIC
	EIA/TIA-422/423-B (RS-422/423)	
DS89C21TM	Line Driver and Receiver Pair	8-Pin SOIC
DS8935WM	LocalTalk 2x3 Dual Drvr./Triple Rcvr. w/Enable	20-Pin SOIC
DS26LV31TM	3V Quad Driver/Receiver, Ganged Enable	16-Pin SOIC
DS26LV32ATM	3V Quad Driver/Receiver, Ganged Enable	16-Pin SOIC
	EIA/TIA-485 (RS-485)	
DS36276M	Failsafe Transceiver	8-Pin SOIC
DS36C278TM	CMOS Transceiver	8-Pin SOIC
DS36C279M	CMOS Transceiver with Sleep Mode	8-Pin SOIC
DS36C279TM	CMOS Transceiver with Sleep Mode	8-Pin SOIC
DS36C280M	Slew Rate CMOS Controlled Single Transceiver	8-Pin SOIC
DS1487M	Low-Power Single Transceiver	8-Pin SOIC
DS36F95M	RS-485/-422 Bus Transceiver	8-Pin SOIC
DS3695N	Multipoint Transceiver	8-Pin MDIP
DS75176BN	Multipoint Transceiver	8-Pin MDIP
DS90LV018ATM	3V Single, LVDS Receiver	8-Pin SOIC
DS90LV019TM	3.3V LVDS Driver/Receiver	14-Pin SOIC
DS90LV027M	LVDS 3.3V 100 Mbps, Dual Driver	8-Pin SOIC
DS90LV028ATM	LVDS 3.3V 100 Mbps, Dual Receiver	8-Pin SOIC
DS92LV010ATM	Low Swing Differential Bus Xcvr	8-Pin SOIC
LM2403T	Triple 80MHz CRT Driver	11-Pin TO-220
LM2407T	Triple 50MHz CRT Driver	11-Pin TO-220
LMX3161VBH	Single Chip Dect. Transceiver	48-Pin PQFP
LP2975AIMM-3.3	MOSFET LDO Driver/Controller	8-Pin MSOP
LP2975IMM-3.3	MOSFET LDO Driver/Controller	8-Pin MSOP
LM3914N	Dot/Bar Display Driver	18-Pin MDIP

BOOMER SERIES LOW-POWER AUDIO AMPLIFIERS

Boomer series power amplifiers are designed to deliver maximum output power from low supply voltages, while consuming minimal supply current. Feature ultra-low power shutdown/mute modes.

Type	Power*	Stereo/ Mono	Single-Ended/ Bridged	Package
LM4834MS	70mW	Mono	Bridged	28-Pin SSOP
LM4860M	1W	Mono	Bridged	16-Pin SOIC
LM4861M	500mW	Mono	Bridged	8-Pin SOIC
LM4862M	400mW	Mono	Bridged	8-Pin SOIC
LM4862N	400mW	Mono	Bridged	8-Pin DIP
LM4863M	1.1W	Stereo	Bridged	16-Pin SOIC
LM4863N	1.1W	Stereo	Bridged	8-Pin DIP
LM4864M	550mW	Mono	Bridged	16-Pin SOIC
LM4864N	550mW	Mono	Bridged	8-Pin DIP
LM4870M	250mW	Stereo	Single	8-Pin MSOP
LM4880M	250mW	Stereo	Single	8-Pin SOIC
LM4880N	250mW	Stereo	Single	8-Pin DIP
LM4882MM	1.1W	Stereo	Bridged	16-Pin SOP

* Power is continuous RMS @ THD≤1% with 8Ω load and 5V supply.

(17744) (ne10482)

AUDIO POWER AMPLIFIERS

Type	Power (W)	Stereo/ Mono	Supply Range	Package
LM380N	2.25	Mono	10V to 22V	14-Pin DIP
LM383T	7	Mono	5V to 20V	TO-220
LM384N	5	Mono	12V to 26V	14-Pin DIP
LM386M-1	0.35	Mono	4V to 18V	8-Pin SOIC
LM386N-1	0.35	Mono	4V to 18V	8-Pin DIP
LM1875T	20	Stereo	16V to 60V	TO-220
LM1877M-9	1.75	Stereo	6V to 24V	14-Pin SOIC
LM1877N-9	1.75	Stereo	6V to 24V	14-Pin DIP
LM2878P	2.0	Stereo	6V to 32V	11-Pin SIP
LM2879T	1.25	Stereo	6V to 32V	TO-220
LM4701T	30	Stereo	9V to 20V	9-Pin TO-220

(17743) (ne10483)

OVERTURE™ SERIES HIGH-POWER AUDIO AMPLIFIERS

Overture series amplifiers deliver click- and pop-free performance. SPiKe™ protection makes the output stage virtually "bullet" proof.

Type	Power*	Supply Voltage	Stereo/ Mono	Package
LM1876TF	20W	±22V	Stereo	Isolated TO-220
LM4700TF	30W	±28V	Stereo	Isolated TO-220
LM3886TF	68W**	±28V	Mono	Isolated TO-220
LM3886T	68W**	±35V	Mono	Non-Isolated TO-220
LM3875TF	56W	±35V	Mono	Isolated TO-220
LM3875T	56W	±35V	Mono	Non-Isolated TO-220
LM2876TF	40W	±30V	Mono	Isolated TO-220
LM2876T	40W	±30V	Mono	Non-Isolated TO-220

* Power is continuous RMS @ THD≤1% with 8Ω load at listed supply voltage.
** Power is continuous RMS @ THD≤1% with 4Ω load at listed supply voltage.

MICROCONTROLLERS AND VOLTAGE REGULATORS

COP8SA SERIES ZERO EXTERNAL COMPONENT OTP MICROCONTROLLERS

Key Features:
- OTP Program Space with Read/Write Protection
- Quiet Design (Low-Radiated Emissions)
- Multi-Input Wake-Up Pins with Optional Interrupts (4 to 8 Pins)
- User-Selectable Clock Options (Crystal Resonator; Crystal Resonator w/On-Chip Bias Resistor; External Oscillator; Internal RC Oscillator)
- Internal Power-On Reset (User-Selectable)
- WATCHDOG™ and Clock Monitor Logic (User-Selectable)
- Up to 12 High-Current Outputs
- 2.7V to 5.5V

CPU Features:
- Versatile, Easy-to-Use Instruction Set
- 1µs Instruction Cycle Time
- Eight Multi-Sourced, Vectored Interrupts Servicing: External Interrupt; Idle Timer; One Time (2 Interrupts); MICROWIRE/PLUS™ Serial Interface; Multi-Input Wake-Up; Software Trap; Default VIS (Default Interrupt)
- 8-Bit Stack Pointer (Stack-In RAM)
- Two 8-Bit Register Indirect Data Memory Pointers
- True Bit Manipulation
- Memory-Mapped I/O
- BCD Arithmetic Instructions

Peripheral Features:
- Multi-Input Wake-Up Logic
- One 16-Bit Timer with Two 16-Bit Registers Supporting: Processor Independent PWM Mode; External Event Counter Mode; and Input Capture Mode
- Idle Timer
- MICROWIRE/PLUS™ Serial Interface (SPI Compatible)

I/O Features:
- Software Selectable I/O Options: TRI-STATE® & Push-Pull Output; Weak Pull-Up & High-Impedance Input
- Schmitt Trigger Inputs on Ports "G" and "L"
- Up to 12 High Current Outputs
- Pin Efficient (40 Pins in a 44-Pin Package are Devoted to Useful I/O)

Type COPSAx7 one-time programmable microcontrollers are members of the COP8™ feature family. Devices are offered in a variety of packages. A wide operating voltage range helps simplify design in a variety of applications. Many devices are also available in industrial temperature grade; *contact your local Newark sales office.*

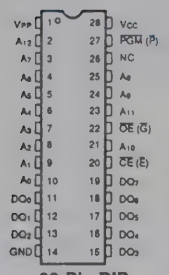
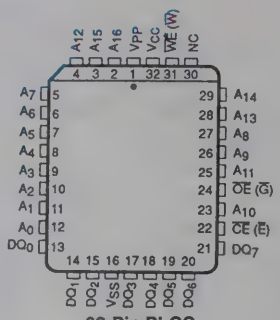
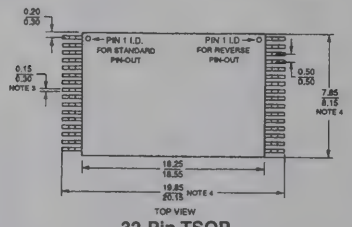
CMOS FLASH NONVOLATILE MEMORIES



32-Pin DIP



32-Pin PLCC



32-Pin TSOP

Unlike EPROMs, electrically erasable and programmable flash memories provide in-system reprogrammability—no need for UV erasure. Single NOR cell architecture reduces component cost. The **Am29F010** is 1Mb flash device with 5.0 volt-only operation, unlike the older 12V write/erase, 5V read, bulk erase devices. Uniform 16Kb sector architecture design allows storage of power-up firmware and data codes on the same chip. A sector-protect feature further prevents accidental erasure and provides virus-proof environment. Endurance is 100K write/erase cycles. Embedded Program and Embedded Erase algorithms reduce system firmware. The **Am29F040** is similar to the **Am29F010**, but is 4Mb and offers an erase suspend/resume feature that allows an erase operation to be suspended in one sector, so that a read operation can be performed in another sector of same device. **Am28F256, Am28F512, Am28F010,** and **Am28F020,** are erased and programmed by using standard Flasherase and Flashrite algorithms. All **Am28Fxxx** devices are available in easy-to-use embedded algorithm versions (**Am28FxxxA**).

LOW-VOLTAGE FLASH MEMORY

High-performance, low-voltage flash memory devices. All devices in the series offer a true 3.0V-only solution, ideal for battery-powered operations. Features include: single power-supply operation, 2.7V to 3.6Voperating range, choice of architectures, high-performance read/write, and high-reliability.

E86 SERIES x86-COMPATIBLE EMBEDDED MICROCONTROLLERS

AMD's integrated 16-bit versions, **type AM186EM** and **AM188EM** microcontrollers, offer new combinations of price, power consumption, and additional on-chip features which are moving 8-bit and 16-bit customers up to high performance.

HIGH-SPEED CMOS ULTRAVIOLET AND OTP EPROMs

EPROMs have a static standby mode, and feature fast Flashrite single address location programming (12.75V programming voltage). Fast read access time allows operation with high-performance microprocessors without any WAIT states. Offer separate output enable and chip enable controls, thus eliminating bus contention in a multiple bus microprocessor system. Provide high speed, low power consumption (100µA maximum standby current), and high noise immunity. All signals are TTL levels, including programming signals. Bit locations may be programmed singly, in small blocks, or at random. Have latch-up protection to 100 mA from –1V to Vcc + 1V. Temperature range: 0 to +70°C. All devices come in ceramic DIP packages, unless otherwise indicated.

DALLAS SEMICONDUCTOR

PRODUCT SELECTION GUIDE

NONVOLATILE SRAM

Integrate a lithium power source and intelligent control circuitry to retain data even in the absence of system power. Control circuitry monitors system voltage available to the memory at all times, and switches to the lithium power source to protect memory contents when necessary. Feature unlimited write endurance, automatic data protection, and read/write access times as fast as 70ns. **Types DS13xx** have built-in lithium battery monitor, CPU reset. DIP packages have JEDEC standard pinouts, 0.600″ row spacing. Low Profile Module (LPM) packages are 0.25″ thick, fit standard 68-pin PLCC sockets. PowerCap Module (PCM) are surface-mount, require **type DS9034PC** for proper operation. Operating temp.: 0°C to +70°C. Some devices also available in industrial temperature range (–40°C to +85°C); *contact your local Newark sales office.*

HIGH-SPEED MICROCONTROLLERS

Dallas Semiconductor high-speed microcontrollers are revolutionary products in the 8051 microcontroller family, which deliver up to 3 times the performance of industry standard 8051s just by dropping into an existing socket. This is accomplished by using 4 clocks per instruction instead of the usual 12, without changing crystal frequency. All parts are instruction set compatible with the 80C51/87C51. **Type DS80C320** is pin-for-pin compatible with 80C32, including the 3-volt version, **type DS80C323. Type DS80C310** is a cost-reduced version of **type DS80C320. Type DS87C520** is pin-for-pin compatible with the 80C51/87C51, and includes 16kB of EPROM, 1.2kB of SRAM. **Type DS87C530** contains same features as **type DS87C520**, plus a real-time clock and 1kB non-volatile SRAM. All of the high-speed controllers, except **type DS80C310,** include dual serial ports, power-on reset, and watchdog timer.

Type	Pins	Package	Clock Speed Max.
DS80C310-ECG	44	TQFP	25 MHz

CPU SUPERVISORS

POWER MONITORS

Type DS1231 monitors high-voltage inputs and uses a precise temperature-compensated reference circuit to provide an orderly shutdown and automatic restart of processor-based systems.

Type	Sense Input Hysteresis		Package
	Low Voltage Trip	High Voltage Trip	
DS1231-20	2.30V	2.50V	8-Pin DIP
DS1231-35	2.30V	2.50V	8-Pin DIP

MICROMONITORS

Type DS1232 monitors power supply, software execution and external override. Resets to active state when an out-of-tolerance condition occurs, and maintains active state for 250 ms to allow the power supply and processor to stabilize when V_{CC} returns to in-tolerance condition. Features pushbutton reset control Watchdog timer can be set to 150 ms, 600 ms, or 1.2 seconds. **Type DS1232LP** is a low-power design.

Type	Operating Current Max.	Package
DS1232	2 mA	8-Pin DIP
DS1232N	2 mA	8-Pin DIP
DS1232S	2 mA	16-Pin SOIC
DS1232LP	50 µA	8-pin DIP
DS1232LPS	50 µA	16-Pin SOIC
DS1232LPS-2	50 µA	8-Pin SOIC (150mil)

ECONORESET MONITORS

Type DS1232/1833 monitors power supply and external override. Resets to active state when an out-of-tolerance condition occurs, and maintains active state for 350 ms to allow the power supply and processor to stabilize when V_{CC} returns to in-tolerance condition. **Type DS1233** and **DS1233A** feature pushbutton reset control. **Type DS1832** have reset and watchdog.

Type	V_{CC}	Tolerance	Package
DS1233-5	5.0V	5%	TO-92
DS1233-10	5.0V	10%	TO-92
DS1233-15	5.0V	15%	TO-92
DS1233Z-5	5.0V	5%	SOT-223
DS1233Z-10	5.0V	10%	SOT-223
DS1233A-15	3.3V	15%	TO-92
DS1233D-10	5.0V	10%	TO-92
DS1233D-15	5.0V	15%	TO-92
DS1233DZ-10	5.0V	10%	SOT-223
DS1832	3.0V	Selectable	8-Pin DIP
DS1832S	3.0V	Selectable	8-Pin SOIC
DS1833-5	5.0V	5%	TO-92
DS1833-10	5.0V	10%	TO-92

REAL-TIME CLOCKS AND ELAPSED TIME COUNTERS WITH SERIAL INTERFACES

Serial clocks provide 4-, 3-, 2-wire interface for systems requiring small packages and low pin count.

Type	Pin	Pkg.*	Description
DS1302	8	DIP	RTC, 3-Wire Interface, 31 Bytes RAM, Trickle Charger
DS1305E	20	TSSOP	RTC, 3- or 4-Wire Interface, 96 Bytes RAM, Trickle Charger, 2 Time-of-Day Alarms
DS1602	8	DIP	2 Counters, 3-Wire Interface

REAL-TIME CLOCKS WITH BYTEWIDE INTERFACE

Bytewide interface clocks provide additional general-purpose RAM. Accept SRAMs or ROMs or densities indicated. Phantom interface clocks are transparent to the system until a particular 64-bit data sequence has been recognized.

DS1243Y	28	Module	8KB RAM, Phantom Interface for RTC
DS1244Y	28	Module	32KB RAM, Phantom Interface for RTC
DS1244Y-120	28	Module	32KB RAM, Phantom Interface for RTC
DS1642-120	24	Module	2KB RAM
DS1642-150	24	Module	2KB RAM
DS1643-120	28	Module	8KB RAM
DS1643-150	28	Module	8KB RAM
DS1644-120	28	Module	32KB RAM
DS1647-120	32	Module	512KB RAM

WATCHDOG TIMEKEEPERS WITH BYTEWIDE INTERFACE

Watchdog timekeepers provide, in addition to the clock and calendar, two alarms, programmable interrupt outputs, and 1kHz square wave output.

DS1286	28	Module	50 Bytes RAM, Time-of-Day Alarm
DS1386-32-150	32	Module	32KB RAM, Time-of -Day Alarm
DS1486-120	32	Module	128KB RAM, Time-of-Day Alarm

REAL-TIME CLOCKS WITH MULTIPLEXED ADDRESS/DATA BUS

Multiplexed address/data bus clocks provide time of day alarm, programmable square wave output and a programmable interrupt output in addition to clock and calendar.

DS12887	24	Module	114 Bytes RAM
DS14287	24	Module	114 Bytes RAM, NVRAM Control

CONTINUED

REAL-TIME CLOCKS (CONT.)

YEAR 2000 CLOCKS WITH CENTURY ROLLOVER

Year 2000-compliant clocks contain a 4-digit year counter that rolls over at the turn of the century from 1999 to 2000 with proper leap-year compensation. Most devices offer pin compatibility as NVRAM density is increased from 242 bytes to 8Kbytes.

DS1687-5	28	Module	114+128 Bytes RAM, KS, S/N, WU, V_{BAUX}, 5V
DS1742-70	28	Module	8KB RAM, Y2K-Compliant
DS1742-85	24	Module	2K RAM, Y2K-Compliant
DS1742-100	28	Module	8KB RAM, Y2K-Compliant
DS1743-70	24	Module	2KB RAM, Y2K-Compliant
DS1743-85	28	Module	8K RAM, Y2K-Compliant
DS1743-100	24	Module	2KB RAM, Y2K-Compliant
DS17287-5	24	Module	114+2KB RAM, KS, S/N, WU, V_{BAUX}, 5V

SOCKETS WITH REAL-TIME CLOCKS

DS1216B	28	Socket	RAM: 2KB, 8KB
DS1216C	28	Socket	RAM: 8KB, 32KB
DS1216D	32	Socket	RAM: 8KB, 32KB, 128KB, 512KB
DS1216E	28	Socket	ROM: 8KB, 32KB
DS1216F	32	Socket	ROM: 8KB, 32KB, 128KB

* All modules contain 32.768KHz crystal and embedded lithium energy source.

(9434) (de01883)

DS5000T SOFT MICROCONTROLLERS

Soft microcontrollers with embedded clock/calendar permit logging of events with time and date stamp. 8-bit µC provides nonvolatile RAM for program and/or data memory storage via lithium power source. 128 internal nonvolatile registers for variable retention. Capable of modifying program/memory in end-use. Maintains all nonvolatile resources for 10 years in absence of V_{CC}. On-chip full duplex serial I/O port and 32 parallel I/O lines. Compatible with 8051 instruction set and pinout. Temperature range: 0-70°C. 0.100″ (2.54) pin spacing. 0.600″ (15.24) row spacing. **Type DS5000FP-16** is an 80-pin quad flat pack containing a stand alone **DS5000** soft microcontroller die. Supports up to 32 Kbytes of data memory, 32 Kbytes of program memory. This gives user the flexibility of using their own lithium cells and memory to implement a nonvolatile microcontroller solution with the soft features of the **DS5000. DS5000TK** evaluation kit has **type DS5000T-32-12** microcontroller, software diskette, user's guide, in system loader software. Supports downloading from IBM PC host and downloads/verifies Intel Hex absolute object file.

Type	Program/Data RAM	Max. Clock Speed
DS5000T-08-08	8 Kbytes	8MHz
DS5000T-32-12	32 Kbytes	12MHz
DS5000T-32-16	32 Kbytes	16MHz
DS5000TK	Evaluation Kit

BATTERY MANAGEMENT ICs

Battery managment ICs acquire battery parameters such as temperature, voltage, and current, providing an important link to a Smart Battery System (SBS), and helping to determine the cut-off point of charge and discharge cycles. Dallas' 1-Wire™ interface links the chip to an embedded system, microcontroller, or processor. **Type DS2434** features a user-defineable ID code for battery packs. Direct-to-digital thermometer allows for self-discharge calculations based on battery environment and eliminates the need for a thermistor in the battery pack. **Type DS2435** adds an elapsed time counter and a time-temperature histogram for more sophisticated prediction of battery self-discharge. **Type DS2436** has 64-bit serial number, which allows multiple battery packs to be charged at once, and a voltage A/D converter for battery voltage measurement. **Type DS2437** adds a fuel gauge for measuring the remaining battery charge. Multiple DS2436 and DS2437 devices can operate on the same single data line for remote data acquisition systems or gang charger circuits.

Type	DS2434	DS2435	DS2436	DS2437
Manufacturing ID Code	Yes	Yes	Yes	...
Temperature	Yes	Yes	Yes	Yes
NV Memory (Bytes)	24 + 8	24 + 8	24 + 8	40

ECONOSCILLATOR FIXED FREQUENCY OSCILLATORS

EconOscillators are user-programmable to set frequency values in the 30kHz to 100MHz range through an on-chip prescaler and EEPROM divider. Replacements for bulky oscillators, they offer 1% accuracy over specified temperature and voltage ranges with no external timing components. **Type DS1075** can be used as either a stand-alone oscillator or slaved to an external reference to provide sub-multiples of the reference frequency. **Type DS1073** is a 3V device suitable for small, battery-powered, handheld applications and systems requiring low-voltage operation. **Type DS1065** incorporates the programmable feature of the original **type DS1075**, and is available in a space-saving 3-lead TO-92 package. An internal oscillator circuit is factory-programmable from 60MHz to 110MHz, and two on-chip dividers are user-programmable from 1-513. EconOscillators come preprogrammed in four standard master frequencies: 60, 66, 80, and 100MHz with a divide-by-two. Using **type DS1075K** development kit, parts can be programmed to user's setting during prototyping and reprogrammed as designs change.

Type	Package	Clock Speed
DS1065T-60	TO-92	60MHz
DS1065T-100	TO-92	100MHz
DS1073M-60	8-Pin DIP	60MHz
DS1073M-100	8-Pin DIP	100MHz
DS1073Z-60	8-Pin SOIC	60MHz
DS1073Z-100	8-Pin SOIC	100MHz
DS1075M-60	8-Pin DIP	60MHz
DS1075M-66	8-Pin DIP	66MHz
DS1075M-80	8-Pin DIP	80MHz
DS1075M-100	8-Pin DIP	100MHz
DS1075Z-60	8-Pin SOIC	60MHz
DS1075Z-80	8-Pin SOIC	80MHz
DS1075Z-100	8-Pin SOIC	100MHz
DS1075K	EconOscillator Development Kit

DUAL ADDRESSABLE SWITCHES

Type DS2407 dual-addressable switch simplifies distributed closed-loop control from a central PC. Each **DS2407** contains a guaranteed-unique serial number that serves as a node address and allows multiple chips to reside on a single 1-Wire™ bus. The PC can activate the switch in a remote **DS2407** to turn on an LED. Alternately, its high-impedance sensor inputs are designed to capture a one-shot pulse, such as one generated by a piezo sensor. The device features 1024 bits of EPROM memory to store application-specific data. PIO pin channel "A" has sink capability of 50mA at 0.4V with soft turn-on. Channel "B" has 8mA at 0.4V.

Type	Description	Package
DS2407	Addressable Switch (1 Channel)	TO-92
DS2407P	Dual-Addressable Switch	TSOC
DS2409P	MicroLAN Coupler	6-Pin TSOC
DS2423	4K 1-Wire RAM with Counters	TSOC
DS2480	Serial 1-Wire Line Driver	8-Pin TSOC

(10941) (ne09944)

PC BOARD LABEL EEPROMs

Type DS2430A 256-bit, 1-Wire™ EEPROM identifies and stores relevant information, such as manufacturing history or revision data, about the product to which it is associated. The lot, or product-specific, information can be accessed with minimal interface, for example via a single port pin of a microcontroller. **Type DS2430A** communicates at up to 16.3Kbps. The power to read and write the device is derived entirely from the 1-Wire™ communication line. Data is transferred serially via the 1-Wire™ protocol, which requires only a single data lead and a ground return. The 48-bit serial number, factory-lasered into each **DS2430A**, provides a guaranteed unique identity which allows for absolute traceability.

Type	Description	Package
DS2430A	Silicon Label EEPROM	TO-92
DS2430AP	Silicon Label EEPROM	TSOC
DS2502	1K Add-Only Memory	TO-92
DS2502P	1K Add-Only Memory	TSOC
DS2505	16K Add-Only Memory	TO-92
DS2505P	16K Add-Only Memory	TSOC
DS2506	64K Add-Only Memory	PR35
DS2506S	64K Add-Only Memory	SOIC

DIGITAL POTENTIOMETERS

Digital potentiometers are solid-state replacements for mechanical pots in many applications. They offer numerous advantages including greater reliability, improved accuracy, and direct processor control of the wiper setting. Listed devices come in PDIP packages. Some device types listed are also available in SOIC and TSSOP packages and industrial temperature grade; *contact your local Newark sales office.*

Type	Taper	Resolution	Power Supply (V)	Interface	Memory
DS1267-010	Linear	256 Positions, Dual	4.5 to 10	3-Wire Serial	Volatile
DS1267-050	Linear	256 Positions, Dual	4.5 to 10	3-Wire Serial	Volatile
DS1267-100	Linear	256 Positions, Dual	4.5 to 10	3-Wire Serial	Volatile
DS1669-10	Linear	64 Positions	4.5 to 8.0	Pushbutton	Non-Volatile
DS1669-50	Linear	64 Positions	4.5 to 8.0	Pushbutton	Non-Volatile
DS1669-100	Linear	64 Positions	4.5 to 8.0	Pushbutton	Non-Volatile
DS1801	Log	64 Steps, 1dB, Dual	2.7 to 5.5	3-Wire Serial	Volatile
DS1802	Log	128 Positions, Dual	2.7 to 5.5	3-Wire Serial	Volatile
DS18030-100	Linear	256 Positions, Dual	2.7 to 5.5	2-Wire Serial	Volatile
DS1804-010	Linear	100 Positions	2.7 to 5.5	Inc./Decrement	Non-Volatile
DS1804-050	Linear	100 Positions	2.7 to 5.5	Inc./Decrement	Non-Volatile
DS1804-010	Linear	100 Positions	2.7 to 5.5	Inc./Decrement	Non-Volatile
DS1844-010	Linear	64 Positions, Quad	2.7 to 5.5	3-Wire/Z-Wire	Volatile
DS1844-050	Linear	64 Positions, Quad	2.7 to 5.5	3-Wire/Z-Wire	Volatile
DS1844-100	Linear	64 Positions, Quad	2.7 to 5.5	3-Wire/Z-Wire	Volatile

(4451) (ne09567)

DIRECT-TO-DIGITAL TEMPERATURE SENSORS

Digital and analog temperature sensors, many with thermostat capability. The core feature set of this series is a direct-to-digital readout of the temperature (≥9 bits); over- and under-temperature non-volatile thermostat set points; factory calibration; and dedicated thermostat logic outputs. Variations include three types of serial interfaces (1-Wire™, 2-wire and 3-wire), on-chip E^2PROM memory (up to 256 bytes), and multi-sense capability (up to ∞). The digital sensors require no external components to sense temperature and convert it to a digital word that can be read by a µP. Factory calibration eliminates the need for the designer to perform any compensation or linearization over the operating range. The nonvolatile thermostat trip points and dedicated thermostat outputs allow for stand-alone (no µP required) thermostat operation. Applications include: thermal management of personal computers and servers, office electronics, equipment racks, HVAC environmental control, and process monitoring/control. Some of the devices offer demonstration kits to allow users to explore the operation of this temperature sensing technology. The kits, which include software and hardware to interface the sensor to an IBM-compatible PC, allow the user to measure temperature, set thermostat trip point, and view thermostat output operation. Demo kits are available for **type DS1620** and **type DS1820**; *contact your local Newark sales office.*

Type	Package	Power Supply	Interface	Accuracy	Unique Feature
DS1620	8-Pin DIP	3V/5V	3-Wire	±0.5°C	Standalone Thermostat Mode
DS1620S	8-Pin SOIC	3V/5V	3-Wire	±0.5°C	Standalone Thermostat Mode
DS1621	8-Pin DIP	3V/5V	2-Wire	±0.5°C	Addressable Interface
DS1621S	8-Pin SOIC	3V/5V	2-Wire	±0.5°C	Addressable Interface
DS1624	8-Pin DIP	3V/5V	2-Wire	±0.5°C	256 Bytes EEPROM
DS1624S	8-Pin SOIC	3V/5V	2-Wire	±0.5°C	256 Bytes EEPROM
DS1629S	8-Pin SOIC	3V/5V	2-Wire	±2.0°C	On-Chip Real Time Clock
DS1720S	8-Pin SOIC	3V/5V	3-Wire	±2.5°C	Relaxed Spec, Economy **DS1620**
DS1721S	8-Pin SOIC	3V/5V	2-Wire	±1.0°C	Relaxed Spec, Economy **DS1621**
DS1780E-000	24-Pin TSSOP	3V/5V	2-Wire	±2.0°C	Monitors 6 Voltages, 2 Fan Speeds, 8-Bit DAC to Control Fan Speed
DS1820	PR-35	5V	1-Wire™	±0.5°C	Digital Interface w/Multiport Sensing
DS1820S	16-Pin SSOP	5V	1-Wire™	±0.5°C	Digital Interface w/Multiport Sensing
DS1821	PR-35	5V	1-Wire™	±1.0°C	Dig. Interface w/Standalone Thermostat Mode
DS1821T	TO-220	5V	1-Wire™	±1.0°C	Dig. Interface w/Standalone Thermostat Mode
DS56S	8-Pin SOIC	3V/5V	Analog Voltage	±2.0°C	Dual Independant Thermostat Settings
DS60R	SOT23-3	3V/5V	Analog Voltage	±2.0°C	Linear Output Sensor
DS75S	8-Pin SOIC	3V/5V	2-Wire	±2.0°C	**LM75** Compatible w/Higher Resolution

1.5A QUAD DARLINGTON SWITCHES

High-voltage, high-current Darlington arrays interface between low-level logic and a variety of peripheral loads such as relays, solenoids, DC and stepper motors, magnetic print hammers, multiplexed LED and incandescent displays, heaters and similar loads. Intended for use with TTL, low-speed TTL, and 5V MOS logic. Feature transient-protected outputs. Can drive loads up to 480W. Both types have predriver stages. Temperature range: –20°C to +85°C.

AMPLIFIERS

intronics

The isolation amplifiers listed below are currently manufactured with the identical high-performance levels and wide bandwidth as when they werre manufactured by Analog Devices. The operational amplifiers and log/antilog or log/ratio amplifiers, as well as the other listed parts, are now exclusively manufactured by Intronics to the exact same specifications as when they were manufactured by Analog Devices.

Type	Description
284J	High-Performance, Self-Contained Isolation Amp
286J	High CMV, High-Performance, Synchronized Isolation Amp
289J	Precision, Wide Bandwidth, Synchronized Isolation Amp
289K	Precision, Wide Bandwidth, Synchronized Isolation Amp
289L	Precision, Wide Bandwidth, Synchronized Isolation Amp
290A	Multichannel Isolation Amp
310J	Operational Amplifier
755N	Log/Antilog Amplifier
755P	Log/Antilog Amplifier
757N	Log Ratio Amplifier
757P	Log Ratio Amplifier
759N	Log/Antilog Amplifier
759P	Log/Antilog Amplifier

ACCESSORIES

QWIKRADIO™ RF RECEIVER/DEMODULATOR

- Complete UHF Receiver on a Monolithic Chip
- Frequency Range: 300 to 440MHz
- Typical Range over 100m with Monopole Antenna
- Date Rates to 4.8kbps
- Automatic Tuning (No Manual Adjustment)
- No Filters or Inductors Required
- Very Low RF Re-Radiation at the Antenna
- Direct CMOS Logic Interface to Standard Decoder and MPU ICs
- Applications: Keyless Entry; Security Systems; Remote Fan/Light Control; Garage Door Openers

MICROCONTROLLERS AND MICROPROCESSORS

Z8 FAMILY

Z8 architecture consists of a highly-integrated microcontroller on a single chip and a fully-expandable microprocessor for I/O and memory-intensive applications. The **Z8** can also address up to 124K bytes of external program and data memory which can provide full, memory-mapped I/O capacity. Features: WDT; 2 counter/timers; 256 internal register file, including 236 bytes RAM; 3.0-5.5V; 6-bit programmable prescaler; 6 vectored priority interrupts; brown-out protection; 2 sStandby modes—STOP and HALT; low power consumption. **Z86E02** offers ½ Kbyte of one-time programmable PROM, 61 bytes of general-purpose RAM, 1 on-chip counter/timer, and 14 I/O, low-noise, and ROM protect programmable. **Z86E04** offers 1 Kbyte of one-time PROM, 124 bytes of general-purpose RAM, two on-chip counter/timers, 14 I/O, low noise and ROM protect programmable and low-power consumption. The device allows easy software development and debug, prototyping and small production runs not economically desirable with a masked ROM version. **Z86E08** is a 2KROM featuring Z8 architecture in a low-cost plastic DIP. Low power I/O ideal for hand-held and computer applications. Compatible with the entire Z8 family. 141-byte register file. 3-volt operation.

Type	Pins	MCU	Speed (MHz)	Pkg.	Temp. (°C)	Std. Flow

Z86E0812PSC1866	18	OTP	12	DIP	0 to 70	Plastic

(10004) (de02120)

Z80 FAMILY

The **Z80** family of state-of-the-art microprocessors and peripheral controllers simplifies hardware requirements. Two index registers provide additional memory addressing flexibility and simplify the task of programming. 4MHz versions of the devices below are also available; *contact your local Newark branch.* **Z08400** (NMOS)/**Z84C00** (CMOS) provide exceptional computational power and allow Z80 microprocessors and associated peripherals to be linked by a vectored interrupt system. Internal registers contain 208 bits of read/write accessible memory and include two sets of six general-purpose registers which may be used individually as 8-bit registers or as 16-bit register pairs. **Z08420** (NMOS)/**Z84C20** (CMOS) interface between Z80 microcomputer systems and peripheral devices such as keyboards, paper tape reads, printers, and PROM programmers. **Z08430** (NMOS)/**Z84C30** (CMOS) utilize a counter/timer circuit for peripheral counting and timing applications. Four independently programmable channels fulfill requirements for event counting. **Z08440** (NMOS)/**Z84C40** (CMOS) function as serial-to-parallel, parallel-to-serial converter/controllers that can be programmed by a CPU for a broad range of serial communication applications. **Z08442** (NMOS) features the same characteristics as **Z08440/Z84C40** but utilizes a bonding option of "2". Preferred version for most applications. **Z08470** is a dual asynchronous receiver/transmitter (DART) peripheral component. Dual-channel multi-function capabilities. 40-pin plastic DIP. **Z84C15** integrates the **Z84C00** CPU with **Z84C40** (S10), **Z84C30** (CTC), **Z84C20** (P10) in 100-pin QFP package.

Z8® CCP™ IN-CIRCUIT EMULATOR

- **In-Circuit Debug Program Emulation**
- **Real-Time Emulation**
- **Z8 GUI Emulator Software with Windows-Based User Interface**
- **One-Time Programmable (OTP) Support**
- **Selectable Baud Rates—9600 to 57.6 kpbs**
- **Bisync Error-Correcting Communications Protocol**
- **Source-Level Debugging**
- **Symbolic Disassembly in the Debug Window**

The Z8 CCP emulator (**type Z86CCP01ZEM**) is a member of Zilog's ICEBOX™ product family of in-circuit emulators for the Consumer Controller Processor (CCP™) microcontrollers. The emulator provides essential timing and I/O circuitry to simplify user emulation of the prototype hardware and software product. The emulator can be connected to the COM ports of the host computer and uses GUI software. Operating temperature: 20°C±10°C. Supply voltage: +7.5VDC to +10.0VDC (+8.0VDC typ.). Emulation speed: 6MHz internal SCLK max., 1MHz internal SCLK min.

83F4697 Type Z86CCP01ZEM In-Circuit Emulator. **Each**..... **99.00**
(28133) (ne28133)

Z8® MCU DESIGNER CERTIFICATION KIT

Hardware:
- **Z8 CPP™ Emulator Board**
- **18-Pin DIP-to-DIP Target Cable**
- **Z86E08 18-Pin DIP OTP-Device**

Software:
- **Z8 GUI Software Diskette**
- **ZASM Cross-Assembler/MOBJ Disk**
- **PLC COMPASS/Z8™ (Eval. Disk)**

Documentation:
- **Zilog Z8 Emulator User's Manual**
- **Z8 Microcontrollers Technical Manual**
- **Discrete Z8 Microcontrollers Databook**
- **Registration Card**

Training Materials:
- **Z8 Training Manual**
- **Z8 Windows-based Cert. Prog. 3.5" Disk**

Zilog's Z8 certification kit contains everything needed to become a certified Z8 designer. Emulator board features: real-time emulation, hardware breakpoints, symbolic debug, software trace and OTP programming support. User interface is Windows-based.

66F1106 Type Z86CCP00ZTK. Z8 Certification Kit. **Each**..... **232.39**

DSP EMULATORS FOR Z89323 SERIES DSPs

- **Source-Level Debugging for DSP Codes**
- **Symbolic Disassembly in the Debug Window**
- **Selectable Baud Rates—9600 to 57.6 kbps**
- **Zilog Macro Cross Assembler (ZMASM)**
  - **Structered Assembly and Data Code**
  - **Source-Level Debug Support**
  - **Built-In Register Equates**
  - **Linker**

Type Z89323x emulators for **Z89323 series** DSPs provide essential timing and I/O circuitry to simplify user emulation of the prototype hardware and software product. Emulators include a full-featured macro cross-assembler. Kits include: Z89323 emulator board; RS-232C 9-pin M/F serial cable; 9VDC AC adapter; software; and documentation. Emulators may require additional accessory kits for use with certain devices, as detailed in the table below; *contact your local Newark sales office.*

TYPE Z0220100ZCO MODEM EVALUATION KIT

- **Supported Protocols: V.22bis, V.22, V.21, V.23, Bell 103, Bell 212A**
- **Board Connections for Phone Network (RJ-11) and PC (RS-232)**
- **Eye-Pattern Output for X-Y Oscilloscope Display**
- **Speaker for Modem Handshake and Dial Tone**
- **Software Configurable for Worldwide Country Support**
- **Software Configurable Object Code**

Type Z0220100ZCO modem evaluation kit is designed for evaluation of the **type Z02201** modem DSP and analog front end, and the **type Z02205** modem controller. Kit includes assembled circuit board, software, and documentation.

83F4698 Type Z0220100ZCO Modem Evaluation Kit. **Each**..... **245.00**

Z180 FAMILY (S180, Z180)

Z180/S180 (static version)/**L180** (low-voltage version): The **Z180 MPU** series is an upgraded Z80 core with on-board peripherals. It includes a memory management unit (MMU) which translates 16-bit addresses to 20 bits and two 16-bit counter/timers, a pair of DMA controllers and three serial ports. **Z181™ SAC™ Smart Access Controller:** The Z181 contains the complete Z180 along with a channel of the **Z85C30** (SCC) and 16 I/O lines with the **Z84C30** (CTC). **Z182 Zilog Intelligent Peripheral (ZIP™) Controller:** Used for modems, faxes, voice messaging and other communication applications, the Z182 incorporates the S180 MPU linked with two channels of the **Z85230** (ESCC™), 24 bits of parallel I/O and a 166550 MIMIC for direct connection to the IBM PC, XT, AT bus.

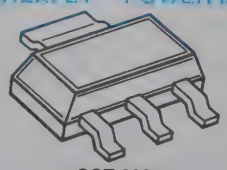
SOT-223 HEXFET™ POWER MOSFETs

SMD



SOT-223

The SOT-223 package is capable of dissipating more than 1W in a typical printed circuit board application. Package design allows for maximum die size, optimum thermal performance and ease of surface mount manufacturing. Suitable for use with all soldering techniques.

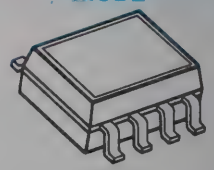
FETKY™ CO-PACKAGED HEXFET™ POWER MOSFET AND SCHOTTKY DIODE

SMD



SO-8

The FETKY™ series of co-packaged HEXFET™ power MOSFETs and Schottky diodes offer the designer an innovative board space-saving solution for switching regulator applications. Generation 5 HEXFETs utilize advanced processing techniques to achieve extremely low on-resistance per silicon area. Combining this technology with International Rectifier's low forward drop, Schottky rectifiers results in an extremely efficient device suitable for use in a wide variety of portable electronics applications. Ideal in buck generator or battery charge control circuit applications.

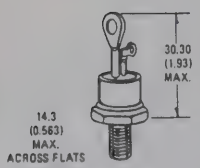
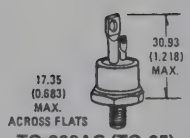
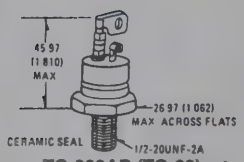
PHASE CONTROL SCRs (THYRISTORS)



TO-208AA (TO-48)



TO-208AC (TO-65)



TO-208AD (TO-83)

TO-209AB (TO-93)

TO-209AC (TO-94)

TO-209AE (TO-118)

Phase control-type SCRs are available from 25 to 125 amps rms with voltages up to 1300 Volts. Included are state-of-the-art SCRs as well as a full range of high quality industry-standard devices in the most widely used packages. Companion series (listed in the notes) are different only in package configuration, unless otherwise specified.

INTELLIMOD™ ORDERING GUIDE

PM 100 CSA 060
(1) (2) (3) (4)

(1) Device Type:
PM = Intellimod™

(2) Current Rating I_C (Amperes)

(3) For INTELLIMOD™:
HSA = Single Device
DSA/DVA = Dual Device
CSA/CSJ/CVA = 6 Pack
RSA/RSH/RSK/RVA = 7 Pack Device
(7th IGBT used for braking)

(4) Voltage Class (X10)
060: 600V/for AC 220V line
120: 1200V/for AC 440V line

(4444) (ne08787)

INTELLIMOD™ INTELLIGENT POWER IGBT MODULES

These intelligent power modules can run at low, medium, and high power and speed, with a high frequency of ≤20kHz and a total loss reduction of 20%. The packages of the modules are small and slim. All have integrated functions: OT, SC, OC, UV, and BR (where applicable). New features include improved short circuit capability 'RTC' and fault output available from P-side.

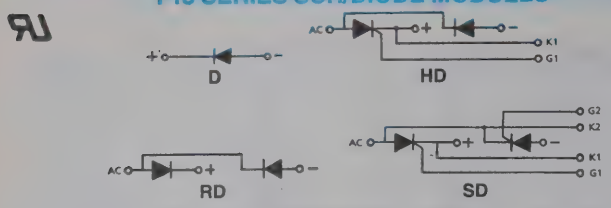
THYRISTOR/DIODE MODULES

F18 SERIES SCR/DIODE MODULES



Modules come in an industry standard package, offering nine circuits that can be used single or as power control building blocks. Feature highly efficient thermal management for greatly extended cycle life. UL recognized. V_{DRM}/V_{RRM} is indicated in last digits of type number (PIV).

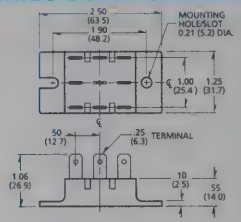
M25 SERIES SCR/DIODE MODULES



Units feature 2500VACrms terminal-to-base isolation and ultra-high surge current capabilities. Circuit types featured: in type numbers, **1** before last numeral indicates hybrid bridge common cathode SCRs; **4** before last numeral indicates AC switch. **"F"** after last digit indicates freewheeling diode; **"V"** indicates voltage suppressor; **"FV"** indicates both. UL recognized.

V_{DRM}/V_{RRM} = 600V, V_{RMS} = 240VAC

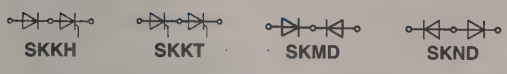
THYRISTOR/DIODE MODULES AND RECTIFIERS

SEMIPACK® THYRISTOR/DIODE MODULES



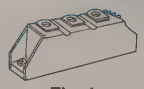


Fig. 1

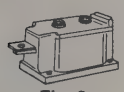

Fig. 2

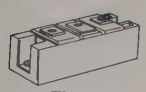

Fig. 3

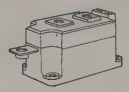

Fig. 4

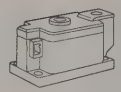

Fig. 5

Type SKET single thyristor; **type SKKD** two diodes; **type SKKH**, thyristor (cathode side) + diode; **type SKKT**, two thyristors. dv/dt grade: 500V/µs (type number suffix **D**); 1000V/µs (type number suffix **E**). Applications: DC motor and temperature control, light dimming, and rectifiers for AC/AC converters and transistorized AC motor controllers.

FAST THYRISTOR/DIODE MODULES

Type SKKD, all diodes in series connection with center terminal; **type SKMD**, all diodes in center tap connection (cathodes connected); **type SKND**, all diodes in center tap connection (anodes connected). Diode type: **E** in type number, fast epitaxial; **F** in type number, fast; **M** in type number, medium fast. Applications: self-commutated inverters, DC choppers, AC motor speed control, inductive heating, uninterruptible power supplies, electronic welders, general power switching applications, snubbers for GTO thyristors.

SOLID-STATE RELAYS AND SURGE ARRESTERS

AC, CG, CG2, CG3 AND PMT3 (310) SERIES SURGE ARRESTERS

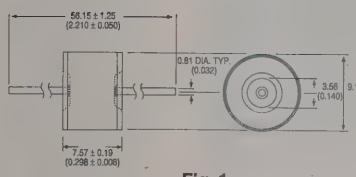

Fig. 1

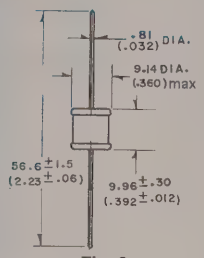

Fig. 3

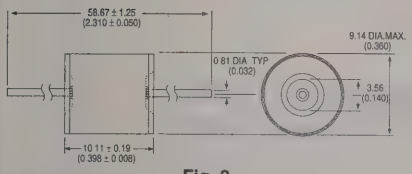

Fig. 2

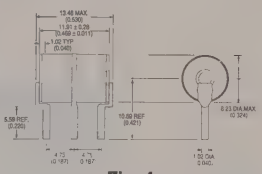

Fig. 4

AC, CG, CG2 and **CG3 series** surge arresters constructed of two metal electrodes hermetically sealed in gas-filled ceramic cylinder. **CG** devices for low VDC captive discharge applications. Use **CG2** devices where microsecond transient rise times are expected. Use **CG3** devices where bias voltages or signal levels of several hundred volts are normally present. **PMT3(310) series** units provide general purpose, three electrode surge arrester for telecommunication applications. AC designed for AC line protection. UL recognized, CSA certified. Meet REA PE-80,IEEE587.

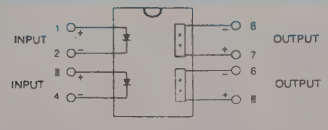
SOLID-STATE MOSFET DRIVER

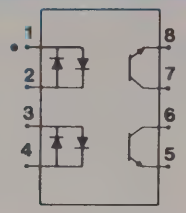


The **FDA series** offers a significant reduction in drive circuit complexity and board space. Used in conjunction with discrete MOSFETs, the **FDA215** is designed for use in programmable controls, process control, instrumentation, and telecommunications, and for replacing TRIAC/drivers, mechanical relays, and bipolar components. Output switch device: IC. Load voltage: 10V. Load current: 1mA. Package type: 8-pin DIP. Operating time: 5ms. UL recognized, CSA certified.

Stock No.	Type	Control Characteristics (mA)	Off-State Clamping Resistance	I/O Isolation (Vrms)	1-24	25-49
92F3168	FDA215	5	0.25K	3750	**8.68**	**7.81**

(3717) (ne03799)

TYPE LDA SOLID-STATE CURRENT SENSORS

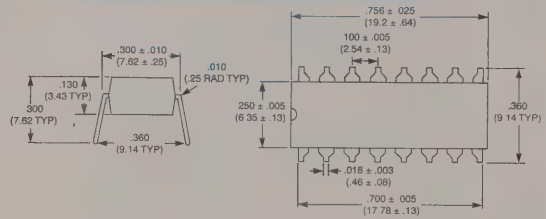


Used for telecommunications, instrumentation circuits, and industrial controls where input-to-output electrical isolation is desired. Typical applications include ringing current sensing, loop current sensing, AC/DC current monitoring, and off-hook detection. Single phototransistor optically coupled with 2 light-emitting input diodes. Available with 1 or 2 sensors. Feature optical isolation to 3750V, small dual inline package to conserve board space. Machine insertable, wave solderable. Simplifies circuit design. **Type LDA200** has 2 sensors. Offers current sensing and bidirectional inputs to detect AC or DC. Delivers 100% current transfer ratio, 0.5V saturation, 20V breakdown (minimum), and 100mA maximum continuous input. UL recognized, CSA certified, BSI and VDE approved.

Stock No.	Type	BV_{CEO}(V)	V_{SAT}(V)	1-24	25-49	50-99
51F4179	LDA200	50	0.3	**5.33**	**4.61**	**3.69**

(3715) (ne03155)

LINEAR ISOLATION AMPLIFIER

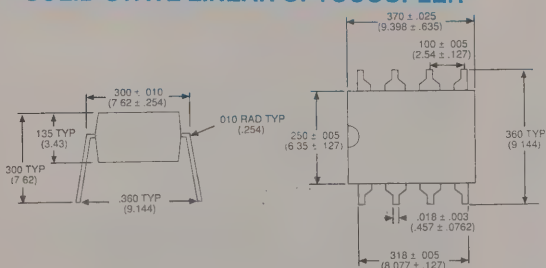


Type LIA100 contains a linear optocoupler and 2 **LF356** operational amplifiers that can be connected to form a complete isolation amplifier. Couples AC and DC signals in either unipolar or bipolar modes while maintaining linearity and isolation up to 3750V. Housed in either a 16-pin DIP or 16-lead SOIC package. **Type LIA100** is 16-pin DIP thru-hole mount but can be used easily as surface mount. Operation temperature range: -40°C to +85°C. Machine insertable, wave solderable. Offered in a photovoltaic mode amplifier. UL recognized, CSA certified.

Stock No.	Type	Linearity (Typ.)	Isolation Voltage	Bandwidth	1-9	10-24
52F7360	LIA100	0.01%	3750Vrms	≥ 40kHz	**11.43**	**9.72**

(3741) (ne07121)

SOLID-STATE LINEAR OPTOCOUPLER



LOC 110

Intended for telecommunications, industrial controls, medical, and instrumentation markets. Typical applications include digital telephone isolation (replacement for transformers), power supply feedback, voltage/current and audio and signal interfacing. **Type LOC 110** is 8-pin DIP, **type LOC211P** is 16-pin SOIC. Features include coupling analog and digital signals, wide bandwidth 200kHz, high-gain stability, and low input/output capacitance. Provides solid-state reliability along with board space savings. LED operating current: 1. Common mode rejection ratio: 130 typ./dB. Package: 8-pin DIP/flatpack. UL recognized, CSA certified.

Stock No.	Type	Total Harmonic Distortion	Servo Linearity (%)	Bandwidth (kHz)	I/O Isolation (Vrms)	1-9	10-24
92F3166	LOC110	87dB	.01	< 200	3750	**5.33**	**4.80**
83F6793	LOC211P	87dB	.01	< 200	3750	**15.41**	**13.11**

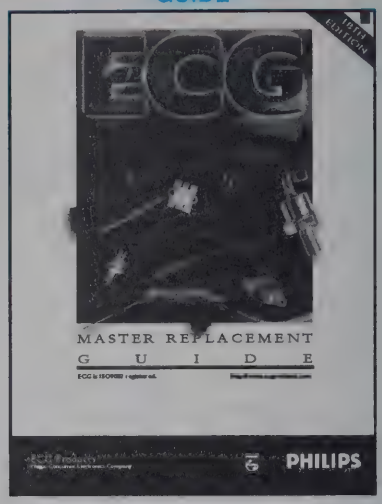
PHILIPS ECG SEMICONDUCTOR MASTER REPLACEMENT GUIDE



The Philips ECG Semiconductor Master Replacement Guide features approximately 300,000 crosses. The ECG semiconductor product line encompasses a wide variety of quality devices that cover the complete spectrum of semiconductor technologies from simple diodes to microprocessors. Guidebook includes complete specifications, including pin diagrams.

83F4162 Type ECG212T. **Each** **5.00**

The Philips ECG Semiconductor Cross Reference Guide on disk features new Instant Cross™ software that gives ECG replacement, description, case style, and special notes instantly. For IBM-PCs and compatibles with MS-DOS, 640K RAM. 3.5″ floppy disk.

83F4163 Type ET-2604W1.1 for Windows®. **Each** **12.09**

ECG2353	Transistor, NPN, SI, Horiz Out w/Damper Diode, HV, Sw, TO-3PM
ECG261	Transistor, NPN, Si, Darl. 80V, TO-220
ECG264	Transistor, PNP, Si, Darl, 100V, 10A, hfe=1000(min.), TO-220
ECG284	Transistor, NPN, Si, AF PO, Pd 150W, TO-3
ECG289A	Transistor, NPN, Si, AF PO, Pd 0.6W, TO-92
ECG377	Transistor, NPN, Si, Pwr. Dr., PO, Sw., Reg. TO-220
ECG378	Transistor, PNP, Si, Pwr. Dr., PO, Sw., Reg. TO-220
ECG379	Transistor, NPN, Si, HV, Hi-Speed Pwr Sw., TO-3P
ECG386	Transistor, NPN, Si, HV Hi Speed Sw, TO-3
ECG506	Rectifier, Si, Hi Current/Fast Sw, Damp, Blank
ECG53	Transistor, NPN, Si-HV, Hi Speed Sw, tf=0.7µs typ., TO-3
ECG5313	Rectifier, Si, Bridge, 200 PRV, 8A
ECG5322	Rectifier, Si, Bridge, 200 PRV, 25A, 4-Spade Connectors
ECG5324	Rectifier, Si, Bridge, 400 PRV, 25A, 4-Spade Connectors
ECG5326	Rectifier, Si, Bridge, 600 PRV, 25A
ECG5332	Rectifier, Si, Bridge, 600 PRV
ECG5342	Rectifier, Si, Bridge, 600 PRV, 40A, 4-Spade Connectors
ECG5344	Rectifier, Si, Bridge, 1000 PRV, 40A
ECG5460	SCR, 800 VRM, 25A
ECG56026	TRIAC 600 VRM, 40A, Isolated Stud, TO-48
ECG5645	TRIAC, 600V, 10A, Isolated Tab, TO-220
ECG5679	TRIAC 600 VRM, 40A, TO-3
ECG5700	Industrial Power Mod, 100V, 25A
ECG580	Rectifier, Si, 600PRV, 3A, Axial Lead
ECG5809	Rectifier, 1000 PRV, 3A, Axial Lead
ECG5817	Rectifier, 1000 PRV, 6A/22A, Axial Lead
ECG94	Transistor, NPN, Si, HV Gen Purp Amp, TO-3
ECG947D	IC-Dual Freq-Compensated Op Amp, 14-Lead DIP
ECG960	IC-Voltage Regulator, Positive, 5V, 1A, TO-220
ECG98	Transistor, NPN, Si, Pwr Darl HV Amp, Fast Sw TO-3
ECG987	Quad Op-Amp, 14-Pin DIP

REPLACEMENT SEMICONDUCTOR KITS

SK SERIES REPLACEMENT SEMICONDUCTOR KITS

Newark Electronics® has packaged the most requested SK Series replacement semiconductors in convenient kits. Each kit is housed in a 30-drawer cabinet, and comes with its own SK Semiconductor cross-reference software on 3.5″ HD diskette. (Also available separately; *contact your local Newark sales office.*) All kit components, as well as hundreds of additional SK Series devices, are available separately from Newark for immediate delivery.

Combination Kit #1 consists of the 25 most-requested devices. Selection of transistors, diodes, rectifiers, and SCRs in a variety of package styles. The 145 pieces in this kit replace 42,723 devices.

Type	Description	Qty.
SK3004	PNP Ge Transistor, AF Low Power, TO-1	5
SK3009	PNP Ge Transistor, AF High Power, TO-3	5
SK3027	NPN Si Transistor, AF High Power, TO-39	5
SK3051	Si, Axial Lead Rectifier, 1000V, 3A	5
SK3054	NPN Si Transistor, AF Deflection, TO-220	5
SK3081	Si, Axial Lead Rect., 1000V, 2.5A DO-41	10
SK3087	Ge, Ax. Ld. Signal Diode, AF/RF, 75V, 50mA, DO-7	5
SK3090	Ge, Ax. Ld. Signal Diode, AF/RF, 100V 100mA, DO-7	5
SK3100	Si, Ax. Ld. Rect. Switching, DO-35	5
SK3114A	PNP Si Transistor, AF Power Amp, TO-92	5
SK2124A	NPN Si Transistor, AF Power Amp, TO-92	5
SK3220	NPN Si Transistor, Deflection, AF, TO-220	5
SK3311	Si, Ax. Ld. Rect. 200V, 1A, DO-41	5
SK3312	Si, Ax. Ld. Rect. 400V, 1A, DO-41	10
SK3313	Si, Ax. Ld. Rect. 600V, 1A, DO-41	10
SK3440	NPN Si Transistor, AF Med. Power, TO-220	5
SK3444	NPN Si Transistor, RF/AF Osc./Amp, TV Vid., TO-18	5
SK3466	PNP Si Transistor, AF Med Pwr., Preamp/Drvr., TO-92	5
SK3854	NPN Si Transistor, AF/RF Osc./Amp, TV Vid., TO-92	5
SK3893	NPN Si Transistor, Audio Amp/Sw., TO-220	5
SK3998	Si, Fast Recov. SCR, 1500V, 1A, DO-15	5
SK9091	Si, Diode, 200V, 200mA, DO-35	5
SK9118	NPN Si Transistor, Vert. Defl./AF amp, TO-220	5
SK9229	NPN Si Transistor, Gen. Purpose, Amp/Sw., TO-92	5
SK9422	NPN Si Trans., w/Damper Diode, Hor., Def., TO-3P	5
SK9487	NPN Si Trans., w/Damper Diode, Hor., Def., TO-3P	5

46F8606 Type SK86NEW1. Kit #1. **Each** **284.44**

Combination Kit #2 consists of the second most-requested 25 devices. Selection of transistors, diodes, rectifiers, and SCRs. The 125 pieces in this kit replaces 19,029 devices.

Type	Description	Qty.
SK6V2	Zener Diode, 6.2V ±5%, 1W	5
SK3017B	Si, Axial Lead Rectifier, 600V, 1A, Glass	5
SK3020	NPN Si Transistor, AF Med. Pwr., TO-39	5
SK3021	NPN Si Transistor, AF Pwr., TO-66	5
SK3044	NPN Si Transistor, High Voltage, TO-39	5
SK3083	PNP Si Transistor, AF/Deflection, TO-220	5
SK3122	NPN Si Transistor, AF/RF Med. Pow., Plastic	5
SK3180	NPN Si Darlington, High Power, TO-220	5
SK3190	NPN Si Transistor, AF High Power, TO-126	5
SK3191	PNP Si Transistor, AF High Power, TO-126	5
SK3201	NPN Si Transistor, AF TV Video/Chroma amp, TO-220	5
SK3245	NPN Si Transistor, AF Preamp., TO-92	5
SK3274	PNP Si Transistor, AF Out/Power Sw., TO-220	5
SK3275	NPN Si Transistor, FM AF Driver/Output, TO-220	5
SK3433	NPN Si Transistor, AF High Voltage, TO-92	5
SK3441	PNP Si Transistor, Med. Power, TO-220	5
SK3452	NPN Si Transistor, RF, AM/FM/RF, TV VHF/RF/IF, TO-92	5
SK3639	Si, Axial Lead Rectifier, 200V, 6-22 A	5
SK3747	NPN Si Transistor, AF High Power, TO-126	5
SK3896	NPN Si Darlington, Power Amp, TO-220	5
SK3929	NPN Si Transistor, Med. Pwr., Drvr./Output, TO-220	5
SK9000	Si Fast Recov Rectifier, 600V, 1A, DO-15	5
SK9041	NPN Si Transistor, AF Driver, TO-126	5
SK9119	NPN Si Transistor, W/Damper Diode, Hor. Defl., TO-3	5
SK9455A	NPN Si Darlington, AF AM, TO-92	5

46F8607 Type SK86NEW2. Kit #2. **Each** **330.76**

Zener Diode Kit 78 most-requested zener diodes in a variety of voltage and wattage ratings. All have a ±5% tolerance. The 180 pieces in this kit replace 21,122 devices.

87F873 Type SK86NEW6. Zener Diode Kit. **Each** **287.50**

SCR/TRIACs Kit 21 consist of the most-requested SCRs and TRIACs in a variety of package styles, including TO-5, TO-15, TO-20, TO-92 and TO-220. The 105 pieces in this kit replace 1,648 devices.

Type	Description	Qty.
3503	SCR, 600V, 7A, TO-5	5
3506	TRIACS, 400V, 2.5A, TO-5	5
3523	DIAC, Trigger for SCR/TRIAC, DO-15	5
3533	TRIAC, 400V, 16A, TO-220	5
3597	SCR, 200V, Sensitive Gate, TO-20	5
3598	SCR, 400V, Sensitive Gate, TO-20	5
3627	SCR, 200V, 0.8A, Sensitive Gate, TO-92	5
3638	SCR, 100V, 0.8A, Sensitive Gate, TO-92	5
3666	TRIAC, 400V, 4A, TO-126	5
3683	SCR, 200V, 5A, TO-66	5
3950	SCR, 30V, 0.8A, Sensitive Gate, TO-92	5
5237	SCR, 400V, 10A, Sensitive Gate, TO-220	5
6708	TRIAC, 400V, 8A, TO-220	5
9292	SCR, 200V, 10A, TO-220	5
9293	SCR, 400V, 10A, TO-220	5

87F872 Type SK86NEW5. SCR/TRIAC Kit. **Each** **300.95**

Transistor Kit 26 consists of the most-requested transistors in a variety of package styles, including TO-1, TO-3, TO-92, and TO-220. The 104 pieces in this kit replace 35,684 devices.

Type	Description	Qty.
SK3004	PNP Ge Transistor, AF Low Power, TO-1	5
SK3009	PNP Ge Transistor, AF High Power, TO-3	5
SK3027	NPN Si Transistor, AF High Power, TO-39	3
SK3054	NPN Si Transistor, AF Deflection, TO-220	3
SK3114A	PNP Si Transistor, AF Power Amp, TO-92	3
SK3115	NPN Si Transistor, Deflection, TO-3	3
SK3124A	NPN Si Transistor, AF Power, TO-92	5
SK3180	NPN Si Darlington, High Power, TO-220	2
SK3190	NPN Si Transistor, AF High Power, TO-126	2
SK3220	NPN Si Transistor, Deflection, AF, TO-220	3
SK3245	NPN Si Transistor, AF Preamp., TO-92	2
SK3274	PNP Si Transistor, AF Out/Power Swit., TO-220	2
SK3440	NPN Si Transistor, AF Med. Power, TO-220	3
SK3441	PNP Si Transistor, AF Med. Power, TO-220	3
SK3444	NPN Si Trans., RF/AF Osc./Amp, TV Video, TO-92	10
SK3466	PNP Si Trans., AF Med. Power, Pre-Amp Dr. TO-92	10
SK3710	NPN Si Transistor, Deflection, TO-3	2
SK3854	NPN Si Trans., RF/AF Out/Amp, TV Video, TO-92	10

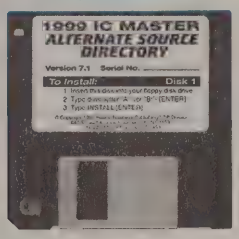
PRINTED AND ELECTRONIC REFERENCE BOOKS

1999 IC MASTER CATALOG

IC Master 3-volume set features Internet access to the most current IC Master database, including pinout and package data for over 95,000 devices, with on-line search capability and direct links to manufacturers' home pages on the World Wide Web at http://icmaster.com. It's a functional and numerical search guide to 100,000 current ICs and related products that are commercially available today. It also includes over 13,000 new device listings and provides device data, organized in parametric search format, to help locate the precise IC to solve design problems.

48F2161 Type IC MASTER 99BK Set of 3. **Each** **195.00**
(4634) (ne08810)

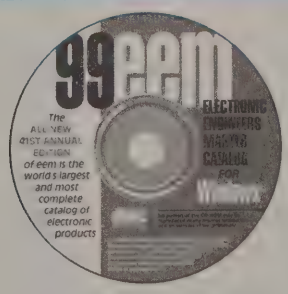
1999 IC MASTER ALTERNATE SOURCE DIRECTORY ON DISKETTE



Designed for users who do frequent cross-referencing and second-source searching. Its menu-driven industry-wide listing of 120,000 current and discontinued pin-for-pin equivalents, including the complete NTE and ECG IC parts list, can be customized by adding and deleting device numbers and by adding comments to device listings. Comes with complete vendor contact information on 3.5" diskette. For use with IBM® XT and compatibles. Hard drive required. NOTE: Device specifications and data sheets are not included in the ASD on diskette, but they can be found in the IC Master Catalog, *ordered separately on this page*, and the IC Master CD-ROM, *ordered separately on this page.*

48F2163 Type IC MASTER 99ASD **Each**..... **190.00**
(4635) (ne09426)

1999 EEM CD-ROM FOR WINDOWS®

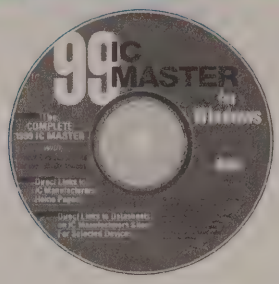


99 eem
ELECTRONIC ENGINEERS MASTER CATALOG FOR Windows
The ALL NEW 41ST ANNUAL EDITION of eem is the world's largest and most complete catalog of electronic products

The 1999 Electronic Engineers Master CD-ROM for Windows® is a powerful search tool that makes data retrieval fast and efficient. A single compact disk provides electronic direct access to all the product information in the EEM database. Search by product or manufacturer. Access to 4,300 product catalog data pages from over 1,000 manufacturers. The CD can launch your web browser for direct access to advertisers' internet home pages. The CD includes the complete EEM Manufacturers and Sales Offices Directory. Runs on 386 or higher computers. Hard drive required.

48F2165 Type EEM 99 CD ROM **Each**..... **99.00**
(4623) (ne08087)

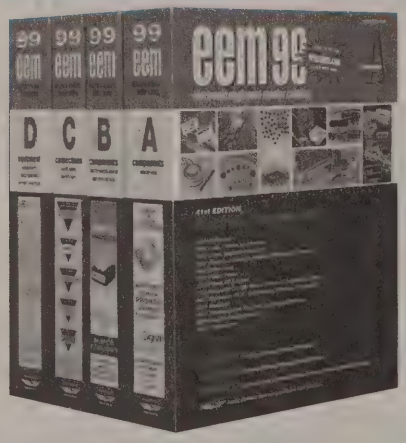
1999 IC MASTER CD-ROM FOR WINDOWS®



The 1999 IC Master CD-ROM for Windows® features true parametric/specification search capability. Users can search on values or on multiple parameters. Search results can be sorted by multiple parameters as well. Includes pinout and package data for over 90,000 devices. The web-interactive CD has links to application notes and selected data sheets. Users also have ability to access the most current IC Master database with on-line search capability and direct links to manufacturers' home pages on the Internet at http://icmaster.com. The expanded IC Master CD-ROM is the entire IC Master database with specifications on over 130,000 current and discontinued devices, on a single compact disk. It includes the Alternate Source Directory with NTE and ECG IC parts, manufacturer supplied data pages, the complete IC Master Manufacturers and Distributors Directory, and the entire IC Master Directory of IC Manufacturers' Data Pages. The CD-ROM permits device selection by flexible category search and key word search. It features a redesigned and simplified interface to speed searches. Requires PC 486 or higher, 16MB RAM and Windows95 or NT. Multiuser network version also available; *contact your local Newark sales office for details.*

48F2162 Type IC MASTER 99CD **Each**..... **195.00**
(4633) (ne08809)

1999 EEM/ELECTRONIC ENGINEERS MASTER CATALOG



The EEM/Electronic Engineers Master is in 4 volumes:

- **Volume A: Electronic Components**
- **Volume B: Electronic, Electro-Optical, and Military Components**
- **Volume C: Interconnections, Packaging, and Hardware**
- **Volume D: Power Sources, Instrumentation, Computer Products, and Equipment**
- **Volumes E, F, G: Measuring and Control Products from Omega Engineering**

The EEM/Electronic Engineers Master is a comprehensive catalog of all electronic products organized in four separate volumes, each dedicated to a specific class of electronic products. The Product Index, a comprehensive listing of electronic products by their generic name, cross references each product to the manufacturer and over 4,300 related product catalog data pages that are arranged in 63 EEM Product Sections. Includes sections on LAN products, terminal blocks, and test accessories. Data pages are supported by 40 Product Selection Guides that give the latest selection parameters for quick and easy product searching and by numerous pages of codes, charts, and miniglossaries. A complete Manufacturers and Sales Offices Directory lists more than 5,300 manufacturers with hundreds of new vendors and thousands of updates.

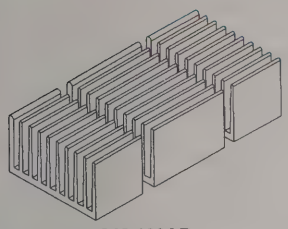
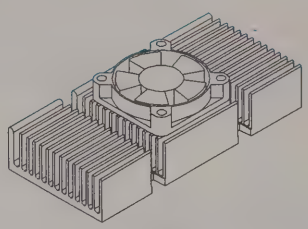
HEAT SINKS

848 AND 859 SERIES HEAT SINKS FOR INTEL PENTIUM II™

NEW



848-130AB



859-124D

848 series and **859 series** heatsinks are for Intel Pentium II™ microprocessors up to 450MHz. Providing optimal thermal performance for ATX/NLX standard PC chassis formats. *Robust spring clip available separately below.*

Stock No.	Type	Number of Pins	1-4	5-9	10-24
48F4326	848-130ABS5	10	14.35	13.18	12.70

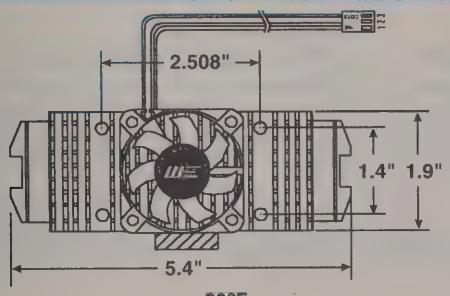
48F4329 Type 829-SC Spring Clip. **Each** **0.52**
(34775) (ne34775)

866 SERIES HEAT SINKS FOR THE INTEL CELERON™

NEW



866F

866 series heat sinks are for the Intel Celeron™ microprocessor. **Type 866H** convoluted fin sinks and **type 866F** meet Intel's thermal specifications, and exceed shock and vibration test requirements. *Order robust spring clip separately below.*

Stock No.	Type	Height	1-24	25-49	50-99

879 SERIES AND 709 SERIES FAN/HEAT SINK SOCKETCLIP™ ASSEMBLIES FOR INTEL P6.0 PROCESSORS

Designed to meet the stringent performance requirements expected for the Intel P6.0 high-performance processors. Include pre-installed four-point captivated SocketClip™ for attachment to ZIF Socket 8 and 387 SPGA LIF sockets. Fit Pentium™, Pentium MMX™, AMD K6™, AMD K6-2™, Cyrix 6x86™, and Media GX™.

879 SERIES FAN/HEAT SINKS

Thermal performance: Θ_{SA} = 0.62°C/W. (Θ_{CA} = 0.75°C/W, with use of **Type 120** thermal compound; *available separately on page 951.*) Height: 1.31″ max. Require 0.40″ minimum inlet air headspace above fansink assembly. Weight: 0.37 lbs. (170g).

SOCKETCLIP™ HEAT SINKS FOR INTEL PENTIUM™

899 series for Intel Pentium™ 90 and 100MHz requires mating ZIF socket 5 (Newark stock numbers 92F5404, 92F5405, and 97F8589). **779 series** designed for forced convection applications. Include pre-installed four-point captivated SocketClip™ for attachment to ZIF Socket 8 and 387 SPGA LIF sockets. Also include channels for chip capacitors on the top ceramic surface of the P6.0 processor.

698/798 SERIES PIN FIN HEAT SINKS

698 series is for Intel Pentium™ processors (60-, 66 MHz) and Hewlett Packard PA and MIPS R4000/R4400 RISC processors. Yield forced convection thermal resistance (θ_{SA}) values low as 1.4°C/W (100LFM) for desktop and 0.75°C/W (400 LFM) for multiprocessor server applications. **798 series** same, but for Intel Pentium™ 90 and 100MHz processors. Base dimensions: 2.100 x 1.920″ (53.3 x 48.7).

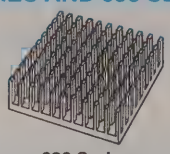
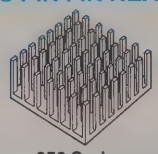
628 SERIES AND 658 SERIES PIN FIN HEAT SINKS



628 Series



658 Series

628 series for adhesive attachment to 17x17 ceramic PGAs. These omnidirectional pin fin heat sinks are for Intel 80486 microprocessors, AMD Am29K microprocessors, and TI TMS320C40. Black anodized finish. **658 series** designed for heat dissipation for Olin Corporation MQuad™ aluminum Quad flat packs and Amkor Power Quad thermally enhanced PQFPs. Pre-applied, pressure-sensitive adhesive versions available; *contact your local Newark sales office.*

DELTEM™ & DELTEM™ II COMPOSITE HEAT SINKS

Type D10850-40 is specifically designed for the Intel 80486SX microprocessor (196-lead PQFP), i960KA embedded controller (196 PQFP), and Cyrix486 microprocessor. **Type D10650-40** is for the Intel 80386SX microprocessor (100-lead PQFP) and Intel 82490/82491 cache RAM. **Type D20850-40T1** Deltem™ II heat sink is designed for ASICs, the Intel i960KA embedded controller, and Intel's 486DX2 microprocessor. Works with 168-208 pin PQFPs, PowerQuad™ 2, and PBGAs and CBGAs.

Stock No.	Type	Description	Dimension	1-49

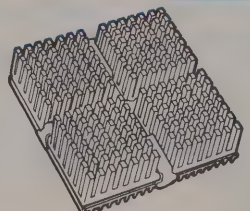
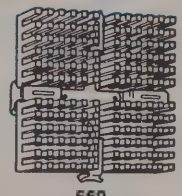
669 SERIES AND 649 SERIES SPIDERCLIP™ HEAT SINK ASSEMBLIES



649



669
17 x 17 PGA

- **For Motorola 68040, 68060**
- **For Intel 80486DX2, Intel 486DX4**

669 series for Intel 80486DX/DX2™ and i960CA/CF™. No thermal compound or interface material is required in typical PC and server applications. Black anodized except **669-32AG** gold iridite. *Order* **type 163-IT** *assembly tool separately; contact your local Newark sales office.* **Type 649-33AB** designed for attachment to Motorola MC68040 microprocessor.

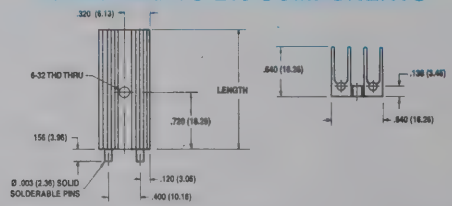
BOARD LEVEL HEAT SINKS FOR TO-220 AND TO-218 COMPONENTS



Vertical mount, slim profile, unidirectional fin heat sinks offer two assembly alternatives for vertically mounting TO-220 and TO-218 components. Available with or without wave solderable pins on 0.40″ (10.2) centers. Ideal for a variety of applications where quick assembly and space are considerations. Footprint: 0.640″ x 0.640″ (16.26 x 16.26). Material: black anodized aluminum.

FRIENDLY, QUALITY SERVICE FROM YOUR LOCAL NEWARK SALES OFFICE.

HEAT SINKS FOR "HALF BRICK" DC/DC CONVERTERS

Standard mounting hole pattern allows mating with AT&T **JC/JW/BF series** and Computer Products **BXB series** power modules with output power ratings of 30 to 150 watts. Aluminum extruded fin construction keeps DC/DC converter modules cool in both forced and natural convection applications. Vertical and horizontal fin configurations are available in a variety of fin heights. Integral thermal interface pad option eliminates need to order and install pad separately. Material: black anodized aluminum. For Deltalink IV thermal interface material, add **S4 suffix** to type number when ordering.

910 SERIES FAN/HEAT SINKS FOR MPUs AND ASICs

910 series fan/heat sinks for AMD AM486™ DX4, IntelDX4™, Intel™ Pentium™ P54C combine an integral 40mm ball bearing 12VDC or 5VDC axial fan with an effective unidirectional heat sink and factory preapplied pressure-sensitive adhesive. No tools required for installation. Provides direct impingement processor cooling in areas where there is limited or no system-level airflow. Base dimensions: 1.70 x 1.79″. Black anodize finish.

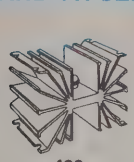
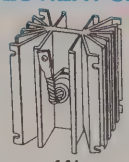
433 AND 441 SERIES HEAT SINKS



433



441

Type 433 high-performance heat sink uses minimum space for required cooling. **Type 441** high density heat sink for mounting on vertical surface (no brackets required) for better natural convection. Black anodized finish aluminum alloy. Both are blank (no semi mounting holes).

Stock No.	Type	Thermal Resistance	H x W x D	1-4	5-9	10-24

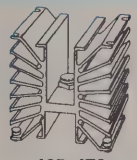
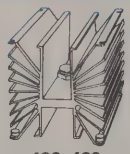
(4469) (de00946)

HEAT SINKS FOR HIGH-POWER SCR/RECTIFIERS



465, 476



486, 489

Type 465 for 1.06″ hex style devices. **Type 476** allows 1.25″ hex style devices to be mounted. **Type 489** is 3″ longer than **Type 486,** both mount hex SCRs up to 1.75″ and utilize decreased conduction path length between semis and fin surface area for maximum cooling of devices. Black anodized finish aluminum alloy. All are blank (no semi mounting holes).

Stock No.	Type	H x W x D	1-4	5-9	10-24
58F420	465-K	5.00 x 4.00 x 4.00″	**31.55**	**28.96**	**26.16**

58F403 Type 109 Mounting Bracket. **Each** **27.62**

(4471) (de00948)

301, 302 AND 303 SERIES HEAT SINKS FOR STUD-MOUNTED SEMICONDUCTORS

Radial fins and large surface area provide effective natural convection cooling per unit volume. All 3 types have tapped hole in one end for mounting semi. Black anodized finish aluminum alloy. Type suffixes: **M** = 10-32 tapped, 0.625″ deep; **N** = ¼-28 tapped, 0.625″ deep.

Stock No.	Type	H x W x D	1-24	25-49	50-99

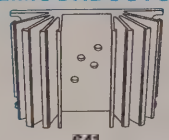
(4467) (de00941)

621, 623 AND 641 SERIES SINGLE-CHANNEL HEAT SINKS FOR METAL-CASED SEMICONDUCTORS

621, 623



641

Replace marginal flat plate dissipators. Accept most transistor case styles. **641 series** has fin design that provides large surface area for maximum natural convection. Black anodize finish aluminum alloy. Type suffixes: **A** = 1 TO-3 semi mounting hole; **K** = (blank, no holes).

Stock No.	Type	H x W x D	1-24	25-49	50-99

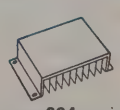
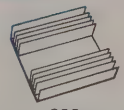
(4588) (ne04083)

394/395/396 SERIES LOW-PROFILE HEAT SINKS FOR POWER MODULES



394

395



396

High-performance extruded fin heat sinks designed to provide maximum cooling for unit volume. Width: 5.000″ (127.0). **394 series** are flat back designs, while the **395** and **396 series** are open-channel designs which permit mounting of standard semiconductor module styles.

HEAT SINKS

291 SERIES CLIP-ON HEAT SINKS

For cooling plastic semiconductors in case styles TO-202, TO-220. **Type 291-C2-36AB** has clip with tabs for TO-220; **type 291-H-36AB** has 0.140″ diameter mounting hole only. Black anodized aluminum.

Stock No.	Type	1-49	50-99	100-499

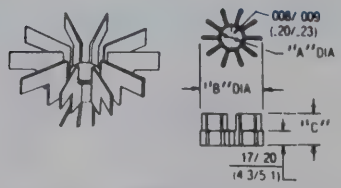
58F156	291-H-36AB	0.53	0.48	0.45

(4474) (de01004)

200 SERIES SNAP-ON HEAT SINKS

201, 202, 204, 205, 211

203, 207, 213



209, 215

Friction-mount heat sinks allow easy installation/removal of semis. *Order installation tools separately below.* Spring-like action assures excellent thermal contact between heat sink and semi case. Fin design permits horizontal or vertical positioning of semi axis. Can mount transistor after wave soldering without danger of flux entrapment. Black Ebonol C finish beryllium copper. **Sold in multiples of 5.**

635, 690 SERIES HEAT SINKS

635

690

635 series space-saver heat sinks conform to shape of TO-3 devices in high-density applications. Interchangeable with other TO-3 heat sinks. Aluminum construction with black anodize finish. **690 series** circuit-board heat sinks are aluminum alloy with black anodize finish in mounting patterns for TO-3 or TO-66 JEDEC packages. **Sold in multiples of 10.**

ECONOMY HEAT SINKS

270, 271, 272

273

274

270 and **272 series** heat sinks for plastic-case TO-220 devices. **272 series** accepts two TO-220 devices. Provide two-sided cooling by adding **271 series** heat sink to **270** or **272** heat sink on top of TO-220 device. **273** and **274 series** heat sinks for plastic-case power SCRs and transistors. Black anodized finish aluminum. Available with wave-solderable tabs.

150 SERIES THERMALLY CONDUCTIVE ADHESIVES

Delta Bond 152 thermally bonds components to chassis or heat sinks. Includes resin and hardener. **Delta Bond 155** thixotropic paste offers high heat transfer, low shrinkage and a coefficient of thermal expansion comparable to copper and aluminum. Includes resin and hardener. **Delta Bond 156** is a modified acrylic adhesive for permanent mounting of components where heat must be effectively transmitted. **Type 156-K** comes in a kit with hardener and syringe.

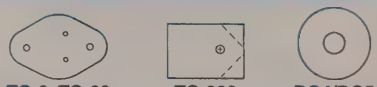
175 SERIES KAPTON® REINFORCED INSULATORS



TO-3, TO-66 TO-220 DO4/DO5

Interface transistors to heat sinks and eliminate thermal grease, burr cut-through, and cracked or torn insulators. 3-layer construction, Kapton® film sealed between silicone rubber layers. Dielectric strength: 6000V. Thickness: .006″±.001″. Continuous use temperature range –60°C to +200°C.

HEAT SINKS

TYPES 2225B, 2226B, AND 2227B HEAT SINKS

2225B/2227B 2226B

Provide cooling for TO-5 devices. Thermal resistance: **Type 2225B**, 46.0°C/W; **Type 2226B**, 57.5°C/W; **Type 2227B**, 21.0°C/W.

Stock No.	Type	Height	Width	1-24	25-49	50-99

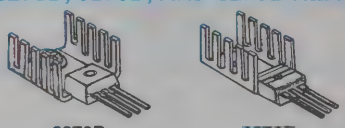
(34772) (ne34772)

TYPES 6273B, 6278B, AND 6279B HEAT SINKS



6273B 6278B

Low-profile cooling for TO-202 devices. Minimal heat sink space requirement. For use on PC boards with 0.50″ centering between boards. All have black anodized finish per MIL-A-8625, type II. **Sold in multiples of 10.**

Stock No.	Type	Height	Width	10-24	25-49	50-99

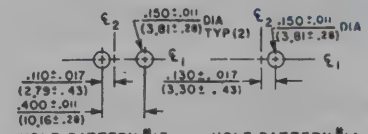
(4489) (de01108)

TYPES 6106B AND 6107B HEAT SINKS

6107B-14

6106B



Economy heat sinks for TO-220 plastic power transistors and SCRs. Designed for PC board applications with 0.15″ diameter hole. Mount vertically or horizontally. Black anodized finish per MIL-A-8625, type II. Type number **suffixes -13** and **-14** refer to hole patterns. **Sold in multiples of 10.**

Stock No.	Type	Height	Width	10-24	25-49	50-99

TYPES 6208B, 6013B-6016B, AND 6002B-2 HEAT SINKS

6208B 6013B 6002B-2

Type 6208B "Hat" for TO-3 used with heat sink where extra cooling needed or as stand-alone unit. **Types 6013B-6016B** space saver cooling for TO-3 cases in high density application. **Type 6002B-2** high performance heat sink for TO-3. Slanted fins create turbulence for high thermal efficiency. **Sold in multiples of 10.**

Stock No.	Type	Height	Width	10-24	25-49	50-99

TYPES 6021PB, 6098B, AND 6025B HEAT SINKS

6021PB 6098B 6025B, 6025B-TT

Type 6021PB stake-on wave solderable tab heat sink for TO-220. **Type 6098B** solderable-pin heat sink designed for TO-202, TO-220 plastic power transistors. **Types 6025B** and **6025B-TT** are vertical mount heat sinks for TO-220. **Type 6025B** integral, scored mounting tab may be bent for PC board retention. **Type 6025B-TT** tinned-tab may be soldered directly into PC board. Black anodized finish per MIL-A-8625, type II. **Sold in multiples of 10.**

Stock No.	Type	Height	Width	10-24	25-49	50-99

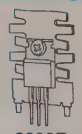
HEAT SINK ACCESSORIES

HEAT SINKS FOR TO-220 DEVICES



6022B

Easily installed heat sinks for TO-220 devices. **Types 6021B** and **6022B** feature pre-anodized black material. **Types 6078B**, **6079B**, and **6099B** feature black anodized finish. **Type 6030B-TT** features black, enamel finish.

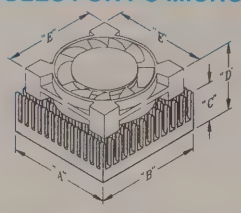
COOLING MODULES FOR PC MICROPROCESSORS



- **Heat Sink with Cooling Fan Attached**

Cools Intel i486, i960, and Pentium® Pro, AMD AM29000, and Motorola 68040. Significantly reduces volumetric space with direct impingement down airflow compared to natural convection. Thermal performance approaching recirculated liquid. Typical DC brushless, ball-bearing fan has life expectancy of 50,000 hours. Type numbers with **suffix "2S"** are 12 volt fans and with **suffix "5S"** are 5-volt fans.

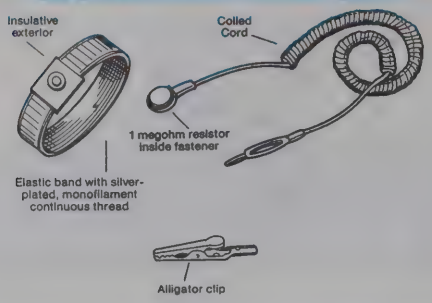
NEWARK STOCKS MORE PRODUCTS THAN ANY OTHER ELECTRONICS DISTRIBUTOR!

3M BRAND WRIST STRAP SETS



Wrist straps dissipate static from personnel before it can damage devices being handled. Feature a band made of silver-plated, monofilament, continuous thread woven together with elastic nylon to assure full conductivity, comfort, and reliability. Provide rapid and continuous drain of static charge. 1-megohm resistor built into strap for safety. Set includes 1 wrist band, 1 cord, 1 alligator clip. UL listed. Replacement wrist straps and cords are available; *order separately on this page.*

4600 SERIES WRIST STRAPS AND GROUND CORDS

NEW

Wrist straps ground static charge from personnel before static sensitive devices/ printed circuit boards can be damaged. Features an insulative thermoplastic band with an integrally molded conductive interior insert providing full conductivity, comfort, and reliability; easy-on/easy-off adjustable zipper-style latching mechanism. **Sold individually, except type 4659, which is sold in packages of 5.**

3M BRAND DISPOSABLE WRIST STRAP

Type 2209 disposable wrist straps are ideally suited for shipping with valuable products to ensure protection at the receiving end; or in the plant environment for short-term usage by visitors and others who don't need the durability of a reusable strap. Hypo-allergenic adhesive provides 360° contact with skin to minimize skin-to-band resistance. Adhesive-backed copper foil at other end adheres to any convenient electrical ground. 1-megohm resistor contained in the black volume-conductive layer. UL listed.

Stock No.	Type	1-9	10-24

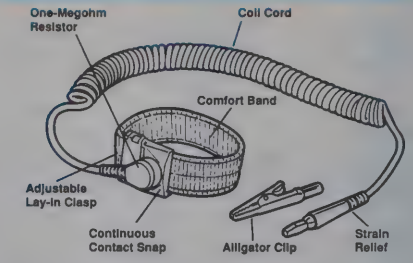
(4662) (ne52032)

3M ADJUSTABLE WRIST STRAP SETS



Type 2272 adjustable wrist strap set includes 5′ cord (extendable to 6′), monofilament band, and alligator clip. One-megohm resistor and molded-in strain relief. Average cord flex life: 350K. Blue-and-white band. **Type 2259** adjustable lay-in wrist strap set includes 4 to 9″ comfort wrist band, 5′ working length coil grounding cord and alligator clip. Silver plated, continuous monofilament threads establish a 360° contact zone and a reliable path to ground. Cord meets EOS/ESD standards. One-megohm resistor. Average cord flex life: 600K. Green band.

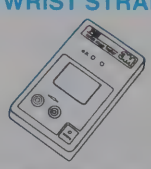
TYPE 745 WRIST STRAP TESTER



Provides periodic testing of wrist straps while the strap is being worn. Accepts both standard and shrouded (European) banana plugs. PASS/FAIL LED indicates if strap resistance is within acceptable limits, (7509K ohms to 10 megohms). Operates on one 9-volt battery (included). Complete with wall mounting kit, cover for wrist strap, plug-in jack and instructions. 6.25 x 3.75″. This unit is certified and calibrated.

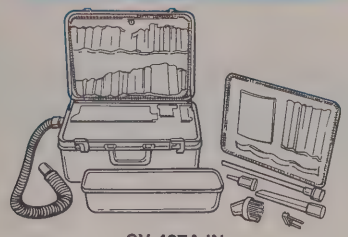
FIELD SERVICE KITS AND STATIC CONTROL PRODUCTS

ELECTRONICS VACUUMS



SV-497AJN

Constructed of a plastic with a resistivity that dissipates electrostatic buildup, yet high enough to limit current to levels of 220V or less. Motors are continuous-duty rated with one sealed ball bearing and one sleeve bearing lubricated for life. Comes complete with a type 2 toner/dirt filter, stretch hose, wand, crevice tool and brush, needle nozzle and dusting brush for toner and dust particles. Easy-to-service, replaceable 1 HP motor. 115VAC, 50/60Hz, 5.0 amps. UL listed, CSA certified. 3-year warranty. **Type SV-497AJM** is encased in a high-impact case, has a detachable power cord for effortless storage, and measures 17.8L x 7.75W x 9.25"H; weighs 9⅞ lb. **Type SV-497AJN** offers ample storage for service tools and cleaning supplies; two tool pallets, a removable tray to store extra tools, and storage to place paperwork, vacuum tools, and power cord. 18.25L x 14.25W x 9.87"H.

Stock No.	Type	Description	Each

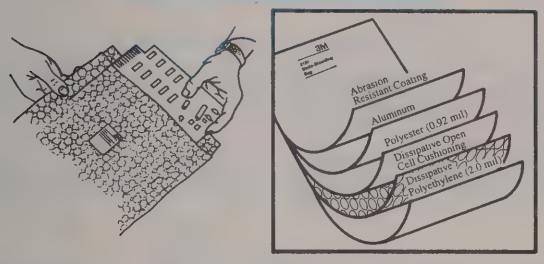
(4540) (de51212)

METAL-OUT CUSHIONED REUSABLE STATIC-SHIELDING BAGS



For physical protection as well as static shielding. Cost-effective and convenient, the five-layer construction protects against direct discharge, triboelectric charge and static fields. The inside layer (closest to components) is a smooth, static-dissipative polyethylene liner that minimizes snagging of pins or sharp edges during insertion and removal. Open-cell cushioning enhances shock protection. Metal-out construction makes bags easily testable and reusable. Thickness: 125 mil. Strength tested to ASTM D882 (tensile), FTMS 101 (puncture) and MIL-B-81705 (seal) standards. **Sold in package of 100.**

(4608) (ne07233)

METAL-IN STATIC-SHIELDING BAGS

Economical static control bags have an aluminum shielding layer bonded between two layers of static-dissipative film, one 0.48 mil polyester and the other 2.5 mil polyethylene. Designed for less demanding applications in which reuse and high durability are not prime considerations. Can be tested and are heat sealable. **Type 1910** bags offer a dual-track resealable closure for easy opening/closing. Meet requirements in MIL-STD-1686A par. 5.10, MIL-HDBK-263A par. 5.10, and EIA-541 specifications for static shielding and dissipative packaging. Other bag sizes available; *contact your local Newark sales office.* **Sold in packages of 100.**

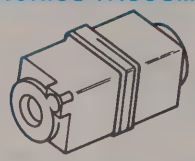
ELECTRONICS VACUUM FILTER

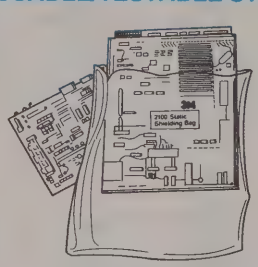


Type 1 filter traps extremely fine particles that can get into highly sensitive equipment such as color copiers and laser printers; it has a thinner, more concentrated weave. Type 2 filter traps unwanted toner from copiers and laser printers; ideal for cleaning typewriters and data processing equipment.

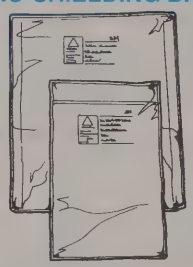
Stock No.	Type	Description	Each
50F948	SV-SPF1	Fine Particle	24.69
50F949	SV-MPF2	Medium Particle	16.29

(4544) (ne51214)

REUSABLE/TESTABLE STATIC-SHIELDING BAGS



2100R



2110R

High-performance static-control bags designed to protect the most static-sensitive products against electrostatic fields, direct discharge and triboelectric charges, as well as contaminants that affect sensitive connector surfaces and circuit traces. Produced with a proprietary "metal" out construction in which the shielding layer is very near the exterior surface. A thin, abrasion-resistant coating protects this metal surface from scratches, but still permits measurement of electrical continuity with common volt-ohmmeters for easy verification of shielding performance prior to reuse. The interior features a volume-loaded, amine-free antistat that limits triboelectric charging of parts as they slide around inside the bag. "Volume loaded" means that the antistat is compounded into the polyethylene prior to extrusion rather than topically applied to the finished film. Thickness: 3.5 mil. Tensile strength: 30 lbs./in. width. Can be quickly and easily tested with **type 705** bag check tester *ordered separately; contact your local Newark sales office.* **Type 2110R** bags offer an anti-static reclosable zipper. Meet requirements in MIL-STD-1686A par. 5.10, MIL-HDBK-263A par. 5.10, and EIA-541 specifications for static and dissipative packaging. Passed ASTM E595 out-gassing test based on NASA spec. SP-R-0022A. The **2100R** and **2110R series** bags offer an aluminum shielding layer with increased seam strength. Other bag sizes available; *contact your local Newark sales office.* **Sold in packages of 100.**

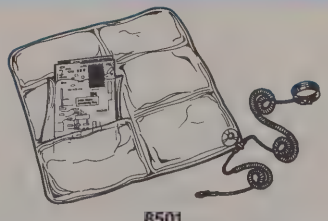
PORTABLE FIELD SERVICE GROUNDING KITS



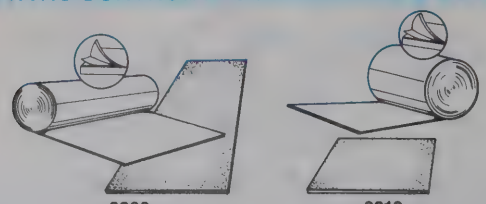
8501

Portable grounding kits provide all the basic items needed to create a static-safe work environment for field service work. All kits contain adjustable wrist band, ground cords, and a static-dissipative work surface.

Stock No.	Type	Description	Each
46F7444	8501	Portable, compact	61.26
95F2864	8505	Standard version	64.08
91F2907	8506	Economy version	44.60

(4660) (ne51202)

STATIC CONTROL FLOOR AND TABLE MATS



8200 8210

Rubber static control mats feature a 2-layer construction consisting of a top layer of static-dissipative rubber laminated to a bottom layer of conductive rubber. The synthetic rubber work surface offers excellent resistance to oil, grease, and most common solvents, plus a higher degree of resistance to heat and hot solder than vinyl.

RUBBER STATIC CONTROL TABLE MATS

Each table mat includes 1 **type 3048** wrist strap/table mat grounding system and 2 **type 3034** female snap fasteners (installed).

Stock No.	Type	Size	Color	1-4
66F9500	8810	2 × 4′	Gray	91.42
66F9501	8811	2 × 4′	Blue	91.42
66F9502	8820	2.5 × 4′	Gray	114.25
66F9503	8821	2.5 × 4′	Blue	114.25

RUBBER STATIC CONTROL TABLE RUNNERS

Each table runner includes 2 **type 3040** 15′ grounding cords and 5 **type 3034** female snap fasteners (not installed).

Stock No.	Type	Size	Color	1-4
66F9504	8840	2 × 24′	Gray	417.43
66F9505	8841	2 × 24′	Blue	417.43
66F9506	8850	2.5 × 24′	Gray	571.19
66F9507	8851	2.5 × 24′	Blue	571.19

RUBBER STATIC CONTROL FLOOR MATS

Each floor mat includes 1 **type 3040** 15′ grounding cord and 2 **type 3034** female snap fasteners (installed).

Stock No.	Type	Size	Color	1-4
66F9508	8870	4 × 6′	Gray	215.82
66F9509	8871	4 × 6′	Blue	215.82

Vinyl static control mats feature a 3-layer construction. The top layer is semiconductive vinyl, with a resistivity sufficiently low to discharge static-laden conductors while preventing the shorting of PC boards laid on the mat. The second layer is a highly conductive scrim, which provides the main discharge path to ground. The third layer is nonconductive foam backing, which prevents the bypassing of the protective conductive layers.

VINYL STATIC CONTROL FLOOR MATS

Each 4 x 6′ floor mat includes 1 15′ ground cord and 2 female ground cord snap connectors (installed).

Stock No.	Type	Color	1-4
46F7456	8201	Brown	215.82
90F2065	8202	Beige	215.82
90F2067	8204	Blue	208.52
92F1289	8205	Granite	215.82

VINYL STATIC CONTROL TABLE MATS

Each 2 x 4′, 3-layer construction table mat includes 2 female snap fasteners (installed) and 1 **type 3048** wrist strap/table mat grounding system.

Stock No.	Type	Color	1-4
46F7457	8210	Gold	93.67
46F7458	8211	Brown	91.42
90F2068	8212	Beige	91.42

66F6107	8354	24 x 48″	Gray	245.29

(12427) (ne09847)

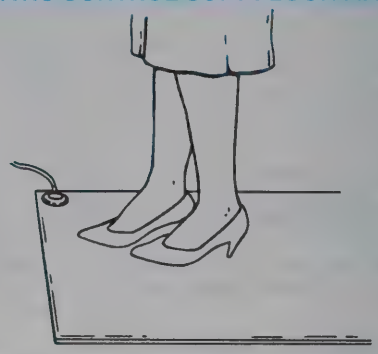
STATIC CONTROL ANTIFATIGUE MATS

NEW

Static control anti-fatigue mats have a smooth surface of black ½″ thick rubber bonded to a base of a highly resilient, insulative vinyl and rubber sponge, which provides cushioning and reduces stress on the spine and lower back. Features: Carbon loaded rubber material to improve product reliability, insulative sponge cushioning backing to provide for worker comfort, and beveled edges for safety. Mat size is 3′ x 5′. Surface to ground resistance is 2.5×10^4 to 1×10^7.

83F8474 Type 9500. **Each** **193.73**
(33073) (ne33073)

STATIC CONTROL SOFT FLOOR MATS



Feature a special cushioning layer to enhance comfort in areas where personnel stand to operate equipment. Consist of upper semiconductive vinyl layer followed by highly conductive scrim that provides instant discharge path to ground.

Stock No.	Type	Color	Size	1-4
90F2111	9111	Brown	36 x 48″ (0.9 x 1.2)	160.07
90F2112	9121	Brown	48 x 96″ (1.2 x 2.4)	412.80

(4548) (de51228)

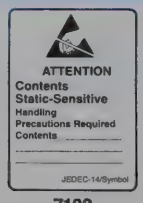
CLEANER FOR STATIC CONTROL MATS AND WORK SURFACES

Water-based, extra-strength formula removes stains, dirt, and grime from all types of static control surfaces without leaving residue and increasing contact resistance of surface. Also serves as an effective topical antistat. Ready to use full-strength; no rinsing required. Contains no chlorides or sulfides. Nonflammable. Fresh, clean scent. Supplied in 1-quart plastic trigger-spray bottles.

00Z1495 Type 8001 QT. **Each** **5.66**
(4498) (de02018)

STATIC AWARENESS LABELS

7101



7102

7201/7202

Designed to alert personnel handling bags, boxes or other carriers that the contents are static-sensitive. Help prevent improper handling of static-sensitive components. Available in single-use or reusable forms using the accepted industry static symbols: JEDEC-14 (Joint Electric Device Engineering Council) and MIL-STD-129M (**types 7201** and **7202**). **Sold in rolls of 500.**

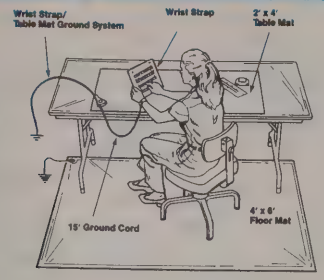
STATIC CONTROL WORKSTATION GROUNDING KITS



Each kit includes:

- **2′ x 4′ Table Mat**
- **4′ x 6′ Floor Mat**
- **Type 3040 15′ Ground Cord**
- **Type 2214 Adjustable Wrist Strap**
- **Type 3048 Wrist Strap/Table Mat Grounding System**

Workstation grounding kits provide the basic items needed to create a static-safe work environment for fabrication, assembly, storage, kitting, testing, and repair operations. **8020 series** kits floor and table mats are made from three-layer static-dissipative material to ensure resistance-to-ground measurement will be same from any point on surface of material. **8030 series** kits' table mat is made of softer three-layered, static-dissipative material, while floor mat is of more-rigid, durable, volume-conductive Velostat™ material. Table and floor mats connect to building ground using components included in kit. Up to 2 wrist straps connect to the wrist strap/table mat grounding system. Wrist strap features 1-megohm resistor to protect personnel from electrical shock through cord. Other colors available; *contact your local Newark sales office.*

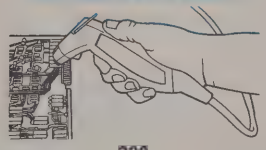
IONIZED AIR GUN



980

Type 980 lightweight, ergonomically designed air gun is an excellent tool for blowing particulate contamination off any surface. Releases a constantly balanced stream of compressed ionized air or gas that neutralizes static charges that attract particulates to a surface. Its unique ionization system is completely self-balancing; it maintains balance to within ±30V of 0V at a distance of 6″. Maintenance-free gun uses safe, efficient, low-voltage power allowing for the use of much lighter wiring. Includes a transformer that converts line power from a standard 120V outlet to 24V. *Order accessories separately below.* UL listed, CSA certified, CE approved.

Stock No.	Type	Description	1-9
91F2938	980	Ionized Air Gun	836.68
91F2935	980-F	Air Filter (Package of 3)	92.22

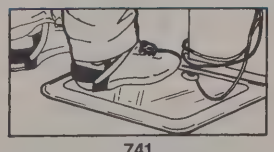
(10944) (ne09868)

WRIST STRAP AND FOOTWEAR TESTER

740



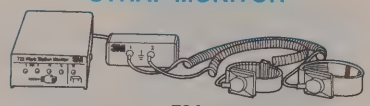
741

Type 740 wrist strap and footwear tester for daily testing of employees' static control wrist straps is simple to operate. Wall-mounted unit tests the wrist strap and cord while they are being worn and can also test each component independently to isolate an identified fault. Red and green LEDs give a clear "go" or "no go" indication. Can be used at four different resistance levels. A digital output allows the unit to interface with a computer, automatic door lock, alarm or other control devices. **Type 741** shoe electrode, *ordered separately,* connects to **type 740**, converting it into a footwear tester as well. By standing on the shoe electrode test plate, the user can check static control footwear, heel straps, etc.

Stock No.	Type	Description	1-4
16F1764	740	Wrist Strap and Footwear Tester	430.76
16F1765	741	Shoe Electrode	111.30

(4622) (ne08028)

TYPE 724 WORKSTATION MONITOR AND TYPE 725 WRIST STRAP MONITOR



724

Type 724 workstation monitor is designed to monitor the operation of the wrist strap grounding systems of 2 operators and to detect electrostatic discharge (ESD). System incudes monitor, remote dual conductor jack, AC adapter, ground cord, and monitor/table mat cord. **Type 725** is a small, compact battery-powered unit that is used to ground and monitor 1 dual conductor wrist strap. *Order dual conductor fabric or metal wrist straps separately below.*

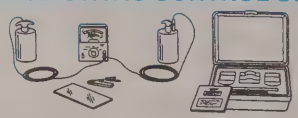
TEST KIT FOR STATIC CONTROL SURFACES



Type 701 kit for testing the effectiveness of static control working surfaces. Meg-ohmmeter has separate scales and settings for measuring surface-to-ground and surface-to-surface resistance at 10V and 100V, plus system continuity, and open circuit tests. Compatible with EOS/ESD standard S4.1-1990 and MIL-W-87893A. Kit also includes two 10′ test leads, two 5-lbs. test weights, bulldog clip, alligator clip, continuity test plate, 22.5V battery, 1.5V battery, instructions, and foam-lined carrying case.

HEEL GROUNDING ASSEMBLIES

Heel grounding assembly provides greater freedom of movement without compromising static control protection. Effectively grounds worker in contact with conductive flooring materials. **Type 2051** and **type 2051-M2** assemblies have a 1-megohm resistor; **type 2052** has a 240kΩ resistor. Both versions feature comfortable elastic ankle strap and a non-marking insulating interior. Simply place assembly over shoe, adjust strap for a comfortable fit and insert extra long contact ribbon between shoe and sock. Foot perspiration produces enough moisture to create electrical contact between conductive ribbon and the body. The intrinsic resistance in the heel strap does not increase shock hazard to wearer. Accommodates most shoes and boots.

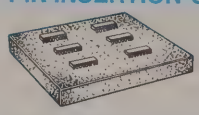
VELOSTAT™ PIN INSERTION-GRADE FOAM



2802 series crosslinked polyethylene electrically conductive foam is intrinsically conductive, noncorrosive, and ideal for long-term storage. Carbon is compounded directly into the polyethylene, providing permanent, uniform protection for ICs and DIPs. High conductivity and low puncture resistance permit insertion of delicate device leads safely. Size: 39 x 39″. **2803 series** has a density of approx. 3 lbs. and is primarily a cushioning foam, but can be used for pin insertion with sturdier device leads. Size: 24 x 36″.

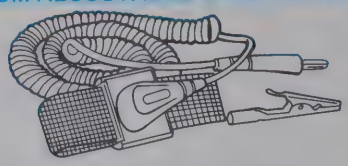
PREMIUM ADJUSTABLE WRIST STRAP SETS



- **Unique Patented Adjustment Design for Added Safety**
- **Extra-Wide, Soft Elastic Material for Superior Comfort**

Personnel grounding wrist straps help prevent static generation on the body. For added safety, unique patented adjustment design guards against exposed conductive "tails." Once adjusted and locked, the material will not slip or slough, making it safe for microelectronics. The band has silver-impregnated nylon knitted on the inside for superior conductivity. Nonallergenic stainless steel is used throughout. Built-in 1-megohm nonslip resistor provides safety for the user. Set includes one blue wrist strap, one cord, and one alligator clip. UL listed. *Order adjustable wrist band separately below.*

Stock No.	Type	Description	1-9
52N8347	8404-0018-ASQ	Set with 6′ Coil Cord	**17.55**
52N8350	8404-0021-ASQ	Set with 5′ Light Coil Cord	**18.58**

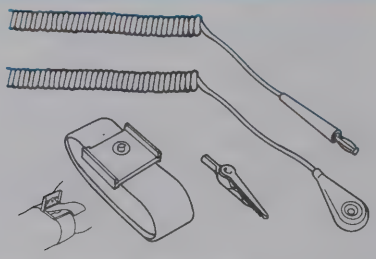
(18148) (ne10185)

STANDARD ADJUSTABLE WRIST STRAP SETS



Soft, comfortable elastic wrist band easily adjusts to fit any size wrist. Easy-to-open plastic clasp secures elastic material in place. Nonallergenic stainless steel plate provides excellent skin contact for superior grounding. 1-megohm resistor molded within snap assembly limits current to provide safety for the operator. Set includes one burgundy wrist strap, one 5′ coil cord, and one alligator clip. *Order adjustable wrist band separately below.*

(18149) (ne10186)

DISPOSABLE WRIST STRAP

This disposable wrist strap is durable and can be reused. Ideal for field service technicians or visitors. This wrist strap can be shipped with loaded PC boards and other sensitive materials so that appropriate ESD precautions are taken by end-users. Provides an economical alternative when temporary ESD protection is needed. Equipped with alligator clip. Color: navy blue.

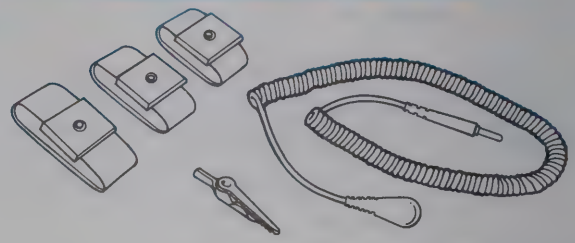
52N8351 Type 8404-0022-ASQ. **Each** **1.45**
(4611) (ne07394)

DISPOSABLE HEEL GROUNDER

Economical heel grounder is designed for temporary visitors to ESD control areas. Provides an effective contact to grounded floor surface. Lightweight strip clips to top of shoe and opposite end adheres to underside of shoe.

10N312 Type 8404-1082-ASQ. **Each** **0.52**
(18150) (ne10187)

FIXED SIZE WRIST STRAP SETS



Extra-wide, soft wrist bands have silver-impregnated nylon knitted on the inside for superior conductivity. No adjustments are necessary. Includes 1-megohm resistor for user safety. Set includes one blue wrist strap, one cord, and one alligator clip. UL listed. *Order fixed size wrist bands separately.*

(4624) (ne08395)

HEEL GROUNDERS

Comfortable fitting heel grounders use adjustable hook-and-loop system. 0.060″ thick, multilayered, rubber sole material. Non-marking inner layer is a neoprene, reinforced polyester mesh insert. Black outer layer provides highly conductive neoprene surface for superior grounding when in contact with conductive flooring materials . Reversible cup design allows heel ground to be worn on either foot. Charge decay is less than 0.01 seconds. One heel grounder on each foot is recommended for proper grounding. UL listed.

52N8360 Type 8404-0031-ASQ Includes 1 Megohm Resistor. **Each**..... **9.75**
52N8361 Type 8404-0032-ASQ Without Resistor. **Each** **9.75**
(4612) (ne07395)

ANTISTATIC TAPE

Prevents ESD damage to sensitive electronic components. Transparent polyester film with acrylic adhesive. Generates low levels of static charge even in extremely dry conditions. Width: ¾″. **Sold in rolls of 72 yards.**

52N8383 Type 8404-0054-ASQ. **Per Roll** **12.94**
(4625) (ne08396)

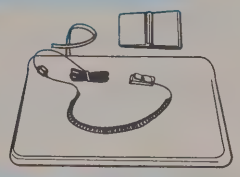
FIELD SERVICE KITS



MADE IN USA

POCKET FIELD SERVICE KIT

Kit is designed to be folded to fit into a shirt or pants pocket. Includes one ground clip, adjustable wrist strap, and ground cord. Mat is made of 18-mil red laminated vinyl. Size: 15 × 20″ (381 × 508). Surface resistivity: 10^8 - 10^9 ohms/sq. per ASTM-D257. Large grounding clip provides additional holding power. Made in the U.S.A.

52N8382 Type 8404-0053-ASQ. **Each** **46.53**

LARGE FIELD SERVICE KIT

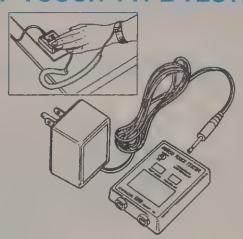
Kit is designed to comply with MIL-W-87893A, Type III. The adjustable elastic wrist strap has a 1-megohm resistor and is designed for use with the common print ground, which is also included. Mat is made of 18-mil red laminated vinyl with two 8 x 11″ storage pockets. Size: 22 x 24″ (558.8 x 609.6). Surface resistivity: 10^8 - 10^9 ohms/sq. per ASTM-D257. Large grounding clip provides additional holding power. Made in the U.S.A.

52N8381 Type 8404-0052-ASQ. **Each** **56.15**

(4613) (ne07396)

WRIST STRAP TOUCH-TYPE TESTER

NEW UL



MADE IN USA

Quick and easy installation; provides grounding and testing of two wrist straps and table mats. Effortlessly attaches to the workstation for testing. Range: 750k to10M ohms. Plugs into 120VAC outlet. UL listed. Made in the U.S.A.

84N2612 Type SPC4638. **Each** **64.99**

(33389) (ne33389)

COMBO WRIST STRAP/ FOOTWEAR TESTER

NEW

MADE IN USA

This static control tester is an easy-to-use, single-station fixture with both wrist and heel straps. A green light notifies user of "Passing" test range. Red LEDs along with an audible signal warn user of "Failing" test results. Tester has a nominal press range of 750k to 10M ohms for wrist straps and 750k to100M ohms for footwear. Uses either one 9-volt alkaline battery (included) or a special 120VAC adapter; *order separately below.* Made in the U.S.A.

Stock No.	Type	Description	Each
84N2613	SPC4639	Combo Tester	249.99
84N2614	SPC4640	120VAC Adapter	22.99

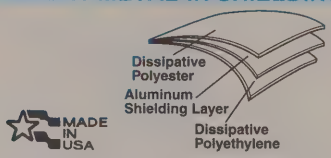
TRANSPARENT METAL-IN SHIELDING BAGS

NEW



MADE IN USA

Metal-in ESD shielding bags offer enhanced durability provided by the metallized layer buried between the polyester and polyethylene layers. This metal layer prevents the penetration of damaging electrostatic fields. Tribocharging is minimized by the specially processed polyethylene liner. Greater than 50% light transmission allows for easy identification of bag contents. Made in the U.S.A. **Sold in packages of 100.**

Stock No.	Type	Description	W x L	Per Pkg.
84N2616	SPC4642	Shielding Bag Metal-In 3 x 5″	3 x 5″	6.85

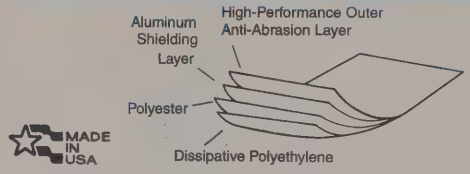
METAL-OUT TRANSPARENT SHIELDING BAGS



MADE IN USA

Metal-out shielding bags are designed to protect against static-induced damage. Feature conductive antiabrasive exterior. Better than 40% light transmission allows for easy identification of bag contents. Bags will dissipate a 5000V static charge to zero in less than 100 microseconds. Made in the U.S.A. **Sold in packages of 100.**

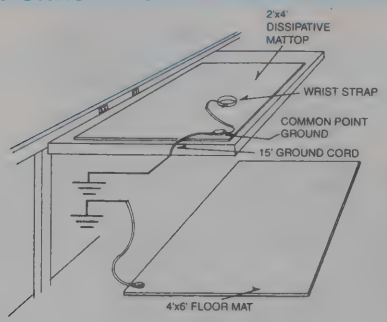
WORKSTATION GROUNDING KITS



Kit Includes:
- **2 x 4′ Mattop**
- **15′ Ground Cord**
- **4 x 6′ Floor Mat**
- **Common Point Ground**

Static control workstation grounding kits include everything needed to install an ESD-safe work area, protecting ESD-sensitive components. Vinyl mattop and floor mat consists of a highly effective 3-layer material. Durable top layer makes it ideally suited for use as an ESD-protective bench or floor mat. Highly conductive middle layer provides a superior discharge path to ground. A closed cell foamed dissipative bottom layer provides excellent protection against physical damage. RTT: 4.0 x 10^7 ohms per EOS/ESD-S4.1; RTG: 2.3 x 10^7 ohms per EOS/ESD-S4.1. Thickness: 0.100″ (2.5). Colors: beige, blue, brown, and gray. Grounding components and a premium wrist strap with 6′ coil cord are included. Floor mat is also available in conductive polyethylene for durability in high-traffic areas. Hard surface is ideal for heavy carts and chairs, and it resists acids and alkali solutions. Thickness: 0.060″. Color: black.

Stock No.	Type	Mat Color	Description	Each

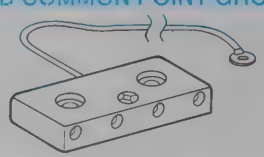
QUAD COMMON POINT GROUND



Dual-purpose common point ground features 4 banana plugs. Compact design does not get in the way when used under a workbench. Two mounting holes allow the unit to be permanently installed at a workbench. Unit includes a 10mm snap stud to snap directly to the mat and 10′ of ground wire terminated with a ring terminal. No resistor.

52N8384 Type 8404-0055-ASQ. **Each** **18.58**
(4619) (ne07402)

COMMON POINT GROUND FOR BENCH MATS AND WRIST STRAPS

Common point ground for 10mm mats with 10mm socket. 15′ of wire, terminated with a #10 (0.200″) ring terminal. An extra ring terminal is provided for custom installation.

52N8385 Type 8404-0056-ASQ. **Each** **16.51**
(4618) (ne07401)

STATIC-DISSIPATIVE HAND LOTION

Blue static-dissipative lotion is enriched with aloe vera and vitamins A, D, and E. Natural moisturizers help achieve healthier, softer, younger looking hands and nails. This non-acidic lotion relieves chapping, skin flaking, irritation, and skin sensitivity problems caused by regular use of latex gloves and finger cots. Non-petroleum, non-contaminating, greaseless formula contains no glycerin, mineral oil, silicones, or lanolin and absorbs immediately into the skin without interfering with grip or dexterity.

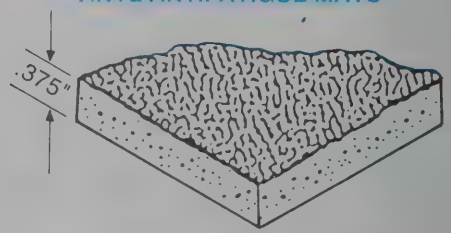
(12947) (ne09915)

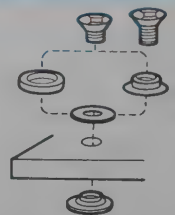
VINYL ANTIFATIGUE MATS



Foamed, soft antifatigue floor mat is designed to reduce fatigue or to use where cushioning is required. This material will not lose electrical properties due to wear and aging for up to ten years. Beveled edges add safety. The material should be grounded at approximately 6′ intervals. Use with **type 8404-0057-ASQ** universal snap kit; *ordered separately on this page.* RTT: 2.5 x 10^9 ohms per EOS/ESD-S4.1; RTG: 4.6 x 10^9 ohms per EOS/ESD-S4.1. Size: 36 x 48″. Thickness: 0.375″ (9.5). Color: brown.

52N8370 Type 8404-0041-ASQ. **Each** **113.80**
(4617) (ne07400)

UNIVERSAL SNAP KIT

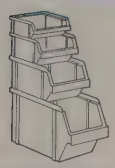


Kit includes a 10mm stud, 10mm socket, threaded backing washer, long screw, and short screw. Everything needed to field install a stud or socket on all soft materials. Just punch a hole through the mat and screw on the socket or stud, whichever is preferred. All that is needed is a Phillips screwdriver. Recommended for homogeneous material.

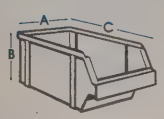
52N8386 Type 8404-0057-ASQ. **Each** **3.00**
(4620) (ne07403)

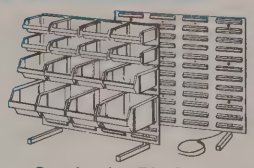
STATIC CONTROL STORAGE SYSTEMS

CONDUCTIVE STACKABLE STORAGE BINS



Stacking Bins





Conductive Bin Stand

Stackable, conductive storage bins are designed for static-sensitive components. Hi-impact carbon-filled plastic meets MIL-B-81 specifications. **Type DSC3209C** conductive bin stand can be ordered separately or as part of **type FSC3200C** storage system. Color: black.

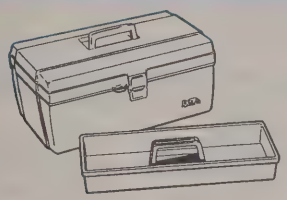
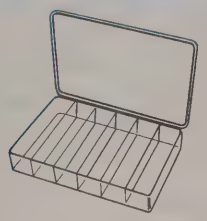
CONDUCTIVE UTILITY STORAGE BOXES



Utility tool box transports and stores small static-sensitive tools, equipment, and components. Constructed of black, break-resistant, carbon-filled, conductive, copolymer materials. Features positive-action latch, padlock tab, recessed handle, and lift-out tray with handle. Size: 5.25H x 14.50W x 7.50″D.

84N1452 Type TC-320-2C. **Each** **29.99**
(18227) (ne10190)

MULTICOMPARTMENT CONDUCTIVE UTILITY BOXES



- **Choose from a Variety of Compartment Configurations**

Rugged utility boxes are ideal for organizing hardware, precision parts, electronic components, and medical or lab supplies. Hinged overlapping lid fastens securely. Constructed of conductive carbon-filled plastic for static-sensitive parts.

Stock No.	Type	Compartments	H x W x D	1-9	10-24

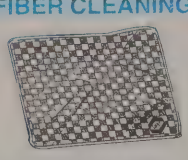
(18226) (ne10189)

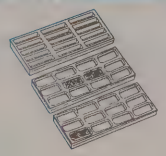
MICRO-FIBER CLEANING CLOTH



Micro-fiber cloth is ideal for cleaning computer monitor screens, copier glass, TV screens, eyeglasses, and lenses of all kinds. 50/50 polyester/nylon cloth is made up of super-fine, high-density lint-free fibers that lift dirt, fingerprints, oil, and water from delicate surfaces without scratching, streaking, or smearing. It is washable and can be reused thousands of times. Cloth contains no chemicals and does not require chemicals for use. Size: 7⅞″ square.

92N4432 Type 2943. **Each** **7.24**
(18042) (ne10180)

STATIC-DISSIPATIVE SMALL PARTS TRAYS



Static-dissipative parts trays are perfect for storage of small parts, fasteners, etc. These trays offer a wide variety of cavity sizes and compartment sizes. All tray sizes: 14⅜ L x 6⅝″ W.

Stock No.	Type	Tray Height	Compartments No.	Length	Width	Each

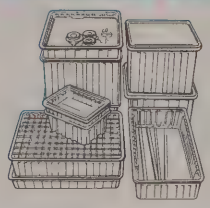
(18043) (ne10181)

STATIC-DISSIPATIVE STACKABLE MODULAR TOTE BOXES



Static-dissipative tote boxes are vacuum formed from sheets of high-density polyethylene. Vacuum forming produces a stress-free container with maximum resistance to cracking. These containers are impervious to oils, most chemicals, rot, solvents, and temperature extremes. Totes stack with or without lids so they do not rest on the storage contents. Divider grooves on 1¼″ centers allow for the formation of 1⅛ x 1⅛″ compartments or multiples thereof. *Order lids, dividers, and standard card holders separately below.*

MODULAR TOTE BOXES

Stock No.	Type	Outside Dimensions L	W	H	Inside Dimensions L	W	Each

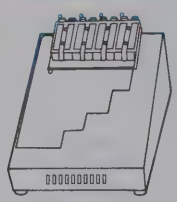
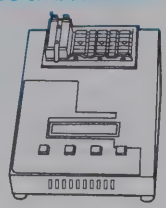
PROM/PAL PROGRAMMERS

HUSKY-LC PC-BASED AND SHOOTER-LC STAND-ALONE EPROM/FLASH PROGRAMMERS

NEW



Husky



Shooter

- **Program EPROMs to 8MB**
- **Program 32-Pin DIP Devices**
- **Program 1 or 4 Devices**
- **Windows 3.1/95/NT Software**
- **RS-232 Serial Port**
- **Automatic Label Printing**

Program and verify 32-pin EPROMs and flash memory from 1MB to 4MB. Devices program 1 or 4 devices. Windows-based software. Updates available via the internet. Compatible with Xlink software.

HUSKY-LC PC-BASED PROGRAMMERS

Stock No.	Type	Description	Each

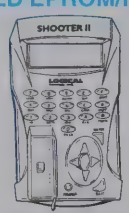
SHOOTER II HANDHELD EPROM/FLASH PROGRAMMER

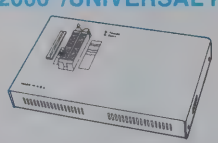


PROSTR-002

Type PROSTR-002 Shooter II is a 1 lb. EPROM/Flash Programmer. Device support: EPROMs, EEPROMs, FLASH, CMOS PROMS, Serial to 8 Mbit Dip packages in 8, 24, 28, and 32 pins with 0.3″ and 0.6 pitch; PLCC, SOIC, and TSOP adapters available. Fully updateable internal device library in non-volatile FLASH memory. Menu-driven device selection uses full manufacturer electronic ID to verify that the correct device is in the socket. Devices checks include connect test, reverse/faulty part test, bit check, empty check, verify, and marginal verify. 8, 16, and 32 bit modes automatically handled by "Interlace 2" method of splitting and shuffling data without the intervention of the user. AC or portable battery powered. 1Mbit standard, upgradeable to 8Mbit.

01F318 Type PROSTR-002. **Each** **755.30**
(13131) (ne09872)

CHIPMASTER 2000®/UNIVERSAL PROGRAMMER



Work station with 48-pin universal DIP socket, PC parallel port interface. Software driven PC-based programmer. No adaptor needed for DIP devices. Supports over 1000 devices, EPROM's, FLASH, PLD, Bipoplar PROM, GAL, MACH, Micros, all on the same socket.

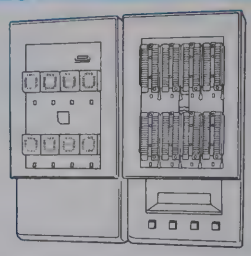
66F1964 Type PROCM2-000 PC-Based **Each** **1081.32**
(4555) (de51485)

PALMERASE® EPROM ERASER

Ideal for field service and engineering applications where space and portability are important. Erases in less than five minutes. Tray holds a single 24-, 28- or 40-pin EPROM. 4Lx2Wx2H″ (101.6x50.8x50.8).

89F600 Type ERAPME-000. **Each** **65.15**
(4557) (de51487)

XPRO-1 SERIES EPROM/MICRO PROGRAMMERS



The **XPRO-1 series** can program eight EPROMs simultaneously. Include DOS or Windows PC-updatable software, internal backup RAM for storage, 1 Megabit of upgradable internal memory, front panel LCD and display for stand-alone operation, and a high-speed serial port. The **XPRO system** consists of a base unit with interchangeable socket head (modules), *which can be ordered separately below for device-specific applications.* Also available are "pre-configured" systems (base unit including a particular head). *Contact your local Newark sales office for additional base units, modules, and pre-configured systems.*

XPRO SERIES BASE UNITS

Stock No.	Type	Description	Each
92F4475	PROXP1-104	4 Meg. RAM	1081.32

XPRO SERIES MODULES

92F4479	MODXP1-GD32	Gang 32-Pin DIP EPROM, (8)*	646.62

PRE-CONFIGURED XPRO SERIES SYSTEMS

92F5917	PROXPR-GD4	PROXP1-104, MODXP1-GD32	1624.70

*Number in parentheses indicates the number of sockets on the module.

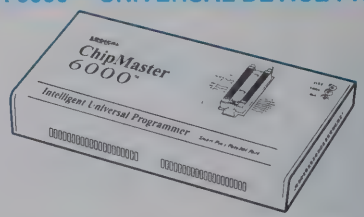
CHIPMASTER 6000™ UNIVERSAL DEVICE PROGRAMMER



Type PROCM6-000 universal device programmer with true 48-pin universal DIP sockets. Windows and PC interface. Printer port PC interface with auto-switch power. Includes universal 44-pin PLCC socket adaptor. Includes CUPL PLD design software starter kit. Device insertion and pin contact check. Auto device sense and self programming (mass production mode). Fast programming times: 13 seconds for 1 Meg EPROM; 8 seconds for 1 Meg FLASH. Supports 3.3V devices in VCC and logic level. Current limit/over current shut down on all pins. Universal adapters for PLCC, TSOP, PSOP QFP, SOIC packages. Auto-ID detection and search on EPROM/FLASH. Auto-increment function for memory devices. Optional ROM emulation. Fast device selection operations. Full-screen editor with search/fill functions. Statistics function. Project file save/load. Auto file format detection and conversion. TTL and user-definable digital IC tester. User-changeable programming parameters. Context-sensitive on-line help. *3-year warranty.*

01F319 Type PROCM6-000. **Each** **1624.70**
